STUDENT MEN AND FACULTY READY TO MIX

Stunts, Moviemint, Song, and Soft Drink Display Will Abound

ALL IS SET FOR FROLIC

List of Speakers Includes Three Denver, Harris and Nutting

Shouts and speeches by the students and faculty will feature the mix of the men of the University which is to be held Monday evening of Stunt at Balaban's, and the city park west of the park bridge. The mix will be attended by the faculty, students and alumni. A new session men a chance to become better acquainted with the students and fellow students.

Mark savoury surrounds the preparations for the stunts and no details are available, but the general impression is that fun will flow rather freely.

The tentative program includes music by a male quartet and community chorus. The program includes Dean George F. Kay, Dean William F. E. Ritter and the first tenor of students of universities, Dean William F. E. Ritter, Dr. George F. Kay, and Edward G. Burrows.

The arrangements for the mix are under the direction of the University Council, 1200 Michigan Ave., and it is expected that Misses with E. L. Ritter as general chairman will be in charge of the arrangements.

A part of the program will be the presentation of prizes to the students who are the winners of the Stunt competition.

FIFTEEN PER CENT INCREASE

Fifty-six students were registered for the Summer School program in Chicago, according to a report from the registrar. This is an increase of 155 per cent over the corresponding same period last year.

The increase in the number of students is a direct result of the increase in the number of instruction.
**THERE THEY ARE!**

The summer Students are finding that there is such a thing as home cooked meals. Jerry himself prepares them. His wife looks after the pastry end.

FIVE HUNDRED MEN AT THE PARTY

And now comes the first challenge of your loyalty, University area. The party this year is on the football field. For every man of the all-year, both faculty and students, will need your cooperation to be a success. A member of the black and gold is pleased to offer you a chance to get acquainted with your dormitory and see which the regular session student feels to do in his nine months on

Jerum here. In the class rooms you see but one side of your professor say it is the stern, austere side. Corin and the boys out of the dormitory, but you will find out for yourself that he isn't the Portentous individual you thought he was.

The party offers you a chance to be entertained by the leader of your class, the leader of the dormitory a chance to spend the rest of the session among your friends. It offers you a big dinner, and an entertainment for all and all for one dollar. The party this year is in the University, it has never been done before and it will be a tremendous success. There are still more, the professors and students who are watching with the most enthusiastic about the riotous entertainment.

**ROCK-BREAKING CREW IS DOING SIX WEEKS AT HARD LABOR IN GEOLOGY FIELD COURSE**

Prof. J. J. Runker's Summer Class, Which Includes Only Men This Year, Dwells in Tents Amid the Black Hills

"Nothing to do but work," is the song of the geology students taking in Black Hills field course this summer. With tents for shelter, and a hired man to put up their tents, the class has been at work for nearly four or five hours before last three.

The Black Hills field course, offers every summer in students of geology, began June 18, under the direction of Prof. J. J. Runker, of the geology department of the University. This summer's class is unusual in that it is composed entirely of men. The class of last year, which was about the same size, had an equal number of men and women.

The permanent camp of the class is located at Whiteclay, S. D., which has an altitude of about 3,000 feet. It is in the midst of the Alpilna flora region, where, it is said, there are more wild flowers than in all Iowa. The most renowned of these is the mountain blue flower, a species with which the lawn resident seems to be acquainted. The members of the class are in teams of two, each team is assigned to a definite field. The instructor distributes his

ammonium nitrate to be used for both mineral and oil. Every man here is both the geologist and artist. He has a wealth of knowledge about the history of the world and a water so that he can work it in the most possible way.

The Black Hills Field Course will be repeated in August. Toward the end of the summer, Professor Thomas will have his class camping at Whiteclay, S. D., which is in the midst of the Alpine flora region, where it is said that there are more wild flowers than in all Iowa. The most renowned of these is the mountain blue flower, a species with which the lawn resident seems to be acquainted. The members of the class are in teams of two, each team is assigned to a definite field. The instructor distributes his ammonium nitrate to be used for both mineral and oil. Every man here is both the geologist and artist. He has a wealth of knowledge about the history of the world and a water so that he can work it in the most possible way.

MEN--Attend University Party
Monday Night - City Park

THERE ARE COOLER PLACES THAN IOWA CITY, BUT DON'T LET THAT DISCOURAGE YOU

The Summer Seasonal Enjoy himself With Picnics, Mid-River Dates and Trips to the Amana Colonies

"Why is Iowa City so sumptuous? Go to summer school in that delightful burg! Not on your life! This is usually heard from the first student who has never gone to summer school.

"Bury enough for three whole months! Never is the world as parties, no parties—nothing to do." But the summer season student knows better.

"Nothing to do in Iowa City in the summer? No parties? No dances? Who wants to dance in the summer time, anyway? And for those who do, there is always the cool retreat of the Park Pavilions. The summer students have other things to do. They swim, they fish, they row, they sun, they travel. Traveling on, no—not so far! But those who take the one day trip to the Amana colonies, or the Quaker Oats factory in Cedar Rapids come back with a wealth of knowledge and a list of interesting experiences equal to those who travel far.

Unconcerned with trains and automobiles, they take the Rock Island to the quiet little town of Homestead, with its unpretentious clean streets.

Front here, they follow a pleasant road through the woods to South Amana. They inspect the women millers, they visit the community kitchen, where big kettles of steaming soup and mammoth loaves of bread are being prepared for the colonists; they chat with the friendly Amana women with their black poky bonnets and characteristic ways; they eat Dutch cheese and delicious meats at the Amana Hotel, hay bales at the grocery store, and start home with great heaps of Amana bread under their arms. The summer session student should never miss a trip to Amana.

For those who swim, or canoe, or prefer to fish, the Iowa river holds a great attraction. Its green banks were made for picnics; its waters for the dip at the paddle, and the lazy swing of the fish pole. Black Springs, the Country Club, and Pheasant Park are favorite haunts of the student.

And your answer is not complete without the Mid-river trip. You are up early in the morning and come back late at night. A day on the river has made you tired, contented, and happy.

Nothing to do in Iowa City! There is something to do in Iowa City with its beautiful river, its escalator, and its surrounding features. There is something to be seen and to do because of lack of something to do.

Clean-Up Campaign Starts Today

IOWA HAS FOUR MEN TRACK MEET TODAY AT STAGG FIELD, CHICAGO

Iowa has four entries in the National Track Meet at Stagg Field in Chicago today. Wilson in the 100 and 220 yard dash, Crawford in the hurdles, Hoffmeyer high jump and Blumberger in the weights, are the Iowa entries.

Two hundred and thirty-seven athletes are entered in the meet. Tryouts have been arranged for in every event. A general feeling of uncertainty prevails throughout athletic circles of the University as to the outcome of these entries. Wilson should win one of the five places in his event but the other men have good chances and should score in the meet.

- A Suggestion -

Good, clear negatives will make excellent enlarged prints, suitable for wall decoration.
The expense of enlargements mounted on card suitable for framing is nominal.

A CORRECTION

The Daily Iowan wishes to make a correction to the article appearing in the issue of June 17, regarding the capacity in which Walter Bass, teacher, and Frank Emlen, teacher of voice, and Frank Kudrinicz, instructor in instruments, matter of fact they are both full professors.

DE BARBOUR

In an interview yesterday Dr. Barbour, President of the Rockford Theological Seminary said: "There are very good chances to play football and strong men for the future. In fact only vigorous and firey boys destined to bring the Gospel to the modern and busy men of today. Religion is increasing and not decreasing as some think. Most probable it is better that there are many different branches in the Protestant church, as long as the various parties of the Reformation church do not become to antagonistic to each other. Just as the army is stronger because it is made up of so many different elements, so the Protestant church is stronger for the same reason. A tree with many branches is stronger than if it would have a single trunk at the
Miss Margaret Thielen of Iowa City, spoke, his subject being the most remarkable story of PASTIME the great Northwest with college of Liberal Arts. They left Iowa City for Cedar Rapids, enroute to Lake Geneva. They will hold the ceremony at the end of the summer term. The couple will make their home in Chicago.

Miss Dayton graduated from the college of Liberal Arts in 1920; was chaperon.

The wedding of Katheryn Dayton to Edwin Bohac of Okoboji, was a member of the Theta Chi fraternity.

Miss Dayton graduated from the University of California in 1920. They will make their home in studies, he was pensioned by the Board of Education. He will do clerical work under this bureau.
