STATE UNIVERSITY

Many Wallowske Educators to Teach Here During The Summer Session

Many, many hours and many famous educators this summer will be giving courses in many different departments of the University of Iowa. In addition to the departments of education, physical education, and the social sciences, many other departments will be offering courses for students in the arts and sciences.

To ADD TO STAFF FOR SUMMER

To STAFF

TO JOIN THE TEAM

The entertainment and social life of the University of Iowa will be greatly increased this summer with the addition of many eminent educators. Among those who will be joining the faculty are Dr. Charles O. Cantril, Dr. Richard M. Hovey, Dr. John E. Richardson, and Dr. Albert M. Burt. Others who will be teaching this summer are Dr. R. E. D. Van Deen, who will teach in the department of education, and Dr. R. W. S. Cliff, who will teach in the department of physical education.

Many classes will be offered in the departments of English, History, and Mathematics. In addition, many courses in art and music will be available.

The University is looking forward to a very successful summer session, and all students are urged to take advantage of the opportunity to study under some of the best educators in the country.
CLASCHROOM AND BUSINESS

The coming of 1. Reed Lane of the Federal System of Superintendents, Frank E. Armitage of the New York Life Insurance Company, and other men of their type to lecture to students in the school of commerce seems to indicate a demand for this work for the students for the actual life of the business world in these days. It has been our belief that interest in teaching work for the students for the actual life and business worlds is showing a decided increase.

Therefore the main argument used by these lecturers was that they were not teaching along purely practical lines and that the business man had very little knowledge of actual business processes. Further, this talk of the future in the business world was based on the college in the school of trade. It seemed to the author that these defects will not be so apparent and will gradually disappear as we continue to teach along practical lines and close connections are made with the business world.

Business men are beginning to realize that the college trained business men of today are the future of the business community, they have the necessary standards, no matter what line of business they start in; college trained men who have had as much practical experience as the business men in the various departments.

One of the first men the author had an opportunity to talk to was a young man who after having been graduated from a business school was looking for a position in a large firm. He had been started in the various departments and was looking for a chance to get out into one of the big concerns where he would get the best experience. He had an opportunity to talk to the author about his work and his future and the author was able to give him some advice and suggestions as to how to go about getting the best experience.

A MINISTRY OF ART

The League of New York Artists estimates that a delegation to President Harding to forego his present program and go in the cabinet. This is a new move only a few days ago, and includes in its organization a number of New York artists and a provision for lay members.

Lay membership by art and artists of the ministry of art is of very great importance, it is said, for the laying of the beginning, and for the production of art and exhibition, and the production of art and exhibition is the purpose of the proposed organization.

The names of a society of this sort, with its possibilities for expansion and its already prosperous beginning, offers a fertile field for speculation. It is now in the very beginning stage and will be the subject of considerable interest if it can be made to work in the right way. A new society of this sort could not be altogether original, it is said, but it would be unique and of interest. It could be the nucleus of a society of this sort and its possibilities for expansion and its already prosperous beginning, offers a fertile field for speculation. It is now in the very beginning stage and will be the subject of considerable interest if it can be made to work in the right way. A new society of this sort could not be altogether original, it is said, but it would be unique and of interest. It could be the nucleus of a society of this sort and its possibilities for expansion and its already prosperous beginning, offers a fertile field for speculation. It is now in the very beginning stage and will be the subject of considerable interest if it can be made to work in the right way.
