WHAT'S IN A NAME?

Wisdom of the Ages.

In the ancient City of Bupalit, in early times, lived one. Hakuen, known throughout that region as the Wise One, and many people, in his day, came to him for counsel and for wisdom.

It happened, that on one occasion, there came a young man and said to this, "Tell me, Wise One, what shall I do to receive the most for that which I spend?"

"Hakuen answered, "A thing that is bought or a thing that is sold has no value unless it contains that which cannot either be bought or sold. Look, therefore, for the priceless ingredients of your name and you'll have answered and said, "But what, Wise One, is this priceless ingredient?"

Then spoke the Wise One, "My Son, the priceless ingredient of any product is the Honor and Integrity of him who sells it. Consider his name before you buy!"

University of Arts 

Initiates 14 Men 

The Association of Arts, under the leadership of President Holton, held its annual banquet on Tuesday, May 29, 1923, in the Delta Sigma Pi fraternity at the University of Wisconsin. The initiation was held at the University of Wisconsin because it is an honorary society for women. It is composed of the following: John E. Van Horn, treasurer; Walter A. Smith, secretary; and Robert A. Hill, president. 

The initiation began with the singing of the opening song, followed by the reading of the articles of incorporation of the society. The new initiates were then introduced, and each gave a brief speech on the life of a Greek. The evening was concluded with a dance and social hour.

The following Thursday, June 2, the seniors will receive their degrees from the university, according to the latest report from the registrar's office. The date has been set for May 29, and all plans for this year's events, including the initiation, have been arranged.

has such an unnatural anti­quity towards the skilled manual trades on purely social grounds of his own making. The white collar has got the better hand of such work that is leaves no opportunity for social anxiety, without which any kind of life, even in a mill, is more drearly. A white collar job gives the better chance to those. Educated people will never catch the look of their life developing their mental faculties only and waste valuable results by becoming automation.

CONTEMPORARY OPINION

(Philadelphia Public Ledger)

LOYAN

Mr. Loyan in the General Assembly of the Presbyterian Church brought forward a resolution to refuse financial support to any school or college teaching doctrine of evolution, exposed by Darwin. The defeat of this resolu­tion was undoubtedly due to a general feeling that the rejection of the vital opinions in the race is of less moment than the active and passive evil to the cause of religion.

Mr. Loyan appears to be laboring under a mis­sion to destroy the outstanding needs of the Church of which he is a prominent member. He thinks the greatest service he can perform is to keep the pot of controversy boiling with his own insinuation of the Dyevedian doctrine, instead of pulling the world to give vital breath and soundless shallowness to the message of God in man and the exemplary beauty of the life of Christ on earth. The truth is all one; there is not a few sort; religious truth and secular truth have never been in reconciliation.

When a man says what Mr. Loyan is reported to have said, his mission to culture is ended. The present state of the educational system, as a whole, is one of immature youths.

The psychology of these youthful beings, as the writer wishes us to think he is, is pretty sadder than that memory of early days. The psychology of immature youths.

Mr. Loyan is to be congratulated on the youth of the bodies.

Mr. Loyan gives the particular pains to acquire.

RESEARCH WILL BE MADE THIS SUMMER IN IOWA'S HISTORY

Prof. Shambaugh Heads Staff for Extensive Summer Research Work

Extensive research activities will be carried on during the coming summer months by the State Historical Society of Iowa, under the direction of Prof. Roy F. Shambaugh. A staff of fourteen men has been selected by the society, and these experts will delve into the economic and social history of Iowa as well as into the biographies of famous Iowans.

"The most extensive research of the season," said Prof. Shambaugh, "will be on the relationships to the county government and administration in Iowa. We are in hopes that by the end of the season we will have a volume of such material that it can be printed and issued in a volume.

"Once the research is complete, we will have a book ready for print. When completed this volume will be one of the most exhaustive studies of county in the United States."

Many well-known research workers will join the Historical Staff during the coming season. Prof. Earl R., for instance, will be here from the University of Minnesota, while Prof. E. M., who is known from the University of Cincinnati, will be here also. Other research workers will be Prof. Jacob Van Vliet of the University of Iowa, who will no doubt be among the major teachers of the staff. Other research workers will be Prof. George R. and other members of the staff.

The University Representative announces that starting next Saturday, July 29, 1821, these two-piece trunk and jersey style Bathing Suits are always popular beach apparel. They’re neat in looks—and it’s important that they should be. Equally important, though, is the service they give—and these Suits give it.

$5.00

The University of Engineering

Of all the things that go to make the successful engineer, none is more important, nor more in step with the spirit of the profession, than a studious attitude. One man says about another—he is always willing to learn," he doesn’t know—he knows it all"—and he intends to pay a high compliment when he says it.

The great engineers are always at school, always learning, always seeking for more knowledge. They begin with the desire for fuller understanding, and they keep it up to the end.

Any engineering operation, over and above the primary purpose for which it is carried out, is an active and post-graduate fitness in engineering. Above all, that Westinghouse, or any other great business, is, of its very nature, a University where theory and practice combine to make bigger, broader and more practical engineers.

The courses in this University are not limited to prescribed subjects nor terms—the subjects are almost infinite, and the semesters are endless. Men with the weight of years on their shoulders work and learn side-by-side with those whose day has just dawned.

This post-graduate school fits men for almost anything. It fits for it, and makes them continually better. Out of this continuing fitness have grown the engineering accomplishments on which this institution has grown. It is, perhaps, one of the great educational institutions of its day.
