EMINENT BRITISH
PROFESSORS TO
BE AT MEETING

English Students to Have Op-
opportunity to Meet
Prominent Scholars August 28

TO BENEFIT TEACHERS
Representatives Here From Universities of England

Two scholars from English univer-
sities will visit a series of six lie-
s will appear at an English conference at the University of Iowa City to be held Aug. 28-30. Prof. H. G. Baker, head of the English department, University of Cambridge, will appear on the program, as will Prof. A. W. Reed, King's college, London.

TERRIBLE RIGHT TO JEW BRINGS FARMER TO DEATH WHERE HE TAKES COUNT.

A Jewish farmer, Louis DeFusco, of Avoca, Iowa, was killed yesterday afternoon with a blow of a pickaxe that would have been fatal to any man. The assault was made by his son, Joseph DeFusco, 18, who had been taunted by his father because of his political activities.

Professor Wilson Spends Vacation Chopping Trees

For thirty-five years Prof. Charles Lincoln Wilson, head of the department of economics at the State University, has spent his vacations in the woods of the North. This year, however, he was somewhat disturbed by the request of the professor to whom he was teaching the summer term at the University. But all of his vacations have been devoted to teaching of the German language. For instance, he has taught French and English to his students. He has also taught French and Spanish to his students in the German language and in linguistics.

"Now want what goes are made. In the world of German, I am convinced that they have a good deal about the whole in our study of the world. To you professors, it tells the same story. If you do not have enough time to study, you do not have much more than that they favor." He carries on no work with which he is a member of the American Association of Teachers. While he was teaching the German language, the American Association of Teachers was teaching the German language in the German universities. His students joined in the German universities and in the American Association of Teachers.

"Many years ago the professor and his students have a chance for the first time of being a model of the American Association of Teachers. While he was teaching the German language, the American Association of Teachers was teaching the German language in the German universities. His students joined in the German universities and in the American Association of Teachers.

"One of the children-children of this story, another in the world of German. I am convinced that they have a good deal about the whole in our study of the world. To you professors, it tells the same story. If you do not have enough time to study, you do not have much more than that they favor." He carries on no work with which he is a member of the American Association of Teachers. Use of Final Examinations Depends on Size of Classes

Final examination grades are not always a measure of a student's intelligence. There is no evidence that the student who gets a certain grade is doing better or worse than another student with a similar grade. The principle of working under pressure and finding what you can do under pressure is helpful both to the student and the instructor, but it has not proved to be the solution of many of our questions.

Final examinations are necessary in large divisions, especially in biology, because the student with the best knowledge of the material should be assigned to the first examination and the worst should be assigned to the second examination. The principle of working under pressure and finding what you can do under pressure is helpful both to the student and the instructor.

Almost every test is necessary in biology, but they should be given in a different way. Some students are willing to take the first examination, but they should be given in an entirely different way. The principle of working under pressure and finding what you can do under pressure is helpful both to the student and the instructor.

The principle of working under pressure and finding what you can do under pressure is helpful both to the student and the instructor. The principle of working under pressure and finding what you can do under pressure is helpful both to the student and the instructor.

Chunghua University Head and Dean Pay Visit To University.

KEA TO COME HERE

Educational Work in China

Advances in Spite Of Internal Ikets.

Great faith in China's future was expressed by Prof. S. H. Chao, and Dean T. L. Ling of Chunghua university, Wuchang, China, delegates to the World Educational congress at San Francisco, who are paying-a two-days visit to the University.

Despite their very partial appearance they are two of China's-booking educators. Mr. H. C. Kao, graduate of the Wu Chang government teachers' college, came with them and will enroll here this fall.

"We believe the upheavals at the present time in China are deeply stirred around the Foundation of sound pedagogy," said Doctor Ling, who is a former student of Iowa, having received the degree of Doctor of philosophy in education here in 1915.

"Why do we think this? Because this present period of upheavals took place in France, and Britain and America, but in China, Paris, New York and Chicago.

Even the history of the United States gives us a precedent. You remember that years to establish a government on a free basis.

"We strongly believe that education is the only means of establishing a strong republic in China." Doctor Ling continued, "In this I do not mean that we must take old education in its entirety and plant it in our country. We firmly believe that we have a literature of our own, and we are not ready to admit that all that we are offered from the west will fit the soil of China. We believe that the words which we use are termed by the President of the United States as our children should not be taught the English of the President of the United States, and that fit the soil of China.

"An interesting thing is the connection with our internal problems. There was a phrase used, 'the fact that our educational work continues to advance without internal strife is a fact, almost, like the existence of you--longer--either. We had a school system in all of China in the middle of the past century which few people who have been educated in all get by in the past century, not counting the present century. In 1910 there were four thousand attending schools in all, to the grade from primary to college age. By 1912 this number had been raised to five million."

"But notice the jump during this past two years. We have now four and a half million students in school. We have 120 institutions of college standing, and 486 normal schools, 771 high schools, and ten conservatory schools, and this growth in the past five years we were having 120 schools."

"The Peiping University Educational situation which was reported by Professor of Education, S. F. Chao, of the University of Chicago, showed that of the 120 institutions of education in China, and a member of the provincial student association of his province. Professor Chao, by the university of which he is president, and supporter with his own education, law, commerce, liberal arts, and Chinese languages, are the subjects of his institution. President Chao considers being a delegate to the world conference, is making a study of the municipal government in this country."

Doctor Ling stated at the University of Missouri, and Syracuse, before leaving to the University of Iowa, that was in 1912 to 1913. On returning to China he was professor and have done at the Wu Chang government teachers' college. Three years ago last spring he was appointed to be a delegate to the national conference. Mr. H. C. Kao believes Iowa has the best instructors for the five years work which he wishes to take up, and is planning to enroll here this fall.

He is a student of the Wu Chang teachers' college, and before attending in America was associated with the University of English. Mr. Kao came to study school administration, and from there went to the University of Iowa, where he was associated with the Department of Education. He has been teaching in China, and is a graduate of the Wu Chang teachers' college, and before attending in America was associated with the University of Iowa. Mr. Kao came to study school administration, and from there went to the University of Iowa, where he was associated with the Department of Education. He has been teaching in China, and is a graduate of the Wu Chang teachers' college.

To TEACH NEXT YEAR

Pound House will be principal of the high school at Bedford, Iowa, next year.

A position as school name at Harvard last year. David F. Smith will teach at Oakville, Iowa.

HORN'S SPELLER NOW AVAILABLE

888,900 Words Analyzed in its Complete Dictionary.

Comparison to Other Spellers--Co-author.

Prof. Ernest Blois, professor of education and director of the University of Iowa educational college, and Prof. Ethel Ashbough, associate professor of education, and chief of the bureau of educational tests and measurements, have compiled a new "Horn's Speller" which has been post-rounded recently by J. B. Lippincott company, and is now ready for sale.

The vocabulary is taken from a compilation which Dr. Horn has made of the scientific investigations of the words used in writing letters. Those investigations represent somewhat more than 6,000,000 running words of normal and technical words. The basic language used 2,589,000 words which were found to be most frequently used, and 892,000 classical words which were somewhat less frequent which have been made for many of which 6,079 words.

A process of objective review in good and helps to eliminate spelling errors in a very thorough manner by testing words which are tested by every pupil in one or more of the several grades of each grade of each department.

Two rounds of words were used in the grading system, that of the first round being with the words used in correspondence, and that of the second round with which they were spoken. Eleven thousand four hundred words were tested to establish the standards.

As a help to teachers' four points were strongly emphasized--more important than others.

1. The teacher write her pupils on each lesson before they begin to study.

2. Each pupil studies only the words which he is capable of mastering.

3. He is taught an economical method of study.

4. It is clearly what progress he is making.

Teachers who have used this method have been unanimous in reporting that not only do the pupils learn more rapidly, but also that they work with greater enthusiasm.

Lippincott says of the book, "This is one of the most far-reaching contributions to school text-book literature, and is a valuable addition to the library of teachers and education students."

Mr. James carried on investigations during the past year showing the value of Horn's Motor College.
