## ENGINE TROUBLE MAKES MAUGHAN ABANDON FLIGHT

### Abandonment of Trans-Conti- nental Flight Is Re- ported.

### NEAR END OF TRIP No Direct Word Received From Maughan; Try To Communicate.

(By United News.)

San Francisco, July 19.—With only about four more hours to go, Russell L. Maughan was forced to abandon his attempted trans-continental flight at Rock Springs, Wyo., late Thursday on account of engine trouble, according to word received by the air mail service here.

Maughan returned to the air mail landing field at Rock Springs, after having passed Green River, Wyo., at 5 p. m., mountain time, to make engine repairs, according to a report from the air mail operator at the former point. No word has yet been received direct from Maughan and every effort is being made by Colonel Gilmore, here, to get such a report.

When Maughan landed, according to air mail advices, he planned needed engine repairs and to resume his race with the sun for San Francisco, but mechanics soon found the work would take so long that Maughan would be unable to reach the Golden Gate city before night had set in. With that word, Maughan, according to the air mail advices, for the second time abandoned his dawn-to-dusk transcontinental flight.

Colonel Gilmore in command at Crissy flying field here, said he did not doubt in the least the report by air mail service that Maughan had abandoned his flight, but was making every effort to get it direct by telephone.

Gilmore said undoubtedly the trouble that had developed in the plane lubricating system before Maughan arrived at Cheyenne was responsible for the engine failure.

## Professors Depart For Vacation As First Term Closes

With the close of the first term of the summer session, University professors and heads of departments will scatter to all parts of the country. Prof. George F. Kay, dean of the college of liberal arts and head of the department of geology, will drive his automobile to Canada, staying in the Dominion about two weeks. He will then return to MacGregor, Iowa, and later do some geological field work for the state.

Prof. Charles Bundy Wilson, head of the department of German, will make his annual summer trip to Alden, Mich., where he has a summer cottage near the lake. Prof. Phillip G. Clapp, head of the school of music, will leave for Bridgeton, Me., where he will join his wife. Professor Clapp expects to spend most of his time in composing before returning to Iowa in the fall.

Prof. Charles C. Nutting, head of the zoology department, with his wife and son, Carl, will leave Iowa City for a trip abroad. They intend to spend most of their time at Oxford, England, where they will be with their son, Willis Nutting, a Rhodes scholarship student at Oxford.

Professor Merry, head of the speech department, and Dean Chester A. Phillips of the college of commerce, are at present teaching at the University of Wisconsin and California, respectively.

## SECURE POSITIONS

Among those who have recently secured teaching positions through the teachers' bureau are: Jeanette Stewart, English and Latin at Shelby, Ia.; Rachael Fabrick, home economics at Clarion, Ia.; Helen Martin, history and music at Albany, Minn.; Dorothy Brooks, English and physical education at Bellevue, Ia.; and Esther Long, Spanish and French at Simpson college, Indianola, Iowa.

## Piper to Speak Before Assembly In Second Term

The weekly assembly next Wednesday morning will be addressed by Prof. Edwin Ford Piper. Professor Piper who is a member of the English department, is well known for his poems on typically western themes. "Barbed Wire" is the title of one of his best known volumes of poetry. He is a contributor to a number of modern poetry magazines.

Professor Piper is the author of an original masque, "The Land of the Aiuwas," which was produced here under the direction of the dramatic art and music departments. He is a Nebraska university graduate, and his experiences on the western plains have served as a foundation for some of the best of his poems. He is intimately acquainted with many modern writers and poets and has an interesting library of books sent him by the authors.

At the present time Professor Piper is making a collection of old folk-songs, ballads, and dance calls that are rapidly disappearing from our modern civilization.

## NEW MAN ADDED TO LAW FACULTY

### W. G. Cook, Davenport Lawyer, To Succeed Professor Randall As Lecturer in Law.

Wayne G. Cook, of Davenport, who has been instructing in the law school this summer, has been appointed to succeed Professor Frank Hall Randall of the law faculty who resigned this spring.

Mr. Cook will be a lecturer in law and will give courses in trial practice and in brief making. He will be here only part of the time during the first semester, but will devote all of his time to teaching as soon as his business affairs are arranged in Davenport.

Mr. Cook graduated from the college of law here in 1913 and since that time has been practicing attorney in Davenport in the firm of Cook and Balluff. He is known as one of the ablest and most experienced young lawyers in the state.

Mr. Cook is the fourth generation of Cooks who have made law their profession. In 1839 Mr. Cook's great grandfather opened law offices in Davenport. He was one of the pioneers of the profession in that city and was well known throughout the state. His son, Mr. Cook's grandfather, carried on the work of his father, and his son Reuel B. Cook, was graduated here from the college of law in 1890.

George Cram Cook who was at one time on the faculty of this University in the English department, is an uncle of Mr. Cook. He was here from 1895 to 1899, and has proven himself an author of no small fame. Two of his best known novels are, "In Hampton Roads" and "The Chasm." He has also written plays and has been since 1915 director of the Provincetown Players.

Mr. Cook will succeed Prof. Frank Hall Randall who resigned in the spring, and who will practice law in this city with Attorney Paul Korab. Mr. Randall was graduated here in liberal arts in '02 and in law in '08.

In speaking of the appointment, Dean Henry Craig Jones said, "We feel that we are very fortunate to obtain such a man to fill the position. He has been most successful in the practice of law and will be in its teaching."

## Library Books Are Due Today

All university library books must be returned to the library today, Friday, July 20, unless the holder expects to register for the second term of the summer session. If arrangements have been made at the central desk that students will be here the second term, they may keep the books the regular period of two weeks.

The same rules hold for the reserve books that are in use at the present time. That is, the student can take a reserve book out at 9 p. m., and the book must be returned by 8 o'clock the following morning. There is a fine for the failure to return these books to the library at the required time.

## 'MUCH ADO' ENDS PLAY PROGRAM OF FIRST TERM

### Shakespeare's Comedy is Pre- sented Before Appreciative Audience at Quadrangle.

### COSTUMES FROM CHICAGO

### Special Lighting and Music Effects Feature Final Pro- duction of Term.

A cramped though appreciative audience of about sixteen hundred people enthusiastically witnessed the performance of Shakespeare's comedy, "Much Ado About Nothing" last night. The audience was only a little smaller than that of "Only 38" which was probably due to the fact that today is the day of examinations.

The curtain arose promptly at 8 p. m. on the first act of "Much Ado About Nothing" the most artistic presentation of all of the plays during the first summer session. The elaborate lighting effects gave the scenes a rare beauty which the other plays of this summer lacked. For the first time the stage had a drop curtain, which added to the effectiveness of the whole production. Prof. E. C. Mabie and Mr. Gregory Foley deserve considerable praise for their work on the closing play of the first summer session.

The crowning scene of the play was the scene of the near-wedding in the church. The atmosphere of solemnity was sustained by the sweet music from the organ accompanying the slow procession of the wedding march. This impressive scene was set very realistically; the different colored lights making it a most charming picture. Helen Bachnagel who has been organist for St. Mary's church for many years, played the music for the play.

Real altar boys from St. Patrick's church were cast as crossbearers, acolytes, and choristers. Francis N. Suplepp's acting was up to everyone's expectations. He played Leonato in a finished manner, worthy of his reputation. He made the governor of Messina a commanding figure in the play, and his infectious laugh continually pleased the audience.

Miss Helene Blattner in the part of Beatrice was indeed sharp of tongue and proud, but she was also good to look upon, and she made her Beatrice sparkle with wit and fun. Gladys Hammer as Hero, J. D. Welch as Don Pedro, Chester J. Myers as Claudio, all deserve praise for their respective interpretations. Joe Kelly made a very good villain.

The costumes which were ordered from Chicago, faithfully followed the conventional Shakespearean conception. They were varied in color and of fine texture.

## Social Workers Will Meet Soon

The twenty-fourth annual Iowa state conference of social workers will be held in Mason City, July 22-25, at the Hotel Hanford.

H. Claude Horack of the law department of Iowa university will be chairman of the committee on administration of poor relief, and Miss Louise Cottrell, in charge of the social service work of the extension division in connection with the University, has been appointed secretary and treasurer.

Dr. Bird T. Baldwin, doctor in charge of the child welfare research station of Iowa City, will give two addresses, on "Health of the Normal Child" and "Height and Weight Tables." The child welfare research station of Iowa City is the foremost of its kind in the United States.

## LOCAL GIRL DIES AS RESULT OF AUTO ACCIDENT

### High School Girl Fatally Hurt When Car is Wrecked Near Town.

### 3 OTHERS INJURED

### Defective Steering Gear Said To Be Cause Of Ac- cident.

Miss Alice McGuire, Iowa City High school student, died in a local hospital yesterday morning about 10 as the result of injuries received Wednesday night in an automobile accident.

As the car in which the girl and three others were riding approached a curve south of the city, Ted Watkins, driver, failed to make the turn and the car crashed into the ditch, through a fence, and against a post. A defective steering gear is said to have been the cause of the accident.

The McGuire girl suffered a fractured skull and her recovery from the first was not even hoped for. Watkins, the driver, escaped with a few cuts and bruises.

Miss Goldie Statts, 17, employee of the University hospital, suffered a fractured right shoulder. John Theobald, 16, the fourth occupant, was cut and bruised.

It is claimed by Watkins, the driver, that the car was travelling about twenty-five miles per hour and that the steering gear had not been working properly all evening. It suddenly locked, he says, and the car went into the ditch.

The auto, which was a sedan, was so completely demolished that it was barely recognizable. Watkins and the Statts girl were pinned beneath the wreckage in the front seat while the other occupants were thrown out of the car.

Passing automobiles took the wreck victims to Iowa City, where the fatally injured girl was taken to the hospital. Her skull was badly fractured and there was no hope for recovery.

The dead girl was until recently a member of the maid's staff at the University hospital. She is a daughter of Mr. and Mrs. E. E. McGuire, 714 South Dubuque street.

The young people were on their way to a dance at Hills when the accident occurred.

## Rabbi Lectures On History Of Jews in America

"The Jew in American History" was the subject of the third address of Rabbi Jacob Singer, given yesterday afternoon.

"The year 1492 was the saddest one in the history of the Jewish people, as it was the year in which the decree of expulsion was signed for the Spanish Jew," said Rabbi Singer.

The Golden Age among the Jewish people represents the medieval age in history. "It is not the queen's jewels but the Jews who were the financial basis of the expedition of Columbus," writes Adams of Johns Hopkins university.

Zacuto, professor of astronomy and navigation and inventor of several nautical instruments, introduced Columbus to the court of Isabelle and Ferdinand and it was largely through Zacuto's efforts that Columbus made his expedition.

The earliest settlements of Jews in America were in the following cities: Philadelphia, Charleston, N. C., Lancaster, Pa., and Newport. By the year 1800 there were only 3,000 Jews in America and the were mostly of Spanish origin.

"The Jews aided materially in colonial times," states Rabbi Singer. "It had not been for the little Jew on Front street I do not know what we would have done in the trying days of '77," Madison wrote Isaac Solomon.

At present there are more than three million Jews in America. They are playing an important part in agricultural, engineering, industrial, and other pursuits. Especially in agriculture are the Jewish people making great strides, according to Rabbi Singer.

## Harding to Answer Criticisms of Hiram In His Own State

(By United News.)

With President Harding Aboard U. S. S. Henderson, July 19.—In Senator Hiram Johnson's home state, President will answer the criticism of Johnson and others of the administration's foreign policy both in Europe and the Orient.

The president has already given considerable thought to the San Francisco speech which he regards as one of the most important on the trip.

Mr. Harding will discuss the world court, Mexico and the Pacific. He may also take a crack at Senator Brookhart and others he holds are keeping conditions stirred up, thus hampering the complete domestic reparations he holds essential before world stability can be restored.

The president got a big batch of mail at Seward, some of it apparently important, as it was the only mail delivered to the Henderson at that point. He spent much of the day in work.

The Henderson is due to Valdez Thursday evening for a short stay and will then proceed to Cordova.

## TO BEGIN WORK ON IOWAN PLANT

### Will Remodel Chemistry Building And Install \$25,000 Worth Of Machinery.

During the next week work will be started on Chemistry Annex No. 1 at 112 Iowa avenue, remodeling the building so that it will be ready for occupation by The Daily Iowan Publishing company in September. To have its own printing plant has long been the goal of The Iowan, and in two months this goal will be realized.

The press room and business offices controlling all student publications will occupy the first floor, while the second floor will be used by the composing department.

\$25,000 worth of new printing machinery will be installed in the building. The machinery will include a new model Duplex web perfecting press, three of the latest model linotypes, and other modern equipment necessary to the printing trade. When the plant is completed it will be the most up-to-date and best equipped plant of its size in the state.

During the past years the paper has been printed under contract by local job shops. It is hoped that the new plant will be much more satisfactory than the old one has been. The Duplex press, which prints from roll paper, will reduce the actual time of presswork from ten hours to about fifty minutes each day. By using this press, news stories which come in as late as 3 o'clock in the morning can appear in the same morning's issue of the paper.

The Daily Iowan Publishing company is a non-profit corporation organized under the state laws for the purpose of publishing The Daily Iowan and other student publications. This company is owned and controlled by the students of the University, although no individual may own stock or share in the profits of the company.

## Rooms Available At Quadrangle

Excellent rooms are available in the quadrangle for men students during the second term of the summer session. The rooms are well furnished, with running hot and cold water, telephones in each room, and shower baths. A room is provided for clothes pressing free of charge.

The quadrangle is located west of the river and the rooms are pleasant and cool. Every effort will be made to make them comfortable for students who are here during the hot weather.

A reduced rate will be charged for the rooms during the second summer session. \$11.00 is the price of the double rooms, and \$16.50 for the single rooms.

## CONFER DEGREES AT CONVOCATION THIS AFTERNOON

### Starbuck to Speak on "Edu- cation and World Peace."

### OVER 100 CANDIDATES

### Professor Wilson Will Act As the Master of Cere- monies.

Pres. Walter A. Jessup will confer more than one hundred degrees at the first convocation of this summer session to be held on the campus at 2:30 this afternoon. Of the twenty-nine advanced degrees to be conferred there will be thirteen master of arts, nine master of science, and seven doctors of philosophy, forty B. A.'s, ten B. S.'s in commerce, 540 certificates in education, and five degrees in pharmacy will also be conferred by the president. Prof. Charles Byndy Wilson, head of the department of German, will act as master of ceremonies.

The procession will be led by the marshal, Capt. T. E. Martin of the military department will probably act in this capacity. The marshal will be followed by President Jessup and President Emeritus Thomas H. McBride, Prof. Edwin Diller Starbuck, orator of the day, and Rev. Robert R. Reed, pastor of the Presbyterian church, who will act as chaplain of the day. The official guests of the University, members of the faculties, candidates for degrees, and candidates for certificates will then follow.

Prof. Edwin Diller Starbuck of the department of philosophy will deliver an address on "Education and World Peace." Professor Starbuck has received degrees from Harvard, Indiana, Zurich, and Clark universities.

He was consulting psychologist for the American Unitarian association from 1912-14, and is a member of the National Society for the Scientific Study of Education, the American Philosophy society, the American Psychology association, and a number of other well known organizations. Professor Starbuck came to Iowa in 1906, having previously been professor in education at Stanford university and Earlham college.

The order of the exercises will be:  
I. PROCESSION—

II. OVERTURE—

March from Aida ..... Verdi

Summer Session Orchestra.

III. INVOCATION—

Reverend Robert Rush Reed, B. A.

IV. ANTHEM—

Praise Ye the Lord ..... Ivanoff

Summer Session Chorus.

V. ADDRESS—

Education and World Peace....

Prof. Edwin Diller Starbuck, Ph. D.

VI. ANTHEM—

Inflammatus from Stabat Mater

..... Rossini

Miss Lucille Mylchreest and

Summer Session Chorus.

## Summer Grades Will be Mailed In Near Future

No students will receive their grades for the first term of the summer session unless they have deposited coupon No. 1, enclosed in a stamped, self addressed envelope in the box in the registrar's office.

According to the registrar, many coupons without envelopes, envelopes without coupons, unaddressed envelopes, and unstamped envelopes have been left in this box. No attempt will be made to send such students their grades.

The registrar will not send grades to a different address than that on the envelope. If a student has changed his address since depositing his envelope he must make provision for having his grades forwarded from the original address.

The exact date when grades for the first term of the summer session will be sent out is not yet known. All grades will have to be sent in by the instructors on class cards, recorded on the registrar's cards, and then transferred to the student's coupon.

# The Daily Iowan

(Summer Session)

OFFICIAL STUDENT NEWSPAPER OF THE UNIVERSITY OF IOWA

Published every morning except Sunday and Monday by The Daily Iowan Publishing Co., 11 East College Street, Iowa City, Iowa.

Entered as second class matter at the post-office at Iowa City, Iowa.

Subscription Rates: \$1.50 for entire session; \$1 for first term; 75 cents for second term.

MEMBER OF IOWA COLLEGE PRESS AND WESTERN CONFERENCE EDITORIAL ASSOCIATION

BOARD OF TRUSTEES

## CAP AND GOWN

Seven weeks have passed since the last commencement and another graduation season is at hand. This afternoon when the exercises are over, more than forty new citizens will be thrown out upon the world, replete with educational frills and eager for the experiences of life.

Although the senior accepts his degree with an outward air of badinage he feels the inrush of responsibility upon him. From the day of commencement, the making of his future depends upon him and he realizes that college training is after all nothing more than the prelude to the future activity of the student. The day has long passed when it is a mark of special distinction to have gone to college, and it is now the rule rather than the exception in professional circles. Education alone cannot determine the student's success in life, for in the words of Emerson Hough, the American story-teller and an alumnus of this university, college training is too often "perfectly good, but perfectly worthless." Without energy, ambition and pleasant personal qualities, the graduate cannot be successful.

## CONTEMPORARY OPINION (New York Times) WHY SOME STUDENTS ARE FAILURES

Prof. D. H. Howard of Northwestern university has been trying to find out why it is that some students pass their examinations, while others constantly get "conditioned" or "dropper." It is not, he has discovered from a study of the "delinquents" at his own university, merely a matter of difference in mental capacity. Indeed, he says that the average intelligence of the delinquent group is as high as that of those more successful in "meeting collegiate requirements."

That is in accord with common observation; class room stars often failing to attain eminence in later life, while the seemingly stupid ones go on to wealth or fame of one or another kind, much to the surprise, and not a little to the annoyance or disgust, of those who considered themselves their superiors—and were, in college.

Among the causes of student delinquency listed by Professor Howard are excessive devotion to athletics—it is significant that he puts that first—social activities, and outside work, these and like things causing students to devote less time than they should to sleep, campus activities, meals, classes and studies.

There is a much smaller group, the members of which show "mental immaturity," a phrase used, perhaps, to avoid calling them "defectives." They, for the most part, he says, have been raised in easy circumstances and never have been required to view life seriously. The question arises whether if born in poverty they would have done any better. Presumably they would not have gone to college at all.

As summarized, Professor Howard's report makes no suggestion as to what should be done with students who are getting no benefit from a college course, or less than they should. Most of the evils mentioned by him as causes of "delinquency," except, of course, plain lack of brains, seemingly could be remedied by a tightening of college discipline—the adoption of the methods approximating those used in the time with such wonderful results in the way of acquiring knowledge.

be done in time of peace, but the desirability of doing it is questionable, for it is obvious that these sternly pressed students missed much that a college course is expected to give. They had, too, a motive for submitting to authority, no matter what its exactions, that is lacking except in a national emergency, when a sort of discipline is endured that in different circumstances would excite resentment and revolt.

## The Sounding Board

Never a day goes by without a story getting into the columns of the Gotham dailies concerning either a subway or an "L" derailment. Yesterday it was a "Bronx Express" subway. The service was demoralized for but four hours, a substantial decrease over that of the day before.

Brookhart says that three more speeches of the president on his present trip would elect Ford to his position, in the next election by a scant 10,000,000. Well, if that's all Henry will be able to do, that insures us against a landslide. We don't like landslides, because we hate to have the defeated candidate feel humiliated.

The Sounding Board's weekly musing lading prize which takes the shape of a handsome valsparrad waffle this week leaves us with a feeling of regret. Will Hays, Frank Crane and Arthur Brisbane are all on their vacations. So we have picked a story appearing in the New York World concerning a rooster deluded by the cosmic urge as the one coming nearest to satisfying the requirements:

"Pana, Ill., July 17.—John Brunner, a farmer near here, has a rooster that attempted to hatch out his own brood. For three weeks he hovered over twelve eggs as faithfully as any hen. Frequently he left the nest to crow and strut but he always returned. Yesterday he quit his post as no eggs showed signs of hatching, and vented his temper by breaking every egg with his spurs.

Dr. Paul Bartsch, curator of molluscs at Smithsonian Institute, comes forward with the proposal that Washington birds be bathed. A good suggestion. And why not provide Polar Cub fans at the same time for Iowa Sparrows. They have been panting a good deal during the late warm spell.

Yesterday a "Photomailer" was revealed among the other nondescript articles that accumulate about our sanctum in the course of the night. Thinking that the hon' had relented and had decided to put out a likeness we feverishly tore the cover away and came upon an engraving of the "New York Chapter of Daytime Wives" together with its adopted baby.

We had never heard of the daytime spouse idea and so were interested for though the "wives" were plainly no descendants of Venus de Milo they were not of the clock-stopping variety either. But we got a scare when we read this passage from their constitution: "working girls banded together for the express purpose of helping their employers win their fight for success, by bringing a bit of home into their offices, that is, mending their employer's gloves, seeing that he eats his meals regularly, and attending to duties that his legal wife is neglecting."

As a means of developing triangles the scheme has powerful possibilities. We fear that the day time wives will show a tendency to want to work over time, so carrying their activities in the night.

"Several wives have taken exception to the movement," writes Paula Gould, the president. In view of the fact that the New York chapter includes 20,000 morons we are surprised that no more of them have misunderstood their altruistic movement.

We have received a list of Ten Safety "Don'ts" for us in case of lightning. We shall comment on several.

No. 2. Don't stand under a tree with thick foliage.

We never stand under a tree with either thick or thin foliage. We always lie down.

No. 4. Don't laugh at anyone's nervousness during a storm. There is good reason to be nervous for it is dangerous to be near a chimney, a flagpole, or a metal clothesline.

The excitable ones, as far as we know, stay away from the above mentioned danger zones. We shall continue to laugh at them.

No. 5. Stock should not be tied near a fence.

Having toyed with the cows for a decade and a half we were in a position to observe the habits of stock in the event of a storm. The advice not to tie stock near a fence is superfluous. Horses and cattle rush for a fence corner at the first flash of lightning and remain there until the thunder is but a distant rumble.

ETAOIN.

# THE WATER FRANCHISE

TO THE PEOPLE OF IOWA CITY:

The CITY COUNCIL OF IOWA CITY has submitted to the voters of Iowa City an ORDINANCE granting the IOWA CITY WATER COMPANY A FRANCHISE. THE COUNCIL BELIEVES THIS FRANCHISE FAIR.

Before action was taken on this franchise the Commercial Club of Iowa City had the matter in open debate before its members as did the Engineers' Club, and both organizations, after suggesting changes fair to the City and to the Water Company, recommended this franchise. The Council has made an independent study of the situation and feels that the City is protected and the contract fair.

The Code of Iowa gives the City Council the right to make reasonable rates and the rates now in force were made some years ago by a previous Council. The Council has the right to determine on a service charge or minimum rate. The rates are not governed by the ordinance but by the Council, irrespective of ordinance or contract as the law provides, and for that reason are not in the ordinance, but the Council has given consideration to the conditions confronting water companies and departments in cities in Iowa and has had before it for consideration the rates charged by other cities, and for the information of the public the rates as reported by the various water companies are as follows:

City Water Works, Boone, Iowa:

Schedule of Water Rates Per Quarter.

First	400 Cubic Feet @	50c per 100 Cubic Feet
Next	1000 Cubic Feet @	35c per 100 Cubic Feet
Next	2000 Cubic Feet @	30c per 100 Cubic Feet
Next	4000 Cubic Feet @	25c per 100 Cubic Feet
Next	6000 Cubic Feet @	20c per 100 Cubic Feet
Next	10000 Cubic Feet @	15c per 100 Cubic Feet
Next	15000 Cubic Feet @	13c per 100 Cubic Feet
Next	25000 Cubic Feet @	11c per 100 Cubic Feet
Next	50000 Cubic Feet @	10c per 100 Cubic Feet
Next	100000 Cubic Feet @	9c per 100 Cubic Feet
All additional	@	8 1-4c per 100 Cubic Feet

Minimum, \$2.

Citizens Water Company, Burlington, Iowa:

Schedule of Meter Rates.

First	10,000 per month,	30c per thousand gallons
Second	10,000 per month,	25c per thousand gallons
Third	10,000 per month,	20c per thousand gallons
Fourth	10,000 per month,	15c per thousand gallons
Fifth	10,000 per month,	12 1-2c per thousand gallons
Additional water	.....	10c per thousand gallons

Minimum, \$1 per month.

City Water Works, Cedar Rapids, Iowa:

Rates.

First	500 Cubic Feet @	.19 per 100
Next	1000 Cubic Feet @	.18 per 100
Next	1500 Cubic Feet @	.15 per 100
Next	2000 Cubic Feet @	.13 per 100
Next	2000 Cubic Feet @	.12 per 100
Next	5000 Cubic Feet @	.10 per 100
Next	10000 Cubic Feet @	.09 per 100
Next	20000 Cubic Feet @	.08 per 100
All over 42000 Cu. Ft.	@	.07 per 100

Minimum, 90c per month.

Council Bluffs City Water Works, Council Bluffs, Iowa:

Rates.

35c per 1000 gallons down to	8c per 1000 gallons
------------------------------	---------------------

Minimum 50c per month.

Centerville Water Company, Centerville, Iowa:

Schedule of Rates Per Month.

First	15,000 gallons,	75c per 1000 gallons
Next	15,000 gallons,	50c per 1000 gallons
Next	30,000 gallons,	40c per 1000 gallons
Next	60,000 gallons,	25c per 1000 gallons
All over 120,000 gallons,	15c per 1000 gallons	

Service Charges, Per Month.

For 5-8 inch service	.....	25c
For 3-4 inch service	.....	40c
For 1 inch service	.....	60c
For 1 1-2 inch service	.....	\$1.00
For 2 inch service	.....	\$2.00
For 3 inch service	.....	\$4.00

Davenport Water Company, Davenport, Iowa:

Rates Per Month.

First	20,000 gallons,	35c per 1000 gallons

All over 26600 Cubic Feet,	7 1-2c per 100 Cubic Feet	

Minimum, 75c per month.

The written statements of above are on file at the Clerk's office in the City Hall and may be seen by anyone interested.

A low interest rate on the bonds of the Water Company is advantageous to Iowa City as the consumers ultimately pay for this.

The Des Moines Water Company's rates are as above given and its financial statement shows a valuation of \$4,990,000.00 and an indebtedness of \$4,651,000.00. Des Moines will not have paid for its plant until it has paid off its indebtedness.

The Council gave this entire matter its best efforts and believes the franchise fair to both the City and the Company.

The physical valuation of the Iowa City Water Company property was given by Day & Zimmermann, Engineers of Philadelphia, as \$571,000. The fact that the Water Company is authorized by the State of Iowa to issue stock up to \$750,000.00 has no bearing on the rates. Rates are computed only on the property in use for the benefit of the consumers without regard to the capital stock and the capital stock can be issued only when paid for as the plant grows and extensions are paid for by the consent of the Executive Council of Iowa.

- Emma J. Harvat, Mayor
- Geo. J. Keller, Alderman from 1st Ward, Chairman Water Committee.
- B. V. Bridenstine, Alderman at Large and Member of Water Committee.

- M. O. Roland, Alderman 4th Ward and Member Water Committee.
- Harry C. Smith, Jr., Alderman 5th Ward.
- Frank H. Randall, Alderman 2nd Ward.
- Will J. Hayek, Alderman from 3rd Ward

# BREMER'S

IOWA CITY'S LARGEST CLOTHIERS

July 19, 1923.

Dear Friends:

It's savings we're emphasizing in our 90th Semi-annual Clearance Sale.

Prices are mere figures—they mean nothing by themselves—it's what they stand for in the quality of the merchandise with which they are associated that counts.

To estimate justly your savings here you must first see the quality, then the low prices attached to the quality. There you have a genuine measure of value—a real estimate of savings. Come and see for yourself.

Today and Saturday are Summer's Last Call Days at this store—the wind-up of our successful Clearance Sale. We've cut prices deeply—the quality and prices will speak for themselves.

We're expecting a call from you.

Very truly yours,

**BREMER'S**

A judicious expenditure of money for an Iowan ad will yield high interest

### Hinners-Burke.

Announcement was received yesterday in Iowa City of the marriage of Miss Marion Regina Hinners, daughter of Mrs. John L. Hinners of 11850 Summit avenue, St. Paul, Minn., and Mr. Eugene T. Burke, '16 Iowa.

Mr. Burke graduated from the law college in '16 and was very prominent in athletics. The bride attended the State University of Minnesota and is a graduate of Northwestern university.

The young couple left St. Paul the first of the week for a wedding trip by automobile to several eastern points, among them, Washington, D. C., where they will visit Mr. Burke's sister, Mrs. W. R. Meadows.

Among the guests at the wedding was Mr. Burke's sister, Miss Julia Burke, an undergraduate at the University of Iowa last year and a member of the Alpha Xi Delta sorority.

Mr. and Mrs. Burke will make their home in Clinton, where the groom is an attorney in partnership with George B. Phelps.

### Honors House Guests.

Miss Dorothy Matson will be hostess to a number of friends at a bridge tea tomorrow afternoon at her home in Cedar Rapids in honor of her house guests, Miss Katherine Weber and Miss Betty Brown of Davenport. Iowa City girls who will attend are Helen Shrader, Esther Yetter, Geraldine Wright, Eleanor Wade, Sara Cox, and Helen Wylie.

### Phi Omega Pi.

Doris and Agnes Dunham of Waterloo are week-end guests at the Phi Omega Pi house. Betty Pickering of Chicago will spend the week-end in Muscatine visiting Mrs. Genevieve Turnipseed, who is teaching in the extension school there.

### Entertains Nurses.

Miss Josephine Creelman entertained Tuesday afternoon at a reception at her home on East Lawn in honor of all the nurses going to summer school this session. Miss Ruth Abbott of the cast of "Only 38" gave a solo. Several musical and violin solos were also rendered by student nurses.

### P. D. K. Dinner.

Members of the Phi Delta Kappa, honorary educational fraternity, will have a dinner tonight at 6 p. m. at the Pagoda Tea Shop. Immediately following the dinner, the second initiation for the year 1923 will be held.

All Phi Delta Kappa men in the University, whether of Epsilon chapter or of other chapters are welcome.

### Devines Are Leaving.

Mr. and Mrs. Aubrey Devine will motor to Des Moines tomorrow to spend a week as guests of his parents. From Des Moines they will motor to Colorado to spend the month of August vacationing in the mountains.

After September first they will make their home in Denver, where Aubrey has accepted a position as athletic coach at the University of Denver.

### Park Dance.

Dancing at the park pavilion this evening will be chaperoned by Mr. and Mrs. C. W. Smith.

## Students Enjoy Woodwork Exhibit

The manual training exhibition was the center of interest in the excursion to the engineering building yesterday at 4 o'clock. The clocks mounted in black walnut and the large table lamps with art glass shades and inlaid "I's" were among the best articles at the exhibition.

Numerous turned articles such as fruit bowls, bud vases, candle stick holders, and rolling pins were on exhibit.

The men found little pleasure in looking at the rolling pins and spent most of their time in the shops. There were also a large number of articles that had been made by beginners in manual training. Among these articles were book racks, card note boxes, and stands of various kinds. The kitchen cabinet was extremely interesting to the sightseers.

After viewing the exhibit, the group spent a short time looking over the engineering shops and the steam laboratory.

### WHEAT GOES UP

(By United News.) Chicago, July 19.—Reports of the new damage from black rust in the northwestern wheat belt, sent futures above \$1 a bushel on the Chicago Board of Trade Thursday for the first time in more than a week.

Education Head Favors Teaching As a Profession

DEAN PAUL C. PACKER

Who's Who This Summer at Iowa

A man with a big belief in his profession is Dean Paul C. Packer, the head of the college of education. Prof. Packer is new to present Iowa students but he is far from a stranger to former University members as he has been here both in the capacity of student and professor in past years.

Dean Packer advocates training for teaching as a profession. He believes that the teacher should be a specialist and should have the same intensive study and preparation that is required of the doctor, lawyer or dentist. Especially does he emphasize the value of personality and culture as assets of the best teacher.

The student who goes to the education head with any question whatsoever is always sure of courteous and helpful interest. He never treats anything as trivial. No matter what your difficulty may be, Mr. Packer does his best to help you, and this quality of never-failing interest and helpfulness is one of the chief charms of the man whom students are learning to know and enjoy.

The dean is of Quaker descent and is characterized by the rare virtue of saying but little and speaking only when the spirit moves him. He never gets hilarious over life, but rather enjoys it in a quiet, unruffled way.

Amusements? Swimming, golf or tennis have little special interest for Mr. Packer, but he is an enthusiastic football, basketball and baseball fan. He follows the league scores regularly, and friends admit that he was especially interested in the Iowa football and basketball teams and took keen delight in watching their progress during the time he was at Columbia.

The dean is also a devotee of the theatre, but owes his allegiance mainly to the legitimate stage. Strong, virile mystery plays rank high among his favorites—and he likes them full of thrills.

Dean Packer is an Iowa man. He was born and raised at Salem, Iowa, a small Quaker community. His wife, who was formerly Miss Mary Bliss, grew up with him at Salem. He has one daughter, Miss Virginia, a brown-eyed miss of six years, and to play with her or read to her are pleasures of which Mr. Packer never tires.

He received his A. B. degree at Iowa in 1918, his A. M. at Michigan in 1921, and then completed his graduate work at Columbia university where he was awarded a Ph.D. in June, 1923.

Professor Packer has had experience teaching in the country schools, as grade principal at Ft. Madison, and as supervising principal of the Iowa City public schools, where he made plans for several of the new grade buildings. He was also principal of the university elementary high school for one year.

In 1918-19, he was assistant director of research in Detroit, and the following two years he was assistant superintendent of schools in the same place.

He was professor of education here in the fall of 1921, and in February, 1922, he went to Columbia university. He was a member of the teaching staff at the Columbia summer session last year.

Dean Packer's special field is administration, and he has directed or been intimately connected with many surveys of large school systems. Among these are surveys conducted at Gary, Ind.; Cleveland Heights, Ohio; Flint, Mich.; St. Joseph, Mo.; and White Plains, N. Y.

Picturesque Career Caused Byron To Be Misunderstood

"Because of the picturesqueness of his career, Byron has been misjudged more than any other poet of his time," said Prof. Frederick C. Pierce of Yale who is teaching several courses in the summer sessions, in his lecture on Byron yesterday afternoon in the L. A. assembly hall.

He went on to say that Byron's career was most exciting, reading like a novel, and although he undoubtedly practiced some gross vices, one must not overlook his real character. He was selfish, cynical, and proud,

but underneath it all there was a better Byron who is too often overlooked.

"Byron at heart was a shrewd and penetrating idealist. All of his life he wanted to write realistically, but his readers' demands and the demands of the world of custom at that time kept him from it. He wanted to make an accurate study of life, devoid of any sentimentalism and artificiality. In his later years he realized his desire although some of his writings were cynical and bitterly sarcastic."

In closing, Professor Pierce said, "Byron was no saint, but he was something better than we realize, and we see this in the greatness of his best poetry, and the shrewdness with which he looked on life."

HOUSES CLOSE

The Phi Gamma Delta fraternity and the Delta Zeta sorority will close their houses at the end of the first summer term. Other organizations are making plans to stay open until the fall term of the University.
