IOWA MEN GET EIGHT PLACES IN TRACK MEET

Brookins, Crawford, Devine, Coulter, and Belding Win Points

GET HIGHEST SCORE

Hawkeye Men Lead Other Universities In Meet At St. Joe

Six Iowa athletes, competing individually in the first annual Fourth of July track and field meet at St. Joseph, Mo., yesterday, took four firsts, two seconds and two thirds, scoring 30 points and leading the contestants from any other university.

Athletes competing from Kansas Aggies made 18 points, and placed second to the Hawkeye athletes. Kansas made 17, Kansas Normal 11, and Nebraska 8.

Brookins won the 220-yard low hurdles in :24 2-5, with Crawford second. The latter took first in the 120-yard high hurdles in :15 3-5. This is the first competition for Crawford in over a year.

Morrow was first in the half-mile, running it in 2:00.

Coulter, the freshman star, placed third in the 100-yard dash.

Devine took third in the pole vault.

Belding, a freshman in the University last year, formerly a student at Upper Iowa University, and now attending the Iowa summer session, won the novice and open broad jump events. Belding won his numeral in track here when a freshman, and is planning to remain in the University next year.

Iowa finished second in both the mile and half-mile relays.

George T. Breshnahan, track coach, and the men who competed in the meet, are expected to return tomorrow.

The meet, which is planned as an annual affair, was sponsored by the St. Joseph Chamber of Commerce. It was open to all amateur athletes in the west and over 200 competed.

HIGBEE WILL LEAD MANUAL ARTS ROUND TABLE TALKS TODAY

Prof. Frederic G. Higbee, head of the department of descriptive geometry and drawing, will lead the weekly manual arts round table discussion at 4 o'clock this afternoon in room 3N engineering building.

The subject will be "Drawing for Manual Arts Courses". The time of the weekly meetings has been changed from Friday to Thursday to accommodate the large number who have conflicting classes on Friday.

"The round table this week will discuss what the drawing course should be and how it is related to the manual training course," said Prof. Higbee.

"Work will be on exhibit that was done in the class rooms last year in an experiment to determine what we can expect students to produce under unfavorable conditions in respect to time and equipment. We want to point out in connection with this exhibit what public schools that do not have the equipment for formal mechanical drawing may accomplish by free hand methods.

"Anyone is welcome to the discussion whether he is registered in the courses in manual arts or not. Last week there was a large attendance and I believe that any public school man who is interested in this particular course of study will find his time well spent if he attends".

PROFESSOR MOFFETT THROWN BY HORSE

While riding with friends in cavalry fields northeast of town Tuesday morning July 4th, Prof. Harold Y. Moffett of the department of English was thrown from his horse. He received a broken collar bone and two fractured ribs. The horse fell while galloping, throwing Professor Moffett. He was taken at once to the University hospital where he remained until Wednesday afternoon.

He is very weak but getting along well. Physicians say that his injuries are not serious.

DUNLAP WILL LEAVE JULY 8 FOR NEW YORK

Prof. John H. Dunlap of the college of engineering will leave July 8 for New York. Professor Dunlap was elected permanent secretary of the American Society of Civil Engineers at a meeting of the society in Champaign, Ill., June 30.

It has a membership of between ten and eleven thousand, with a board of directors of twenty-eight members. Professor Dunlap will be located in the Engineering Societies' building at 33 West 39th street.

Professor Dunlap's permanent headquarters will be in New York but his work will necessitate rather extensive traveling. He will visit at least once a year the thirty-four sections or geographical divisions of the society in this country.

ENGINEERS TO CONDUCT RADIO EXHIBIT THURSDAY

The department of electrical engineering will give a wireless exhibit on Thursday evening, July 6, in room 19 in the basement of the physics building. From 7 to 8 p. m. there will be received a wireless telephone program, and from 8 till 10 Prof. Arthur H. Ford, head of the electrical engineering department, will exhibit and explain wireless equipment to any who are interested.

DEVINE WRITES ARTICLE

Aubrey A. Devine, all-American quarterback, is writing an article on forward passing for the Illinois Sports magazine. At the present time Aubrey is instructor in the course of football tactics offered by the athletic department in its summer session coaching course.

LIBRARIANS IN THIRD ANNUAL SESSION HERE

Professor Weller Tells of Need of New University Library

MANY GOOD SPEAKERS

Problem of the Librarian Is to Get Books to the People

The first session of the third annual conference for library workers opened yesterday morning at 9:30 with Mrs. Julia A. Robinson, secretary of the Iowa library commission, presiding. She struck the keynote of the work before the conference when she said, "Our problem is how to get books to the people."

The address of welcome was given by Prof. Charles H. Weller, director of the summer session, representing the University in the place of President Walter A. Jessup who could not be present.

In his address, Professor Weller sketched very briefly the history of the library at the University of Iowa, and stated that the present library in the natural science building is only temporarily located. He told of a dream the fulfillment of which all interested in the welfare of the University must look forward to, a library located on the same block with the law building, which will occupy the entire length of that block.

Another building like the law building would be placed on the southeast corner of the square with another large building between the two facing the old capitol campus. This will house the entire library.

University Library Grows Fast

Professor Weller gave figures to show that the university library has been growing very fast in the six or seven years. Since 1913, according to Professor Weller, it has grown from the twentieth to the thirteenth in size of university libraries in the United States, and it is tenth in the number of volumes it has added to its shelves in that time. Only four libraries in the Mississippi valley are larger, Wisconsin, Minnesota, Illinois and Michigan.

Miss Baldwin Speaks

Miss Clara F. Baldwin, library director, state department of education, St. Paul, Minnesota, was the second speaker of yesterday's morning session. Her subject was "County Libraries—the Next Step." She began by explaining that the present system, or lack of system, in the matter of small libraries located in rural communities is inadequate for proper advancement of education.

This inadequacy however, she explained, was partly done away with when the travelling library was introduced. But, to completely solve the problem, in Miss Baldwin's opinion, a county unit must be adopted. A difficulty in accomplishing this, she said, will be found in the local pride of a community which already has a public library.

The people of these communities fear that the introduction of the county system will interfere with what they have already done, but, according to the speaker, the local library will be helped very much instead of being hindered.

County Library Best System

"Our great problem," said Miss Baldwin, "is in convincing the rural people that our plan is the best, and in persuading our county officers to

(Continued on page 4)

CONFERENCE MEET WILL NET \$4,600.00 IN PROFIT

The Conference track and field meet, held here June 3 and 4, will net the conference approximately \$4,600. The total gate receipts amounted to \$5,500. The expenses of conducting the meet totaled \$900. Of the sum sent to the conference certain incidental expenses must also be deducted before the net profits accruing may be determined.

EIGHTY GO ON TOUR TO WEST-SIDE CAMPUS

Eighty persons visited the west-side campus yesterday under the leadership of Prof. Charles H. Weller, director of the summer session. The first stop was the Children's hospital, where the tourists were shown the boys' ward, girls' ward, pediatric ward, gymnasium, playground and workshop where casts and braces are made for the children.

At the psychopathic hospital, the laboratories, classroom, and dining room were inspected. On account of the rain some decided to drop the trip, while the others continued on to the Quadrangle and the Armory. On the way there they passed the government wireless station, which is situated south of the psychopathic hospital on University property. It is one of a chain of stations operated in connection with the air mail service.

DOUBLES TOURNAMENT IN TENNIS TO START AFTER SINGLES MATCH

As soon as the championship in the singles of the tennis tournament is determined, play will begin in the doubles which are now being drawn up. An entry blank is now posted at the east door of the men's gymnasium, and those desiring to take part in the doubles tournament may sign up at once.

All entries must be in by Friday, so that drawings can be made and the tournament may get under way immediately. In the doubles tournament last summer, John M. Dorsey, and Professor F. K. Knight of the psychology department defeated E. Fannon and H. Brandenburg for the championship.

ART STUDIO IS OPEN TO PUBLIC THIS WEEK

A number of students of the summer session are visiting the exhibit now being held at the art studios. The interest of most of the visitors is centered on the work now being done by the students in the art department. The art studios are to be open from 2 to 4 p. m. for the rest of this week.

The exhibit includes a Medici print of "The Chase," by Ruysdael, recently presented by Prof. Gilbert L. Houser of the department of animal biology, to the department of graphic and plastic arts.

This work is of special interest because of its dissimilarity with the work of today. It brings out to the most minute detail everything in the picture. Each leaf of the trees in the picture is developed perfectly.

The tendency today is to emphasize more the color and shadings and to place less stress on the development of the less important parts of the picture.

In the still life room many sketches in black and white from plaster casts of antique statuary are on exhibit. In rooms 221 and 223 decorative designs for cretonne and wall paper, lettering and posters, color crayon, water color, and oil sketches are exhibited. The technique of light and shade, and balance and arrangement are all demonstrated by the arrangement of the studies.

DOCTOR BALDWIN GIVES WEEKLY ASSEMBLY TALK

Willis W. Grant Unable to Be In Iowa City for His Lecture

TELLS OF RESEARCH

Iowa's Station a Pioneer In Study of Normal Children

Dr. Bird T. Baldwin, director of the Iowa child welfare research station, addressed the assembly in the natural science auditorium yesterday morning. Willis W. Grant of the board for vocational education, who was to have addressed the assembly, was unable to appear because of the lateness of his train.

Dr. Baldwin told about the work of the child welfare research station, which was established by the state in 1917, "having as its objects the investigation of the best scientific methods of conserving and developing the normal child, the dissemination of the information acquired, by such investigation, and the training of students for work in such fields."

"What is a normal child?" he asked, and proceeded to explain.

Much time and effort has been devoted to the welfare of retarded, delinquent, and subnormal children, but little research has been given to the problems of conserving and developing normal children. Iowa established the only station in the world for this purpose, in connection with the University, appropriating \$25,000 a year for its support. The W. C. T. U. has since donated a sum of \$50,000 to be distributed over a period of five years. "A child has five ages, chronological, physiological, mental, pedagogical, and social or moral. In a normal child each age is developing at its maximum and the physiological, mental, pedagogical, and social ages are balanced. Children should not be promoted on the basis of one alone, but all five should be considered as they are parallel and interrelated."

The study by the station is done along a number of different lines, such as psychology, anthropometry, nutrition, eugenics and genetics, sociology, vocational guidance, and cooperates with other departments of the University to great advantage. Eight bulletins have already been published and six more are ready for the press.

Doctor Baldwin told briefly of some of the work that has been accomplished. Practically everything that has been written about how children grow has been assembled. A million and a half growth curves have been made. Individual measurements of a large number of boys and girls have been made over a period of from five to twelve years. If the length of an infant is determined at birth, the height of the child at six can be predicted, and if the height of a child at six is known its height at sixteen can be predicted. It is more important to measure an infant than to weigh it.

A similar set of mental growth curves is being made and the relation between physical and mental development carefully studied. These charts show that superior children mentally are usually superior physically. They also show that during adolescence both mental and physical growth tends to speed up, bringing us part way back to the ideas advanced by G. Stanley Hall. In recent years educators had been convinced that the growth curve was more nearly a

COLLEGE TRAINING

From time to time during his college course a student is led to a serious consideration of the worth of higher education. There are always two forces at work shaping his motives in this respect. On the one hand is the urge of those who tell him that a college education is necessary to success. Working against this is the influence of those who uphold the idea that a college education is superfluous as regards attainment. Opinions of others are often impelling influences and when there is a definite conflict in ideas, there is sure to be confusion as to which course to follow.

Hamlin Garland in a recent lecture pointed out that the greatest American writers have not been college trained men. He cited Mark Twain, William Dean Howells, and Joaquin Miller as examples of the writer who could succeed without college training. Mr. Garland called attention to the literary products of the college trained writers of the present in contrast to those of the above writers to show that in the literary field, a college education was far from an assurance of success.

Charles M. Schwab, the magnate of the steel industry, and not, himself, a college man, has often expressed his preference for men who have not received a college training, but who have been educated in the well-known and justly-famous "school of experience."

On the other hand, there are such men as the senior Marshall Field, founder of the famous institution which bears his name and Penfield Hoyt, with whom a college education was said to be a criterion of the best in business and professional preparations.

Whether a college is the equivalent of a through ticket to success or not, the venter of higher education doubtless helps to develop the latent capacities of the individual. On the other hand, if he does not possess the ability to succeed, no college can give it to him, and if he does have it in him he will succeed without the college training. The college is a means and certainly not an end in the development and training of the average person.

A LIBRARY FOR ALL

There are two aspects to the use of the library which deserve, and occasionally receive, unfavorable comment. One of these is lack of use, and the other is misuse.

A professor, in making an assignment the other day, told his class: "The work for tomorrow will include some outside reading in several reference books. For those who are ignorant of the location of certain interesting features of the campus, I may say that the University library is located in the natural science building." And in spite of the apparent sarcasm, it would not be surprising if the professor's announcement were really informational to some of the members of his class.

But of those students who know the location of the library and occasionally frequent its hall, there are a number who fail to realize that the library is meant to be used by more than one, or even a few, students.

One objectionable disturbance is the person who insists upon studying to himself or rather whispering what he reads. But by far the most detrimental distraction is that afforded by couples who habitually use the li-

brary as a trysting place—a den for campus gossip, or a place to display davenport etiquette. A little bit of this conduct would not be objectionable but when it begins to dominate the library for such purposes to the detriment of those who are there for concentrated study, it does not help to make the library fulfill the purpose for which it was intended.

If the University library were larger and if it were not in use so constantly, one or two corners might be provided where visitors who prefer the atmosphere of the library to that of the theater or parlor might enjoy their tete a tete without being distracted by those who wish to study. But under the existing conditions, such is quite impossible.

When students realize that there are others besides themselves who have to use the library for the things for which it was intended, the University library will fulfill its purpose.

RIUTSU EGIMTO

Sugar and spice and all things nice, that's what little girls are made of! We hesitate to print the corresponding rhyme telling what little boys are made of, but it makes us think that the little boys are reputed as possessing more snap and go than is generally accredited to the little girls. But when the little girls are grown women and are planning a monster dinner for all the women who are registered in the University for the summer, it is time to wake up and show that University women are not made of sugar altogether.

The majority of the women who are buying tickets for the dinner are wide-awake, capable people who wish to have a good, jolly time with congenial company. They do not wish to hear everything around the University prated and lauded in a lot of dry toasts. For this reason the committee in charge of the program is hoping to put over a spicy evening containing lots of ginger.

That some of our regular University student women are too disinterested to buy tickets is a reflection on their loyalty. If they are not willing to give the glad hand to the other students on the campus this summer they are showing a lack of good sportsmanship. We should be loyal to campus projects all the time and not lose our interest in the summer, as we sometimes do our religion, because it is hot. For this is an all-University women's dinner in which no one is to be labled as anything but a University woman.

LIBRARIANS HAVE PICNIC

About sixty persons attended the picnic given yesterday afternoon at 6 o'clock at the city park for the librarians attending the third annual conference for library workers.

Seven people have signed up to take riding lessons. Dr. Marian O'Harrow of the student health department has charge of the arrangements.

CHAMPIONSHIP IS DECIDED TODAY

Final Match Between Gillis and Dorsey; Gillis Doped Champion

Lee J. Gillis defeated E. Fannon in the semi-finals of the tennis tournament yesterday afternoon in a match featured by hard drives and spectacular recoveries. The score was 6-1, 6-1.

The other match of the semi-finals was between John M. Dorsey and Prof. William S. Maulsby, Dorsey winning 6-2, 6-1. The winner of these matches will play this afternoon for the championship of the University in the singles. Those who witnessed the playing yesterday afternoon are of the opinion that Gillis will win the tournament.

The first game opened up with Fannon playing a fast driving game, Gillis recovering and returning them as fast as they were sent. After a few fast balls had been played, both men settled down to a slower pace, but only for a short time.

Fannon's playing was featured by the low fast returns which he made. In the second set Gillis won the first four games before Fannon was able to score, but Fannon won his game after some difficult playing.

Results of the Tournament

The winners of the semi-finals were:

Lee J. Gillis defeated E. Fannon, 6-1, 6-1; J. M. Dorsey defeated W. S. Maulsby, 6-2, 6-1.

In the third round: L. J. Gillis defeated F. D. Knight, 6-4, 6-2; E. Fannon defeated J. L. Parkhill, 6-3, 6-4; J. M. Dorsey defeated Blackstone, 6-4, 6-2; W. S. Maulsby defeated H. W. Scott, 1-6, 6-3, 6-0.

In the second round: F. D. Knight defeated E. Chamberlin, 4-6, 6-3, 9-7; L. J. Gillis defeated W. L. Peterson, 6-1, 6-1; E. Fannon defeated D. O. McGovney, 6-1, 6-2; J. M. Dorsey defeated W. H. Lemmel, 4-6, 6-2, 6-4; W. S. Maulsby defeated R. F. Miller, 6-1, 4-6, 8-6.

In the preliminaries: E. Chamberlin defeated E. W. Chittendon, 6-3, 6-2; F. D. Knight defeated T. A. Hunter, 6-2, 6-2; L. J. Gillis defeated H. W. James, 6-0, 6-1; W. L. Peterson defeated R. C. Hurd, 6-4, 4-6, 6-3; Ricketts defeated Ramsey, 6-11, 0-6, 6-2; J. L. Parkhill defeated P. W. Hoff, 6-1, 6-3; E. Fannon defeated Guthrie, 6-0, 6-0; D. O. McGovney defeated Ball, 6-2, 6-3; K. Burkholder defeated Randall, 3-6, 6-4, 6-4; Blackstone defeated W. A. McCullough, 6-3, 5-7, 9-7; J. M. Dorsey defeated A. Gilbert, 6-1, 6-0; W. H. Lemmel defeated A. L. Spooner, 6-1, 6-0; W. M. Maulsby defeated Edgar, 6-0, 6-2; R. F. Miller defeated R. W. Houston, 6-1, 6-0; W. H. Dargan defeated McMurray, 6-3, 6-3; H. W. Scott defeated W. L. Hunter, 6-8, 6-2, 7-5.

ONE-ACT PLAYS GIVEN AT LIBRARY MEETING

The Out-of-Door Players presented two one-act plays, "Overtones" and "The Clod," before an audience of students and library conference workers at 8 o'clock last evening. These plays, which were on the programs presented in the open air theater last week, were repeated for the benefit of those attending the conference for library workers.

"The Clod" was coached by Charles V. Brown. M. Irene Sinclair and Mr. Brown coached those appearing in "Overtones."

On July 7 the Out-of-Door Players will present "You Never Can Tell," by Bernard Shaw, and on July 14 Shakespeare's "As You Like It" will be given.

PROF. CLIFFORD H. FARR TO SPEAK THURSDAY EVENING

Prof. Clifford H. Farr, of the botany department, will speak Thursday evening at 8 o'clock in the old science hall on "The History of the Life Sciences."

In this discussion Professor Farr will trace the development of all phases of plant sciences, such as botany, zoology, and psychology. The relation of the development to the discoveries in other sciences such as physics, chemistry, and geology will also be treated. The main viewpoint of the lecture will be from the standpoint of methods of science.

The University orchestra will make its first appearance at the Shakespearean production, "As You Like It," on July 14.

BAPTISTS BUILD STUDENT HOUSE

New Center Will Give Students Same Advantages As Home Life

The Baptist church and the State Baptist convention have completed plans for the Iowa State Baptist student center. The building to be used for this purpose is already under construction and is being erected on the corner of Clinton and Bloomington streets. The building covers a space of thirty by forty-six feet; it will be three stories high, and of brick construction.

"This building is to be strictly modern throughout. When it is completed it will be the finest site in the city with possible exception of the presidents home" said Rev. Ray E. York, pastor of the Baptist church and student pastor of the University.

"Other churches over the country have tried schemes similar to this but there is no institution exactly like this one in the United States. The fund for the erection of this building was taken from the new world movement fund which the Baptists of the world are raising for benevolent and educational purposes. The cost of the house and grounds amounts to \$30,000.

"The Baptist church of this city is interested in the welfare of the students and has built club rooms in the church basement for the students," said Reverend York. "These rooms have been used and appreciated by those who have used them. The church is attempting to carry out an entirely different plan in inaugurating this new center. The rooms in the church are to be used for the club life of the students and the building we are erecting is to be used for an entirely different purpose, but still working toward the same end.

"We have realized that an introduction of home life was needed here in the University. The idea of the new center is to give to the students the same advantages he received in his own home.

"If this center is to be a success, the people using the home must realize that it is their home when at the University, and should treat it as they would their own home. The plan is to have the use of the house limited to those who make reservations for it."

Rev. Mr. York is to make his home at the house in order to enable him to assist the students with any plan they wish to follow out.

The house will consist of fifteen rooms and a large basement. The dining room and parlor are to be built of such dimensions as to make possible the accommodation of a large group of young folks. The pastor's quarters are to be separate from the students' rooms but at all times someone will be there to chaperon groups of students.

"We feel that young people of the University are not able to spend their long winter evenings together without going to dances or to movies, said Rev. Mr. York. For men and women of moderate means this is sometimes impossible and it is because we realize the necessity of social life among young people that we are building this home.

"It will be possible to secure the use of the parlor and the kitchen and dining room by making reservations at the home.

The building will be ready for occupants by the first of October. Reverend York will take up his residence there as soon as it is opened.

CHINESE MINISTER TO COME

Hon. Fang Yuan-Lien, Chinese minister of education, plans to come to the United States, says a message to the Chinese club. The members of the club say that he expects to attend the University of Iowa for one semester to do some special work in the field of education.

Plans are being made for a joint men's and women's swimming meet during the first term of the summer session.

A TIP FROM DEVINE

Charles L. Parsons and Aubrey Devine stop for a chat during a class in football tactics.

DEVINE WORKS WITH PARSONS

Two of University's Three Nine-"I" Men Now In University

Aubrey Devine, Walter Camp's all-American selection for quarterback on his mythical football eleven last year, has Charles Parsons as a member of one of the teams in football tactics at the University of Iowa. Parsons is one of many coaches from Iowa and other states who is attending the summer session coaching courses.

Parsons was the second University of Iowa man to win nine "I's"; Devine was the third, and Walter L. Stewart was the first. Like Devine, Parsons won his letters in football, basketball, and track.

Parsons returned to Iowa City following the expiration of his contract as coach of athletics at the Colorado School of Mines at Golden, Colo. Although he contemplated retiring from coaching work, he is now considering several tentative offers from Iowa and Illinois colleges.

"The fundamental basis of football tactics has changed little during the seven years since I left the University," said Parsons. "The noticeable change is that everything is now worked down to a finer degree of perfection. Although one can keep abreast of the times by reading, it is much better to get first hand information. That is why I am at the University of Iowa. Devine has the dope on forward passing, and I want to use it correctly.

"I wish all of the coaches within the state would agree to come to the University for our six weeks' course", commented Devine. "It would be for the good of the game. During discussions we could profit by each other's experiences."

CLASSICAL CLUB TO MEET

The Classical club will meet tonight at 7 o'clock. The program for the evening includes a number of short talks, games, and refreshments. Those who are interested in the club are invited to attend.

ORCHESTRA WILL REHEARSE

The summer session orchestra under the direction of Prof. Phillip G. Clapp, head of the school of music, will rehearse in the school of music building at 7 o'clock tonight.

Professor Edward C. Mabie will leave at the close of the first session of the summer school to join Stewart Walker in his repertoire theater at Indianapolis.

PARSONS HELD MANY UNIVERSITY RECORDS

Charles L. Parsons' University of Iowa records in the 440 and half mile withstood seven years of competition until Eric C. Wilson and Gerhard B. Noll lowered the records at the Iowa-Northwestern dual meet held at Iowa City, May 6.

At the Drake-Iowa dual meet in 1913 Parsons set a University record of 50 3-5 seconds in the 440-yard run. Wilson lowered the record one second, his time being 49 3-5 seconds.

At the state meet in 1914 Parsons ran the half mile in 1 minute 58 3-5 seconds. Noll lowered this record 1 1-5 seconds, the new record being 1 minute 57 2-5 seconds.

Since graduation in 1915 Parsons has been coaching continuously with the exception of a period of service in the World war. After graduation Parsons coached during 1915 and 1916 at Trinity college, Sioux City. He then coached one football season at the Colorado School of Mines, Golden, Colo.

After returning from service in 1919, Parsons coached football, basketball, and track at Colorado college, Colorado Springs, until 1922.

As a coach at Colorado college, Parsons has an enviable record. In 1919 his football team won the championship of the Rocky Mountain conference, and second place in 1920. His basketball team won the basketball championship in 1922.

During the three years that Parsons was coach, his teams entered in 180 games. Of this number his teams won 124, tied three and lost 53.

FOREIGN LANGUAGE ROUND TABLE WILL HOLD SESSION TODAY

Prof. Charles B. Wilson, head of the department of German, will preside at the first foreign language round table to be held in room 104 liberal arts building at 4 o'clock this afternoon.

This is the first time such a round table has been held at the University. The project originated with Professor Wilson and Prof. Charles E. Young of the department of Romance languages, and is to include the French, Spanish, Latin, and German languages.

The subject for the round table is to be "Objectives", and the speakers are to be Professor Young and Prof. Franklin H. Potter of the Latin department. They will discuss reasons for studying foreign language and foreign literature.

TO GIVE HONOR DINNER

Phi Lambda Theta, educational sorority, will give a dinner at the city park pavilion tonight at 6 o'clock. The dinner is given in honor of the thirty-five summer students who are members of the chapter.

Prof. Ernest Horn of the department of education and director of the elementary school will speak at the State Normal school of Michigan at Kalamazoo Friday, July 7. Professor Horn will address the student body on "Increasing the Efficiency of Silent Reading."

WILLIAM H. COBB IS APPOINTED AUDITOR

William H. Cobb, formerly of Tipton, Ia., has recently been appointed to a new position of auditor. He is to have charge of the accounting of the University's financial proceedings. He will also act as an assistant to William H. Bates, secretary of the University.

Mr. Cobb is a graduate of the University of Illinois, receiving his degree in commerce in 1919. Up to the time of his appointment at this institution he held the position of assistant auditor at the University of Illinois.

CHINESE STUDENTS' CLUB HOLDS MEETING

The Chinese students' club held a social meeting in the club room of the First Baptist church last Saturday afternoon. A talk on the college spirit of China was given by C. Chen, Chinese immigration to Java was discussed by K. W. Lee, and short talks were given by T. C. Chas and P. H. Hsu.

J. J. WENGERT RETURNS

James J. Wengert, Aberdeen, S. D., who graduated from the University last June, has returned to Iowa City where he has a position on the advertising staff of the Iowa City Republican. Mr. Wengert was advertising manager of The Daily Iowan last year.

FRENCH PRISM BINOCULARS

At last we are able to show you real powerful Prism Binoculars at prices that please anybody. We only have a limited amount, and therefore advise early shoppers.

COASTS'

LIBRARIANS IN THIRD ANNUAL SESSION HERE

(Continued from page 1)

make the change. The law should be so changed as to make it easy to establish libraries. Ample support must be given in order to carry the work on effectively." She then gave instances in which the county plan had been worked out.

Miss Baldwin's chief suggestion as to the way the county library plan can be carried through was that of using publicity. Campaigns should be instituted, and papers used to the greatest extent to put them over, she said.

"What Portland is doing" was the subject of a talk made by Miss Helen McRaith, librarian of the East Portland branch library, Portland, Oregon. Miss McRaith, who was formerly at the University of Iowa, spoke on library work in the public schools of Portland. She stated that a course extending from the primary grades upward is given. The first grade people, for instance are taught the care of books, second grade, contents of books, and so on through the high school. Another novel feature of library work in Portland, according to Miss McRaith, is the bungalow libraries. These buildings resemble in every way ordinary bungalows and may be converted into residences, when it is necessary to change the location of the library.

"Still more unusual in connection with the libraries in Portland is the widening of the scope of their use," said Miss McRaith. "We use them also as community centers, and for baby clinics. One hundred mothers

with their babies were enrolled at the clinic last year."

Much of the community library work was with foreigners, according to Miss McRaith, and each year "foreigner parties" are held at which sometimes a dozen different nationalities are represented.

Writing News of Library

Prof. William S. Maulsby of the department of English spoke on "Writing Library News" at the 2 o'clock session.

"News should be accurate, recent, and of interest to readers," said Professor Maulsby. "Advertising is used by librarians to bring people into the library. News items should be written by somebody outside the library if possible. All the news should be given in the first sentence of the first paragraph. Clear, simple facts are all that is needed."

Business Man Needs Library

Frank K. Walter, librarian of the University of Minnesota spoke on the "Possibilities of the Public Library for the Business Man" at 3 o'clock.

Mr. Walter spoke of the business man as a dominant factor in the modern economic world of today and the necessity of having a library in the community which could help the business man to a greater success. He contends that the world is progressing so fast that the average business man will have to read in order to keep up with the changes and it is to the library that the business men will turn for his information, he said, since the library can serve him in two ways, by supplying him with reading material he cannot ordinarily afford to buy, and by supplementing what he already has in his own library.

Mr. Walter gave four rules for librarians to follow in order to make the library a success from the business man's stand point. 1 Know what business interests are represented in the town; 2 Know the leaders of these different business fields; 3 Know what they are reading now, and 4 Find out what they would read if they could get it. He also spoke of the necessity of getting people's viewpoint when choosing the supply of books to be stocked in the library.

Librarian Must Know Books

Mr. Walter stressed particularly the necessity of the librarian's knowing the books which she has to handle. This he said could be made possible by having librarian assistants specialize in the various fields over which the librarian aims to cover.

In conclusion, Mr. Walter said that the library must in the future recognize the business man or fail in one of its most important missions.

The conference program is presented through the cooperation of the extension division of the university, and the summer school for library training, and is a feature of the summer session of the University.

Those Who Registered

Those registered as attending the convention are: Lenna M. Huffman, librarian, Marion; Cornelia Rhynsburger, librarian, Muscatine; Mabel Leech, librarian, West Branch; Bessie Davis, assistant librarian, Waterloo; Frank K. Walter, librarian, University of Minnesota, Minneapolis, Minn.; Julia A. Robinson, secretary of the Iowa library commission, Des Moines; Clara F. Baldwin, library director Minnesota Department of Education, St. Paul, Minn.; Iva Glessner, assistant librarian, Waterloo; Emma Heden, Davenport; Mrs. Katherine Rhynsburger, trustee, Pella; Bessie E. Stover, Iowa City; Jesse E. Porter, Ottumwa; Alice Gay, Iowa City; Josephine Dondore, assistant librarian, Iowa City; Martha Grant, Iowa City; May B. Ditch, librarian, Ottumwa; Eva G. Denny, Washington; Pearl G. Carlson, assistant librarian Cornell College, Mt. Vernon; Cora Hume Brown Farmington; Lillian M. Guin, librarian at Bradley college, Peoria, Ill.; Helen McRaith, librarian East Portland branch, Portland, Oregon; Margery Burditt, head of circulation department, Waterloo; Ruth Hoffman, children's library, Sioux City; Cecile Stanton, cataloger, Waterloo; Golda Ausbury, Waterloo; Mrs. Rena Drizhal, Iowa City; Mrs. A. J. Barkley, Boone; E. Joanna Hagey, public librarian, Cedar Rapids; Ida E. Goldbery, public librarian, Cedar Rapids.

100 BUY TAGS DURING DRIVE

Will Sell Tickets to Women's Dinner In Liberal Arts Hall

At a meeting of the ticket committee for the Riutsu Egimto in the Y. W. C. A. rooms yesterday at 5 o'clock, six women reported the sale of over one hundred tickets during the drive Wednesday. Due to some misunderstanding about the date of the meeting most of the women failed to appear at the appointed time, and therefore it is impossible to estimate the amount of the sales for the day, but it is almost certain the sales would aggregate twice the present total.

It was decided at the meeting to arrange for the selling of tickets at the table in the upper hall of the liberal arts building during the next few days. Different members of the ticket committee will be in charge of the sale which is to start at 9 o'clock this morning and continue successively during the day.

According to those on the committee the selling of the tickets has been very easy, since every woman solicited showed an active interest in the dinner. They report that if the pep and enthusiasm shown today continues the rest of the week the Riutsu Egimto is an assured success.

The program committee also met yesterday and perfected plans for an entertainment which will, according to reports, eclipse anything that the summer session has to offer. One of the most interesting stunts planned so far is a dress pageant, the exact nature of which is not to be revealed until the dinner.

The Pi Lambda Theta educational sorority at a picnic tonight at the city park will discuss plans for their share in the entertainment.

GRANT SAYS THAT THE CIVILIAN IS IN NEED OF REHABILITATION TOO

Willis W. Grant of Des Moines, supervisor of the board for vocational education, spoke yesterday afternoon at 4 o'clock in the liberal arts assembly room on "Civilian Rehabilitation."

"My work," said Mr. Grant, "is new to a great many people. While every one has heard of rehabilitation of the soldier, few have heard the term used in connection with the civilian."

Mr. Grant will speak again tomorrow at 4 o'clock in the L. A. assembly.

DOCTOR BALDWIN GIVES WEEKLY ASSEMBLY TALK

(Continued from page 1) straight line than the kind of curve Hall showed it to be.

One of the most important lines of work being done is in the psychological laboratory for children from two to four years of age. This a most fertile field and one that has hardly been touched. The pre-school child is one of our most important problems. The time to give physical and mental tests is before a child enters school, not when he is ready to leave.

The bulletins by the station already published are as follows: "The Physical Growth of Children from Birth to Maturity", "A Survey of Musical Talent in the Public Schools", "A Preliminary Study in Corrective Speech" "An Analytic Study of a Group of Five and Six Year Old Children", "Investigations in the Artificial Feeding of Children," "Selective Migration as a Factor in Child Welfare in the United States With Special Reference to Iowa," "Child Legislation in Iowa," "The Mental Growth Curve of Normal and Superior Children."
