FRED POTGIETER RESCUES CHIEF

Student, Graduated in June,
And Another Worker Dive
to Aid Engineer

Fred Potgieter, a graduate of the engineering college this spring, and Fred Painter of Iowa City, a workman for the Iowa City Light and Power company, saved J. H. Mangle, chief engineer of the light and power company from drowning yesterday morning at 10 o'clock, when the latter slipped from where he was directing some construction work on top of the Coralville dam and fell onto a pile of submerged planks covered with spikes and other wreckage, from where he slid into the water and was carried downstream by the current.

Mangle lit on his back when he fell and was injured so much that he was unable to swim when he slid into the racing water below the dam. Potgieter and Painter who were working with Mangle, saw him go under and jumped in to assist him. They dove into the water, barely clearing the wreckage which had caught Mangle, but swam quickly to his side, where they held his head above water and swam downstream with him about 150 feet, where they landed on a pile of driftwood close to shore.

Potgieter and Painter were working on the dam under the supervision of Mangle, who has been here starting work on resurfacing the dam. These men, together with some other workers, had been building a trestle for a small railway to carry materials, and the work had progressed about to the middle of the dam, when Mangle slipped from where he was working.

Aside from numerous cuts, bruises, and a badly-sprained back, which he received when he fell on the planks covered with long spikes, Mangle was not feeling very serious effects from his fall and near-drowning, when he was pulled out by the two workmen. He was able to go out to the work late in the afternoon yesterday after he had been given medical attention.

Both Potgieter and Painter jumped so quickly after Mangle's fall that they forgot the tools with which they were working, Painter diving without even removing a saw which he was holding between his knees. He was not hurt, however.

PAIRINGS FOR MEN'S TENNIS TOURNAMENT MADE OUT YESTERDAY

The pairings for the University men's tennis tournament were announced yesterday afternoon. The rounds must be played off before next Wednesday, or be forfeited. In the preliminary matches three sets will be played, and the finals five sets.

A beginner's tournament and a men's doubles tournament will be held after the completion of the present series.

Pairings announced yesterday were:
Chittenden and E. Chamberlain
Hunter and F. D. Knight
James and Gillis
R. C. Hurd and W. Peterson
Ramsey and Greenwood
Parkhill and P. W. Hoff
Farman and Guthrie
McGovney and Ball
Burkholder and Randall
Blackstone and McCullough
Dorsey and Gilbert
Lemmel and Spooner
Edgar and Maulsby
Houston and Miller
Dargan and McMurry
W. L. Hunter and Scott.
The tournament last year was won by F. D. Knight.

BULLETIN Friday, June 23

4:00 p. m.—MANUAL ARTS ROUND TABLE: "Shop Problems," conducted by Prof. Victor E. Thompson—3 engineering building.
6:00 p. m.—ALL-UNIVERSITY MEN'S DINNER—Burkley ballroom.
Saturday, June 24
7:30 a. m.—EXCURSION: To Quaker Oats factory at Cedar Rapids. Party will leave by interurban car on the hour.

IOWAN STAFF WILL GIVE SECOND PICNIC

The Daily Iowan staff will hold its second fortnightly picnic next Tuesday. It will take the form of a picnic and beach party at Indian Look-out. A truck leaving the Iowan editorial office at 4 p. m. will carry the members out and bring them back. The party will return in time to attend the three one-act plays to be given Tuesday evening by the Out-of-Door players.

MERRY RETURNS FROM THE EAST

Speech Professor Is Elected to General Phonetic Society

Prof. Glenn N. Merry, head of the department of speech, has recently returned from a trip in the East. His time was spent in visiting several large school systems and in study at Columbia university, New York City. On the way East he lectured in the department of speech at the University of Michigan and before the public school teachers of Grand Rapids, Michigan.

He spent three days in visiting the public schools of Detroit, two days in the schools of Boston, and two days in the schools of Philadelphia. His purpose in making these visits was to observe such methods as are being used for the development of the spoken languages.

At Columbia, Professor Merry spent six weeks in Doctor Green's clinic for speech defects. His work at the clinic was connected mostly with the defects of stuttering, stammering, and lisping, and the study of a basis for classifying them.

Professor Merry also studied with Prof. Phillip Krapp and Professor Tilly, both of whom are foremost in their field. The problems of standards of pronunciation of English, history of this pronunciation, and applied phonetics, were taken up. Professor Krapp is author of the most widely accepted text book on standards of pronunciation of English. Professor Merry's work with him was primarily on the use of this text book in class work. Professor Tilly was for many years director of the school for the teaching of English in Berlin.

While in New York Professor Merry was elected a member of the General Phonetic society. He is a graduate of Northwestern university, and of the School of Oratory of that place. He taught for one year at the University of Illinois, and has been at the University of Iowa for ten years. He received his master of arts degree in economics and political economy, and the degree of doctor of philosophy in psychology and economics at this University. He is the author of "Principles of Speech."

BOSE CHAUTAUQUA LECTURER

Prof. Sudhindra Bose, of the department of political science, is lecturing on the Midland Chautauqua circuit this summer. Professor Bose is a native of India, and he is discussing questions pertaining to Japan, Korea, and other Oriental lands.

FRESHMEN RANK LOW IN GRAMMAR

State Wide Test Held by Moffett Reveals Many Interesting Facts

A spelling and grammar test conducted by Harold Y. Moffett, instructor in the department of English, revealed the fact that the average college freshman is as deficient in grammar and spelling as the eighth and ninth grade student. Mr. Moffett has carried on an extensive campaign throughout the state, holding the tests in over 200 Iowa schools.

These tests grew out of a desire on the part of Mr. Moffett to learn as near as possible the result of the distribution of a bulletin prepared by the Extension Division, entitled "Minimum Essentials of English Composition". The primary aim of this bulletin was to make clear to the teachers, especially in the eighth and ninth grades, what the pupils in these grades ought to know. The bulletin has been widely circulated and used in other states as well as in Iowa.

Mr. Moffett's test in spelling consists of the dictation of a business letter at a stated rate of speed, in which the essential words named in the bulletin are used. The grammar test consists of exercises in capitalization, correct punctuation, and sentence construction.

The results of these tests are being tabulated now and as soon as results of the schools responding are arranged Mr. Moffett will be able to notify schools which has sent in a report just how it stands in the test compared with other schools in the state.

The results of two tests, one of fifty eighth-grade pupils in the Iowa City public schools, and the other of forty-two university freshman attending this summer session, show a hitherto unnoticed fact.

Iowa City University eighth grade freshmen	
Number of papers	50 42
Largest number of errors	19 17
Smallest number of errors	1 0
Median number of errors	8 3
Number of perfect scores	0 7

"Occurred" is one of the spelling demons misspelled by forty eighth-grade pupils and twenty university freshmen. "Occasional" was misspelled by twenty-seven eighth-grade pupils and by nineteen university freshmen. Other of the "demons" in the test which show a high percentage of errors by eighth-grade pupils and university freshmen are "probably", "immediately", "finally", "lose", "stopped", "generally", and "sincerely".

GRADUATES GET POSITIONS

Catherine Winters, who is a candidate for a master's degree in history, has been appointed instructor of history in the Florida State college for Women.

E. M. Eriksson has been elected head of the history department at Lombard college, Galesburg, Ill. Mr. Eriksson received his doctor's degree at the June convocation.

Grace L. Gilmore, who received her B. A. degree this June, has taken a position as research assistant in the State Historical society of Missouri at Columbia, Mo.

BAR ASSOCIATION MEETS

Judge F. F. Faville and Prof. H. Claude Horack, both of the law college, are attending the twenty-eighth annual convention of the Iowa state bar association which is in session yesterday and today at Sioux City. Judge Faville is chairman of the Iowa state bar association and Professor Horack is secretary.

GROUP TO VISIT CEDAR RAPIDS

Professor Hills to Direct Tour of Industrial Plants

An excursion, under the direction of Prof. Elmer W. Hills, assistant professor of economics, will be taken Saturday morning at 7:30 to Cedar Rapids, to visit the Quaker Oats factory, the Sinclair meat packing company, and the Pennick-Ford syrup company.

Any one wishing to go should sign up on the bulletin board, room 205, liberal arts building. This information is desired so that a sufficient number of guides may be provided. They may go by way of the interurban. A car leaves Iowa City at 7:30 a. m. arriving in Cedar Rapids at 8:45 (or they may go in automobiles but should be in Cedar Rapids at 8:45 in order to accompany the party. The cost of a round fare trip on the interurban is \$1.92.

About an hour and a half will be spent in going through the Quaker Oats factory. This factory is located in the heart of the business district and is one of the largest and most up-to-date of the Quaker Oats factories. There are eighty-one large cylindrical bins, towering over a hundred feet, which hold several million bushels of grain. Over 2000 workmen are employed. Power for this company is furnished by the Iowa City and Cedar Rapids power dam.

The company manufacturers Quaker Oats, puffed wheat, puffed rice, and flour, and boxes, barrels, and packages in which the products are shipped. The manufacture of each product involves many processes. The puffed wheat and rice is heated in ovens to several hundred degrees, then shot from great guns, or literally exploded, into screened vats. Another interesting feature will be a view from the top of this ten-story building. Almost the whole of Cedar Rapids can be seen from here.

After seeing the oats factory the party will either visit the Sinclair packing house, or the Pennick-Ford starch plant, or both, depending upon the amount of time that remains, for the factories close at noon. The Pennick-Ford company is the successor of the Douglas Starch company. The factory has been recently rebuilt to replace the plant that was destroyed by an explosion several years ago.

The Sinclair packing will also be visited. The tour will start with the slaughter-room and take in the various processes of preparing meat for table use. This will include the room where the meat is smoked, the room where sausages and bologna are made, and where the veal loaf is baked. Veal loaf is baked in a sort of a revolving oven in which the leaves are placed so as to turn constantly about the source of heat, to insure even baking. And finally the refrigerator will be gone through. The temperature here is several degrees below freezing. This place should prove to be very comfortable if the day is hot.

MEN WILL CUT AIR CAPERS AT DINNER TONIGHT

Attendance of More Than 300
Expected; Mahan is
Toastmaster

JESSUP WILL SPEAK

Five Main Speakers and
Male Quartet on
Program

The fifth annual all-University men's dinner will be held in the Burkley ball room this evening at six o'clock. All the tickets have not been checked in as yet, but an attendance of more than 300 is expected.

The toast program will take the form of an airplane trip, with Bruce E. Mahan acting as pilot and the diners serving as observers.

The party will be taken "Up in the Air" by Supt. E. B. Dolzell of Shenandoah, it will "Loop the Loop" under the direction of Prof. H. D. Williams of Tulane University, New Orleans, and it will hold its breath during a "Tail Spin" conducted by A. L. Lom-Hospital.

Having regained something of its as, superintendent of the University equilibrium it will take a "Bird's Eye View" assisted by Prof. William F. Russell, dean of the college of education, and then will be conducted gently "Back to Earth" by President Walter A. Jessup, where it will be received and serenaded by a male quartet consisting of E. W. Fannon, M. F. Penrod, Paul McKee, and J. D. Jackson.

Adventures during the journey among the clouds cannot be predicted with any degree of certainty, but activity about the hangars of Professors Clapp, Weller, Robbins, and scouting planes continue to report others, indicating that something unusual is bound to happen. Whether this will be in the nature of an anti-aircraft barrage, the dropping of a few bombs, perhaps the more thrilling feat of dropping propaganda from the air, is not clear.

Tickets may yet be secured today for the dinner at Whetstone's of the University book store.

MEDICAL COLLEGE OFFERS SPECIAL CLINICAL COURSE

Courses are offered during the summer session which are not offered during the rest of the year. The medical college offers a clinical course during the summer for general practitioners. Clinical instruction will be given from June 19 to July 15. This course is only open to a limited number of physicians. A tuition fee of \$25.00 is charged for residents of Iowa, and \$30.00 for non-residents.

The course consists of ward walks, clinical demonstrations, and work in the clinical and anatomical laboratories. It will give physicians in practice, an opportunity to become acquainted with the new methods and laboratory diagnoses and treatments.

A course is also offered during the summer session for public health nurses. The course takes up some of the subjects which will be most useful to them in their work. It is offered to give nurses, who are holding positions and cannot be released for a long period at a time, a chance that they could not get during the regular school term.

The Weather

Continued fair, excellent weather for picnics, if it were not for mosquitos.

WEAR YOUR TAG

Every man who has bought a ticket for the all-University men's dinner this evening has been given a ticket indicating that he is supporting the annual affair in the one way which will help the most.

The proper thing to do upon buying a ticket and receiving one of the tags is to put the ticket in your pocket and the tag on your coat lapel or on a button of your shirt—or vice versa—anyway to indicate that you are going.

The fact that so many men already have bought tickets indicates that they are in favor of the dinner and are doing their part to boost it and make it an even bigger success than those of past summers.

The size of the ticket sale has already assured the success of the dinner to a certain extent, but why should we be satisfied with only partial success. This year's dinner could be made the greatest event of any summer session if it were pushed in the proper way.

All that is necessary is to secure the personal cooperation of every man who intends to go. Those who have bought tickets already should wear their tags all day to-day to remind those who have not bought them that they have neglected their duty until the eleventh hour, and those who have no tags at present should get theirs early in the day and wear them. Let's spread the word of the dinner, wear the tags ourselves, and let there be none come to the dinner without buying a ticket previously.

ANOTHER NEED

One of the needs which will be filled by the new Iowa Memorial Union building when it is erected was emphasized again Tuesday morning when a crowd estimated at many more than a thousand attended the weekly assembly on the lawn in front of the liberal arts building.

Although the principal reason for holding the assembly in the open was because the natural science auditorium had been given over to the G. A. R. convention, there was such a large crowd who came to hear President Jessup in his first appearance before the summer session that if there had been an attempt to hold the meeting in the auditorium, as is done ordinarily, the crowd could not have been accommodated.

One of the largest auditoriums in the middle west is being planned for the Memorial Union. It will fill a long-felt need on the campus, and one which should be an incentive for even more concentrated effort on the part of the student body to make the Union not only a certainty—for it is that already—but an immediate possibility as well.

Fame has its disadvantages. Harold F. McCormick, of the International Harvester company, sends down to the court house to get a copy of the divorce decree and the next morning meets a scare head in his morning paper saying, "McCormick ready to remarry".

To-day's worst window display—A never-wind clock; stopped.

ANNOUNCEMENTS

The first meeting of the University—P. E. O. members' will be held at the Alpha Delta Pi house, Friday, June 23, at 8 p. m.

Marjorie Graham, Pres.

ONLY FIFTY PERSONS INSPECT UNIVERSITY MUSEUMS WITH GROUP

Fifty students gathered in front of Old Capitol yesterday afternoon at 4 o'clock to tour the university museums under the guidance of Prof. Charles H. Weller, director of the summer session.

They first visited the Art and Archaeology museum on the third floor of the liberal arts building. Professor Weller showed the group the collection of Babylonian tablets, Roman coins, paintings, and other antiques which the museum contains.

At the State historical library, Dr. Ruth Gallaher, who is in charge of the library, led the party of the library and the work of the State Historical society.

The party next viewed the museum of natural history and bird hall in the natural science building. Professor Weller told them of the work of preparing the various exhibits especially the Laysan Island group which was prepared after a party headed by Prof. Homer R. Dill of the zoology department had spent a summer on Laysan island in the Pacific.

Professor Weller said that the museums were open to visitors at all times and invited the students to re-visit the exhibits at their leisure.

SHOP PROBLEMS TO BE DISCUSSED AT MANUAL ARTS MEET

Shop problems will be discussed at the manual arts round table conducted by Prof. Victor E. Thompson of the college of engineering. The discussion will be held at 4 p. m. in room 3 of the engineering building.

The purpose of the round table is to exchange and express the ideas of those in attendance. A person from Davenport may be confronted with a problem which he is unable to solve. By bringing this problem up at the discussion, perhaps someone from Cedar Rapids has had the same problem and will be able to help the person from Davenport in his difficulty. The greatest gain results when the views are expressed by the students themselves. It gives them a chance to express their views, even though, they may not be in accordance with others that have been expressed. By having everyone participate, the most good is derived.

Dr. Lydia M. O'Harrow, assistant in the student health department, is in Dubuque attending a medical convention. She will return to her work today or tomorrow.

THE LAST HOT RIVET HAS BEEN HAMMERED

A Section of Iowa's New Steel Bleachers

NEW BLEACHERS ARE COMPLETED

Stadium On Iowa Field Can Now Accommodate 30,000

The stadium of Iowa Field now has a seating capacity of 30,000. The new steel bleachers just completed have increased the seating capacity by 9,600. Work began early in the spring with the construction of a concrete wall on the west side which bridged the gap south of the dike to prevent the flooding of Iowa Field and served as a base for the steel framework. Since then the work has steadily progressed. The first steel was set in place at the north end of the west bleachers so that twenty

rows of seats were placed as a continuation of the old bleachers.

The additional sections include not only the bleachers built above the old ones, but also have added a section of forty rows of seats at the south end of the concrete bleachers. The steel is so constructed that the west stands can be double-decked if necessary. The west side was finished in time for the Big Ten conference meet, which was held here on June 2 and 3.

The east stands were given the last coat of paint on Tuesday of this week and men are now putting supports in to hold the seat boards. The setting up of the steel work on the east side required one week, and the riveting of it took about two weeks. Dressing rooms are to be installed underneath both the east and west stands.

In order to have room to put up the supporting frame for the east stands, it was necessary for the interurban tracks to be moved to the east about twenty feet. While the iron work was being set up, it was necessary for a man to stand at a special switch in order to turn the electricity on and off so that the cable and boom of the derrick of the American Bridge company would do no damage if it should hit the trolley wire of the interurban. The cars now run under the outer part of the east bleachers.

After the steel work had been set in place and riveted, new seat boards were installed. In addition to this, the old boards of the concrete stands on the west side have been replaced with new ones, so that all the boards on the steel and concrete bleachers are new. The new fence on the east side of the field, which extends from the gate on the north side by the interurban viaduct to the south end of the new bleachers, is nearing completion. The outside has received the finishing coat of cement.

The addition of these new bleachers

gives seating capacity to 30,000. At present the stands will not be extended. The south end will not be built up, although in time Iowa will have a stadium in the form of a horseshoe, with the south end closed by a section of seats forty rows high. When this section is completed the space underneath will be used as a general storeroom. The old wooden bleachers which were formerly along the south end of the football field have been moved south of the track and temporary bleachers will be installed at the north and south ends of Iowa Field to take care of the crowds.

The "blue ribbon" crew of the American Bridge company erected the

bleachers. It was this crew that put up the bridge at Hell Gate, N. Y. While the bleachers were being put up at Iowa Field, it was a common sight to see one of the men scale up a support beam for about forty feet with no assistance except for his hands and knees. He would reach to the other side of the beam with his hands, then place his knees inside the edges near him and place his feet on the outside and climb up.

A stationary engine was used to operate the boom employed to erect the west stands. This boom had been shipped to Iowa from Juneau, Alaska. In the riveting work, one man would heat the rivets until they were red hot, then would pull them out of the

fire with a pair of long pliers and toss them as needed up to the riveters, who would catch them in a small can and place them in the holes, where they were driven down by the air hammers.

Prof. Byron J. Lambert, head of the department of structural engineering of the college of applied science, and chairman of the athletic board, has charge of all construction work on Iowa Field.

The state convention of the Grand Army of the Republic, which has been in session here this week, closed yesterday with business sessions of the G. A. R. and allied organizations. L.

**SUMMER SESSION STUDENTS ARE AGREED TO
DISAGREE ON WHEN IT IS EASIEST TO STUDY**

Is it easier to study in the summer or in the winter? Every summer session student on the campus seems to have a different answer to the question. When do you find it best to study?

Samuel P. Franklin, instructor of psychology and education at Union college, Barbourville, Kentucky, who is taking work here this summer, says: "I really enjoy summer school this year because I have been teaching the past term, but while I was attending the university during the regular term and then attended summer school it seemed to me that the work was harder and school was not as interesting."

"I think a student has to work too hard for what he gets out of it," said Mildred M. Freburg of Pomeroy.

"I don't find it any harder to study in the summer than in the winter," said Milton F. Metfessel, graduate student. "You can always find cool spots in the summer, but you can't find warm ones in the winter."

"I find it best to study in the library," is the opinion expressed by Alice M. Portland of Centerville.

One young woman philosophized as follows: "I think it is harder to study in the winter. It is too hot in the summer to go anywhere, but in the winter you can't study because there is something doing all the time."

Kenneth L. Shumaker of Iowa City said: "I think it is too hot to work very hard in the summer, and I find that summer school work is harder because one has to attend class every day."

**FRIVOL MAKES PLANS
FOR BETTER MAGAZINE**

"The 1922-23 Frivol," said Margaret Wilson of Iowa City "will resemble the past year's magazine only in size." Frivol is the university's humorous magazine which is published by the student body seven times during the school year.

"We intend to make Frivol better than it has ever been before." Miss Wilson is editor-in-chief for next year, Reginald O. Mars of Iowa City is business manager. There will be two permanent editors, Margaret Hills of Cedar Rapids as assisting editor, and Lorenz G. Wolters of Waukon, contributing editor. The rest of the staff will not be permanent.

Frivol will have more short jokes and fewer long stories will be published. Sketches will appear instead of cartoons. The paper will contain a considerable amount of art work. Graduates or students will work on the issues. The Frivol will very likely make its first appearance early next fall, and will be on sale during registration week.

"Every one is encouraged to send good articles," said Miss Wilson, "and perhaps payment will be made for the articles printed."

**FRENCH AND SPANISH
STUDENTS LEARN TO
TALK FOREIGN TONGUE**

"Donnez moi le pain, s'il vous plait." "J'aime ce saladé." Hagame a usted el favor traerme una vasa de aqua." Such is the jargon the waiters at the French and Spanish dining room in Currier hall hear at every meal.

The maintenance of a French and a Spanish table in one of the private dining rooms at Currier hall, and of a French house in the Currier annex known as Ball cottage, is one of the advantages the University summer session offers to graduate and undergraduate students in the department of Romance languages.

La Maison Francaise is in charge of Mlle. Lucienne M. Foubert, an instructor in the department of Romance languages.

Eight young women, all of whom have either been teaching or are intending to teach French, are living at the house together with four other students who do not speak French. These students live at La Maison Francaise because there were not enough applications by students specializing in French. "This is very annoying," says Miss Foubert, "because we cannot strictly enforce our rule that all conversation within the house must be in French. We must be polite and speak in English sometimes so that the others can understand us."

A regular class in French conversation is held every afternoon at 5 o'clock in the Maison Francaise for which University credit is given. In the class, French guessing games are played and French songs are sung.

"Many of the students were very timid at first and spoke very little," Miss Foubert remarked. "At the table it was very quiet. The girls found it difficult to eat and carry on a conversation in French at the same time and they spoke in phrases instead of sentences."

Miss Colette Resweber, a graduate of the State University of Louisiana,

Martinville, La., Miss Mildred Johnson of Lead, S. D., and Miss Doris Potter of Albion, are graduate students living at the French house. The undergraduates are: Esther Shaw of Wellman, Vivian McElroy of Lamoi, Ada Snyder and Martha Gwenter of Burlington, and Ruth Silvis of Cornell college, Mt. Vernon.

"Some of the students are specializing in both French and Spanish and eat alternately at the French and Spanish tables at Currier. There is no Spanish house although eight students eat at the Spanish table in charge of Miss Emma C. Stubner, an instructor in the department of Romance languages. All conversation is carried on in Spanish at this table.

A waiter who speaks French waits on the French table and Miss Foubert says that his "Desirez vous plus de pommes de terre?" makes the girls giggle.

**CONGREGATIONALISTS TO
HIKE TO LOVER'S LEAP**

A hike to Lovers' Leap and a picnic supper has been arranged by the Congregational young people for Saturday evening. They will leave the Conference house, 128 North Clinton street, at 5 o'clock. Supper will be furnished at cost. Lovers' Leap is one of the beauty spots about Iowa City. It is located one and a half miles north of town.
