MINOR SPORTS GAIN AT IOWA

Boating, Swimming, Gymnastics, and Other

Many Students

Minor athletics are coming to the front very fast at the University of Iowa according to E. G. Schroeder, director of the physical training department. "More interest has been shown this year in the minor sports such as boating, swimming, and tennis than during any other year in the history of the school," he said.

Boating was a new sport in the university that was developed the past year and that had been training in college that is to take a place in between varsity sports and other activities during the year. Special classes are also given for the students who want to boas.

The only course that is open to the students is that of the "White Shield" fraternity, which is the first one of its kind in the state of Iowa. The purpose of this course is to teach the students how to properly handle the oars and how to get a boat under way. The course is open to all the students of the university, and there are only 25 students in each class.

Boating has proven to be a very popular sport over the past year, and there is no doubt that the course last year is to be continued.

The "White Shield" fraternity and the University of Iowa are working together to develop the sport of boating in the state and to promote it as a healthy and enjoyable activity for young people.

PROMISED SHOWS

Samantha O'Neill

"My name is Samantha O'Neill. I am a senior at the University of Iowa. I have been interested in the sport of boating for many years, and I have been selected to be one of the instructors for the "White Shield" course.

I would like to share with you some of the benefits of boating. This sport is not only fun, but it is also a great way to get exercise and to enjoy the outdoors. Boating is a great way to spend time with friends and family, and it is also a great way to connect with nature.

I would like to encourage all the students at the University of Iowa to try boating. It is a great way to get some exercise and to enjoy the outdoors. If you have any questions, please do not hesitate to ask me.

I would like to thank the University of Iowa and the "White Shield" fraternity for allowing me to be an instructor for the boating course.

PARTY TO VISIT ARSENAL TODAY

Prof. Hills Will Conduct Trip to National Arms Shops at Rock Island

The excursion to the Rock Island arsenal will be taken today. Students who have made arrangements with Prof. W. H. Hills, in charge of the party, will be taken by automobiles at 9:30 while the rest will go by train at 11:15 a.m. Rock Island train. Students desiring to go on this tour must certify that they are United States citizens for reasons which will be given through the arsenal.

"The Rock Island is the greatest in the country," said Mr. Hills yesterday. "There's only one in this country for the last war and many of those are not doing manufacturing.

The arsenal is located on one of the largest and most beautiful islands of the Mississippi river. It includes about 100 acres. All bridges leading to the arsenal are under the supervision of the government.

During time of war it is entirely controlled and to protect the peace great payments are made for the protection of the government property.

The island has had a very interesting history. First black horse defence, Fort Armstrong, was finished in 1847 for protection against the Indians. After the Black Hawk war, however, the buildings were ruined and the fort was evacuated.

During the Civil War the arsenal was used as a military prison for about 800 prisoners. The buildings were burned, however, and now only one wing of the old fort is visible in the woods, just out of the city.

The national arsenal installations are the production for all of the United States. Factories and central points used in the arsenal. The superintendent of one of the installations is a sort of president of the national arsenal and this man is in charge of all the national arsenals.

Another place of interest is the national arsenal in California where about 500 soldiers are buried. Parts of the island have been left to its original state and are a perfect arsenal museum.

The commercial ship of Davenport has offered to take the party around the city to see the city. Those who by automobile will return home immediately while the rest will go in the train, where the party will come back on the 3:30 train.

SHAW WILL LECTURE ON TEACHING POETRY IN THE HIGH SCHOOL

Prof. Maria A. Shaw, associate professor of English literature, will lecture at 3:00 this afternoon on the liberal arts assembly room upon the teaching of poetry in the high school. This lecture will be illustrated by examples from Rudyard Kipling, Professor Shaw said yesterday that there are certain points which he would not bring out in the teaching of Rudyard Kipling's poetry that would not hold true of other writers, and also that teach- ing any poetry is a big thing as poetry has many practical sides.

The purpose of the lecture is the demand for happiness that every one possesses. Also, the student will become familiar with the greatness of common things and in one of the greatest unified objects in a nation.

SUMMER SESSIONERS IN MANUAL ARTS TO SHOW THEIR WARES

The manual training classes of the summer session are holding open house at the shops and the drawing room 6N, in the engineering building today.

Prof. Frederick G. Higbee, director of the manual training classes, says that the exhibits will be a good representation of what is being taught this summer. There will be shown in industrial training rooms 6N of the engineering building a few finished articles in the shops below the engineering building, and the woodworking class will hold an exhibition from 10 a.m. to 12; the machine woodworking class at the same place from 10 a.m. to 12; and the machine woodworking class at the same place from 10 a.m. to 12; and the machine woodworking class at the same place from 10 a.m. to 12. From these, the visitor may get an idea of what the classes are doing.

There will be chances in industrial training room 6N of the engineering building from 10 a.m. to 12. The industrial woodworking class at the same place from 10 a.m. to 12; and the woodworking class at the same place from 10 a.m. to 12. There will be a chance for those who want to see the work to stop by the shops and examine the exhibits.

In the elementary woodworking class there is one woman, Miss. Underwood from Greenup, Ky.

NOTICE

There will be a reading of "The Man Who Married a Dead Wife," by H. G. Wells on Wednesday evening at 8:00 p.m., the cast is said to be there promptly at 8:15.

PROFESSOR HEDRICK DELIVERS LECTURES TO MATHEMATICIANS

Prof. Karl H. Hedrick, head of the department of mathematics of the University of Minnesota and eminent chairman of the bulletin of the American Mathematical society, spoke yesterday afternoon in a grand representation of representatives, principals, and mathematic teachers.

His subject was "Alana of Mathematics," the Work of the National Council on Mathematics Education.

"The primary purpose of the teaching of mathematics should be to develop those powers of understanding and analyzing relations of quantity and of space which are necessary to a better appreciation of the progress of civilization and a better understanding of life and the universe about us and in development habits of thinking which will make those powers effective in the life of the individuals," said Professor Hedrick.

A second aim in the teaching of mathematics should be to teach to the students the most valuable information and training which he is capable of receiving in that year with little reference to the years that are to follow.

One great idea in the mathematical teaching is that of the functional relations. In the real world outside of mathematics we do practically all our thinking in terms of a relationship between two quantities," said Professor Hedrick.

"In mathematics this is not false that no transfer of training from one subject to another does exist but it is quite difficult to express any numerical way in which the amount transferred can be measured. That training in mathematics will help people to better understand the problems which confront the nation, will add a new and a means of expression exact, clear, and ready to use. This is because when a mathematical knowledge will be considered as important as a knowledge of reading and writing.

Professor Hedrick spoke yesterday morning before a class in the teaching of mathematics and will speak this afternoon at 10 a.m. in room 234 of the physics building on "The Foundations of Mathematics in Relation to the Training of Teachers."

This afternoon at 4:15 in the same room he will speak to the mathematics students on "The Non-Euclidean Geometry."

"Americans who are apt to think there are no idealists at all are at least connected with the French stages, should study the life and works of Bastian," said Professor Charles Edward Young, who will lecture on "An Idealist on the French Stage" tonight in the auditorium in liberal arts. "There are some things that are not idealistic of course," continued Professor Young "but Bastian's suggestions are distinctly idealistic." Professor Young has travelled and studied in France and has made a special study of the French stage and drama. He received his Doctor's degree at Wisconsin university, this distinction being on a subject connected with the French theater. This was published by the University in the department of Philology and Literature series. Professor Young received his B. A. at Harvard College.

BAND TO MAKE DEBUT TOMORROW ON CAMPUS

The Iowa City band will give a concert on the campus Thursday evening at 7:30. The band is under the leadership of Orle E. Van Dusen, and consists of thirty pieces. The program is as follows:

- Comic Pantomime Concert Walts "First Love" Holmson Tak "For You"
- Bridal Rose Overton Lavelle
- Carolina Lullaby Hirschi
- Shadowland Taylor
- Royal Vagabond Selection Cedar
- "76 C. 4" Rigby

1000 MAY REGISTER FOR FIVE WEEK TERM

Last year there were 1,420 different registrations in the summer school for the two sessions. About 1,200 of these were for the first session. About 700 were in attendance during the second session last year, more than twob-thirds of whom registered the first session and stayed for the second session. The registration for the first session this year is about 1,700. If last year's figure can be taken as a criterion, we should have from 900 to 1,000 for the second session. As the number of registrations for the second session should be about the same, we should have around 1,700 for the second session. Any one who plans to register during the second session should attend to registration this week. New students will be permitted to register early next week. Registration continues as usual before 4 o'clock daily.
