FRANCE FAILS TO REGAIN LOSSES IN TRADE PEACE

Problem In Country Is Serious; Birth Rate In Cities Is On Increase

Paris, May 16.—While practically every other country is recovering from the woes of the past, France is floundering in the midst of a most critical situation. The birth rate in Paris, which was thought to be on the increase, has recently fallen to an all-time low. This is a serious situation, as it indicates a lack of interest in the future of the country.

The birth rate in other cities is also on the decrease, and it is feared that this may be due to the economic conditions prevailing in the country. The situation is so critical that the government is taking steps to encourage immigration from other countries.

Answer To England's Note Regarding Anti-British Talk

(United States) London, May 15.—Bassett warned Britain, the imputed provocateur, is a sad address to the House of Commons regarding continued relations and the possibility of trade between the two countries being blocked.

The Russian communication was sent on Friday evening, stating that the latter country would not deal in any form with England, France, or any other western countries until the situation was clarified.

Bassett advises that she sent the communication to the authorities in the East but did not think that the note was addressed to Britain for anti-British propaganda.
