French invasion of Ruhr is question of Nation's Living or dying—M. Roz

"In France, the question of the invasion of the Ruhr is not a matter of whether or not it is a war, but it is a question of the nation's living or dying," said M. Roz, the French, believe in a speech given before about 100 people in the French section recently.

Thursday evening.

"Life in France has become so high, in spite of the industry and prosperity of the country that the French are exceedingly able to live. They have, however, reached the limit of their ability to maintain their standard of living."

In time of peace There is opposition among the military leaders for the question of whether or not the French are entitled to pay, at present, an internal interest of 100 francs on foreign exchange at $1 per franc. The French government has been shut out of the repatriation fund by the fact that the French are entitled to a 100 franc bond per capita for all former aliens, as against Germany: $50.

Moreover, the French are expected to pay, at present, an internal interest of 100 francs, per capita, for all former inhabitants, where they formerly paid only 10 francs.

In describing the present situation of France, M. Roz said, "France is very much in the same condition as that of the United States in the reconstruction era following the Civil War."
