NUMBER 89

ARCHITECTS' DRAWING SHOWS PROPOSED UNIVERSITY BUILDINGS ON WEST BANK OF THE RIVER

OLD WEST BANK CHANGES FRONT IN NEW DRAWING

Dormitories, Hospital, and Nurses Home Are Among Buildings Contemplated

SKETCH IS ONLY TENTATIVE

Medical Plant Will Be Practically All Across the River — Similar Relocation at Other State Universities — Style to Follow that of Buildings Now in That Area

This is not a picture of some foreign castle. It is a new sketch drawn by the University architects, Proudfoot Bird, and Rawson, of Des Moines, to show the general appearance of the west bank of the Iowa river when the buildings now contemplated shall have been built.

Take your stand somewhere near the top of engineering hill, looking west, and project yourself into the future a few years. Do you get the point of view? In the foreground is Iowa river. A little to the right of the center is the Iowa avenue bridge connecting with the River-to-River road.

Medical Plant to be Relocated
That large building on the right is the new hospital for the college of medicine. You can count nine stories in front, but in the rear, where it is on the level with the children's hospital, it will rise two or three stories less. The covered passageway on the right connects with the new nurses' home now under construction. Out of sight, in the rear, are the children's hospital and the psychopathic hospital.

Beyond the bridge you see hazy outlines of the new medical laboratories to be located across the road from the psychopathic and children's hospitals. When this plan is executed, practically the whole medical plant will be on the west side of the river in a single unit. A similar re-locating of medical plants is said to be taking place at several other state universities, notably Michigan, Illinois, and Wisconsin, which, like Iowa have strained their former bounds.

Early Beginning Hoped For
The long building, or buildings, on the left of the center are men's dormitories constructed along the ridge of the Quadrangle. These buildings, together with the armory, dimly seen at the end of the street on the left, and the Quadrangle, here concealed by buildings in front of it, will make the nucleus of a great men's campus. Here is plenty of room for practice grid-irons, baseball diamonds, golf courses, tennis courts, etc., as well as for other buildings as they become necessary.

According to the architects' design, these projected buildings will be in a style harmonious with the children's hospital, psychopathic hospital, quadrangle, and armory. The sketch is only tentative but it gives a good idea of what we may see not so many years hence. As President Walter A. Jessup puts it, "This is no dream but

(Continued on page 2)

PRESIDENT SAYS PLANS ARE MORE THAN DREAM

Concerning contemplated building plans on the west bank of the Iowa River, President Walter A. Jessup said: "This is no dream but an attempt to express, as economically as possible, the most practicable methods of caring for imperative needs. I can not prophesy when the buildings will be constructed, but I hope that some of them may be begun before long."

HAWKEYE TANK TEAM CHOSEN

Tryouts For Minnesota Meet Next Friday Held Yesterday Afternoon

The final tryouts for the swimming team, held yesterday afternoon, brought out keen competition for places on the team which will meet Minnesota next Friday night at Minneapolis.

The greatest competition in yesterday's meet centered around the 40 yard dash. Twelve men tried out for the first four places in this event. The successful contestants were Shepherd, Boynton, Clark and Rademacher. Bob Brown, dash man on last year's squad was unable to enter the meet today, but will undoubtedly get to make the trip.

In the plunge, Forney made the length of the pool in good time. If he is up to form Friday night he should win that event for the Old Gold team. Halbeck placed second in this event.

William Goodell nosed Shepherd out of first place in the 220 yard swim in the last lap of the race. In the 100 yard dash, Clark took the first place and Goodell and Rademacher tied for second honors.

The summary of the tryout is as follows: 40 yard dash, Clark first,

(Continued on page 3)

UNION TO GIVE PLAY

Illinois Raises \$15,000 For Chinese Famine Relief Fund

The Young People's Religious Union of the Unitarian church will give a play for the benefit of the famine relief in China within the next few weeks. With the exception of the Methodist Sunday school no other church has made any contribution as yet.

The Illinois State University has raised \$15,000 and Iowa has only raised a little over \$800. The Chinese students at Iowa feel somewhat dissatisfied with the amount they have raised here to help their suffering countrymen, according to Chiang Liu G.

The president of the Chinese Student's Alliance has appointed a committee for the purpose of raising funds. The committee appointed by President Wilson will cooperate with this committee. Chinese students here are expected to carry on their campaign until February.

BRESNAHAN IS ELECTED NEW TRACK COACH

Assistant Coach at Wisconsin Will Take Watson's Place on Staff

WILL REPORT AT IOWA SOON

Bresnahan is Selected from Field of Twenty-five Applicants—Has Been Member of Several Conference Championship Trach Teams — Has Coached Since 1914

G. T. Bresnahn, assistant coach and head of track activities at the University of Wisconsin was appointed to succeed Jack Watson as track coach at Iowa, yesterday afternoon at a meeting of the board in control of athletics. He will report here as soon as his successor at Wisconsin is secured, which is hoped to be by the end of this week.

Mr. Bresnahan is a graduate of the Sterling Ill. high school and of the University of Wisconsin. While a student at Wisconsin he participated in several meets, running the 440 and 880 dashes, the mile, and cross country.

Coached Cross Country

He was a member of the Wisconsin indoor track team in 1913 which won the conference championship, and also was a member of the 1914 indoor and outdoor team. In cross country events he was a member of the 1912 and 1913 conference championship teams and was captain of the team in 1913.

After completing his competition in college he coached cross country at Wisconsin in 1914-15, and returned in 1918 as head of cross country and assistant coach of track.

Last summer Mr. Bresnahan attended the Olympic games and visited Oxford, Cambridge and Mc Gill universities with a view of gathering data on track and field events.

Was Here Yesterday

The appointment of Mr. Bresnahan closes a long chapter of dickering by local athletic officials in an effort to secure the best man possible to fill the vacancy made by the resignation of Jack Watson. Almost twenty five applicants representing some of the leading universities in the east and west were considered. Coach Howard H. Jones made a special trip east to confer with some of the candidates, and R. A. Keuver, secretary of the board in control of athletics, interviewed some prospects while on a personal business trip to the east. The application of Bresnahan however received favorable attention almost from the opening of negotiations. He himself came to the University during the holiday recess and talked the matter over with members of the athletic board.

He was also in Iowa City yesterday and attended the final meeting of the board on this question.

SHIMEK NEAR TOP OF CONFERENCE SCORERS

According to Irvin Howe's column of individual scorers in the conference, Iowa has a man near the top of the list. Captain Taylor of the Badgers is leading with Dean of the Hoosiers and Vollmer of the Maroons close on his heels. Shimek is fifth in the list with five ringers from the field and two free throws. A few games on the home floor may raise Shimek's average a notch higher.

COWLING HERE FOR VESPERS

Carleton President To Speak on "A Personal Philosophy of Life"

Donald J. Cowling, president of Carleton College, Northfield, Minnesota, speaker at the Vesper services to be held this afternoon, in the natural science auditorium at 4 o'clock, will arrive this morning from Cedar Rapids, where he spoke last night. President Cowling's subject for the services this afternoon is, "A Personal Philosophy of Life."

President Cowling has been at the University several times in the past few years. Prof. H. F. Goodrich, of the college of law, who was graduated from Carleton College in 1911, speaks highly of President Cowling as a public speaker.

The program for the afternoon includes the following numbers: University Orchestra, "Melody of Peace" by Martin; invocation and scripture reading by Rev. Herbert L. Searles; violin solo from the Second Concerto by Wieniaski, by Miss Winifred Forbes, instructor of violin in the department of music; "How Lovely are Thy Messengers," from the Oratorio from St. Paul by Medelssohn by the Vesper Choir; and the benediction.

SIZE OF FRIVOL CHANGED

Better Grade of Paper and New Style Type To Be Used

A revision of Frivol, both as to size and content will be made in the Rococo number, issued February 2, according to Bruce Gould, A3 of Des Moines, business manager.

The difference in size of the magazine will be slight, according to Gould. The size will be 8 7-8 by 11 inches in place of the 9 1-2 by 11 1-2 inch size of the former issues. A better grade of paper and a different style of type will be used to make the magazine much neater in appearance. "This issue will enable us to make an improvement, not only in the general appearance of the magazine but in the nature of the material contained, as well," said Gould.

The cover for the Rococo Frivol has been designed by Miss Edith Bell, of the Frivol staff. It is a five colored cover and exemplifies the spirit of the issue as expressed in the editorial pages.

MAROONS WIN; FINISH WITH A 25 POINT LEAD

Iowa Takes Small End of 42 to 17 Score on Chicago Basketball Floor

HAWKEYE OFFENSE IS WEAK

Shimek Divides Honors With Team-mates — Iowa's Defense Works Fairly Well But Scoring Machine Fails to Work — Vollmer of Maroons High Scorer with 7 Baskets

Chicago, Jan. 22. (Special to Daily Iowan by Chicago Herald-Examiner.) —The University of Chicago won a poorly played basketball game from the University of Iowa here tonight the final score of which was 42 to 17.

Chicago took the lead from the start and at no time was in any danger. The Hawkeye team showed a fair defense that worked successfully only at times but at best was unable to stop the Vollmer-Burkhoff forward combination.

Iowa Under Handicap

The Hawkeyes' defense was their strongest point as their offense was entirely unsuccessful both at floor-work and at teamwork. Basket shooting was fair but was coupled with a good deal of hard luck which accounts for the low score.

Coach Ashmore constantly substituted his players, using eight of the squad of nine men in an attempt to get a combination. Shimek played the best game for Iowa, scoring one field goal and five free throws out of six trials. Devine played a good teamwork game. The Iowa team entered the game with the handicap of a hard trip and a defeat the night before at the hands of Michigan.

Maroon Teamwork Excellent

Chicago had the offense all the way, forcing the Hawkeyes to turn all their efforts to a defensive game. Iowa showed flashes of good play, and occasionally carried the ball down in a clever array of teamwork for a shot. No one on the Iowa team scored more than one field goal.

Vollmer was the star of the game with seven field baskets, and Birkhoff was high scorer with six field baskets and six free throws out of nine trials. The Maroons had excellent teamwork and their forwards scored almost at will, while their defense worked perfectly.

Lineup:
Chicago (42) Iowa (17)
Birkhoff f Shimek f
Vollmer f Ehresman f
Halladay c Frohwein c
Crisler g Kaufmann g
McGuire g Lohman g
Fieldgoals: Vollmer, 7; Birkhoff, 6; Halladay, 3; McGuire, 2; Frohwein, Ehresman, Shimek, Devine, Kaufmann, Lohman, 1. Freethrows: Birkhoff, 6 out of 9; Shimek, 5 out of 6. Score at end of half, 21 to 5. Substitutions: Devine, f; Smith, g; Kamer, c; Lohman, g; Neff, f; Ratcliff, f; Segal, g.

MAKING A PAST

Without being foppishly sentimental it is safe to say that more things go into a university than the bricks and stone of its buildings or the requirements of its curriculum. It has a certain atmosphere of memory and custom, a certain past of things done and plans laid.

Architects draw plans; construction companies pile up steel and stone; and educators make curriculums. It is our business to build atmosphere. We enjoy a past too intricate and extensive to describe. The young men and women who will live on the new campus will enjoy the past that we happen to be making now in the homely conduct of everyday life, in simple customs established, and in things done in a small way.

WHY THE FLAPPERS FLAP

The intellectual Newfoundland, by name Chesterton, shot out a few rounds at the flapper the other day, by way of explaining the strange phenomenon of the daring woman whose latest nickname happens to be the "flapper." Every time the designation of a thing changes, it is only human to think that the thing itself changes. Hence the flurry to define the pet name of the world old type made famous by Fitzgerald.

Chesterton says, "I have seen the change in my own time; the severe, strenuous, 'advanced' lady of my generation has given place to the flapper, and as for the flapper—well she flaps! She is out for a high old time and she doesn't care who knows it. Far from denying her sex, she wishes to accentuate it and to get all the joy out of life it will bring her."

Of course that is fair enough if only the emotion of joy turned to find its fulfillment in those things which have more or less definitely proven that they contain it. But unfortunately flappers, both male and female, for they who wear trousers are not greatly dissimilar from those who wear silk stockings, think pleasure and joy obtainable at the grocer's much as one might buy peas and canned corn.

As the "leonine man of letters" goes on to say, "What is wrong with the world for woman in it is that she, like the man cannot get from life the common things she wants—marriage, children, and a dignified place in her own home."

B. G.

FEDERAL TAX LAWS ARE EXPLAINED BY COLLECTOR

A revenue collector from the Internal revenue offices at Dubuque was at the University last week seeing about the tax on University functions. He has found that University organizations are somewhat lax in complying with the federal tax laws, and has made known the regulations regarding entertainments.

Every organization giving an entertainment at which admission is charged must either pay their tax or file an application for exemption with the Dubuque Internal Revenue office. No performance can be given unless arrangements are made for this matter of tax, and all tickets must have the amount of the tax or the words "tax free" printed on the back. These applications should be sent in to the Dubuque office about thirty days before the entertainment is to take

place since it requires about that long to handle the applications. If tickets are not printed with the tax report on the back, they may be stamped with a rubber stamp which has been provided for that purpose at the office of John M. Fisk, superintendent of grounds and buildings, in Old Capitol building.

REPORT OF BOARD OF HEALTH LABORATORIES SHOWS BUSY 2 YEARS

Biennial report of Dr. Henry Albert director of the State Board of Health laboratories located at the University, made to the State Board of Health, indicates a total of 113,180 bacteriological examinations were made in the past two years.

The more important diseases for which these examinations are made are diptheria, typhoid fever and tuberculosis. The past year has been an especially heavy year. During this year 74,125 examinations were made as compared with 39,055 the year before and an average of about 24,000 for the several years preceding.

"This marked increase in the amount of work which the laboratory is being called upon to perform is due" Dr. Albert said, "to an appreciation on the part of physicians and the general public as to the service which may be rendered by the laboratory in the early and definite recognition of various communicable diseases. The value of such from the standpoint of both the treatment of the individual diseases and the prevention of the spread of such a disease to others, is obvious. The limits of the service which may be rendered by the laboratory is by no means reached. It represents indeed only a beginning of what may and should be accomplished if we are to materially reduce the number of cases and deaths caused by the various contagious diseases."

DRAMA LEAGUE TO MEET

Iowa City Center to Hold Monthly Meeting Tuesday Evening

The Iowa City Center of the Drama League of America will hold its monthly meeting on January 25 at 8 p. m. at the Little Theatre on the third floor of the University elementary school.

Miss Arminda Mowre of the department of public speaking will give an appreciation of St. John Ervine's "John Ferguson." The program will also include reports on plays recently seen in New York and Chicago, including "The Son-Daughter," "Abraham Lincoln," "The Skin Game," "The Bat," "Smilin' Through," "The Famous Mrs. Fair," etc., to be made by Miss Margaret S. Sherman, instructor in public speaking, Frederick F. Brown, instructor in public speaking, Prof. Berthold L. Ullman, head of the department of Latin and Greek, and others.

Mrs. W. R. Hart, Jr., chairman of the junior department, will report on the ten day institute of the Drama League, held in Chicago last August. Mrs. Hart was the Iowa City Center's delegate.

Those who are not members are asked to join the league and enjoy the privilege of attending this meeting and others to follow.

L. E. DODD TO ASSIST PHYSICS DEPARTMENT

L. E. Dodd, Ph. D. '18, is returning to the University for the second semester, upon leave of absence from the bureau of standards at Washington. Mr. Dodd is connected with the optical division and the section on the manufacture of optical glass. He will assist in instruction in the department of physics and engage in research. He

SECOND HUNGARIAN RHAPSODY TO APPEAR IN BAND CONCERT; FIRST TIME SINCE 1915

By Dale Kitzmiller

The Second Hungarian Rhapsody, which appears on the program of the University band for the concert of Sunday, January 30, was last played by the University band in 1915. Since that time Dr. Van Doren, band director, has received many requests annually from local musical lovers for a repetition of this number, but he has always refused because his bands were not capable of handling the rhapsody. This year Dr. Van Doren announces that he has a sufficiently balanced and skilled organization for his purpose.

Its composer is the brilliant Liszt, of whose character the music is such a part. The year Franz Liszt was born (1811), a flaming comet was seen, and the neighborhood gypsies believe a peculiar significance in this event, predicted as fiery a career for the baby as the strange star under which he was born. Liszt's entire life reads like a romance; in his travels, across the continent he left a trail of smashed pianofortes, and audiences enthusiastic with adulation. After he had finished a concert, the crowd would besiege the stage, seeking pieces of the broken piano strings as keepsakes. Men finished his cigar stubs from the gutters so that they might proudly display them to their friends. At no time during his long life was his success dimmed; he was recognized everywhere as doing for the piano

what Paganini had done for the violin, displaying the real possibilities of his instrument.

Liszt was highly picturesque. He was all that one imagines the Hungarian gypsy to be, temperamental, morbid, flighty. He was like the nomad tribes with whom, as a boy, he had played and sung—dreamy, passionate and delicate.

Into this rhapsody Liszt has poured all that is characteristic of the gypsy mind. The music is expressive of the passionate nature of the Magyrs; on hearing it we feel the headlong excitement of their folk dances, the dreamy languor, and the fascinating capriciousness that belongs to this race. The rhapsody begins with a moody, troubled strain in which the Abbe Liszt seems to brood over his turbulent religious struggles. As he frees himself from this painful reverie the artist turns to pleasanter thoughts and all matters of speculation give way to a tempest of grotesque fantasies and passionate, wide-flung phrases of delirious music, lulling at times into morbid, gloomy forebodings.

Another feature is the unusual elasticity of interpretation it possesses; a director can bring out almost any effect or contrast he chooses without impairing the force and character of the music in any way. When played with any degree of artistry, this number is genuinely inspirational.

comes to the University on this temporary appointment to assist in the department during the extended absence of Prof. George W. Stewart in the second semester.

PROFESSOR NAGLER WINS COLLINGWOOD PRIZE FOR THESIS

Floyd A. Nagler assistant professor of mechanics and hydraulics in the college of applied science, has just received word that he won the Collingwood prize of \$50 offered by the American Society of Civil Engineers each year for the best paper presented by a junior member of the society.

Professor Nagler's paper, published in the 1920 Transactions of the Society, is entitled, "Verification of the Bazin Weir Formula by Hydrochemical Gagings."

This is the second time Professor Nagler has won this prize. He is a graduate of the Michigan Agricultural College and received his Ph. D. from the University of Michigan. He is a member of Tau Beta Honorary engineering fraternity and Sigma Xi honorary scientific fraternity.

STUDENT COUNCIL HAS CHARGE OF DATES FOR UNIVERSITY FUNCTIONS

All organizations that are planning on holding any all-University functions depending upon attendance from the student body should consult the committee appointed by the student council which has charge of the dates open for all-University functions, according to Harry H. Miller L2 of Webster City, member of the student council. Mr. Miller said that this action had been taken in order to avoid conflicting dates in the future.

The committee appointed to take charge of the dates set for all-University events is composed of Harry H. Miller and Russel F. Graham. Anyone desiring to find out what dates are open, and wishing to set dates for any events can get in touch with one of the members of the committee by calling B 792 between 3 and 5 a. m. or by calling 241 in the evenings.

This action has been taken by the

student council to remedy the lack of co-ordination of the departments at which arrangements and dates for events could be made. Organizations wishing to arrange for functions will make arrangements regarding reservations of space, chaperones, and auditing of expense accounts for social affairs the same as in the past.

OLD WEST BANK CHANGES FRONT IN NEW DRAWING

(Continued from page 1)

an attempt to express as economically as possible the most practicable method of caring for imperative needs. I cannot prophesy when the buildings will be constructed, but I hope that some of them may be begun before long."

Well, anyway, it will certainly change the appearance of the old river when these new buildings are erected on its bank.

ANNOUNCEMENTS

There will be a joint rehearsal of the men's and women's Glee club this afternoon at 3 o'clock at the music building.

SOCIETY

Alpha Chi Entertains
Bishop William P. Remington of Rapid City, South Dakota, and Reverend and Mrs. Paul B. James will be the guests of Alpha Chi Omega sorority at dinner today noon.

Miss Adeine Perry, instructor of nurses, entertained six young women of the Dixie club at a six o'clock dinner last evening at Nurses Home No. 1, 329 Iowa Ave. Following the dinner cards were played.

Thelma Blake A3 is entertaining her mother, Mrs. G. W. Blake and cousin Edna Green of Green at Currier hall.

Currier hall women who are spending the weekend out of town are Mildred Kelly A4 at Wapello, Virginia K. Whipple A1 of Vinton, Bernice A. McElroy A2 at Burlington, Bernice R. Pfarr A2 at Tipton and Mary J. Pazdera A4, and Winfred A. Holden A4 at Cedar Rapids.

Spring Styles Are Varied

Spring styles have taken a step toward individuality. The selection is so varied and the models so absolutely different that every woman can choose her gowns and hats according to her own individual type, and not in a blind following of styles. This spring the clothes must be suited to the woman not the woman to the clothes.

The new suits will be shown with short coats and many cape effects. The skirts remain about the same length with a tendency toward fullness. The sleeves are larger and point to the return of the old baloon sleeve. The new materials are tricote, veldyne, and Normandie cloth. The new colors are Hindustan brown, a shade darker than wood brown, and Olympic blue of a dull greenish shade. Gray will be shown especially in foot wear.

Hats for the spring are blooming with bright colored flowers. The old poke bonnet has promised to return for late spring wear.

AND NOW A BOMB BURSTS; EARS MAY BE VIEWED AGAIN

They're wearing them again! Yes honestly we've seen some. Not a great many to be sure, just enough to presage a revolution in art of hairdressing.

You guessed it! After all these years of being smothered beneath bunches of brown hair, ear puffs of a golden hue, and brilliant red locks, the ear is coming into its own again.

Oh no indeed the whole auricular orifice has not burst vulgarly into society on the Iowa campus; just the merest hint is given that my lady is possessed of the shell pink ear of which the poets sing.

SPEAKER TO BE DINNER GUEST

Dr. Crothers To Speak Before Unitarian Men's Club Next Wednesday

Rev. Samuel McChord Crothers, the next University lecturer will be the guest of honor and the speaker at a 6 o'clock dinner to be given by the men's club at the Unitarian church, Wednesday evening, January 26. At 8 o'clock the same evening he will deliver a lecture in the natural science auditorium. The subject of his lecture is not yet announced.

Rev. Mr. Crothers is a graduate of Princeton and Harvard where he studied theology. He was ordained in the Presbyterian ministry in 1877 and later entered the Unitarian ministry. Since 1894 he has been pastor of the Harvard Square Unitarian Church at Cambridge, Massachusetts. This church serves the Harvard students and is considered the leading Unitarian church in the United States, according to Rev. S. C. Doan, Unitarian minister of Iowa City.

Rev. Mr. Crothers is an author and writes articles almost exclusively for the Atlantic Monthly magazine. His most recent publications is a book entitled, "The Dame School of Experience." The material for this book was taken from a collection of his original articles published at various times in the Atlantic Monthly.

Rev. Mr. Crothers has been to Europe on several lecture trips and is considered an international lecturer. He has an honorary D. D. degree from Harvard and an Litt. D. from both Princeton and St. Lawrence Universities.

He will be entertained while in Iowa City by Reverend Doan.

WILL REPRESENT COUNCIL

Prof. George W. Stewart to Travel During Second Semester

Prof. George W. Stewart, head of the department of physics, will spend most of the second semester visiting numerous colleges and universities of the central states as a representative of the National Research council.

He will confer with faculties and with faculty committees concerning possible means of increasing the attainment of graduates but more especially concerning the selection of students of superior ability and recruiting of research professions. The study that Professor Stewart will make is the beginning of an effort of the National Research council to assist in solving the important problem of securing the highest efficiency in the product of our colleges and universities.

DEAN KAY HONORED

One of Committee of Five to Prepare Geology Report

George F. Kay, dean of the college of liberal arts, has recently been honored by being chosen by the Geological Society of America, as one of a committee of five, to prepare a report on the teaching of geology in universities and colleges in America.

Regarding his appointment, Dean Kay said, "I regard it an honor to be chosen as a member of a committee to serve the interests of so important a society as the Geological Society of America."

ACACIA AND NU SIGMA NU LEAD IN HIGH GRADES

Fraternity averages for the year 1919 and 1920, made public yesterday, give Acacia first place among non-professional colleges, and Nu Sigma Nu first among the professionals. The list in order and the averages of each follows:

Professional Fraternities	
Nu Sigma Nu	84.73
Phi Rho Sigma	84.11
Phi Beta Pi	83.6

HOTEL WORK EXPLAINED

Miss Mueller Explains Work Offered By Park Hotels

The various kinds of work offered to college women by the hotels in Estes Park, Colorado, was explained to a large group of University women by Miss Mary T. Mueller, instructor in the English department, at a meeting

held Thursday afternoon in the liberal arts assembly room.

Miss Mueller explained the three kinds of work which are pantry, room, and dining room. The pantry work consists in preparing salads and desserts for serving and in keeping the silver and glassware in order. The room work consists in the caring of rooms, and the dining room work in the setting of tables, waiting on tables and resetting tables.

All employees must wear uniforms consisting of black dresses and white cuffs and collars and fancy white aprons. On Sundays white uniforms are required.

Salaries average from \$28 to \$36 per week. All women must sign contracts and deposit \$5. A small percent of the first check is withheld and this together with the deposit, is refunded at the end of September when the park closes. The season begins the first of June.

Safe and Sensible

For a short term investment, nothing can beat one of our Certificates of Deposit which pay 4 per cent interest for the six to twelve months which your money is on deposit.

Ask us about "C. D.'s" next time you are in the bank.

FIRST NATIONAL BANK

DON'T take a fellow's pipe. Take some other possession. Because wrapped up in his pipe is a fellow's peace of mind, his relaxation, his contentment. This is more than true if it's a WDC Pipe, because then a good smoke is multiplied many times over. Our special seasoning process takes care of this by bringing out all the sweetness and mellowness of the genuine French briar. Just you go to any good dealer and select several good shapes. Put them in your rack. Smoke a cool one every time, and you'll be well on your way to pipe-happiness.
