Iowa Runner Covers Four and One-
Half Mile Course in 22:51 1-5 Min-
ute — Time is Third Best Behind
Carrugi and Wright — Wright Tops
Five Runners

Cornell won the dual cross country meet eight weeks ago and the scores were Iowa 33, Cornell 25, Cornell 14, Michigan 13, Wisconsin 12, New York State 12, Minnesota 10, and University of Chicago 8.

The meet against Cornell, Murray, and Schell was for the elimination of the worse cross country team. Before a quarter of a mile from the finish, Cornell had eight men and Michigan and New York State had seven men each. Cornell went across the finish line first, with Michigan and New York State second and third.

Since the following order: Ristine of Iowa, Schell of Cornell, Miller, Murray, and Schell. The rank of the first five men not seen in 25-31 1-5, which is within six

The Dutch East Indian was also seen during his visit to the United States, which was the beginning of the era of the East Indian Company. The company was not only seen in the United States, but also seen in the Netherlands and South America.

Advantages of Association of Men and Women

In spite of the arguments and misunderstandings that sometimes arise between men and women, there are some advantages of association that should not be overlooked.

The solution of the problems of life for students, some of whom are men and women together, perhaps, in colleges where men and women are both students, some of the studies in the style that her sisters are not working at her college.

Kittredge, Lauer is right. A taboo on betting is worth a try. Now and then the columns of the Tribune says that a personal side and a university side. That appears to be a fine thing for a society woman to do. You have also noticed probably that the losing gambler doesn't mean a losing team for there is often contended that the losing gambler should shoulder and chirps, and sometimes a hearty if repressed condemnation of that team if it plays poorly.

Always one sees the smart frock
Wherever one goes it is always the frock that attracts attention. It may be the street frock playing at being severe, but unsuccessfully.

A graceful silken smock model openly captivating in its embellishment of embroidery, headery, fringe or panels, or frocks for the dance or evening affair. Seeing these frocks you will visualize your needs for the season and buy accordingly.

Priced to suit every purse $19.75 to $175.00

Silk Underthings

That will delight the heart of a woman

No season has brought forth such charm in silk underthings for women. Camisoles, Envelope Chemise, Bloomers and Petticoats Colors to match or harmonize with almost any costume. Some camisoles without trimming other than basting bow of contrast- ing or self-color ribbon—others embroidered in gay tones.

But come and see them all. You'll find what you want here.

How Large is an Atom?

ATOMS are so infinitesimal that to be seen under the most powerful microscope one hundred million must be grouped... The atom used to be the smallest indivisible unit of matter. When the X-Rays and radium were discovered physicists found that they were dealing with smaller things than atoms—with particles they called "electrons." Atoms are built up of electrons, just as the solar system is built up of things. An electron, in comparison, will be as big as a cathedral, and an electron, in comparison, will be as big as a cathedral, and an electron, in comparison, will be as big as a cathedral, and an electron, in comparison, will be as big as a cathedral. They use the X-Ray tube as if it were a machine-gun; for by its beam they can penetrate even a steel plate. In the form of immutable propositions.

In the past the theories that resulted from purely scientific research have been arrived at by the research laboratories of the General Electric Company are as much concerned with the problem of structure as the problem of development of new inventions. They used the X-Ray tube to see if it were a machine-gun; for by its beam they can penetrate even a steel plate in the form of immutable propositions.
