contribution: Signs are posted on the factory, where two companies manufacture various other products. The factory is noted for its efficiency and the high standards of its workers.

The excursion will be in charge of Mr. Dill, the supervisor of the Children's hospital. The party is made up of Ernest Brown, the president of the college; Mrs. Mahan, the superintendent of the Sunday school; Mrs. Wood, the director of the University; and Mrs. Brown, the principal of the university.

The excursion will leave at 7 o'clock on the morning of the 4th of July. Those who wish to make this trip may notify Etta Mahan, who will direct the arrangements. The excursion is planned for the entertainment of the students and faculty of the university, as well as the public.

The excursion will be a day of rest and relaxation. The students and faculty will have the opportunity to enjoy the beauty of the countryside and to spend time with their friends and family. The excursion will be a memorable experience for all those who participate.

The excursion will be a valuable opportunity for the students and faculty of the university to meet and interact with each other. It will also be a chance for them to relax and enjoy the beauty of the countryside.

FIFTY-FOUR IOWA CITY PEOPLE NAMED IN 1920-21 WHO'S WHO

Iowa City is giving Des Moines a close race as the “Who’s Who” city of the state. Two years ago “Who’s Who in America” showed Des Moines leading with 42 to Iowa City’s 36 in the residence of famous men and women whose biographies are contained in that book. The Daily Iowan just issued shows Des Moines with only slightly inferior results as the “Who’s Whom” while Iowa City has jumped to 49.

University of Iowa authorities are pleased with the showing, as it indicates that members of the University faculty are becoming better known throughout the country each year. The faculty members who are added to the faculty from time to time are men who stand high in their subjects. Among the University of Iowa faculty members whose names are in the current “Who’s Whom” are the following:

Henry Albert, professor of pathology and bacteriology; Herbert T. Baldwin, director of the child welfare research stations; Walter F. Brownell, professor of law; F. T. Brown, dean of the college of dentistry; Stephen H. Buck, professor of romance languages; Philip G. Crump, director of the school of music; Harold Craig, professor of English; Lee W. Davis, dean of the college of medicine; Forest C. Enge, professor of education; Arthur F. Earnest, professor of medical science; Charles H. Eberhart, professor of law; Ernest Harris, professor of education; Gilbert L. House, professor of animal biology; Campbell J. Howard, professor of the theory and practice of medicine; Walter A. Howse, president of the University; George F. Kay, dean of the college of liberal arts; Irving King, assistant professor of education; Orie E. Klingman, director of the extension division; Thomas M. MacMillan, president emeritus of the University; Dudley O. McGeorge, dean of the college of law; Charles C. Nutting, professor of zoology; George T. W. Patrick, professor of philosophy; Edwin F. Piper, associate professor of English; Harry G. Platt, professor of history; Henry J. Prestera, professor of anatomy, biology, and embryology; William G. Reynold, dean of the college of applied science; Henry L. Rice, professor of mathematics; Elbert W. Woodcock, professor of chemistry; Charles J. Rowan, professor of surgery; William F. Russell, dean of the college of education; Carl E. Sashbury, dean of the graduate college; Benjamin F. Stambaugh, professor of political science; Solomon Stinchcomb, professor of botany; Edwin D. Starke, professor of philosophy; Arthur Steinmiller, professor of orthopedic surgery; George W. Stewart, professor of physics; William J. Tertscher, professor of Romance languages; Ethel N. S. Thompson, associate professor of English; Berthold C. Ulmann, professor of Latin; Clarence Van Essy, professor of psychology; Ruth A. Wardall, professor of chemistry; Arthur H. Williams, professor of the history of art and Greek; William E. Whitten, professor of gynecology and obstetrics; Henry E. Wickham, professor of entomology; Elmer E. Wilson, professor of Greek; Charles Rugby Wilson, professor of German; Sherman M. Woodward, professor of mechanics and hydraulics.

The recent real estate boom is beginning to convince even hardened speculators that the author of this summer session column knew what he was talking about when he delineated the advantages of Iowa City as a vacation resort.

We can bake all the bread in Iowa City, but we do bake all the bread.
SLIDES ILLUSTRATE NUTTING'S LECTURE

Harbord-Antique Expedition is Subject of Lecture This Morning

"The Harbord-Antique expedition" will be the subject of a public lecture by Prof. C. C. Nutting in the liberal arts building this morning. Nautical maps illustrating various aspects of the trip will be shown in color to the audience, and interested students of the nautical sciences will be present.

The lecture will begin at 10:30 and will last until noon.

SWAMP GROUP IS ALMOST COMPLETE

Formal Opening Will Probably be at Home-Coming This Fall in Red Rod, N. K.

The Louisiana Swamp group, which forms one of the most interesting exhibits of the biological building, is now ready for the opening of the season. The group consists of four small swamp areas, each containing a different type of vegetation. The swamp areas are divided into sections, each containing a variety of plants and animals.

The Louisiana Swamp group is open to the public during the week of Home-Coming, and the formal opening will probably take place on Friday, Oct. 11.

DENTAL REGISTRATION IS LIMITED THIS FALL
BY VOCATIONAL TESTS

Marke First Limiting of Registration
and Use of Vocational Tests in History of University

Tests are set for July 17

Registration in Dentistry 1st for Last Year-Jean City, Iowa City, and
Des Moines. Determined as Points. Where Tests are to be Held—Applications Already Filed

Vocational tests for the admission to the dental course limiting the freshmen class of 1920-21 to 125 candidates will mark the first limitation of registration and the first application of vocational tests as entrance requirements in the history of the University.

The recent adoption for the limitation of dentistry registration results in the limited capacity for instructing advanced classes in two purposes: namely, to select the best qualified and to give those those who are vocationally fitted to choose dentistry as a profession, said Prof. H. D. Deaver, University registrar, yesterday.

1st Registered in Dentistry
Last year 181 people were registered in the college of dentistry, leaving at the end of the year, 164, the probable number that will return for advanced work in September. With only 125 places in the dental college, much crowding will result in advanced classes and prevent each student from receiving the best possible instruction of the clinical training and use of individual equipment.

The only possible cure for the congestion is the limitation of freshmen registration next fall. According to modern psychological idea limitation by vocational fitness is the only just method to employ when the fall interest of both the individual and the University is considered.

By Cash Charge
Professors Carl E. Scheubner, head of the department of physiology; and John A. Lawrence, laboratory instructor, have worked out and are in charge of the tests. The vocational tests are planned for the purpose of judging the natural capacity of the candidate for achievement in the fundamental sciences required in dentistry and dental technology. The tests require no preparation.

For the convenience of those applying for the vocational test, examination places that isn't exactly available will be held at the University at 9:00 a.m., Saturday, July 17, at the Hall of Liberal Arts, Iowa City, Iowa, at the West High School, Des Moines, Iowa, and at the High School, Tour City, Iowa.

Tests Required to Study

The regular dentistry course as it now exists covers four years. Beginning with the fall of 1921 one year preparation course in the college of liberal arts will be required, with four years in the college of dentistry, making a term of five years required for the completion of the entire course.

Two years from now Iowa City will be the "Who's Who" center of Iowa if Des Moines does not watch out.

at this unusually low price.

Tricottees, Georgettes, Marquisettes, Paulettes, and Satins are fashioned into the most colorful styles one could wish. All of the newest styles are included.

Remember that these Blouses are very specially priced and will not last long.

We close at 5 o'clock, Saturday expected.

"The Home Touch"

There's a certain air about some few eating places that isn't exactly easy to define. However, we sum it up in the term "the home touch."

It's made up partly of that "just right" combination of all dishes, partly of the variety from day to day, and again by a superior service including a properly filled office of host.

If you eat at Reid's you know that this is so.

Intend that you there will discover those things upon your first visit.
