The TIME of ROSES
Community and the colleges are with us. Cupid, too, is celebrating the sesquicentennial of his her own work. Seniors are turning from a life of theory to a life of practice. Alma Mater is returning to the heritage of their college days. There is happiness in the faces of our students and something refreshing about the campus as time has completed the cycle of another fall of roses.

In passing we do not urge policies. We have but one policy—a greater Alma Mater. We have harped on the idea of a greater university in the interest of the University on the part of the alumni. We are not always quite so certain of the student's ideals. We are for the benefit of the student. It is a common bond of fellowship between them and the other thousands of things for the student. There is a general agreement of alma mater for the care of life.

Eighteen are students in the infan-

army, who have been on duty with
the R. O. T. C. at various schools
during the winter. The nature of the
training at this camp will be such as
to qualify the men for a reserve
commission after they have completed
the remainder of their course.

Thirty-eight students in the motor tran-

CRIPPLED CHILDREN TO HAVE AUGUST VACATION

Crippled children at the University Hospital will have a vacation during August. During the summer months, with the exception of August, the children will go to school only in the morning.

Teaching will be entirely through volunteer services and from those weekdays, for credit, with the exception of Miss Wilson, who will remain through the summer to supervise classes. During the past school year the staff has been composed of three paid teachers, approximately eighteen working for credit, and forty-six volunteers. In view of the fact that comparatively few students are in normal school the work will be considerably lessened, but it is hoped that the same sort of excellent results can be accomplished.

Miss Freaser will continue to be in charge of the work next year.
