FOOTBALL, TRACK AND BASKETBALL COURSES GET BIG ENROLLMENT

Enrollments in the special summer school men's physical training courses have reached a high level and in all of the courses more registrations are expected. Special summer school sessions are offered in football, basketball, baseball, swimming, and track and work. Student swimming and tennis, though not offered as special courses, have attracted a large number of students.

Many school superintendents, high school coaches, and college educators have taken advantage of the special summer school sessions. The courses offered in football, track, basketball, baseball, swimming, and track and work, have registered for the courses and are expected to complete the entire course this year.

The football program is under the charge of the football classes, says: Mr. Knott, who is in charge of the football classes, says that the team will become much better.

BETTER CITIZENSHIP

There is something of particular interest, considering the movement that is sweeping over the country, in the fact that the University has added for the first time with the 1920 summer session, a number of courses in American Citizenship. It is an admitted fact that the schools and colleges must be able to provide for a great deal more of the interest in American education and better citizenship than we are now giving in the next twenty or thirty years. Emerson Hall, distinguishes this in a short talk during his recent visit to the University, pleaded for a greater and better understanding of the duties of citizenship; everybody in the country, he declared, can do something to help the colleges to instill the idea of a more useful citizenship in the next generation.

In an editorial entitled, "Universities and the American Christian Science Member says this: "Experiences of racial and economic antagonism which are the basis of the public's lack of sympathy are so great a number of them are ready to believe that the decades now immediate-ly ahead are likely to test the efficacy of the American idea of government as it has never been tested before, and both within and without the walls of American universities there has been, of late, a growing belief that instead of being to do a work of moral and intellectual improvement, the university will have to assume a greater and more direct responsibility for the development of the race than they have heretofore undertaken."

The University has added eighteen new courses in American Institutions and Ideals, in the formative and developing aspects of the world, even in the formative and developing aspects of the world, even THREE'S NOT A
CROWD WHEN ONE'S A
Kodak

There's such a thing as living a Mid
River trip over again if you take a
Kodak with you. You then have a
picture story to show your friends, of
breakfast at the spring, of carrying
the canoe around the dam, of the
beautiful scenery—it's half the fun.

We can help you in a selection of a
Kodak or Brownie.
