SCOTT HALTED MOUNT SEARCH STUDENT SAYS

Head of Freshman Gang Tells Of Ducking Sophomores In Class Scrap

(By United News)

Chicago, May 8—Walter Dill Scott, president of Northwestern University halted an investigation of the disappearance of Leighton Mount, three days after Mount vanished in the hazing attending the Northwestern class rush in September, 1921, according to J. Allan Mills, former student, who was brought back from Akron, Ohio, Tuesday to testify before the Grand Jury probing Leighton Mount's death.

This piece of evidence was the most sensational heard by the grand jury in its first day's hearing and ranks as one of the most mysterious developments in this mysterious case since Mount's skeleton was found under a pier near the University last week.

Parents Tell Of Boy

Previously Mr. and Mrs. J. L. Mount, the boy's grief torn parents, had told the jury of their son. Mrs. Mount had set forth her son's habits, traits, character, hopes, studies, plans and accomplishments, and even his love affair with Doris Fuchs, the nursemaid.

"He was a gentle refined boy," she said. "He was indifferent about attending the class rush but I urged him to do so."

"I know he did not commit suicide; there must have been foul play."

Mills declared that he had never met Mount. He told of heading a group of some 250 freshmen who ducked several sophomores in Lake Michigan in September, 1921. The sophomores, he said, were bound in such a way that they could easily free themselves. Mills said he went to bed at about 3 o'clock in the Sigma Nu fraternity house.

Students Urged Investigation

When the campus heard of Mount's disappearance the next morning Mills said Alfred Steele, acting president of the student council; Roland Felman, president of the sophomore class; and Mills himself called on President Scott and urged him to investigate.

"Three days later," he continued, (Continued on page 8)

Professor Nutting Denies Being With Movie Producers

Professor Charles C. Nutting, head of the department of Zoology of the University denied the statement in a local motion picture theatre advertisement that, his expedition to the south sea islands last summer was constantly associated with the company which produced "Lost and Found."

"We were associated with the company only to the degree which any one must be associated with every one else on board ship. The statement which intimated that we were on the same island and at the same place during the time the picture was produced, is not true. We merely were on the ship when they boarded it to return to the United States after the picture had been produced, said Professor Nutting.

"We were not intimately associated with the company on ship board and I do not like to have it stated that we were. While we liked Mr. House Peters, the leading man and thought him a fine person many of the other members of the company were common.

I don't like to have it insinuated that I am endorsing the picture. I don't know anything about it; it may be very poor as far as I know."

HEAD OF CHEMISTS TO ATTEND MEETING HERE

E. C. Franklin

NOTHING NEW IN DISCOVERY SAYS NUTTING

Experiments In Talent Acquisition Are Old To Science, He Says

Nothing essentially new is contained in the recent discovery of Paul Kamerer of Vienna concerning the inheritance of acquired characteristics, if newspaper accounts of the nature of his research are not garbled, according to Prof. Charles C. Nutting, head of the department of Zoology of the University.

Work of a similar nature has been carried on with approximately the same results by several American biologists, Professor Nutting said. The discovery as made by these Americans and by Professor Kamerer, have little value according to Professor Nutting because they are merely the exceptions to the rule, and the difficulty of producing such results in a single case shows that there is little to be gained from such knowledge.

"Of course I can't say definitely that nothing new is contained in this man's discovery, because I haven't seen the technical papers, and newspaper accounts may be garbled," said Professor Nutting, "but as much has been accomplished right here in America if the newspaper reports are correct."

Eyes Degenerate

"Dr. Carl H. Eigenmann of the University of Indiana has carried on experiments with blind fishes, and salamanders which dwelled in caves. These fish had eyes which were degenerated, but they had eyes. One fact that was not mentioned in the newspaper accounts of Professor Kamerer's experiments with blind fishes, is that the eyes in the embryo are much larger and more developed (Continued on page 8)

Delayed Winter Day Endangers Budding Fruit Trees In Iowa

"A winter day that got lost" is one way of describing yesterday's sudden change in weather conditions. The temperature dropped to 35 degrees as the lowest for the day, nearly to freezing, and last night it was predicted that it would go to freezing temperature before morning.

Blooming fruit trees throughout Iowa and northwestern states are in grave danger of freezing. Prof. J. F. Reilly, Iowa City weather recorder, said late yesterday that should the skies clear, great loss would result to fruit crops throughout the affected area. It is thought, however, that great loss will be averted by a continuing of dark, cloudy weather to offset a marginal drop over the 32-degree point.

NEIHARDT WON FAME AS EPIC POEM WRITER

Western Poet To Give Last Of University Lecture Series Tonight

Ever since boyhood John G. Neihardt, American epic poet has been trying his hand at poetry. How he ultimately succeeded in becoming one of America's great poets is illustrated by the works credited to him. Mr. Neihardt will deliver the last University lecture of the year in the natural science auditorium tonight at 8 p. m. The lecture is free to the public.

Throughout his youth Mr. Neihardt had to struggle with poverty, spending his spare moments in scribbling verses. During his boyhood he had an ambition to become an inventor, but since he lacked the finances to put his inventions across nothing came of it.

Engaged In Many Occupation

During his youth he engaged in various occupations. He worked as a farm hand, a hod carrier, clerk, teacher, office boy, marble polisher, stenographer, reporter, editor of a weekly newspaper, which he owned for a time, and as assistant in the office of an Indian trader. He even had a short experience at hoboing.

Neihardt took the teachers' professional course at the Nebraska Normal college and later the scientific course. While he attended college, he rang the college bell as a partial means of earning expenses. After college he worked for a while in the beet fields for fifty cents a day. He had an ambition to go to the University of Nebraska, but since he could not afford it, carried copies of Tennyson's and Browning's poems in his pocket which he read whenever he could.

Is Writing Epic Poem

One of the remarkable things about Mr. Neihardt now is that he is dependent for his financial support on his income as a poet, from the garden he raises and the book reviews he writes.

Mr. Neihardt goes a long way toward disproving the statement that America has little or no national poetry, because it lacks heroic traditions on which to build. He has written two and is now writing one of a series of poems in an epic cycle of the life west of the Missouri river from 1822 to 1890. One of the qualities of his work is his power of condensation. A certain professor in a western University offers a dollar to any student who will find one (Continued on page 8)

Noted Psychologist To Visit University During Coming Week

Prof. R. S. Woodworth, nationally known psychologist and professor at Columbia university, will be in Iowa City on May 18 and 19. Professor Woodworth will be the guest of Dr. Lorele I. Stecher, of the child welfare department, and Rr. C. E. Seashore, of the graduate college, during the stay in the city. He will give no public addresses during his visit, although it had been planned to have him speak to the psychology sections, but none meet on Friday and Saturday.

While at the university, Prof. Woodworth will be extensively entertained by members of the faculty interested in psychology. Professor Woodworth is the author of many books, among them the present textbook of the psychology course at the University.

THE WEATHER

Cool, but rising temperature throughout Iowa today.

HAWKEYES DROP TWELVE INNING BATTLE 1 TO 0

Single With Bases Full Gives Notre Dame Last Minute Victory

South Bend, Ind., May 8, (Special to the Daily Iowan)—With two extra inning defeats already marked up against them the Iowa baseball team continued its fight with "Old Man Hard Luck," and again lost an extra inning game, when it fell before Notre Dame here this afternoon 1 to 0 in twelve innings.

Falvey, Notre Dame pitcher, won his own game when his single scored Thomas with the only run of one of the best games played this year on Cartier field. Castner and Thomas had singled, Bergman was hit by Becker, filling the bases. Vergara, batting for Cerney, forced Castner at the plate. The bases were still loaded with two men out, when Falvey unloaded his hit.

Just as in the Northwestern game, Iowa failed to hit, Falvey being touched for only three singles. The Irish pitcher also struck out ten men, and his support was tight. Iowa also played a good game, making only one error in the twelve innings.

Americans Don't Oppose Harding's World Court—Cox

(By United News)

Chicago, May 8—No American is opposed in principal to the world court of international justice in which president Harding has so strongly urged American membership former governor James M. Cox of Ohio, who Harding defeated in the election of 1920, declared in an address here Tuesday to the Illinois women's democratic club but no courts to interpret it.

Harding's world court plans do not entirely satisfy out and out league of nations' advocates, according to Cox, who expressed the belief that the international question should be taken out of politics.

CHINA TO PAY RANSOM ASKED FOR HOSTAGES

Peking Officials Agree To Punish Brigands And To Release Americans

(By United News)

Washington, May 8—China has agreed to pay the one million dollar ransom demanded by the bandits who hold fourteen Americans and other foreigners as hostages in the hills of Shantung province, the state department has been advised.

All demands made by the council of ministers for the release of the captives, the punishment of the bandits, and the prevention of future outrages have been agreed to.

An official cable from minister Schurman at Peking advised the state department that vigorous representations had been made by the council of ministers demanding all possible steps for the release of the captives, payment of the necessary ransom by the Chinese government, strong military tactics to suppress the brigands, and an official inquiry on which the diplomatic corps would be represented.

Demand Indemnity After May 12

The ministers also reserved the right above any material and moral (Continued on page 5)

A. F. I. WILL ELECT MEMBERS MAY 19

Senior Men's Honorary Society Considers List of Twenty Juniors

Election of new members to A. F. I., senior men's honorary society, will probably be held on Saturday, May 19, according to the committee in charge. This committee now has under consideration a list of twenty juniors who have been active in campus activities.

The constitution of the organization states that a candidate must have seventy-five hours of semester work in the University of Iowa to his credit before he is eligible for election. Ordinarily twelve members are elected from the junior class each year.

The purpose of the A. F. I., which means "All for Iowa," as quoted from the constitution is "to promote in every way possible a better University spirit in the State University of Iowa, to recognize and encourage all service of true distinction for the promotion of 'Iowa Spirit,' and to strive at all times and in every way possible for a greater co-operation and relationship among the various colleges in establishing and maintaining the traditions and customs of the University."

KRUPP HEAD GETS 15 YEAR PRISON TERM

French Sentence Von Bohlen And Directors For Inciting Riots

(By United News)

Werden, Germany, May 8—Doctor, Gustave Krupp Von Bohlen, head of the mammoth Krupp works at Essen and one of the richest men in Germany must serve fifteen years in prison and pay a fine of 100 billion marks for resisting the French.

Von Bohlen, together with nine of his directors and worker's council were convicted before a French court martial here Tuesday.

Formed Riot

The Industrialist, his directors and members of the workers' council, were charged with fomenting the riot at the Krupp plant in Essen during which fourteen German workmen were killed by French soldiers.

They were found guilty of inciting the workmen to turn out of the plant to beat out French soldiers who had appeared at the factory with orders to commandeer the automobiles in the Krupp garage.

Testimony Is Incriminating

Von Bohlen's testimony was considered by the French as most incriminating. He declared that it had been prearranged that the workers should turn out of the plant if the French ever appeared on the scene to take over the property or confiscate any part of it. The signal for this, Von Bohlen testified, was the blowing of the siren which usually called the men to work.

Siren Is Attack Signal

After the siren was blown, the French stated the workers armed with sticks, bricks, and pieces of iron launched an attack on the soldiers. The French prosecutor declared that the police did not fire into the mob until officers realized that lives of the detachment were in danger.

The lightest sentence was meted out to Herr Muller labor leader of the Krupp works. He was sentenced to six months in prison.

Distribution Of 1924 Hawkeye Starts Tomorrow

The 1924 Hawkeyes will be distributed from the janitors' room at the north end of the first floor of the liberal arts building tomorrow morning at nine o'clock. Thursday, Friday and Saturday will be given over to the issue of the books. Both windows of the room will be used and subscribers assigned to each alphabetically. Twenty-five extra copies will be on sale at the windows.

JOURNAL OF BUSINESS GOES ON SALE TODAY

"Business Forecasting: Its Present Status" is the title of the leading article in the May issue of the Journal of Business, which makes its appearance today. Written by Dr. Charles O. Hardy, one of the most active workers in this field of economic activity, gives an idea of what the study of business forecasting consists, and its future possibilities.

The Journal of Business is the official organ of the college of commerce and is published twice during the school year. Articles of interest to students of commerce and business men are published. The articles in this issue are: "The Value of Sociology to the Student of Commerce," by E. B. Reuter of the sociology department; "Some Remarks on Present-Day Railway Fears," by E. M. Winslow; and "Casual Observation in Distribution," by Bradley N. Davis.

Kappa Sigma Initiates

Kappa Sigma fraternity announces the initiations of Mason Kaupke A3 of Cedar Rapids, George Emery A1 of Spencer, Eugene Wiley A1 of Orient, Oscar Nelson A2 of Exira, Richard Nelson A2 of Exira, and Wayne Tiss A1 of Mason City.

A. F. I. Entertains

A. F. I., senior men's honorary society, entertained the members of Staff and Circle, senior woman's honorary society, last night at a banquet at the Jefferson Hotel.

Theta Sigma Phi Entertains

Theta Sigma Phi, journalistic sorority, will entertain several guests at a picnic supper in the L. A. drawing room at 5:30.

Beta Theta Pi Initiates

Beta Theta Pi fraternity announces the initiation of Everett A.

Delta Chi Dance

The members of Delta Chi fraternity will entertain at a dancing party Saturday night at the chapter house. Prof. and Mrs. Henry F. Wickham will chaperon.

Phi Beta Pi Dance

Phi Beta Pi, medical fraternity, will hold a dance at the Pagoda Saturday night. Dr. and Mrs. J. G. Greenwood will chaperon.

Pi Beta Phi Dance

The members of the Pi Beta Phi sorority will entertain at a dancing party at the chapter house Friday night, May 11. The chaperons will be Miss Esther Hocamp and Mr. and Mrs. Carl Strub.

Kappa Sigma Dance

Kappa Sigma fraternity will entertain at the chapter house Saturday night. Dr. and Mrs. John Voss will entertain.

Staff And Circle Plans Breakfast For Junior Women

Plans are now being made by Staff and Circle for the annual breakfast for all Junior women, this year to be held May 19th. It is at this breakfast that twenty candidates are elected prior to the final election of twelve women who will become next year's Staff and Circle. Every Junior woman in the University is to be invited, the invitations to be sent out soon. The committees in charge of the affair are:

Committee on place and lists Beatrice Gates of Pierre, S. D. Ruth Van Law of Marshalltown and Margaret Altman of Livermore.

The committee on decorations includes Betty Ensign of Iowa City,

Jane Coentry of Des Moines and Catherine Hamilton Pasadena Cal. The committee on the menu is Dorothy Norton of Keokuk, Maurine Yaggy of Davenport and Josephine Daus of Aitken Minn.

Committee on invitations. Agnella Gunn of Sioux City, Frances Smith of Montezuma, and Catherine Wright of Des Moines.

TO ENTERTAIN SENIOR STUDENTS AT LUNCHEON

Senior students from all colleges of the university who are members of the Methodist church will be entertained at luncheon on Saturday of this week. Rev. E. T. Gough, student pastor of the Methodist church, has issued invitations to a luncheon to be served at the church at 12:15 Saturday, May 12.

William K. Carr L4 of Lamonte, Mo., will preside as toastmaster, and Margaret Stephenson A4 of Cedar Falls and Carl Tucker S4 of Iowa City will speak. There will be music by the Methodist quartet, consisting of Mrs. Paddock, Miss Wolfe, Mr. Scott and Mr. Smith. The dinner will be served by the Ladies' Aid society.

WOMEN FAVORING LONG SATIN COATS

King Tut's Followers Are On Decrease, New York Experts Say

BY HEDDA HOYT

Fashion Editor of the United News New York, N. Y., May 8.—Long black satin coats for formal afternoon wear are vying for a place with the heavily embroidered coat effects. The more conservative women are finding the embroidered wraps too prevalent to permit their wearing them.

The new black satin coats are made on the same straight lines of the embroidered models and have the same surplice-front fastening. They are trimmed with collars of self material,uffed or embroidered in chenille, or with collars of fur such as summer ermine, white remine or monkey fur.

It is hinted that King Tut's followers are on the wane and that by the time summer has fully established itself, the Egyptian influence will be conspicuous by its absence. Floral colorings are even now more in demand than the vivid Egyptian colors.

Shawls of every known description will be popular for evening wear this summer. And they are to be worn as shawls! They will not be draped into smart wraps or cut into coats, as they were last season. Both small and large shawls will be popular owing to the vogue for short and long wraps.

Waist length capes matching the gown are to be seen a great deal before long. They will be popular for dress, as well as for sport wear. They are already appearing about the hotels at tea time and are extremely youthful and becoming. A gray gown of pleated crepe de chene has a pleated cape extending to the waistline which is attached to a straight collar of gray squirrel.

Women who prefer pajamas to night gowns will find the new sleeveless pajamas both cool and comfortable for summer wear. The armholes are cut quite long and are bound in satin ribbon.

The combination of white and canary yellow will be popular for summer sports wear.

Little jaquettes of brushed wool made exactly like the popular fur jaquettes are shown for summer wear. White and a light tan, the tan of summer ermine, are the prettiest models shown. Long capes of white brushed wool are also expected to be popular worn over the sleeveless sports frock.

Just now cinnamon and gunmetal stockings are decidedly the vogue, but as summer approaches it is predicted that lighter tans and grays will be preferable. The gauze silk weights are lovely in these light shades, although the white stocking is found to be more becoming in heavier weights. White stockings are not attractive when too sheer.

SET ASIDE PRESERVE

The San Juan Islands have been set apart as a biological preserve for the University of Washington biological station at Friday harbor, by action of the state legislature.

MANY SENIORS TO TEACH NEXT YEAR

Students Receive Appointments As Instructors In High Schools of State

Students who are interested in teaching next year are finding the spring months the best time to interview superintendents and secure the desired positions for next year. Among the appointments that have already been made through the committee on recommendations are Ruth Freeman, home economics, at Sidney, Ia.; Harold Havig, athletic coach at Kimball, S. Dak., Helen Roberts, mathematics at Bedford, Ia.; Margaret Avery, English at Anthon, Ia.

Alta M. Beemer, mathematics and physics, Fremont, Ia.; Helene J. Peebles, history, Cherokee, Ia.; Laura Lingenfelter, English and public speaking Eldora, Ia., Ethel Harper, social science, Toledo, Ia.; Pearl V. Davies, English and speech, Manning, Ia.; Ruth Rowser, English, Independence, Ia.

Roger R. Leech, mathematics, Ida Grove, Ia.; Goldie McNeese, domestic science, Dysart, Ia.; Dorothy Herremann, mathematics, Hartley, Ia.; Harlem J. Lacy, manual training and athletics, Jefferson, Iowa.

DAILY CALENDAR

Wednesday, May 9

Meeting of the Chemistry club at 7:30 in the chemistry laboratory, room 110.

Forensic council meeting at 4:30 in room 115, liberal arts building.

Cabinet meeting of Y. W. C. A. at 4:00 in liberal arts drawing room.

Regular recital, school of music, at 4:00 p. m.

University lecture by John G. Neihardt in natural science auditorium.

Thursday, May 10

Classical club at 7:30 in room 109, liberal arts building.

Tennis meet with Minnesota at Minneapolis.

Recital by Florence Kings A3 of Sanborn and Salome Foote A4 of Iowa City, liberal arts assembly room, 7:30 p. m.

Friday, May 11

Prof. E. C. Franklin will address the chemistry students.

Recital at 4:00 p. m. by Verda Walter A4 of Tipton, assisted by John William Scott A2 of Ottawa, Kan., liberal arts assembly room.

University club tea from 4:00 to 6:00 in club rooms.

Recital at 7:30 p. m. by Zita Fuhrmann A3 of Iowa City and Zola Beatty, assisted by Scioto McAdow Merndon.

School Children To Celebrate Annual Play Day on May 18

About 700 children from the public schools of the city will help to celebrate play day at the new armory on Friday afternoon, May 18. The play festival is an annual affair held every May to demonstrate supervised play, and is under the direction of the playground class, of which Miss Miriam Taylor of the department of physical education for women is the instructor.

Boys and girls, ranging in ages from three to twelve, will assemble at 2:00 o'clock and will march to the armory with their school pennants flying. There the program, which will consist of singing games by the littlest tots, relay races, wrestling and Indian dances by the boys and folk dances and the winding of the May pole by the girls will be given

NORTH CHILE DISTRICT SHAKEN BY EARTHQUAKE

(By United News)

San Diego, Cal., May 9—Restoration of communications with the Atacama region shaken Friday night by an earthquake relieved the anxiety of authorities tonight who feared a repetition of the November disaster.

More than 1000 were killed then, but so far as has been ascertained no one was killed Friday though much damage was done to property in the region.

Not In Many Seasons

Have we offered

Striking

New

Coats

AT SUCH LOW PRICES

Not only are all the coats beautifully new and clever—but the prices are so truly exceptional that the woman who spends her dollars wisely and well will be here today.

Rich looking are those fashionable coats of

Lustrosa, Brytonia and Marvella, in navy, black, brown and reindeer. All sizes. Straight-line and wrappy models.

Smart garments that formerly were \$59.50, at \$45.00 The young woman and the more mature woman—will find this a coat sale among coat sales.

SMARTEST COATS

Of Veldyne, Lustrosa, Marvella and soft quality Geroma. In navy, black, brown and other wanted colors.

Formerly to \$100.00, at \$59.50

SPRING SPORT OR TOP COATS

Formerly priced to \$40.00, at \$20.00 and \$25.00 A few sport coats are included in our offering, at \$10.00 and \$15.00 Our salespeople will serve you courteously and promptly.

We Are Studying, Too

Perhaps the habit of studying is contagious in Iowa City.

At any rate the officers and a staff of the First National are continually studying—new ways and means of being of services to the students and faculty of the university.

Make full use of the facilities we have provided to meet your financial needs, and rely on us for friendly co-operation in solving your financial problems. We are always at your command.

Iowa City's Pioneer Bank

Cara Nome Perfume

has become the

"Perfume of Fashion"

throughout the world of culture

Refined in it's nature, exquisite in odor, and having a certain subtle charm of which one never tires, Cara Nome is winning the adoption of "My Own" among so many discriminating women.

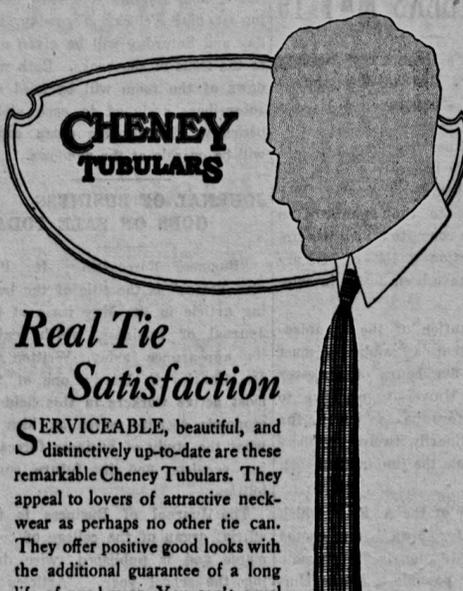

Being the master-piece of the famous French perfume artist, Monsieur Langlois, great care has been taken that it does not become unduly common and it is never sold in cut rate or department stores, which of course makes it of still greater appeal to women who seek individuality.

In Iowa City we alone sell Cara Nome perfume and preparations.

GEOLOGISTS OFFER 4 FIELD COURSES

University Faculty Members Will Conduct Work During Summer

Four field courses will be offered by the department of Geology during the summer session, according to professor Arthur C. Trowbridge. These courses will be open to those who have had one year of geology here or at some other university, with the exception of one course which is open only to graduate students.

An elementary course will be given by Chester A. Wentworth in the Baraboo, Wisconsin region. Prof. J. J. Runner is conducting a course in the Black Hills of South Dakota. This will be followed by an advanced course in the same region which will be open only to those who take the first course.

Later in the summer, Prof. Abram Thomas will give a course for graduate students in Northeastern Iowa.

The Baraboo course will begin June 6th and end July 7th. The Black Hills trip will last from July 12th to September 13th. No dates have been specified for the advanced course.

All of the courses will be limited to twelve students. "Last year the courses were all filled to capacity enrollment and it appears now that they will be this year," said Professor Trowbridge. All of these courses will yield six hours credit.

The tuition is the same as for the summer session in residence, fifteen dollars for the first session and twelve fifty for the second. Other expenses will vary from fifty dollars to one hundred.

The Cost Is Low

The department furnishes all camping equipment, instructions, drawing paper, and other supplies. The total expenses, according to Professor Trowbridge, will be less than would be required to spend the summer in Iowa City.

These regions are chosen for field work because of the diversity of geological formations to be found there. The Baraboo region is a classic field for geological study. It is used by the University of Wisconsin, Minnesota, Iowa, and Northwestern.

CHEMISTRY PROFESSORS ATTEND SECTION MEETING

James N. Pearce, professor of chemistry, Lemuel C. Raiford, associate professor of chemistry,

Going Into Business?

After graduation, you must bridge the "years of experience" before you will be fitted to occupy a position of business responsibility and trust.

To men who are eager to shorten these years, Babson Institute offers an intensive training course of one or two years in business practice.

No lectures; no conferences. No written work; but dictation through dictating machines and secretaries.

Babson Institute, an educational institution *endowed* for the purpose of fitting men for true executive responsibilities, invites you to send for the booklet, "Training for Business Leadership." Write today.

Babson Institute

Framed Mottoes

Jacob Cornog, associate in chemistry, Steven J. Popoff, associate in chemistry, and Earl P. Clark G of Iowa City, attended the annual inter-sectional meeting of the mid-west sections of the American Chemical Society at Urbana-Champaign, Ill., last Friday and Saturday. Professor Raiford presented a paper on "The Migration of Acyl Radicals from Nitrogen to Oxygen" in the organic group meeting. In addition to the general meetings there was a division into groups; organic, educational, general, physical and inorganic and industrial.

The American Chemical Society has at least one section in each state in the union and sometimes more than one. The midwest sections of which this meeting was composed, are: Illinois, Chicago, Minnesota, Wisconsin, Iowa, Ames, Nebraska and Kentucky.

Professor E. C. Franklin, of Stanford University, and president of this society, will lecture here May 11.

ZET-PHILO DEBATE TO DECIDE AWARD

Zetagathians Will Get Cup If They Win Debate On May 18

The Zetagathian-Philomathean championship debate on May 18 will decide the possession of the Delta Sigma Rho Intersociety forensic trophy cup for this year. At the present time in the race for points for forensic activity, Irving Institute leads with 108, Zetagathia is second with 100, and the Philomatheans third with 85, for winning the final championship debate, sixteen points will be awarded. If it goes to the Zetagathians, they will capture the cup with an eight point lead over the Irvings and a thirty-one point lead over the Philos. If the Philomatheans win the debate, Irving Institute will hold its present position as first, seven points ahead of the Philos and eight ahead of the Zets.

The cup is offered this year by Delta Sigma Rho, honorary forensic fraternity. It is intended to stimulate rivalry among the three men's literary societies. It is to be awarded each year on the basis of the winning of debates and oratorical contests under a point system, and it becomes the permanent possession of the society winning it for three successive years.

The Zetagathian-Philomathean championship contest is on the subject, "Resolved, that the rules of the Big Ten Conference should permit college athletes to participate in professional athletics during the summer." The Zetagathian team, which defeated the Irvings on February 2 on the negative in the preliminary debate, have changed sides and now uphold the affirmative. Their debaters are Charlton G. Laird A2 of McGregor, Floyd O. Racker A2 of Waverly, and Ernest G. Linder A2 of Oakland. The Philomathean negative team has been disrupted by the resignation of two of its members, Paul C. Bucy A2 of Hubbard and James M. Stewart L1 of Runnells, Floyd W. Miller A3 of Wapello, the remaining member of the original trio, Daniel W. Holcomb A2 of Iowa City, the alternate, and a third debater not yet selected, will meet the Zets. Besides deciding the Delta Sigma Rho cup race, the winners in this debate receive a prize of \$25, given each year by the Hon. Martin J. Wade of Iowa City.

University Grounds Superintendents In National Meet Here

Superintendents of grounds and buildings of universities throughout the country, gathered in Iowa City Monday to attend a convention which is being held at the University from Monday to Wednesday. This convention of superintendents of grounds and buildings is the annual meeting of the national organization and is held yearly at the various universities which are members.

The convention is meeting in the engineering building and the armory both mornings and afternoons, at which sessions the problems and work of superintendents of grounds and buildings are brought up and discussed.

CHEMICAL SOCIETY WILL MEET FRIDAY

National President To Attend Convention Of Chemical Organization

The presence in Iowa City of E. C. Franklin, president of the American Chemical Society, will occasion a joint meeting of the Iowa section and the newly organized quad-city sections of the society, to be held in this city Friday.

Preceding the evening program which principally includes the address of President Franklin to be delivered at 7:30 o'clock in the lecture room of the chemical laboratory, the guests in the Iowa section will be entertained at dinner at Hotel Jefferson. The quad cities organization includes chemists from Moline, East Moline, Davenport, and Rock Island.

"The Ammonia System of Compounds" has been chosen by President Franklin as the subject for his address. Professor of chemistry in Leland Stanford University is a title held by the speaker, in addition to his association with the national society. He received his bachelor of science and master of science degrees from Kansas University, and aside from his career as a teacher he has been detailed as head chemist at the sugar plantations of Donaldsville, La., and in the gold mines at Miramar, Costa Rica.

Officers of the Iowa Section of the national organization include the following: Dr. L. Chas. Raiford chairman; George H. Coleman, secretary; and Prof. Edward Bartow, counselor.

"GREEK" TEAMS TRY OUT FOR MEET FINALS

Finals Of Fraternity Track Contest To Be Saturday

The unexpected arrival of cold weather made it impossible to hold the second part of the inter-fraternity trials for the track and field meet to be held Saturday afternoon. Those preliminaries that were not held last night will be run off on Friday beginning promptly at 4 p. m.

Monday night trials were held in five events the 50 yard dash, 100 yard dash, pole vault, javelin, and high jump. Those to qualify in the 50 yard dash were: Nesler and Kramer, Phi Kappa Sigma; Cass, Phi Delta Theta; Reinecke, Beta Theta Pi; Piper, Sigma Phi Epsilon; Gaston, Alpha Delta Alpha; Yerkes, Delta Tau Delta.

Kramer Makes Best Time

Nesler of Phi Kappa Sigma made the best time, 58-10 seconds. In the 100 yard sprint seven men reached the finals; Nesler and Kramer, Phi Kappa Sigma, Yerkes and Hines, Delta Tau Delta; Reinecke, Beta Theta Pi; Hotz, Sigma Alpha Epsilon; Fry, Sigma Phi Epsilon; The best time for the 100 was 10 7-10 made by Kramer.

Sigma Phi Epsilon placed two men in the finals of the pole vault, Dauber and Fry. Treynor and Searle Sigma Chi, Vogel, Phi Kappa Sigma,

and Weinecke also won their way into the pole vault finals.

Linden Krasuski pulled the feature performance of the evening when he tossed the javelin 138 feet 10 1-2 inches for first place. He was closely pressed by Dauber, who took second with a heave of 136 feet. Others to qualify were Roberts, Sigma Pi, Gage, Phi Kappa Psi, and Fleckenstein, Delta Tau Delta.

More Preliminaries Friday
Dauber the all-around athlete of the Sigma Phi Epsilons continued his good work by taking first in the high jump. Weinecke, Kappa Sigma, P. F. Smith, Phi Kappa Sigma, Van Oosterhaut, and Fleckenstein, Delta Tau Delta, and Sinclear, will also compete in the finals. Height was 5 feet 3 inches.

Six teams will run in the mile relay, Beta Theta Pi, Phi Kappa Sigma, Sigma Phi Epsilon, Phi Kappa Psi, Theta Tau, and Phi Gamma Delta.

The trials to be held Friday night are as follows: 4:00 p. m. preliminaries 220 yard dash; 4:15, preliminaries 220 yard hurdles; 4:30, semi-finals 220 yard dash; 4:45, semi-finals 220 yard hurdles; 5:00, trials half mile relay; 4:00, trials broad jump and shot put; 4:30, trials discus and hammer throw.

MIKE HOWARD BEATS RUSSIAN WRESTLER

Coach Mike Howard won from Ivan Seoff, the Russian wrestler, at Des Moines Monday night with two falls. The first fall came in three minutes and twenty seconds, and was won with an arm scissors. The second fall was won after four minutes and forty seconds of wrestling.

IOWA'S TENNIS TEAM TO PLAY AT MINNESOTA

Gophers Have Three Veterans; Meet Is Saturday

Cold and rainy weather have halted tennis preparations for the Minnesota-Iowa meet which will be held at Minneapolis, Saturday May 12, the second conference meet of the year for the Hawkeyes.

Coach Van der Zee's net men so named the meet ended this season and the meet ended in a tie. The Hawkeyes were scheduled to play against the Northwestern quartet last week but three of the Purple's first string men became ineligible the day previous to the meet and the matches had to be postponed.

The Minnesota tennis team has three experienced men from last years' squad playing. Despite this fact Wisconsin easily defeated the Gophers last week getting a clean sweep in all the matches, winning 6 to 0.

As the Old Gold men played the Badgers to a tie in their first conference game it should be able to take the majority of matches Saturday. Physical Director Ernest G. Schroeder will accompany the team to Minneapolis.

Director Schroeder is trying to arrange the postponed matches with Northwestern to be played here at 4 p. m. senior day, Wednesday, May 16. The Chicago net men will meet the Hawkeyes here at 10 a. m. on the morning of the state field meet, May 19.

Entry blanks for the Western Intercollegiate Tennis Meet which will be held at Chicago May 24, 25, and 26 have been received by Director Schroeder and the Hawkeyes will be registered for the tournament.

WOMEN'S BASEBALL TEAMS ARE PICKED

First Round Of Tournament Will Be Played On Thursday

With teams picked and the first round of the tournament set for next Thursday at 4:15, coed baseball is in full swing. It is expected that the games between the freshmen and sophomores will be especially peppy, because of the interest shown by those classes. The games will be five innings long with Mrs. Marion L. Schwob of the gymnasium department, umpiring.

The women on the teams and their positions were given out yesterday by Mrs. Bess Baker of the gymnasium department. The freshman team will be represented by Delma Harding of Iowa City, short-stop; Cora Van Beek of Sioux Center, short-stop; Gladys Brooker of Omaha, Neb., first base; Esther Fellows of Algona, pitcher; Nellie Rader of Newton, fielder; Gladys Hirt of Hills, catcher; Corrine Mathis of Boley, Okla., third base; Blanche Clapper of Rhodes, second base; Beulah Williams of Bronson, fielder. The substitutes for the freshman team will be Delma Harding, pitcher; Cora Van Beek, second base; Genevieve Harter of Keokuk, for third base; Chloe Carson of Toledo, fielder.

Sophomore co-eds on the class team are Evelyn Harter of Keokuk, pitcher; Marie Pope of Des Moines, catcher; Genevieve Kirk, first base; Ivon Loveless of La Porte City, second base; Georgia Grigsby of Des Moines, third base; Josephine Buis of Doon, short-stop; Alice Gay of Iowa City, short-stop; Lorraine Crawford of Des Moines, fielder; Lillian Barr of Clarinda, fielder.

The junior coeds playing on the team are Esther Flynn of Iowa City, pitcher; Naomi Moore of Iowa City, catcher; Grace Dyke of Iowa City, first base; Lois Burns of Hartley, second base; Alice Gurlitz, third base; Helen Spencer of Des Moines, short-stop; Mona Silverthorne of Wapello, short-stop; Anna Belle Robinson of Burlington, fielder; Ruth Morris of Stockport, fielder.

Positions given to senior women are Pauline Spencer of Des Moines,

pitcher; Callie Buser of Conesville, catcher; Anne Singer of Sheldon, first base; Lela Trager of Allison, second base; Leona Wiggins of Prairie City, third base; Emily Hartmann of Junction City Kans., fielder; Vae Ross of Cedar Falls, fielder; Gladys Taggart of Spencer, short-stop; Audrey Strand of Moorhead, short-stop.

Fidler Will Box Frazier Thursday In Cedar Rapids

Dave Fidler, University boxing instructor, will meet Jack Frazier, Des Moines lightweight boxer, in a ten-round go at Cedar Rapids tomorrow night. It will be Fidler's first fight in several months. Frazier has been traveling in great style recently. He has won his last four fights by knockouts. He has changed his style of fighting to improve his defense and in place of the open slugging performance he has adopted jabbing tactics. He is a teaser with his left, but brings the right hand up and over to deliver the big punch. Fidler has been working out at the mens' gymnasium for the past several weeks and hopes to win his encounter with Frazier in a decisive way.

French Bar Paddock From Competition In International Games

(By United News)

Paris, France, May 9—The French Federation prohibited the Sunday finals of the International collegiate games here owing to the continued defiance of Charlie Paddock, world champion sprinter, to the federation ban.

The federation further announced that any French or foreign athlete taking part in the games tomorrow would be penalized, the nature of the penalty to be decided later.

Because of the objection of the Amateur athletic union of America to Paddock's participation in the French games the federation ruled that Paddock would be allowed to give an exhibition but would not be

allowed to compete otherwise.

Paddock's avowed intention of continuing to compete gave rise to the federation's latest move.

GREEK LETTER GROUPS ELECT NEW OFFICERS

Most Of Fraternities And Sororities Now Have New Leaders

Nearly all of the Greek-letter organizations on the campus, both social and professional, have held their spring election of officers for next year, although a few are still to be held. The sophomore class played a prominent part in this year's elections when a number of second year students were elected to office.

Sorority women who will act in the capacity of presidents and stewardesses are Marguerite Kizer A2 of Des Moines, president of Phi Omega Pi; Martha Walker A3 of Corydon, president of Alpha Delta Pi; Gladys Fie G of George, president of Alpha Tau Beta; Chloe Carson A2 of Toledo, president, and Stella Helming, stewardess, of Alpha Gamma Pi; Lois Jackson A3 of Mechanicsville, president of Alpha Xi Delta; Ruth Berner A3 of Merrill, president of Chi Omega; May Becker A2 of Elkader, president, and Naomi McClurg A2 of Spencer, stewardess of Delta Delta Delta; Marjorie Turner A3 of Corning, president of Delta Gamma; Alice Timberman A2 of Massena, president, and Esther Burns A2 of Tiffin, stewardess of Delta Zeta.

Margaret Decker A3 of Davenport, president, and Margaret Shaw A3 of Mitchell, S. D., stewardess of Gamma Phi Beta; Lenore Smith A3 of Guernsey, president, and Josephine Bockwoldt A3 of Galva, stewardess of Iota Xi Epsilon; Marion B. Faville A3 of Iowa City, president, and Martha Dean A3 of Sioux City, stewardess of Kappa Kappa Gamma; Esther Flynn A3 of Iowa City, president, and Bertha Roberts A2 of Marion, stewardess of Kappa Delta.

Men elected to fill the corresponding offices in fraternities are Walter F. Bergendorf A3 of Rock Island, Ill., president, and Kirk Yerkes A2 of Cedar Rapids, steward of Delta Tau Delta; A. V. Sebold D2 of Davenport, president, and James M. Simons L1 of Fairfield, steward of Acacia; F. E. Van Alstien L1 of Gilmore City, president, and L. N. Torrance S4 of Belle Plaine, steward, of Alpha Delta Alpha; G. W. Gilfillan M3 of Milton, president, and Byron Biersborn A4 of Liscomb, steward of Alpha Kappa Kappa.

George Gibbs A2 of Alton, president, and C. F. Anderson A2 of Mason City, steward of Beta Theta Pi; G. W. Tompkins L1 of Garrison, president, and Miles Hoag L2 of Waterloo, steward of Chi Kappa Pi; Meredith Barret A3 of Dayton, O., president, and Glen Cray L3 of Marshalltown, steward, of Delta Chi; Stanley S. Burrill A3 of Akron, president and George Crane A2 of Dexter, steward, of Delta Kappa Gamma.

O. H. Chatterton D3 of Clinton, president of Delta Sigma Delta; H. W. Horsch L3 of Davenport, president, and H. J. Thoma L1 of Postville, steward of Delta Theta Pi; Harry M. Harper M2 of Fort Madison, president, and H. N. Bacon A4 of Des Moines, steward, of Kappa Alpha Psi; Gordon Rath L4 of Waterloo, president, and Harry Peveril A1 of Waterloo, steward of Kappa Sigma; Dwight Ensign M3 of Iowa City, president, and John M. Lloyd M1 of Williamsburg, steward of Nu Sigma Nu; Franklin Gill L3 of Sioux City, president, and Iver Christoffersen L1 of Cedar Falls, steward of Phi Alpha Delta.

Harry H. Lamb M3 of Davenport, president, of Phi Beta Pi; Will Price L2 of Des Moines, president, and Frank Shuttleworth G of Sidney, steward of Phi Delta Theta; Archie Urdangen S3 of Muscatine, president of Phi Epsilon Pi; Bennett Cullison L1 of

Harlan, president, and Harold Clifton S1 of Webster City, steward of Phi Gamma Delta; Karl Hoffman D3 of Le Mars, president, and George J. Roland D1 of Missouri Valley, steward of Phi Kappa.

David W. James D1 of Colfax, president, and Harland Apfel D1 of Shell Rock, steward of Phi Kappa Sigma; George A. Swassink M3 of Muscatine, president and steward of Phi Rho Sigma; W. J. Day A3 of Cedar Rapids, president, and Linden Krasuski A2 of Davenport, steward of Sigma Alpha Epsilon; Max Roth Cm3 of Ottumwa, president, and Charles Wherry A3 of Wyoming, steward of Sigma Chi.

Robert L. Block L2 of Davenport, president of Sigma Nu; Vernon B. Thomas A4 of Omaha, president, and Harry L. Jones Cm3 of Burlington, steward of Sigma Phi Epsilon and Dean Litchfield A3 of Waterloo, president, and John Heddens A3 of Wellsburg, steward of Sigma Phi.

LAWS ENTERTAIN AT KIWANIS CLUB

Turn Fun-Makers For Day And Make Merry At Weekly Luncheon

Discarding their assumed dignity as legal lights in the making to display their special aptitude as musical entertainers, students of the college of law, and for the most part, members of the Jubilee cast, took the stage yesterday noon at the Burkley Hotel where members of the Iowa City Kiwanis Club were holding their weekly luncheon. The laws were guests of honor of the club.

Local color was introduced into the program when B. D. Silliman L3 of Boone in his Ukelele specialty "Variable Variations" included the Kiwanian celebrities: Aldous, Sidwell, Keller, Randall, Kay, Feisler and "Barney" Dondore, in its panning.

Rivaling fun-makers who shared cabaret honors with lawyer Silliman, were Wm. S. Kelly L2 of Newton and Glenn F. Cray L2 of Marshalltown, who in costume gave the university interpretation of the comedy hit, "Gallagher vs. Shean."

"The Lawyer Has 'Em Cheated in the Morning—in the Evening—Here at Iowa"—were contributions of the parody artist M. M. Stafford L1 of Dubuque.

Harmony rather than wit featured the selection of the Venttian Serenaders, Allebach-Fribourg, Hardwig, and Larson,—their orchestra arrangement being three violins and a cello. Encored for his rendition of the vocal solo, "Mother in Ireland," C. D. Krepps Jr., L1 of Maquoketa, further favored the assembled Kiwanians by singing "Fate." E. C. Hardwig L1 of Waverly played the cello accompaniment to the vocal selections.

GARLOCK AND LAMSON SEEK Y. M. CHAIR

Two Tickets Nominated For Annual Election Of Officers Today

The annual election of the officers of the university Y. M. C. A. will be held tomorrow from 8 to 5. The polls will be in the university Y. M. C. A. All men who have contributed to the support of the Y. M. C. A. will be eligible to vote.

On one ticket the candidate for president will be Richard Garlock A2 of Maxwell and the candidate for secretary will be Clinton Nasby A2 of Bode. On the other ticket will be Russell Lamson L1 of Waterloo for president and Richard Romey A1 of Mason City for secretary. In former years two full tickets have been nominated. However this year the candidate for president receiving the highest number of votes will be president and the other candidate will be vice-president. The same plan will be followed for secretary. The low candidate will be a member of the cabinet.

Richard Garlock, candidate for president is a member of Alpha Tau Omega and has taken a prominent part in the association's work among new students. Clinton Nasby, candidate for secretary on the same ticket is a member of Delta Tau Delta. He recently attended a convention of college Y. M. C. A. workers at Cedar Rapids.

On the other ticket Russell Lamson is a member of Beta Theta Pi. He was chairman of the interchurch party and has had wide experience in church work for students. Richard Romey, candidate for Secretary, is a member of Phi Kappa Psi. He has been especially active in the

counter work established at the University Y. M. C. A. last fall.

Except for the defeated candidate for secretary the president elect and R. H. Fitzgerald will select the Y. M. C. A. cabinet which will have charge of the various phases of University Y. M. C. A. work.

The candidates were nominated last week by a nomination committee appointed by the president according to the usual custom of the Y. M. C. A. At this same time the method of election was also decided.

The retiring officers are Roscoe Nash Cm 4 of Tipton, president; V. Craven Shuttleworth L2 of Sibley, vice-president, and Gerhardt B. Noll A4 of Waukon, secretary.

Y. W. C. A. WOMEN PLAN HOUSE PARTY MAY 19

A house party for the entire Y. W. C. A. cabinet is planned for the week-end of May 19-20 at Linders' cottage six miles from here on the Iowa river. Twenty women have made reservations for the affair. They plan to go out Saturday noon and return Sunday night.

CHINA TO PAY RANSOM ASKED FOR HOSTAGES

(Continued from page 1)

damages claimed to demand a progressive indemnity for every day after May 12, the the foreigners re-

mained captives.

The Chinese prime minister not only agreed to all of these demands but volunteered to dismiss the civil and military governors of Shantung. This conference took place Monday.

Then the British minister also proposed that after a settlement of the present outrage, the Chinese government should be required to provide adequate police protection on the Tien Tsin-Pukew railroad to be paid out of the earnings of the line which would be under the direction of a foreign traffic manager. Independently of the joint action by the council of ministers the United States has made a peremptory demand that the Americans be returned alive and the bandits punished. This took the nature of an ultimatum except that no time limit was fixed.

Japan Not To Interfere
Tokio, May 8—Japan will not send troops to rescue foreigners kidnapped by Chinese bandits it was learned Tuesday unless other nations request her to.

The Japanese government has ascertained that no Japanese citizens

were among those kidnapped and considers that it could not properly take any military action without a formal request being made.

Japan will do nothing now but some authorities believe it may be necessary for an international conference to be called to devise a way of preventing complete anarchy in China.

Made on the same locale and at the same time of the Nutting Antigua Expedition from S. U. I.

A thrilling drama of dusky native beauties and fighting men staged beneath the flaming skies of a tropic wilderness. The first moving picture sensation to be photographed in the wild South Seas. Don't miss this exceptional film treat!

LYNN A. SAYLOR

Wednesday, May 9

THE POET FROM NEBRASKA

When John Neihardt speaks tonight in the natural science auditorium, Iowans will meet one of the most forceful and dynamic personalities contemporary poetry.

Mr. Neihardt is discouraging to the popular idea that poets are soulful-eyed dreamers, for he is essentially a man of energy and action. His education was obtained largely through his own efforts. He has gathered much of his poetic material by working among the Indians. That his work is valuable is illustrated by the fact that he was the winner of the Poetry Society prize of 1919 for having written the best book of poems of the year. That he is popular is revealed by his election to the poet-laureateship of Nebraska, an honor hitherto unconferrd in America.

Mr. Neihardt has done his share in commemorating the life of the Middle West, for it forms the setting in his finest poems. Although many sections of the country may miss the spirit of his message, Iowa will remember it, for he has written of the familiar scenes and times which form the background for the life of every native Iowan.

COWARDICE AND HAPPINESS

Man has not the courage to face what may well be the truth in this life. The scientist builds a coherent universe of molecules and atoms; then he has not the courage to dismiss his superfluous God. The psychologist discovers the neurones cozening themselves that they are eternal, but the psychologist too babbles of personal immortality. The biologist counts the waste and agony of the struggle for existence; the eugenist knows the merciless injustice heredity shows the innocent unborn; the sociologist measures the crime and poverty in this order of things; then they pray before a merciful, all-powerful God. God may not be concerned with man. God may not be omnipotent. God may not be at all. Man thinks himself the high priest in the cathedral of the universe. He may be less than a gutted candle in the vestibule. These things may be true. Man has not the courage to face the possibility. It is fortunate, man being what he is, that his courage fails.

Man is an ego questing after happiness. He is groping for the unknown of which the cherry blossoms, the green-gold leaves in spring, the sweetness of a woman's face, whisper. Happiness and contentment he has seen afar off, and his life is a quest after them. Mirage or no, it does not matter; in him is the longing.

Man must believe that which smooths his way to happiness. Our explanation of the universe should be both true and optimistic, but if the two conflict, better optimistic than true. Have the will to believe that which makes you happier. If a hierarchy of priests and sky-scaling temples bring you nearer to happiness, then that. If an ecstatic communion with the budding of the leaves and the setting of the sun, then that. If the love of woman, enshrined in a man's heart, then that. If the fatherhood of God and the brotherhood of man, then that. Whether a loving heart and a simple faith are folly is not worth considering. Put your intellectual doubts to sleep with the narcotic of optimistic faith. Step trustingly on any path that leads to the kingdom of happiness.

CONTEMPORARY OPINION

(New York Herald)

THE "BIG BERTHAS"

Leon Daudet, the French Royalist Deputy, re-

cently advanced the theory that the German "Big Berthas" never existed. He scouted the idea that guns could be made capable of shooting forty or fifty miles.

But there is substantial evidence that the "Big Berthas" did exist and fired shots into Paris from behind the German lines, which, except for short periods, were always at least forty miles away. General Herr, the French chief of artillery, has exploded the Daudet theory by saying that the Germans did construct these long range cannon and that the French, too, had built similar cannon before the end of the war and did not use them simply because there were no worth-while objectives within range.

The French ordnance plants, General Herr adds, are now turning out guns with ranges of from 95 to 125 miles. One of the Krupp directors said after the armistice that the "Big Berthas" could fire only a small number of rounds and then had to be sent back to Essen for re-tubing. General Herr reports that the life of the French mammoth cannon will be much longer and that new tubes can be put in without touching the rest of the mechanism.

The German "Big Bertha" had little military value. It came very late in the war and was of no particular help to Germany. The improved monster cannon of today is, however, not a fancy, as M. Daudet would have us think the Krupp one was, but a practicable weapon which may alter the conditions of land warfare eventually as much as the cruising submarine and the bombing seaplane have altered the conditions of war at sea.

The Sounding Board

GENESIS

One morning long ago
When life was an open book, easily
undersood,
Presenting nothing more difficult than
geometry or Caesar,
You smiled at me—over your shoulder—
And that was the beginning.

When I have forgotten all else
I will still remember your smile.

According to unofficial reports yesterday's blizzard broke a world's record (for Iowa) of long standing. Never before in the memory of the oldest inhabitant has snow fallen later than May 7.

Before we forget it, we want to enter a claim for the present winter (1922-23) as the marathon ornery weather champion.

Only one thing detracted from the enjoyable afternoon concert of the St. Louis Symphony orchestra. There was a slight but persistent breeze from the west and enterprising young chemists in Annex No. 2 were obtaining some atrociously malodorous reactions.

The ford is not the only American invention that is notorious in foreign climes. "La Nacion," a Buenos Aires daily, runs George McManus' comic strip, "Bringing Up Father," under the caption, "Pequenas Delicias de la Vida Conyugal."

DON'TS FOR ANNOUNCERS

Following is a list of don'ts that should be closely adhered to by cheer leaders and announcers next Saturday afternoon. Failure to do so might loosen an avalanche of fresh fruit and auld eggs from bored spectators in the stands.

1. Don't fight over who is to announce the events. Let somebody do it who will not distort his face too much and who can talk not loud but "natural."
2. Don't try to imitate Ted Contry. He developed his wit and humor, not by imitation, but by originality.
3. Don't announce the time in the hammer throw or the distance in the pole vault.
4. Don't say, "I will now give you the time." The spectators don't expect you to tell them a funny story.
5. Don't forget that after all the crowd is there to see the track meet. VOX POPULI.

THE SANTA FE TRAIL.

The Military Department at Iowa

—By—
RUTH MIDDAGH

The entire number of the April Journal of History and Politics is devoted to a History of the Military Department at the State University. This article was written by Alan C. Rockwood, a graduate student of this institution.

"The first step towards the establishment of the military department were taken during the early days of the Civil War when the need for military trained men was felt," says Mr. Rockwood. In 1863 funds were set aside for gymnasium exercises and military instructions. The first instructor was Prof. E. R. White. In May, 1864, Thomas Culver organized a college company of one hundred day volunteers which later became the Forty-fourth Iowa infantry.

Following the Civil War little was done until 1874 when the University filed a request with the War Department for an army officer, Lieutenant A. D. Schenk was the first officer to report. The drill at this time was held in one of the rooms on the first floor of the Old Stone Capitol. In 1875 military training was first made compulsory, and the cadets were required to wear a gray uniform after the West Point pattern.

The first band was organized as a part of the military department in the fall of 1880. It was composed of thirteen pieces and played at various university functions. About this time a change was made, the students now being required to wear "an elegant and comfortable uniform consisting of a short and close fitting dark blue sack coat with brass buttons, spring bottom trousers of the same material with a one-inch stripe along the outer seams." This uniform was continued in use until 1907.

"Governor's Day" was inaugurated on June 17, 1881 when the battalion and band marched in review before Gov. John H. Gear and other state officials. The band played many out-of-town concerts that year and also accompanied the football team on various trips.

Prize drills were first held in May, 1888 during which time there were competitive events between companies. The winner company received a large banner. The best-drilled sergeant received a pair of bullion

embroidered shoulder straps, while the best-drilled corporal received a pair of gold lace chevrons. The two best-drilled privates were made corporals.

The position of cadet major was created in 1902 and W. O. Coast of Iowa City was the first man to be appointed. During the early days, drills were held in the boiler house back of the Old Capitol. By 1893, this room had grown too small for any instruction aside from the manual of arms. In 1904 it was decided to erect a gymnasium and armory and the formal dedicatory exercises were held on February 22, 1905. This building is now known as the Men's Gymnasium.

The military ball was revived in 1902 when the fourth annual ball was given and it has been an annual event since that time. It was formerly planned by the cadet captains of the regiment until 1917 when Scabbard and Blade assumed control. Commencing with 1922, the committee in charge has been reduced to cadet field officers.

It is customary to have the Governor and his staff present at the balls whenever possible. "The military ball has the distinction of being the oldest of the annual university parties which are still being given," states Mr. Rockwood. "It was the first to extensively decorate the university armory and the first to introduce leather, celluloid and metal programs."

The first Iowa practice march and encampment was held on May 2, 1907, at Mid River under the direction of Lieutenant Weeks. "A march of eleven miles under full equipment was to be made up the east side of the river with camp pitched nine miles north of town the first night," says Mr. Rockwood. "It was very warm the first day and the baggage of the cadets was reduced to minimum, but by the time the tents were pitched rain had begun to fall and it was turning colder." The next day a steady snow fell and the return was made the second day.

In 1908 a Rifle Club affiliated with the National Rifle Association was formed at the university. Since this time the rifle team has continued as an activity of the military department. In 1916, seven hun-

dred thirty-six students were enrolled for instructions. On March 2, 1917, the University was granted an infantry unit of the Reserve Officers' Training Corps. Graduates from the four year course received reserve commissions as second lieutenants without further examination.

Upon the declaration of war in 1917, the responsibilities of the military department increased. Special drills were held and the colleges of Applied Science, Pharmacy, Homeopathic Medicine and Dentistry passed drill requirements. The following summer an R. O. T. C. camp was held to which 250 alumni applied for admission.

Since 1887 federal inspections have been practically every year except during the Spanish-American war. The reports of the officers have been uniformly commendatory of the department with the exception of one instance. During the war a branch of the Students' Army Training Corps took over the work of the military department.

Colonel Morton C. Mumma returned to the university in 1919 for the third time. In 1920 the new armory was built at an expense of over \$125,000. Forty acres adjoining the building have been set aside as drill grounds.

In 1921 the Officers' Club was organized to further the acquaintance of professional military men and the discussion of military problems. In 1919 the band was reorganized by Dr. Orie Van Doren and since then has been making rapid improvement.

Allan C. Rockwood, the author of the article, is a graduate student of the university having majored in electrical engineering. He received his A. B. in 1921 and his Bachelor of Engineering in 1922. He is well qualified to write a history of the military department since he was a member of the cadet regiment from 1916 to 1922. During 1921-1922 he acted as cadet colonel. Mr. Rockwood also acted as the editor of the Transit, engineering publication of the University, during 1921-1922. The Iowa Journal of History and Politics is published quarterly by the State Historical Society of Iowa.

PICK BEST RIFLE SHOT IN R.O.T.C.

Ralph C. Woods Outscores All Competitors; Dehner Takes Second

Ralph C. Woods S4 of Des Moines, after a careful compilation of the season's scores by Capt. Thomas E. Martin, rifle team coach, has been declared the best all around rifle shot in the University R. O. T. C. This selection was based on the scores made for the entire season in both long rifle and short rifle competition. W. J. Dehner A4 of Iowa City ranked a close second to Woods.

The award for this honor is a silver plaque which will be presented by Col. M. C. Mumma on Governor's day. The one to receive this plaque last year was D. W. Bray Cm3 of Burnside, 111.

Ballard Wins Gold Medal

In the short rifle competition, in which sixty one men were firing, one gold, one silver, and eight bronze medals were given to the ten finishing the season with the highest aggregate scores. R. W. Ballard was awarded the gold medal, and W. J. Dehner the silver medal. The bronze medals were given to the following: George Fabricius, F. Fanselow, E. S. Moore, D. W. Bray, G. Houston, F. W. DeKlotz, I. L. Sorenson, and G. H. Hickox.

On the varsity team, which fires the long rifle, the following won medals for highest average scores: gold, W. J. Dehner, silver, George Fabricius, and bronze, F. W. DeKlotz, D. W. Bray, and R. C. Woods. Nineteen men competed in this event.

Clark Ranks Highest

An added feature of the past season was the presentation of medals to those with the highest average who had never, previous to this year, fired in the intercollegiate rifle match. Those who won medals are, in order: F. Clark, F. Fanselow, E. S. Moore, G. Houston, F. Wiggins, E. R. Kinniard, C. Palmetier, and H. W. Bender.

At present the preliminary matches for the governor's day match are being fired. These matches will weed out twelve of the sixty-five now competing for the final match on May 26. Next week, the company teams matches, for the field day company championship will be run off.

A. A. U. Official Is Pleased By Action Of French Board

Frederick W. Rubien, secretary-treasurer of the Amateur Athletic Union and chairman of the national registration committee, expressed satisfaction yesterday when informed of the action of the French athletic federation in upholding the A. A. U. ruling against Charley Paddock's competing abroad.

"The action of the French federation in the Paddock case is pleasant news and shows that the French officials are ready to co-operate in upholding the international rules," said Rubien at his home. "In invoking its rule against international competition abroad by American athletes, the American Olympic committee acted in support of the French officials who are working for the interests of the Olympic games in Paris next year.

"The real motive back of the international Olympic commissioners and members of our American Olympic committee was to discourage this international competition, on the ground that it was not fair for this country to be sending large teams abroad a year before the Olympic games. Next year the American athletes will be abroad for the Olympic games and will have plenty of opportunity to engage in these events for which invitations have been extended.

"We have always stood for the dignity of the Olympic games as they have been conducted in the past. If everybody and every organization is going to hold an Olympic meet the games will quickly develop into a farce.

"While preventing these trips may dissatisfy a few, I am sure the majority realize it is for the best interests of amateur sport and will accept the ruling."

Really Stylish Woman Does Not Always Follow Fashion; Modifies To Suit Own Needs

(By United News)

New York, May 5—"What constitutes a well dressed woman?" a friend asked me the other day.

There are two answers to that question. Any woman may be considered well dressed if she is gowned in styles that are accepted by the multitudes as the vogue. But the really stylish woman is one who dresses just a little out of the popularly accepted rut—one who follows fashion's dictates only in an indirect way.

A woman gowned in a costume of the latest cut with shoes, gloves, hat and each article of her apparel coinciding with her costume can, of course, pass muster in the ranks of Fifth avenue, where are assembled the greatest number of well dressed women in the world. But—how many people will turn to gaze at her? There are dozens of women of her type dressed in similar garments with hats of the popular shape and shade, white gloves, beige hosiery, etc.

Another woman passes in costume which neither follows the whim of fashion in color or silhouette, her hat just misses the current style, but is chosen for its becomingness and therefore has a chic of its own, her gloves, though white, carry out in embroidery some color note of her costume, and her shoes and hosiery match exactly the shade of her costume, defying the vogue for dark

shoes and light colored hosiery. Perhaps an odd bit of trimming is placed in some odd way on her costume. People turn to look at her, for she too, is well dressed, though not in exact accordance with the popular styles. Her success comes through avoiding the too-popular styles.

French Women Masters

Undoubtedly the French women have the reputation of being the best dressed women of the world because of their straying from, rather than their adhering to styles. If three French women buy three gowns of the same model, within twenty-four hours they appear in three distinctly different gowns, for each woman will apply to her own technic by re-arranging the drapery, adding a bit of color or making some alteration which will mark her gown as individual. Being individually dressed is more important to the French woman than being expensively dressed in current styles.

The popular vogue for bobbed hair, for instance, didn't make thousands of fuzzy headed women in Paris as it did in the United States. In fact, the Fiji island effect was almost unknown in Paris, for the French women were unwilling to sacrifice their best features—their eyes—by diminishing their size by wide hair effects. They wore their bobbed locks straight and well brillianlined, accentuating their features rather than their hairdo. The permanent wave has never been as popular in Paris as here in the States because in Paris they realize that often straight locks are often more becoming than frizzy ones.

Chinese Outlaws Are Being Pursued By Chinese Troops

(By United News)

Pekin, May 8.—Retreating into Shantung wilderness, taking with them 24 foreign captives including a number of Americans for whose release they have demanded one million dollars ransom, 1,000 Chinese bandits who wrecked and robbed a crack Express from Shanghai are being closely pursued by 5,000 government troops.

The American and British governments have served a demand on China for immediate relief of the captives whose lives are feared for if the troops press too hard upon the bandits.

GRADE SCHOOL PUPILS TO GIVE AN EXHIBITION

The pupils of the first six grades of the local schools will give an exhibition at the new armory Friday, May 18, at 2:30 p. m. The University Elementary school, Horace Mann, Sabin, and Longfellow schools will take part in the event. The combined pupils of one grade of all the schools will give some of their folk dances and games at one time. About five hundred youngsters are expected to take part in their exhibition. An admission fee of ten cents will be charged.

Public Utilities Discussed In May Issue of Transit

The May Transit, a magazine published monthly by the associated students of applied science, is now on sale at the book stores.

Dean William G. Raymond, dean of the College of Applied Science, has written one of the main articles entitled, "Shall Public Utilities be Taxed?" He discusses the subject first, with respect to utility under private ownership, and then under public ownership.

Franklin Remington, chairman of the Foundation company of New York City, has written an interesting article on "Righting a Million Bushel Elevator." A huge grain elevator, built by the Canadian Pacific Railroad near Winnipeg settled after the bins were filled. Only the upheaval and compacting of the soil on the west side prevented the complete overturning of the structure. The railway engineers were confronted with an unprecedented problem, and the article deals with the righting of the elevator and how the task was accomplished.

The contents of the magazine also includes editorials on "Engineers and World Affairs," "Politics," and "Engineering and Honesty." Engineering News, which tells of interesting engineering problems in buildings now being constructed and "Getting the Graduate Started," are main features.

There are also the regular departments, on Campus and news, athletics and "Electrons".

METHODIST SENIORS TO BE ENTERTAINED

All Methodist students who are seniors in the university will be the guests of the Methodist church at a luncheon on Saturday, May 12 at 12:15 in the basement of the church. A short program is being arranged by William K. Carr of LaMonte, Mo.,

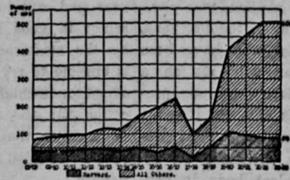

including Margaret Stephenson A4 of Cedar Falls and Carl Tucker S4 of Iowa City as speakers.

The quartet of the Methodist church will give several selections. The ladies of the church are serving the luncheon.

Rev. E. T. Gough requests all senior students that intend to go to notify him by Thursday night.

HARVARD Graduate School of Business

A two-year course in business, open to college graduates, leading to the degree of Master in Business Administration

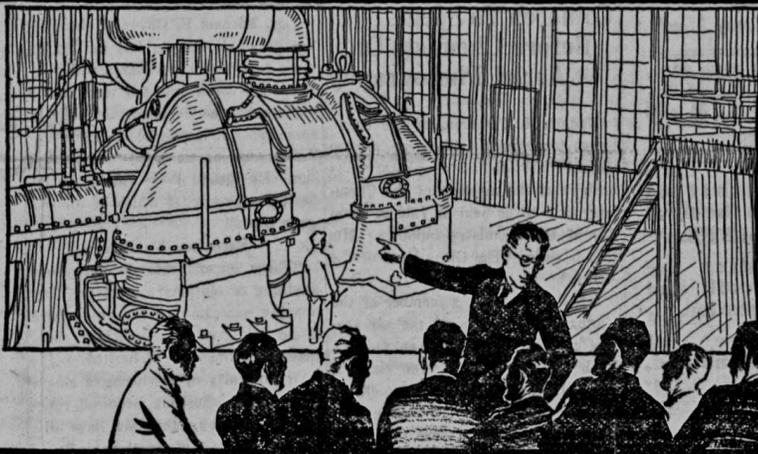

Points of interest regarding the Harvard Business School:

1. The above graph shows the growth in enrollment and the large number of students coming from institutions other than Harvard. During the present year 158 colleges are represented.
2. The case method is used. Actual problems obtained from business are used as the basis of instruction. A staff of investigators is constantly at work gathering problems.
3. Business is regarded and studied as a profession.
4. What the students in the School think of the training which they receive is indicated by the high percentage of eligible first year men who return to complete the course—84 per cent. the present year.
5. The training in the School materially shortens the apprentice period in business. A prominent business man recently said: "On the basis of our experience with your graduates, I estimate that you are saving them five years net. Six months after they come to us, your men are as well fitted to assume responsibility and to make decisions as the typical college man at thirty." The enrollment is limited in first year courses.

For further information and enrolment blanks, write to

Harvard Graduate School of Business Administration
University 23, Cambridge, Massachusetts

The University of Engineering

Of all the things that go to make the successful engineer, none is more important, nor more in step with the spirit of the profession, than a studious attitude. One man says about another—"he is always willing to learn," "he doesn't think he knows it all"—and he intends to pay a high compliment when he says it.

The great engineers are always at school, always learning, always seeking for more knowledge. They begin with this desire for fuller understanding, and they keep it up to the end.

Any engineering operation, over and above the primary purpose for which it is carried out, is an active and post-graduate class in engineering, also. So that Westinghouse, or any other great business,

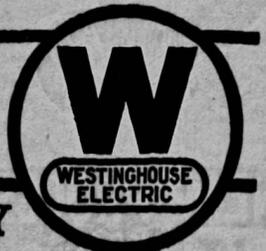

is, of its very nature, a University where theory and practice combine to make bigger, broader and more practical engineers.

The courses in this University are not limited to prescribed subjects nor terms—the subjects are almost infinite, and the semesters are endless. Men with the weight of years on their shoulders work and learn side-by-side with those whose day has just dawned.

This post-graduate school fits men for almost anything. Fits them for it, and makes them continually fitter. Out of this continuing fitness have grown the engineering accomplishments on which this institution has grown. It is, perhaps, one of the great educational institutions of its day.

Westinghouse

ACHIEVEMENT & OPPORTUNITY

Myrtle Dallmire Named President Of Cosmopolitan

Myrtle A. Dollmire, Au of Oxford Junction, was elected president of the Cosmopolitan club for the coming school year at the meeting of the club Saturday night. Other officers are: Edward Zecha, A2 of Soekaboemi, Java, vice-president; Mildred Augustine, A1 of Ladora, secretary; Surenda Mitra, S2 of Calcutta, India, treasurer; Lee R. Norvelle, of the department of speech, faculty advisor; The position of associate editor has been left open until next September.

At this meeting a picnic was planned for next Sunday at the city park, when all members who have been initiated this year will put on a stunt. The popularity of the production which this club gave in the form of an international night program has greatly increased the interest of the student body in general toward the organization. The active membership of the club numbers forty-five.

Hold Examinations For Lowden Prize Saturday, May 19

An examination for the Lowden Mathematical Prize will be held Saturday, May 19, in room 222 physics hall.

Competition is open to all students who are finishing, with the current year, the sophomore work in pure mathematics. The prize of fifty dollars may be divided equally between not more than two candidates, or may be withheld if it shall appear that the work of no candidate is of superior merit. The subjects to be covered by the examination are arithmetic, algebra, Geometry, plane trigonometry, analytical geom-

etry of two dimensions, differential and integral calculus.

Those intending to compete are requested to submit their names to Professor H. Rietz, head of the department of mathematics at an early date.

Elect Editor And Business Manager Of Iowan Tonight

The editor-in-chief and business manager of the Daily Iowan for the summer session and the year 1923-24 will be elected by the board of trustees tonight at 7:30 o'clock. Any student who will be enrolled next year and will have the rating of a senior in good standing, as defined by the registrar of the University, is eligible to try out for the position of editor-in-chief. The only qualification for the position of business manager is that the applicant be a student of good standing in the University.

Mrs. Mill's Pupils Present Recital At Five Tomorrow

Five o'clock tomorrow afternoon is the hour set for the oral interpretation of the literary recital to be given by pupils of Mrs. A. W. Mills. The recital will be given in the liberal arts auditorium. The selections are all from the great English poets. The program follows:

- Mandalay-Kipling—Eleanor Chambers.
- Lady of Shalott-Tennyson—Eloise Harvey.
- Garden Scene from Julius Caesar—Frances Cleveland.
- Queen of the May-Tennyson—Helene France.
- Love Among the Ruins-Browning—Mary Lyle.
- The Swing-Wilfred Gibson—Eunice Lynch.

Cameron To Speak Before Chemists On Aerial Photography

Donald H. Cameron, of the chemistry department, will give an informal talk on aerial photography tonight at the meeting of the Chemistry club to be held at 7:30 in room 110 of the chemistry building. His talk is called "The Glass Eyes of the Army."

Mr. Cameron was a member of the photographic section of the air service over seas for eighteen months. With the help of a few lantern slides he will describe the methods used in making aerial photographs and how the results were used. He will tell some of the difficulties encountered and how they were met. It will be of special interest to amateur photographers as well as of general interest. All are welcome.

NEIHARDT WON FAME AS EPIC POEM WRITER (Continued from page 1)

superfluous word in Neihardt's poetry. The professor is reported not to have lost any money so far.

In 1921 he was appointed poet laureate of Nebraska by the state legislature. The honor was conferred on him at a ceremony at Lincoln, where he delivered an address. The most significant thing about the honor is that at the time it was given him he was living in Missouri. The poet laureateship is an evidence of the affection and respect toward him more than anything else.

Won \$500 Prize

Prof. Frank L. Mott, of the department of English, who is a personal friend of Mr. Neihardt, says that he has found it easier to create a liking and fondness for poetry on the part of boys who do not like poetry by Mr. Neihardt's poems than by those of any other author. Two of his works, "The Song of Three Friends" and "The Song of Hugh Glass" are now in school editions.

Since 1912 Mr. Neihardt has been literary critic on the Minneapolis Journal. In 1919 he received the \$500 prize offered by the Poetry Society of America for the best volume of verse. The volume which won the prize is "The Song of Three Friends."

DISCOVERY REVEALS NOTHING NEW—NUTTING (Continued from page 1)

than they are in the adults, when they degenerate, because of their environment. By exposing these embryos to a certain amount of light, which is increased with each generation, the eyes are finally prevented from degenerating and the fish are able to see. This does not mean that they have inherited acquired characteristics. It means that organs which they already possessed have adapted themselves to new environments."

"Dr. Michael F. Guyer of the University of Wisconsin has carried on more extensive experiments with rabbits. His work was too technical to explain but he demonstrated that in some cases it is possible to cause the inheritance of acquired characteristics. He caused these rabbits to inherit characteristics which he himself gave them."

Exception To Rule

"These experiments do not prove anything revolutionary however. They are the exception to the rule, there is no rule by which acquired characteristics may be inherited. The very difficulty of producing a single example of inheriting acquired characteristics shows that we have discovered nothing of great value."

"I am cautious in my class but I don't hesitate to teach that some day somebody may discover a rule by which acquired traits may be transmitted. However it has not yet been discovered, in my opinion. All of this, of course, is true only if the work of the Vienna professor is actually as the newspapers have described it."

SCOTT HALTED MOUNT SEARCH STUDENT SAYS (Continued from page 1)

"President Scott called on me and said he wanted further investigation discontinued."

"Do you know anything that would throw light on this affair?" he was asked.

"Not a thing," replied Mills.

President Scott is expected to be called before the grand jury in the near future.

ANNOUNCEMENTS

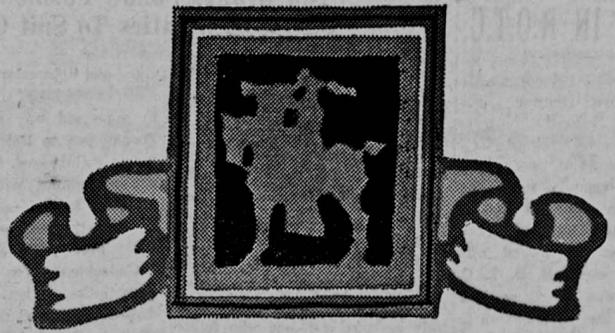

The Forensic Council will meet at 4 o'clock this afternoon in Close Hall. Buel G. Beems, pres.

University P. E. O. will hold a picnic Thursday May, 10. Everyone will meet at the Alpha Delta Pi house at 5:30 p. m.
Robert Anderson.

Kappa Phi "fellowship" meeting at the church this evening at 7:30.
Mildred Martin.

There will be a meeting of the Seals club Wednesday, May 9, at 5 o'clock.
Secretary.

The Eels Club will hold an important meeting this evening at 7:15 in the mens' gym.
W. A. McCullough, president.

An Odd Lot of Hart Schaffner & Marx Suits Specially Priced at \$30

Of special interest to the man who is looking for the utmost in wear at a low price, and who wants to save \$15 to \$20 on a suit.

Who doesn't care if it ISN'T the latest style.

Who ISN'T particular about popular patterns.

Who realizes that he's getting a last season's suit.

We can fit 50 men, sizes 34 to 44 and, of course, we guarantee these suits to wear.

This odd lot goes on sale tomorrow morning.

COASTS'

X = ?

Wanted— men to find the answer

THIS is written to the man who loves to seek the unknown quantity. He is the kind of laboratory worker who ventures into untried fields of experiment, rather than the man who tests materials.

Industry has need of both types, but of the former there is a more pressing demand.

College men may have been discouraged from pursuing pure research. In this highly practical age it may seem there is little room for work which does not have an immediate dollars and cents application. But such is not the case.

The pure research man is the pathfinder. Without him our fountain of knowledge would dry up. His findings in themselves may be uncommercial, but they establish a field for others to develop. Volta worked out the crude voltaic pile—unimportant until other men improved and applied it. And so with Papin in the field of steam, or Lavoisier in chemistry.

Men of the inquiring slant of mind, stick to your last. In post graduate study, on the faculty, in the laboratory of some industrial organization, there will always be an "X" to baffle other men and call for the keenest thought of you blazers of the trail.
