THE IOWA CITY BANK

IOWA CITY, IOWA

Thursday, July 12, 1920

LET US DO YOUR BOOKKEEPING

Why worry about it yourself? Let us worry.

Depost all you receive in the bank and pay all your bills by check. When your monthly statement is sent you tell us when called checks were received, you know exactly what you have done with your money.

There is no question about the data or amount paid; for the check shows clearly in black and white the complete transaction.

CARS WASHED

Any Make. First Class Job or Your Money Back

PRICE $2.00

Burkett-Gartner Motor Co.

BREAD THAT IT IS A PLEASURE TO EAT

Have you ever tasted soft, fluffy, fresh bread that made you call for more and more? It just made the whole meal a success, didn't it?

That is the kind you get at the QUAKER BAKERY

We make white, Graham, bran, raisin, rye, and sandwich bread.

Try our delicious cakes, cookies, sweet rolls, coffee cakes, and doughnuts.

Quaker System of Bakeries

110 E. College St.

We can't bake all the bread in Iowa City, but we do bake the best.
SOCIETY

Clark-Keed
Salena Elizaphyl Clark, law '38, Pita of Marion, Iowa, married Saturday, July 31, to A. John Reo, vice president and general counsel of the Iowa Railway Supply company of Cedar Rapids.

Miss Clark was one of three women to graduate from the college of law this spring, and successfully passed the state bar examination, which is in-aid.

The wedding will take place at the bride’s home in Marion.
Mr. and Mrs. Reo will make their home in Cedar Rapids.

Collins-Fryer
Elie Collins, daughter of Mr. and Mrs. D. E. Collins of Fairfield, and Latest Maurice Fryer, also of Fairfield, were married yesterday at the Baptist chapel in Fairfield.

Miss Collins attended the University of Iowa in 1929 and was a member of Delta Gamma sorority. Mr. Fryer, a member of Delta Tau Delta, graduated at the University of Michigan. Delta Gamma sorority sisters of the bride were: Katharine Turner, maid of honor; Louise Mays, of Fairfield, and Marion Baxter of Red Oak. Mr. Fryer was attended by C. F. Turney, Jr., of Des Moines; J. B. Ashby of Orangeville, N. H., and G. D. Dender of Humbolt.

Alberta Yazzi, 21, Gamma Phi Beta, is spending a few days in Iowa City.
Helen Peterson, 21, and Mary HolDegrund, 20, of Rochester are visiting at the Alpha Delta Phi house this week.

Robert Hayes, a junior in the college of liberal arts, returned home Tuesday evening after completing a month’s work at La Crosse, Wis.

The Philosophical club will meet with Dr. and Mrs. Carl E. Schaefer, Hill St. Line St., Friday evening of this week. The program will consist of a symposium on psychology. All who have been at any time affiliated with the club have been asked to attend.

FIVE ARE INITIATED
IN PHI DELTA KAPPA
Phi Delta Kappa, collegiate chapter, hereby, initiates at Rechard’s pavilion at the city park, Tuesday evening. The initiation was presented by a banquet. About thirty members were present.

The five men who were initiated are as follows: J. Roy Brehm, St. James, Minn.; E. W. Faz donor, Centerville; J. B. Revenous, Ottowa; E. E. Mees- se, Desmair; and E. G. Blackmore, Des Moines.

SUFTING WILL TALK
ON NAPLES STATION
(Continued from page 3) of the University of Naples at the station at Naples. This is the most notable marine zoological station in the world, and probably none that has been done here in the studying of marine animals that elsewhere.

The lecture is for everybody, and while it will appeal as especially interesting to the student marine, especially the marine features of it, it will prove all popular interest not only because of the diversified program, but also of the city of Naples. The reviewer will recall the excursion taken over the city of Naples; the congestion of people, so there are more people on one street in Naples than elsewhere in Europe, he declares.

“STARRY STUFF” OFFERED; MOON AND PLANETS MAY BE SEEN

By Horatio Merry

A look at the planet Mars and the surrounding region of the moon is scheduled for the latest offering of the University to student sight-seers. Through the courtesy of John W. Campbell, associate in the department of mathematics, the Daily Iowan has arranged to have the observatory at the rear of the University high school open Friday evening at 8:30 o’clock provided the weather is clear.

The observatory is equipped with a five inch telescope, which is large enough to show some interesting aspects of the heavens. The moon which shows only a crescent at present is in an especially good position, Mr. Campbell said. The full moon reflects so much light that it has a dazzling effect.

Mars, the next planet beyond the sun, is favorably situated, although its best position was in March. Several double stars and the star cluster in Hercules are also well located for observation. The other two planets now in the evening sky, Saturn and Jupiter, are too far down on the horizon to be seen by the telescope, in its present position.

Of the first magnitude stars, Spica, near Mars, Arcturus, nearly overhead in the evening sky, Vega, high in the evening sky, Deneb and Altair in the morning sky, Alpha and Beta Lyrae are the most attractive. Three of the first six magnitudes only are visible with the naked eye. Others require the telescope or field glasses. Planets present a disc with some detail in the atmosphere, but all stars show only a point of light to the strongest telescope.

The largest telescopes at present are the one hundred inch reflector at Mt. Wilson, California, and in the reflector class the forty inch instrument at the Yerkes Observatory at Williams Bay, Wisconsin. It is not probable that much longer lenses than these can be made, according to Mr. Campbell. In a larger reflecting it is supported as it is by the rim, its weight alone would cause it to sag and distort the image. In a reflector it would be extremely difficult to get a larger lens true and keep it that way. Even small variations of temperature affect large glasses materiality.

Clear air is an essential for the best observations. That is why so many of the best observatories are located on mountains.

The University offers a course in general astronomy during the regular session, taught by Mr. Campbell.

In the library is a good collection of books on the subject, of interest to the general reader. Among them are: F. R. Moulton’s ‘Introduction to Astronomy;’ ‘Astronomy Without a Telescope,’ by E. W. Harper. ‘The Book of Stars,’ by A. F. Collins. ‘Astronomy With an Open Glass,’ by G. F. Sevitt; and ‘Worlds in the Making’ by Dante Alighieri.

WORK FOR MEMORIAL UNION CONTINUES THROUGH STATE

Work for the Iowa Memorial Union is progressing steadily, according to Prof. C. H. Walker, acting campus director, and the field workers are now out in the state.

D. E. Bemis is at work in Jefferson county with headquarters at Fairfield.

Miss Ruth Rogers has just begun a new campaign, this time in a group of counties in the northeastern part of the state. She will visit Worth, Mitchell, Howard, Cerro Gordo, Floyd, and Chickasaw counties. Hugh Speck and Master of Men is the chairman of the district.

PASTIME Theatre

The STRAND is 23 DEGREES COOLER THAN THE STREET

“The Shop with the Campus Spirit”
OAKDALE EXCURSION IS GREATLY ENJOYED BY SUMMER STUDENTS

An excursion to Oakdale through the main hospital, the various cottages, the kitchen and the town with the inclusion of the study of the out-patient apparatus used for the patients, connects the interesting people of the excursion to the state sanitary for the tabular summary for the last quarter as per above.

The excursion of thirty-one students under the direction of Prof. Jefferson left Oakdale on the 5th o'clock excursion and returned at 5.

Those who went to Oakdale are:
- Carolyn Kemman
- Mary Combs
- Henry Louis
- Glick, Pearl Cruise
- Helen Brown

This excursion will be of especial interest to school superintendents in the various counties.

IMPROVEMENTS ARE MADE ON ATHLETIC FIELD

(Continued from page 1)

The first pitch of the ball need not be in the same section as that of the old diamond. The distance of the base should be decided by the height of the river will not exceed the athletic field.

Football Field in Good Shape

The football field now has a fine thick sod. "It is in the best condition that it has ever been," said the Coach Jones.

In the fall season, the water has little effect on the football field.

The current conditions which are being built on the north side will, according to Prof. R. J. Trumbull, who is in the main field, the improvements will probably be extended next summer to include the east and the south ends of the farm. Then the baseball ground will probably be erected. However, it will be in use for the present season. There is a possibility that the wooden seats at the south end of the field and the stands will be able to afford better accommodations when those are needed for the big game.
