Indian States Touchdown

Friday--Rose in Belding

Saturday--Middleton

INDIANA

Indiana--Bloomington, Indiana, Oct. 5--(AP) -- Running an irresistible offensive in the first half and an unassailable defense in the second, Iowa thundered through the Hoosier line for two touchdowns and a field goal, and left them a comfortable load and enabled us to win from their opponents a 27-0 victory here today.

Iowa's first touchdown was made for the plain and simple quarter when A. Devine missed over from the one yard line.

A. Devine holding the ball gave the Hawkeyes their second touchdown, when a 27-yard pass from Williams to MacKay gave the Hoosiers their touchdowns only three minutes before the game ended.

BELLO

In the quiet little town of the Silo.

One wall one wall along the main street, bordered with blue signs and overlooking with Spanish seas, down a generous strip of green grass and a pasture.

The well-maintained northern lawn, or rather the fact that it is well-maintained, it feels rather odd to be greeted with a "Good Morning" from someone when you're never when you're never more than a few feet.

And, by the way, it is always "Good Morning" from someone when you're never when you're never more than a few feet.

The sight of a new policy will be taken their chance along with those who pay regular admission. MILITARY TRAINING

Illinois and Chicago, will be played. An officer cannot be ther.

The day was benign, and the day was benign, and the day was benign, and the day was benign for the young officers. And it was as if a little droiggery in our lives was.

A Study in Distillation

"Harlequin Cante" has been running a week. It isn't realhig to win.

Words of ears can properly express the sensation we experienced when we entered a club that was worn-out, washed, and frayed. We turned.

The leaves in myriads down.

If you feel a different man.

Modern Motive Might

MOUNTAINS, miles and minutes give way before electricity, the magical motive power. Property applied, it drives giant locomotives across the continental divide, toss ocean liners through the Panama Canal, or propels huge ships.

Through good light, safe signals, and illuminated highways, it is making travel better and safer and also is increasing the usefulness of transportation methods on land, sea or in the air.

In short, electricity is revolutionizing transportation, making it quicker, safer, more economical and reliable in all sorts of weather.

And back of this development in electric transportation, in generating and transmitting apparatus as well as motive mechanisms, are the co-ordinated scientific, engineering and manufacturing resources of the General Electric Company, working to the end that electricity may better serve mankind.

COMMISSION, TRIP, AND HARD MONEY OFFERED BY R. O. T. C.

Requirements and provisions of the R. O. T. C. course in the University, are made clear in a statement from Lieut.-Col. Morton C. Mumma, commandant of the Reserve Corps in the University, who will be called to active service in national emergency. Following the completion of the two year basic course an opportunity is given to those who have chosen special military science, and to attendance WIthout cost, pays the student's tuition.

The Reserve Officers Training Corps is designed to furnish officers for the Reserve Corps who will be called to active service in national emergency. Following the completion of the two year basic course an opportunity is given to those who have chosen special military science, and to attendance at the University, pays the student's tuition.

There are established at Iowa City, faculty, and motor transport units leading to commissions in those branches.

SCHROEDER WILL ADD TO CLASSES

Will Organize Advanced Classes Next Week Under the United States Marine Corps.

Beginning this week the class will meet at 4 o'clock Wednesday.

Several new and advanced classes in physical training will be organized within the next two weeks. E. H. Doering, director of physical training announced several new classes.

A leaders' class in the advanced course will be organized for two academic years, five hours a week, to military science, and to attend training camp six weeks during the year.

In return for this service the United States provides uniform and equipment without cost, pays the student's expenses to and from camp, pays him a day wage while at camp and fifty-three cents a day from date of enrollment until graduation, or a total of two calendar years.

Thus, a student enrolling October 1 will be entitled to thirty-three cents a day until May 31, 1928, plus $1.50 a day for his six weeks' camp. He is not, however, paid the thirty-three cents during camp, but instead is furnished with meals. The total sum in cash which accrues to an advanced course student is about $25. Payments are made quarterly.

If an advanced student leaves the University he is entitled to his uniform, but is required, if he is to change another institution, to turn in his uniform and equipment. The University awards to advanced students of the college of liberal arts two hours credit for each semester of completed work, at a total of eight hours credit of the 120 required for the degree. Three two hour hours must be earned in the total for which students may be required.

Applications for enrollment in the advanced course should be made to Lieut.-Col. Morton C. Mumma, commandant, or his office in the gymnasium.

BE THREE WORSE THAN CUPS

We wonder why the freshmen girls play so many. Why all their week nights are spent in the library? The new ruling, "No dates or week nights until graduation," seems to have run its course at the University. Formerly the social life of the university was cut off their feet. It was a great life—what withEssex, co-eds, flowers, freshness. Therefore, the ruling. With tears in their eyes, they now reply to the late ruling myrtles, "You see we can't date during the week, but perhaps five weeks from this coming Saturday.""Good night."'
