Detain Campbell for Questioning in Carlisle Murder

Sheriff Finds Burned Car in Vicinity of Straw Stack

(By The Associated Press)
DES MOINES, Aug. 18.—R. C. Campbell, living near Carlisle, was arrested by deputy sheriff here today and is being detained for questioning in connection with the jazz murder case.

The arrest was kept a secret until the return of Sheriff Park Findley and deputy Sheriff Rich Anderson from Waterloo with Russell Vogel, another suspect, late today.

Car Burned in July
The arrest of Campbell followed an investigation of the burning of his automobile late in July near Carlisle in the vicinity of the straw stack where the body of the woman was found.

Campbell was first arrested shortly after 5 o'clock Monday afternoon by a posse composed of detectives Dalmage and Nichols, deputy sheriff Fred Miller and Mayor Francisworth and Marshall Concklin of Carlisle. He was released by police shortly after 8 o'clock. The sheriff's men immediately rearrested him. Officers working on the case stated that Campbell's wife disappeared under mysterious circumstances before the straw stack burned.

Wife Located
In releasing Campbell, inspector of detectives Carl Vonn stated that he had succeeded in locating Campbell's wife in Council Bluffs.

Regardless of the action of the police Sheriff Findley declared in connection with the case. He would not divulge whether he had any additional evidence against him or what the reasons were for holding him further.

Phi Beta Kappa Delegates Observe West Point Drill

NEW YORK, Aug. 18 (AP)—An exhibition drill by cadets at the United States Military Academy at West Point, will be given for the benefit of visiting delegates to the triennial Phi Beta Kappa convention to be held in New York City, September 8 to 10, the arrangements committee has announced. A steamer will carry the delegates up the Hudson river to West Point. Among the business matters to come before the delegates, representing the 99 chapters of the organization, are applications for new charters from Agnes Scott college, University of South Carolina, College of Wooster, University of South Dakota, Occidental College, University of Idaho, University of Kentucky and the University of the South.

Arrangements also will be made for the sesqui-centennial to be held next year in honor of the original chapter which was established in 1776 at the College of William and Mary. The organization has included 57,761 members, of whom more than 40,000 are living.

Luck Has Failed Marston in Amateur Golf Crown Quests

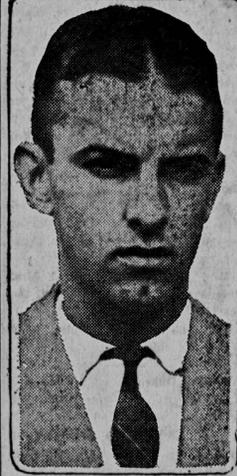

OAKMONT, Pa., Aug. 18 (AP)—Maxwell R. Marston of Philadelphia became amateur golf champion of the United States in 1923 after eight years of competing in the event. Today he is an uncertain factor in the coming championship at the Oakmont Country Club course.

Marston is a most interesting linkman. There was a time when he used a long sweep of the club on the shortest pitches with remarkable accuracy but in recent years he has changed the style somewhat, until it more nearly approaches that of other golfers of note.

Bob Garner, veteran Chicagoan, has been Marston's nemesis in the search for the amateur crown, eliminating him in the early rounds and semi-finals three successive times.

Last year at Merion he progressed to the semi-finals, putting out C. O. Hezlet of Ireland, J. Wood Platt and Dexter Cummings on the way, but he played poorly against George Von Elm and was beaten, 7 and 6.

Boy Mourns Murder of School Teacher

Wilmington, Ohio, is disturbed over the murder charges preferred against Everett Adams, 17, son of a Wilmington police officer, in Sedalia, Mo., where, authorities say, the boy admitted killing Adam R. Lawson, Lawson, a Lodi, N. Y., school teacher, offered her boy a lift in his car and so, it is charged, Everett killed him. Adams was one of the best scholars of the Wilmington high school, and captain-elect of the basketball team.

Ruch Will Speak at Teachers' Meet

Studebaker to Preside Over Des Moines Conference

Prof. G. M. Ruch, of the University of Iowa, will speak at the conference for Des Moines teachers, beginning August 31, on "The Results of Special Investigational Work Financed by the New York Commonwealth Fund."

Other speakers announced for the conference are Prof. E. R. Breslich, of the school of education of the University of Chicago; Laura E. Zirbes of Columbia University, national authority on the teaching of reading; Mrs. Lois C. Mossman, professor of education at teachers' college, Columbia university.

Superintendent Studebaker will preside over the two days meeting for principals and supervisors, followed by a four day conference for the city's entire teaching force of almost 1,000 teachers, and teachers in the country schools.

Mrs. Max Mayer, of Des Moines, and Mrs. Samuelson, of Iowa State Teachers' college will present special talks for the county teachers.

Plane to Cross Channel

LONDON, Aug. 18 (AP)—A 650 horsepower engine airplane to seat 14 passengers recently completed its trials and will be used in the cross-channel service. It has a large roomy cabin with wicker armchairs for the passengers.

Emergency exits are provided in the room should it be necessary for passengers to emerge in case of landing on the sea. The body of the machine is watertight and buoyant and would float for several hours.

Co-Eds Don't Mind Staying Up Until 3 A. M., Experiments Show

According to a story in the New York Sun, the modern co-ed does not think anything of staying up until 3 o'clock in the morning. Neither does her boy student escort.

This much developed in the first phase of a scientific experiment undertaken at George Washington university by Prof. Fred A. Moss, head of the department of psychology, and Dr. Oscar B. Hunder, acting dean of the medical school.

Eight students volunteered for a scientific experiment as to the physical and mental effect of the loss of sleep for sixty hours. Five of them are government employees. They submitted to an examination early yesterday, went to work and reported to Prof. Moss at the end of the day's work. Thereafter the professor's worries centered keeping them from inquisi-

Sydney Foster of Des Moines Talks in Assembly Today

Topic of Address This Morning is "Responsibilities"

Sydney A. Foster, secretary of the Royal Union Mutual Life Insurance company in Des Moines and known both for his work in the field of finance and his devotion to the game of golf, will address the weekly assembly this morning on "Some of Our Responsibilities." He will have the entire period from 10:45 to 11:15 o'clock.

Mr. Foster arrived from Des Moines yesterday and spent the afternoon on the Pinkbine Field, named for his friends, William O. and Charles Finkbine who donated the grounds to the university and with whom he often plays in Des Moines. Mr. Foster has the distinction of having organized the first municipal golf course in the country.

State Fair Reserves Section for S. U. I.

Phases of Different Colleges Exhibited With Pictures

A booth decorated in old gold, and exhibits that visualize the activities of the University will be part of the State fair this year. The third room on the west side of the north transept of the educational building has been reserved for the university from among the four held for State educational institutions. The method of exhibition will be, a two foot wide decorated table on three sides of the booth; the table will be covered with yellow crepe paper and a drop curtain reaching from the edge of the floor, will also be yellow and of the same material.

On the table will be found bulletins sent out by the University. The sixteen panels which have been distributed to several departments will be placed above the table. These panels are 3 by 5 and are painted old gold, each decorated by the exhibiting department. There will probably be about 1,500 views showing the various activities of the university.

At the foot of each panel will appear descriptive bulletins for the exhibit on the particular panel. The panels will be labeled so that visitors can be directed to them by number.

Colleges Have Separate Exhibits

Supplementing the panel exhibit will be a multiplex exhibiting stand, with forty-eight pages about two feet square, entirely devoted to the college of applied science. A second multiplex bracket will carry the exhibits of the college of pharmacy, child welfare, botany, and geology.

The museum panels will exhibit a series of pictures showing the habitat of museum groups including, Layson Island, Bering sea, and an antelope group. The panel of the law college will show pictures of the old class room in the hall of representatives of old capital.

Co-Eds Don't Mind Staying Up Until 3 A. M., Experiments Show

According to a story in the New York Sun, the modern co-ed does not think anything of staying up until 3 o'clock in the morning. Neither does her boy student escort.

This much developed in the first phase of a scientific experiment undertaken at George Washington university by Prof. Fred A. Moss, head of the department of psychology, and Dr. Oscar B. Hunder, acting dean of the medical school.

Eight students volunteered for a scientific experiment as to the physical and mental effect of the loss of sleep for sixty hours. Five of them are government employees. Belgium to Pay, Less Interest; Given Period of 62 Years

Coolidge Informed of Debt Settlement

PLYMOUTH, Vt., Aug. 18 (AP)—President Coolidge was informed late today by the Associated Press of the Belgian debt settlement, and made the terse comment he had hoped for it, and expected it. The executive was plainly satisfied. A statement made by him here yesterday after a conference with secretary Mellon and Senator Smoot of Utah, members of the debt commission, forecast today's settlement. The debt commissioners went over with him the proposed terms of settlement.

Amateur Golf Tournament
CHEROKEE, Aug. 18 (AP)—The first annual Sioux Valley golf tournament for amateurs will be played on the Cherokee Country club course August 20, 21 and 22.

'Al' Smith's Son Pinched for Playing Ball in Street

Walter Smith, Youngest Son of Governor, Caught in Act

ALBANY, N. Y., Aug. 18 (AP)—Walter Smith, youngest son of Governor "Al" Smith, is so devoted to baseball that he came in conflict with police authorities Wednesday night, it was learned today. Although no record appears on the police blotter, Patrolman John Roehr and Fred Grube admitted that they had given the 12-year-old lad, and some companions a ride to the station in the police car, after he had been caught playing ball in the street.

At the station, the officers asked Walter to "use his influence" to keep his "gang" from playing in the street. Walter said he would.

"He's a plucky little lad," Patrolman Roehr said. "We felt sorry for him, but we had to do it."

Rhoner Addresses Medical Association

Dr. Frank J. Rhoner, of the university hospital, addressed the members of the Fayette County Medical association at Waucoma Monday, Aug. 10. The meeting was held at the home of Dr. J. M. Smittle, who was graduated from the college of medicine at the University of Iowa in 1897.

Mahan Takes Part in Indian Day at McGregor Thurs.

Representing the State Historical society Bruce E. Mahan, associate editor of the society, will enact the role of Chief Keokuk in the Peace pageant held Thursday at McGregor, Iowa, in connection with the Wild Life conference.

Thursday is Indian day, and the Peace pageant is commemorating the 100th anniversary of the signing of the peace treaty between the Sanks, Foxes and Sioux. This treaty also established the boundary line between these tribes in Iowa. Mari Reuf Hofer, nationally known pageant maker, has directed the Peace pageant. The United States Commissioner of Indian Affairs will be present. Indians from Iowa and Wisconsin will take part in the pageant.

Thursday is also Bookfellows conference drama day and Mr. Mahan will deliver an address on "Pageantry in Iowa Communities." Mrs. A. Star Best will preside over this part of the program.

The State Historical society has published a pamphlet "Pageantry for Iowa Communities" which was written by Geo. O. Hurley.

Pioneer Homecoming

CHEROKEE, Aug. 18 (AP)—Cherokee will stage its first Homecoming celebration for pioneers August 18 and 19. An elaborate program has been arranged, featured by an historical pageant.

F. Ensign Chosen as Toastmaster at Grad. Luncheon

150 Degrees Will Be Awarded at August Commencement

Prof. Forest C. Ensign has been chosen as toastmaster of the graduate luncheon which will be given at Youde's Inn Friday, August 28 at 12 o'clock. Other speakers are Prof. Hardin Craig, who will speak in behalf of the faculty, Agnes Samuelson for the first degree seniors, and Dr. George D. Stoddard for the advanced degrees. No announcement has been made in regard to the speaker for the administration.

Prof. Frederick J. Lazell and Prof. W. S. Mauleby are in charge of the luncheon. "The sale of the tickets will begin today," Prof. F. J. Lazell, chairman of the luncheon committee, stated. Everyone is cordially invited to attend the luncheon.

Other commencement announcements which have been given out by Prof. Charles E. Young are: Prof. George F. Robeson will serve as marshal, and commencement music will be in charge of Mrs. Mildred B. Paddock. Previous announcement has been made regarding the selection of Prof. B. Ifor Evans for the delivery of the commencement address.

One hundred and fifty degrees will be awarded at the August commencement. The number awarded at the July convocation was over 200. More doctor's degrees will be conferred at the coming commencement than at that of last term.

Will Open Twain Memorial Library

Twain's Old Print Shop Located Next to New Building

KEOKUK, Iowa, Aug. 18 (AP)—A memorial for Mark Twain will be included in the new building of an insurance company here.

The new building will be located next door to the old print shop in which Mark Twain worked as a printer during 1856 setting type for a city directory, which his brother, Orion, published. In this directory the humorist gives his occupation as antiquarian.

A room or library in which will be kept many of the records of Clemens' personal life is the memorial planned. A printer's case, photographs, autographs and possibly a copy of the directory on which Clemens worked will be included as part of the equipment of the room.

Northwestern Circle Elects Mrs. Flickinger President

Mrs. Roy C. Flickinger, wife of Roy C. Flickinger who has recently been appointed head of the department of classical languages at the University of Iowa, was elected president of the Northwestern university circle at its annual meeting.

The organization consists of 200 wives of faculty members and administrative officers of the university. Flickinger is, at present, dean of the college of liberal arts at Northwestern.

Day in Washington

The Shipping Board sold eighteen more ships. Agreement was reached for settlement of the Belgian debt. Abandonment of the MacMillan arctic flight was discussed. The prohibition executive staff laid plans for the new enforcement drive. Secretary Hoover suggested counter moves against former monopoly in American necessities.

Iowa Ranks High in Farm Manufactures

DES MOINES, Aug. 18 (AP)—Figures from the department of commerce at Washington show that Iowa ranked fifth among the states of the union in the manufacture of haying and harvesting machinery.

Her rank among states manufacturing machinery for preparing crops for market or for use in sixth and she ranks eighth in the manufacture of tractors and traction engines.

During 1924 9.8 per cent less agricultural machinery was manufactured than in 1923, but a gain of 57 over 1922 is reported.

Year's Worst Storm Hits Southern Iowa

Climate Causes Treeless Prairies States Shimek

That the same physical conditions which caused the treeless prairie regions affect the crops of the country is the theory of Prof. Bohumil Shimek of the department of botany who will give a public address in old science hall this afternoon at 4 o'clock on the subject, "The Prairies; Their Climate and Origin."

Professor Shimek thinks that it is well that the public know what these conditions are and so be better able to guard against them. Many people believe that the treeless condition is the result of great prairie fires but Professor Shimek holds that there is nothing in this theory.

Scour Portland in Hunt for Fugitives

Daring Trio Aflight From Car in Downtown Section

(By The Associated Press)
PORTLAND, Ore., Aug. 18 (AP)—Portland today was the unwilling center of the greatest man hunt it has ever known.

Hastily recruited police, some of them on vacations, many of them in their beds were called out to scour the town for Tom Murray, Ellisworth Kelley and James Willos, desperados who casually alighted from an automobile somewhere in the downtown section last night.

They learned through C. L. Newman, who with his family was kept prisoner in his home all day yesterday near New Era, Oregon by the fugitives, that no one of the bandits grown hardened and reckless from prison experiences and their prison breakfast last Wednesday, intended to be taken alive.

Kelley has with him a bottle of poison and in one pocket a bullet that fits the revolver he carries. The other two fugitives have a bullet each but no poison. There will be little rest for the entire police bureau until the trio is captured, chief Jenkins declared. All reliefs will be ordered out and will work double shifts, he said.

Arbingast Accepts Ill. English Position

Harper Arbingast, of Mt. Vernon, who is studying in the graduate college at the university, has accepted a position as instructor of English in the schools of Peoria, Ill.

Argentina Buys U. S. Cars

NEW YORK, Aug. 18 (AP)—During the first six months of this year, 24,110 motorcars and 3,394 trucks and tractors were imported into Argentina, says a report received here by the Argentine-American Chamber of Commerce. Ninety-seven per cent of the vehicles were from the United States.

Rome Revives Old Baths for Athletes

ROME, Aug. 18 (AP)—Public baths, which constituted part of the greatness of ancient Rome, are beginning to come into vogue again with the ever growing interest in athletics on the part of Italian youth.

Italian architects have drawn up plans for the erection of two massive structures which are destined to serve the Roman public not only as baths but also as athletic and sport centers.

The new public bath establishment will contain, among other things, a huge swimming pool, 60 meters by 20, as well as a large gymnasium, reading and lounging rooms and other equipment calculated to attract athletically inclined young men.

Hail, Wind Damage Crops, Stock, Silos and Buildings

(By The Associated Press)
DES MOINES, Aug. 18.—A hail storm that came almost out of a clear sky with hail stones of extraordinary size swept localities from North English southeast to Mount Pleasant today beating down the corn until stocks were stripped of leaves or broken, damaging buildings and killing pigs and chickens.

The storm is believed to have started several miles west of North English and traveled southwest to Mount Pleasant. The wind and hail killed chickens and pigs and broke windows, blew down silos, windmills, and trees, and crushed small buildings.

It was reported by far the worst storm of the season in that locality the damage being greater as the corn was nearing maturity. Some farmers reported hail stones "large as baseballs" while others more conservatively said they were the size of small eggs. A sudden cool wind while the temperature was high is believed to have caused the hail.

M. Mason to Head Chicago University

CHICAGO, Aug. 18 (AP)—Max Mason, professor of mathematical physics in the University of Wisconsin, has been elected president of the University of Chicago, succeeding the late Dr. Ernest De Witt Burton and has accepted the appointment.

Chaney, Former Instructor Here, Now Paleontologist

R. W. Chaney, assistant professor in the department of geology of the university for some years previous to 1922, has recently arrived in Peking, China, from an expedition into western Mongolia in which he was associated as paleontologist with Roy Chapman Andrews, leader of the American Asiatic expedition.

The party is congratulating itself upon the large amount of scientific lore accumulated, and upon its safe passage through a great area, west of Peking which is being used by General Feng as a training ground for large Chinese armies with which he hopes to drive all whites from the treaty ports of his country.

Andrews' party is the only one allowed to pass through the country in many months. The report of the expedition states that no human remains were found, nor evidence to establish the missing link. Fossilized eggs estimated to be twenty thousand years old were found near Shabrakus, and also the first traces of head work. Specimens of mammal life of the same period were found and will be brought back. The only similar specimens of mammals are in the British museum.

When Professor Chaney left the university, he took up work as research assistant under the Carnegie foundation in the far west.

2 Die, 74 Injured in Boiler Explosion

NEWPORT, R. I., Aug. 18 (AP)—Two persons lost their lives, one a fireman and the other an unidentified boy while seventy-four were injured, 14 of them seriously as a result of an explosion of the boiler of the steamer Mackinack just before six o'clock this evening while at a point opposite the naval training station here.

The injured were taken to the naval hospital and the Newport hospital. Scores of passengers with superficial wounds went to their homes after being given first aid treatment. All the injuries were caused by scalding steam escaping from the boilers.

President Okes Funding Scheme; Bar Dawes Plan

Payments Will Start Soon, Increasing Each Year

(By The Associated Press)
WASHINGTON, Aug. 18.—All interest charges on money actually loaned to Belgium during the war with Germany will be forgone by the United States under terms of an agreement for the funding of the Belgian war debt to the United States reached today between the American debt commission and Belgian representatives.

62 Years to Pay

The American commissioners, with approval of President Coolidge, agreed to allow Belgium to pay back to the United States over a period of sixty-two years without interest the \$171,000,000 loaned during the war. The balance of the debt, approximately \$246,000,000, which was loaned after the armistice, will also be paid back over a sixty-two year period with some remission of interest charge.

An interest rate of 3 1/2 per cent after the first ten years was agreed upon for this part of the debt. "Moral Obligation"

The American commission in announcing the terms explained that a "weighty moral obligation" attached to the United States in the matter of settling the Belgian debt by reason of proposals accepted by President Wilson at the Versailles peace conference.

The United States commission refused, however, to accept a Belgian proposal that payments from Germany under the Dawes plan should be used to meet the Belgian account.

Belgian industrial conditions and trade circumstances were given consideration in arrangements for partial deferment of actual payments but they will amount shortly to \$2,900,000 a year and graduate upward until the final payment of \$12,700,000 will be realized by the United States.

The Incomplete Angler

There is a distressing decadence in the ancient and honorable art of fishing. As practiced modernly, the pastime has become more time-killer than sport, a sort of mere escape from the whang and bang of the machine age to some quiet spot where there are not too many mosquitoes in the cub foot and it is possible to stick the pole in the bank and fall into a deep sleep accompanied by sonorous snores, causing great consternation among the fish gathered to admire and speculate upon the worm.

Then, too, there is the mixed fishing party, a curse not often tolerated by our eminently sane ancestors, and one that is all too often a farcical ruse in which the eminent design is not the impaling of scaly fighters on a baited hook, but rather the capture of the sucker homo by means of ancient arts in the idyllic circumstance.

Bring back the days when a fish was a fish, and a blanket party was something else. Bring back the days when angling was performed with the gusto of pioneer Texans, as recounted in the following editorial item, printed long ago in the San Antonio "Herald":

"From the fact that a number of ambulances loaded down with demijohns and fishing-poles were seen passing out of town this afternoon, in the direction of the fishing-hole on the Leona, we feel almost certain that tomorrow will be the Lord's Day. We wish to state, for the information of the guilty parties who desecrate the Sabbath, that hereafter we will publish a list of all Sunday fishermen who fail to send us a fair share of the fish. We wish it, moreover, to be distinctly understood that small perch and catfish will not satisfy us. We insist on trout. There are too many bones in perch and catfish to justify us in failing to do our whole duty in exposing those who defy alike the laws of God and man. Remember the sabbath-day to keep it holy."

One of the chief reasons, of course, for the decadence in fishing is the scarcity of good fish. Minnows seem to be on the increase, and apparently retain their youth longer than formerly. Our fish, like our suckers who bought oil-stock, have been too prone to snap at something for nothing, and in both cases the slaughter has been great.

De Profundis

LIKE the Thibetan who last year arrived in Paris to "see the war," Jean Thibaud, deserter from the Chasseurs Alpins in 1915, emerged from the depths of his hiding place in the French Alps and was astonished to find the war was over several years ago and all deserters were amnestied six months ago. Thibaud lived the life of an anchorite in the most inaccessible part of the Alps bordering on Italy. Ten years of silence have made him almost a mute. When he approached Grenoble, he was clad in sheepskins and was naked to the waist.

Such is the story of a French Albert Lloyd, who rather than face the crash of the Prussian guns lived to endure the eternal silence of ten years of mountain life. He has won his game. He has life, the possession which he escaped to preserve. He has life; but life without honor.

How deeper than the cruellest wound of war is the ridicule of peace! What man would prefer to rot in the Ravine of Death at Verdun rather than live a thousand deaths of shame? Had Thibaud fought in the ranks, his lot might have been an unlettered cross and a winding-sheet of flame. But he would have escaped the ignominy which mankind instinctively casts upon the coward, the shroud of living death which speaks of their shame as insistently and accusingly as the Scarlet Letter upon the breast of Hester Prynne.

There is a death far more terrifying than a thousand battles in a life of dishonor. It is hardly probable that Thibaud would duplicate his flight, for the solemn fastness of the mountains have struck more fear into his breast than all the cannon of Fort Vaux. He fled one terror, only to face a greater one. There is still truth in the lines of "The Master of Balantrae" which read, "Not every man is as great a coward as he thinks he is; nor yet so good a Christian."

Forestalling Crime

THE handling of crime, like every other civic problem, goes through a process of evolution. Comparatively few years ago the criminal met a hasty punishment of seeming severity. If a man stole a sheep, he was hanged or guillotined on the public square before a crowd of spectators consisting of men, women, and children. For the slightest offense against society or the officials, he was placed in stocks on a public street, to be hissed at, spat at, and have stones thrown at him. But still there were criminals.

To-day, we are more humane. The criminal is tried before a jury of twelve of his peers. If found guilty of first degree murder, he may be hanged. For any other crime, he is fined, or imprisoned, or both. While in prison he receives good food, a good place to sleep, and is treated as a human being. The murderer is usually imprisoned or declared insane and confined to a hospital. If imprisoned, he is paroled in a few short years and released. In a few years more he may be pardoned. If sent to an insane asylum, he is healed in a couple of years and turned loose. And still there are criminals.

We are now on the verge of a new method, by which the person of criminal tendencies will be detected before he has committed the crime, and will be segregated from society to a colony for the mentally deficient, where expert psychologists will care for him and endeavor to correct his misdirected mind. The purpose is to prevent crime rather than punish crime. This plan for the handling of criminals was proposed by Chief Justice Harry Olson of the municipal court of Chicago, and Dr. William J. Hickson, director of the court's psychopathic laboratory. It is the result of a careful study of over 40,000 criminal cases which proved that nearly all criminals are mentally deficient and uneducated.

This method seems logical and sound. For the first time, we are putting the horse before the cart in criminal proceedings. How successfully the plan can be worked out remains to be seen. We may be sure, however, that so long as man exists on earth, there will be men who will break the laws of society. Cain was the first. Until the end of the world we shall not have the last.

The Master of Your Fate

(The Davenport Times)

IT is certainly true that the child is father of the man.

Could the young be made to realize how soon they will become mere walking bundles of habits, they would give more heed to their conduct while in the plastic state.

We are always spinning our own fates, good or evil.

Every smallest stroke of virtue or of vice leaves its ever so little scar.

The drunken Rip Van Winkle, in the play, excuses himself for every fresh dereliction by saying, "I won't count this time!"

He may not count it, and a kind heaven may not count it; but it is being counted.

Down among his nerve-cells and fibres the molecules are counting it, registering and storing it up to be used against him when the next temptation comes.

William James is authority for the statement that nothing we ever do is, in strict scientific literalness, wiped out.

Of course this has its good side as well as its bad one.

As we become permanent drunkards by so many separate drinks, so we become saints in the moral, and authorities and expert in the practical and scientific spheres, by so many separate acts and hours of work.

"Let no youth have any anxiety about the upshot of his education, whatever the line of it may be," says James.

"If he keeps faithfully busy each hour of the working day, he may safely leave the final result to itself.

"He can with perfect certainty count on waking up some fine morning, to find himself one of the competent ones of his generation, in whatever pursuit he may have singled out.

"Silent, between the details of his business, the power of judging in all that class of matter will have built itself up within him as a possession that will never pass away."

Young people should know this truth in advance.

The ignorance of it has probably engendered more discouragement and faint-heartedness in youths embarking on arduous careers than all other causes put together.

Poems That Live

The Soldier's Death

Such is the death the soldier dies:
He falls—the column speeds away;
Upon the dabbled grass he lies,
His brave heart following, still, the fray.

The smoke-wraths drift among the trees,
The battle storms along the hill;
The glint of distant arms he sees;
He hears his comrades shouting still.

A glimpse of far-borne flags, that fade
And vanish in the rolling din;
He knows the sweeping charge is made,
The cheering lines are closing in.

Unmindful of his mortal wound,
He faintly calls and seeks to rise;
But weakness drags him to the ground:
Such is the death the soldier dies.
—Robert Burns Wilson.

Modistes Offer Coat and Ensemble Hints

By MME. LISBETH.

The Paris modistes are opening their salons to show their collections of fall and winter garments and while we may not all have the privilege of seeing the creations we may listen while those who do tell us what they have observed. And many are the suggestions we may glean from their recitals to help us in choosing our wardrobe.

Three smart looking garments are shown above that give some of the most striking of the ideas put forth in the showings. The plaid sports coat (left) is trimmed with brown caracul fur, a favorite trimming for the new coats. This coat adheres pretty closely to the straight-line and the bandings of caracul are graduated from the shoulder to the hem, which it encircles in a wide band.

German fitch fur is used to elaborately trim the ensemble (right).

Letter to the Editor

Goldfield, Ia., Aug. 16, 1925.

Under the heading, "The Crime of Neglect," you lecture the tax payers for not having built "super roads." You say that Rome had better roads before Christ. They did have. Iowa may have these better roads if they are willing to get them in the same way that Rome did—that is, by slave labor. If these wild eyed, verbose boosters for paving are willing to offer their services as the road builders of Imperial Rome were compelled to do, free, we too may have paved roads. I have heard no mighty roar of volunteer voices!

"We are paying for paved roads whether we have them or not," is stolen propaganda from the Good Roads Assn's. "lethal brew." Another, from the same source—"It costs four hundred million dollars to run the automobiles of Iowa, the greater part of which might be saved if we had paving." If this latter statement is founded on fact then we should pave and double our mileage so that we would have eight hundred million dollars to the good!

The editor must realize that fully ninety per cent of all auto expenditures in Iowa are non-productive. Anything that will tend to increase their use will only aggravate our financial troubles and no money saving will result.

We have 52 bus lines and 75 freight truck lines in Iowa. Every one of these is helping create a deficit in the earnings of our necessary steam roads and thereby compelling those who use the old system of hauling to pay an ever-increasing price for the service. Our Railroad Commissioners are engaged in the arduous task of determining what shall be done to help the railroads earn the return permitted by law. Every mile of paved or other improved road in Iowa is making their task more difficult—and the public "pays the freight!" We must have steam railroads with their passenger and freight facilities—we should not have competing highways to increase the cost of transportation.

You say—"If a war necessity demanded paved roads they would be built." What a nation will do while suffering from war madness and what they should do in times of normal sanity, are vastly different things. Here again the editor seems to forget that war is carried on under slavery conditions,

and it is lined with the material of which the dress is fashioned.

The enormous variety of fur trimming which elaborates the models in the collections thus far shown has proved of particular interest. Mole skin is used in dyed effects such as bois de rose or mahogany, which are particularly attractive, and squirrel is also favored. Other colorings which are represented in mole skin and hare are the navy and violet shades.

Another ensemble rich in color (center) combines a flared frock of printed material with a coat of Epluard green. The coat also has a flare and is trimmed with fur,

and it is lined with the material of which the dress is fashioned.

The enormous variety of fur trimming which elaborates the models in the collections thus far shown has proved of particular interest. Mole skin is used in dyed effects such as bois de rose or mahogany, which are particularly attractive, and squirrel is also favored. Other colorings which are represented in mole skin and hare are the navy and violet shades.

In Iowa City Social Circles

Peterson-McDonald

Announcement has been made of the approaching marriage of Helen Peterson of Iowa City and Robert McDonald of Cherokee. The wedding has been set for August 29. Miss Peterson was graduated from the university in 1921, and is a member of Alpha Delta Pi sorority and of the Staff and Circle. Since her graduation Miss Peterson has been social assistant to the dean of women.

Mr. McDonald attended the university, having completed his junior year of law last June. He is a member of Acacia, A. F. I., and Phi Delta Phi fraternities.

Manville Heights Meeting

Mrs. Kirk H. Porter will entertain the Manville Heights club at her home Thursday afternoon, August 20, at 2:30 o'clock.

Mrs. Frederick Keft and Mrs. George F. Robeson will assist the hostess.

The club will hold its election of officers at this time.

Llewellyn-Dukes

The marriage of Dorothy Llewellyn of Kahoka and Henry D. Dukes of Centerville has been announced by C. L. Llewellyn, father

of the bride. The wedding took place at high noon August 17, at Kahoka.

Mrs. Dukes attended the university, the University of Illinois, and Columbia university, the latter from which she received her higher degrees.

Dr. Dukes attended Iowa Wesleyan university where he affiliated with Beta Theta Pi fraternity.

Mr. and Mrs. Dukes will make their home in Centerville, where Mr. Dukes is associated with the Dukes-Law realty company.

Hallgren-Landegren

Mr. and Mrs. John A. Hallgren of Burlington announce the marriage of their daughter Gladys to Dr. John W. Landegren also of Burlington. The wedding occurred August 12 at Burlington.

Dr. Landegren was graduated from the college of dentistry of the university. He is practicing in Burlington.

A luncheon honoring Sydney A. Foster, Des Moines financier, who is in Iowa City to address the weekly assembly this morning, will be given by faculty members at the Jefferson this noon.

LETTER TO THE EDITOR

(Continued from column three)

men are drafted for the purpose of making living targets for other drafted men—and the criminals, who sit in swivel chairs direct these slaves from a safe distance. Money is drafted and the products of the farm are "stabilized" so that the farmer is virtually a slave to the masters. Shall we consider such a state of affairs for the purpose of determining what should be done in normal times? Surely not.

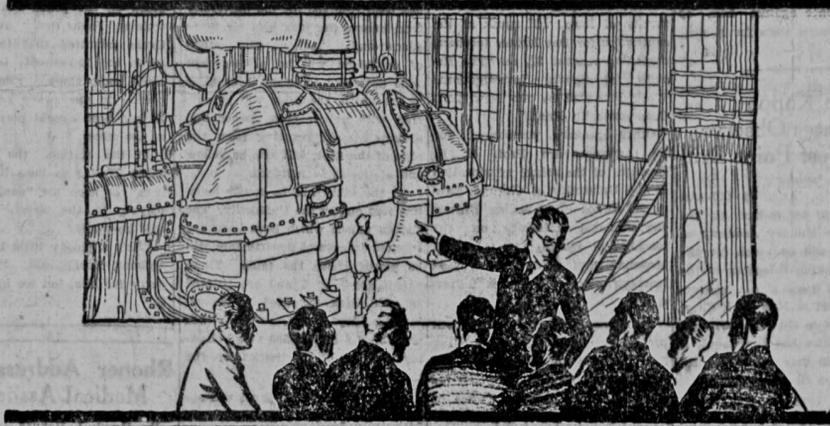

D. M. Stevens.

Best Judges at Fair to Get Scholarships to Iowa State

AMES, Aug. 18 (AP)—Scholarships to Iowa State college, valued at \$600 will go to the best corn and livestock judges in the state, as determined by contests which will be held at the state fair this fall.

The scholarships are good in the regular courses in the college and range from \$175 to \$25. A silver loving cup will be awarded to the boy or girl who has the largest number of points in the general contest.

The junior judges must place rings of horses, cattle and swine as well as two samples of corn.

The University of Engineering

Of all the things that go to make the successful engineer, none is more important, nor more in step with the spirit of the profession, than a studious attitude. One man says about another—"he is always willing to learn," "he doesn't think he knows it all"—and he intends to pay a high compliment when he says it.

The great engineers are always at school, always learning, always seeking for more knowledge. They begin with this desire for fuller understanding, and they keep it up to the end.

Any engineering operation, over and above the primary purpose for which it is carried out, is an active and post-graduate class in engineering, also. So that Westinghouse, or any other great business,

is, of its very nature, a University where theory and practice combine to make bigger, broader and more practical engineers.

The courses in this University are not limited to prescribed subjects nor terms—the subjects are almost infinite, and the semesters are endless. Men with the weight of years on their shoulders work and learn side-by-side with those whose day has just dawned.

This post-graduate school fits men for almost anything. Fits them for it, and makes them continually fitter. Out of this continuing fitness have grown the engineering accomplishments on which this institution has grown. It is, perhaps, one of the great educational institutions of its day.

Westinghouse

ACHIEVEMENT & OPPORTUNITY

Washington Gains Full Game On Macks By Trouncing Indians

Win Puts Champs One Game Behind League Leaders

(By The Associated Press)
CLEVELAND, Aug. 18.—Washington gained a full game on the league leading Philadelphia club by taking the third game of the series from Cleveland 7 to 4, knocking Uhle from the box in the fourth inning and scoring one run off Speece in the 5th.

The Macksmen lost to St. Louis 7 to 6.

Score by innings: R H E
Washington . . . 010 310 002—7 10 1
Cleveland . . . 000 004 000—4 6 0
Batteries: Johnson and Ruel; Uhle and Myatt.

Yankees Pound Out Another Win Over Slipping Tigers

DETROIT, Aug. 18 (AP)—New York leaped on two hopeless Detroit pitchers today and beat the Tigers 5 to 2 in the first game of the locals home stand that opened today.

"Babe" Ruth poled out his 12th home run of the season off Stoner in the 8th.

Score by innings: R H E
New York . . . 000 010 031—5 13 1
Detroit . . . 000 010 010—2 9 1
Batteries: Hoyt and Bengough; Stoner and Bassler.

Win Over Cubs Keeps Giants in Race for National Flag

NEW YORK, Aug. 18 (AP)—Excellent pitching for eight innings by Nehf and a six run rally in the 8th gave the Giants a victory over Chicago today 7 to 1.

Nehf relieved Scott in the second and Maranville tripled immediately. The only other hit off the New York left hander was a bunt by Heathcote in the 9th.

"Irish" Meusel hit a homer with Young on base.

Score by innings: R H E
Chicago . . . 100 000 000—1 6 1
New York . . . 000 001 007—7 11 0
Batteries: Cooper and Gonzales; Scott and Hartley.

Athletics Drop First Game of Series With Browns 7-6

ST. LOUIS, Aug. 18 (AP)—The league leading Philadelphia today dropped the first game of the series to the St. Louis Browns 7 to 6.

Although his mates presented Joe Bush with a five run lead in the opening inning he was unable to hold the Athletics and was succeeded by Danforth in the 4th frame.

Van Gilder later replaced Danforth. Connie Mack's pitching array included Quinn, Baumgartner, Groves and Harris.

The game was delayed 15 minutes by rain.

Score by innings: R H E
Philadelphia . . . 000 113 010—6 13 3
St. Louis . . . 000 000 20—7 8 0
Batteries: Quinn, Harris and Cochrane; Bush, Danforth and Hargrave.

Kerr, Collins and Schalk Survive Old Team

DICK KERR

EDDIE COLLINS

RAY SCHALK

The White Sox team which is now threatening the Athletics and Nats in the American league scramble has but three men on it who played on the championship team of 1919 and came out clean in the washing of the Black Sox scandal that followed the world's series that year. The three are Manager Eddie Collins, Catcher Ray Schalk and

Ederle Fails in Channel Attempt

BOULOGNE, France, Aug. 18 (AP)—Gertrude Ederle, the 18 year old American girl, failed to swim the English channel today.

She matched her strength and endurance of the muscles of her young womanhood against the treacherous waters in a superb battle but was defeated. The end came suddenly 6 and a half miles from Dover after 8 hours, 46 minutes of one of the greatest exhibitions the old channel ever had seen.

She had swallowed great quantities of salt water repeatedly during the miles of choppy sea which was encountered about mid-channel and she was unable to withstand the attack this had on her. Miss Ederle entered the water at Cape Griz Nez at 7:12 o'clock in the morning and ended her strenuous task at 3:58 in the afternoon. She sobbed when she was dragged aboard in a row boat after having been kept aloft by Ishak Helmy, the Egyptian swimmer who at a sign from Jabez Wolfe, her ever watchful trainer, threw his arms about the sinking girl.

Starting as if she would conquer the channel in record time the American champion broke all speed marks from one hour until she abandoned her attempt.

Lyons Marks up Seventeenth Win as Hose Defeat Red Sox

CHICAGO, Aug. 18 (AP)—Ted Lyons won his 17th game of the season today when Chicago bunched hits off Fred Wingfield and defeated Boston 4 to 2 in the first game of the series.

Lyons had only two bad innings when the visitors bunched six of their ten hits for two runs.

Score by innings: R H E
Boston . . . 100 000 010—2 10 1
Chicago . . . 100 11 00—4 8 0
Batteries: Wingfield and Bischoff; Lyons and Schalk.

Arlington Superintendency Offered Charles D. McCoon

Charles D. McCoon, who is taking special work at the university this summer, has been elected to fill the vacancy as Superintendent at Arlington caused by the resignation of A. N. Jorgensen.

Mr. McCoon was a member of the S. U. I. graduating class of 1910. He has been head of the schools at Fayette, Britt, and Marengo.

Spitzbergen Celebrates Rare Event; Baptism of Rich Baby

LONGYEAR CITY, Spitzbergen, Aug. 18 (AP)—Bird life is prolific enough in these lonely latitudes, but a visit from the stork is a sufficiently rare event to set all the wireless apparatus in the archipelago humming.

A baby born here enjoys the unique privilege of being baptized in the most northerly church on earth, and it was the good fortune of a reporter to witness the christening ceremony of Baby Sigurd, son of a mining engineer of the Great Norwegian coal company.

The little church was crowded to capacity with the entire female population of the village hardly more than forty all told, all in their Sunday best, and young Sigurd marked his disapproval of the proceeding in the way infants have all over the world. He was much more amiable at home, where celebrations were kept up in a dense atmosphere of smoke and a one-man jazz band.

Rumored Prince of Wales' Bride

London society's ever busy rumor manufacturers have picked a new bride for the Prince of Wales. This time it is Princess Margaret of Greece. The Grecian beauty is popular in Britain.

Brooklyn Hurlers Easy for Pirates in First Contest

BROOKLYN, Aug. 18 (AP)—Pittsburgh held to its three game lead in the National league today by defeating Brooklyn 11 to 4 while the Giants conquered Chicago.

"Tiny" Osborne was knocked out of the box in the 3rd and the Pirates scored 8 runs off Hubbell.

A Dodger rally sent Emil Yde to the showers in the 3rd but Viv Aldridge held Brooklyn scoreless thereafter.

Score by innings: R H E
Pittsburgh . . . 008 010 011—11 12 0
Brooklyn . . . 013 000 000—4 10 2
Batteries: Yde and Gooch; Osborne, Hubbard and Taylor.

Reds Cop Doubleheader From Pails After Tough Battles

PHILADELPHIA, Aug. 18 (AP)—The fighting Reds took two games from the Phillies here today 7 to 5 and 11 to 0. A ninth inning rally fell short in the first game but another in the same inning of the last game was sufficient to tie the score and force the game into extra frames. The eleventh inning brought thrills to the fans when the locals almost tied the count again after the Reds had counted three times in their half.

Score by innings: R H E
Cincinnati . . . 050 002 000—7 11 2
Philadelphia . . . 001 010 201—5 13 2
Batteries: Luque and Hargrave; Betts and Henline.

Second game: R H E
Cincinnati . . . 010 300 400 03—11 3 0
Phillie . . . 300 002 201 02—10 15 1
Batteries: Benton and Wingo; Knight and Wilson.

Braves Celebrate by Taking Doubleheader From St. Louis

BOSTON, Aug. 18 (AP)—The Boston Braves celebrated the tenth anniversary of the opening of the Braves field by a double victory over the St. Louis Cardinals today by scores of 6 to 2 and 5 to 2.

The visitors were unable to gather more than 11 hits in both games, Rodgers Hornsby going hitless.

Several catches by outfielder Mann and sensational support by Bancroft helped the Brave pitchers at the crucial stages.

Score by innings: R H E
St. Louis . . . 000 000 011—2 5 2
Boston . . . 040 010 10—6 12 0
Batteries: Reinhart and O'Farrell; Genwich and O'Neil.

Second game: R H E
St. Louis . . . 100 000 010—2 6 3
Boston . . . 023 000 000—5 6 1
Batteries: Dyer and Schmidt; Graham and O'Neil.

Gambling Craze Hits Cork Hard, Says Civic Official

CORK, Ireland, Aug. 18 (AP)—At a hearing at which the defendants were bookmakers, accused of violating the law by accepting bets on horse races, the superintendent of the civic guard of Cork asserted that "the city has simply gone mad on the betting craze—men, women, and children—and something ought to be done about it." Every part of the city was affected, more or less, he averred, and the craze had even penetrated into the pupils of the public schools.

He contended, "most of the people to whom I have referred could not afford to bet. When they do so they neglect their cares at home."

The three principal defendants were fined \$100 each.

State Fair Reserves Section for S. U. I.

(Continued from Page One)

views of the library, picture of William G. Hammond, chancellor of the college of law from 1869-1881, picture of Judge George G. Wright, founder of the college, about 1860, the Colf pictures, honorary groups of law students for 1924-1925. The Geology department will send leaves of the exhibit files with pictures of equipment, laboratories, field trips, probably totaling fifty pictures.

Gymnasiums Contribute

The department of women's athletics will send one panel with pictures of the exterior and an interior view of the large gymnasium; views of the study hall; classes in swimming; floor work; apparatus work; folk dancing; games of golf, tennis and hockey; the Iowa regatta; play day; canoeing on the river; June fete; eel-salad review; skiing, and skating. The mens' department of athletics will contribute two panels with pictures of Phelps winning the Penn relays; Coulter in action on the track; Burton Ingwersen, head football coach; Harold W. Griffin, captain of the football team; Paul E. Belling, director of physical education; Otto Vogel, the baseball coach; the homecoming crowd last year; and a basketball and baseball game. In addition there will be views of two gymnasium classes; an intercollegiate swimming meet; wrestling meet; and pictures of championship teams and individual men who won distinction. Some representative of the department will distribute football schedule information, and specially prepared posters will be used to advertise the Illinois and Wisconsin games.

The dental college will have one panel containing the interior views of the infirmary; research laboratories; X-ray room; orthodontia room; room for examination; department of oral surgery, sterilization; the corridor; dean's office; secretary's office; reception room, vestibule, and an exterior view of the building.

Will Show Publications

The school of journalism will exhibit one panel with photos of the building and interior views of the plant. Copies of papers published

by the school will be shown. This list will consist of The Daily Iowan, Des Moines Register special, Cedar Rapids Gazette, Cedar Rapids Republican, Oxford Leader, Frio, Hawkeye, Journal of Commerce, Transit, and Iowa Literary magazine.

The chemistry department will use one panel of pictures showing the exterior of the building, the laboratories and classes, glass blowing demonstration, auditorium, library, lecture room, south entrance, stock room display case, and architects' perspective.

Dramatic art will exhibit one panel of pictures showing work in staging of plays, shop work, and make up. The plastic arts department will place its exhibit on a 3 by 49 border at the top of the panels. This border is divided into four sections of 3 by 12. Each section will represent each year's work. For the first there will be charcoal drawings of plaster paris casts of head figures, also work in mechanical drawing. The second year will be painting in water colors, pastels from still life and examples of work in perspective. The third year will cover decorative design, posters, book covers, and plates, all over design and stain glass design. The fourth will be charcoal drawings and oil paintings of portraits from life.

To Broadcast Program

The engineering department besides the stand with leaves of pictures, pictures of freshman and sophomore work, structures by graduates including dock, bridges, and bleachers at Superior, Wisconsin, bleachers on Iowa field, a remodeled church, views of hydraulic laboratory and the broadcasting station will be responsible for the lighting. The lighting effects will be planned to extend around the room at points eight feet from the floor nitrogen lights that will reflect over the face of the panels, and foot lights that will reflect upward over the paintings at the top. The University broadcasting receiver will be sent to the booth and a university program will be broadcast each day from 12:30 to 1 p. m. Cards will be distributed among the visitors for their names and addresses.

Illuminated Banner

There is a common decorative scheme for the five state educational

institutions. A banner 3 by 22 will carry the names of the University, State Agriculture college, Teachers' college, the School for the Blind, and the School for the Deaf. Beneath the banner will be an electrical effect of a sign 8 by 50 of white lights, broken in the center by a banner 3 by 5, which will have two rows each of red, white, and blue lights. These will be illuminated in the respective order.

Dr. C. S. Chase, professor emeritus of materia medica is in charge of the university section.

This does not compose all of the exhibits and more will be reported later.

Educational Council to Study Religion, Character Building

DES MOINES, Aug. 18 (AP)—Religious and character building education of the schools of Iowa will be the principal subject studied this year by the educational council of the Iowa State Teachers association, it was announced by R. J. Cornell, Des Moines, chairman of the council.

The modernized servants of thought

Eversharp and Wahl Pen are modern, perfected instruments for recording thought. Six new features—we mention specially the non-clogging rifled tip, quick reloading and interchangeability of parts—make Eversharp more convenient and dependable than ever before.

Wahl Pen through the improved all-metal construction has increased ink capacity, strength to resist wear and abuse, and the beauty good taste demands in personal articles.

Eversharp is priced \$1 to \$45—Wahl Pen \$5 to \$55.

Made in the U. S. A. by THE WAHL COMPANY, Chicago

Start Poultry Plant Construction Today

Will Cost \$25,000; Huntzinger Gets Contract

"Surveyors will stake out the grounds this afternoon and building operations will begin this week," said W. L. Davis, proprietor of the Iowa City Poultry and Egg Co., yesterday, speaking of plans for his company which have been rather unsettled pending the amendment of the zoning law which would permit him to use the property of the Cedar Rapids and Iowa City railway south of Benton street as a site for his plant.

A modern two-story house, 72x120 feet, containing three cold storage rooms using modern refrigeration methods, and with a feeding capacity of 20,000 live chickens is to be erected at an estimated cost of from \$20,000 to \$25,000.

Hunsinger Gets Contract

The contract has been let to the Hunsinger Company and they estimate that two months will be required to complete the building. It is to be located at the south end of Capitol street on property leased from the interurban company. The interurban will extend its tracks south of Benton street with a side-track to the new building.

As soon as the building is completed the produce company will be ready to employ from thirty to forty men.

Mr. Davis asserted that the presence of a large produce house benefited the community by bringing hundreds of farmers to the city because of the better market which is obtained where shipping is done by carload lots. Last spring the company had an average of three hundred farm deliveries of eggs and poultry per week. A year ago now they paid \$800 per week in salaries as against nothing this year.

Spend Half Million

Last year the company bought over \$500,000 worth of eggs and poultry from farmers of Johnson and the adjoining counties of Linn, Iowa, Washington, Muscatine, and Cedar and shipped them in carload lots to such eastern ports as New York and Boston.

The resumption of the business of the company, shut off last May by the passage of the zoning law, was made possible through the amendment passed by the city council at its meeting Monday evening changing a portion of the southern part of the city which was in the residential section to an industrial region.

Sydney Foster of Des Moines Talks in Assembly Today

(Continued from Page One)

While not an alumnus of the university, Mr. Foster has taken a great interest in the campus activities, frequently visiting here on Homecomings and similar occasions, and contributing to the Memorial Union.

Bees Interest Farmers

SHELBY, Aug. 18 (AP)—An unusual interest in bees is being displayed by Shelby county farmers. Demonstrations which have been held near here have drawn scores of interested visitors.

War Vet Hurt in Car Crash Now Better, Say Attendants

The condition of J. G. Wellington, victim of an automobile collision on the White Way Monday afternoon is much better according to the report of hospital attendants last night.

Mr. Wellington suffered a fractured forearm, and minor injuries when the roadster in which he and his wife had traveled from New York was struck by a Ford touring car driven by Charles Brant of Tiffin.

Both cars were wrecked but neither Mrs. Wellington nor Brant received injuries other than bruises. The Wellingtons were on their way to Des Moines where they had employment promised them.

County Schools to Enroll 2,500

84 New Teachers in County; Third Beginners

One hundred forty-one rural schools, enrolling 2,500 children, will open in Johnson county on or before Sept. 7, according to information coming from the office of County Superintendent W. N. Leeper yesterday.

Fifty-six schools enrolling 1,000 pupils will have the same teacher as last year while eighty-four, enrolling approximately 1,500 pupils will have new teachers. One-third of these new teachers are beginners.

Thirty Outside Teachers

Thirty teachers have been employed who come from outside Johnson county while ten Johnson county experienced teachers are without employment as yet and will be forced to go outside the home county if they secure a position.

Five years ago, sixty-three schools changed teachers between the fall and winter terms but Superintendent Leeper says that this year the largest part of the teachers have contracted for the entire year and the prospects are now good for most of them to stay the entire year in one school.

Nine Men in Group

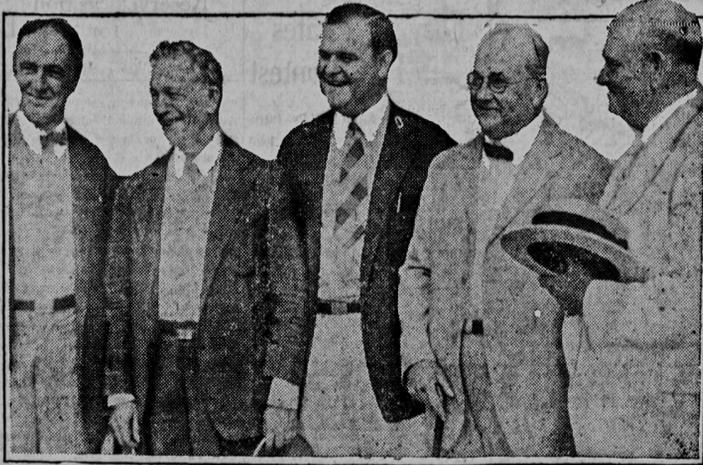

There are nine men among the rural teachers and two of them are married; of the 131 women, fourteen are married.

All beginning teachers have second grade certificates as well as about half of the others. Of those remaining, the numbers are about equally divided between normal training certificates and first grades. Four two-year high schools approved by the state department are also opening in the county; two in villages and two in the open country. One teacher is employed in each with a total prospective enrollment of about seventy-five.

Dean Kay Returns From Illinois

Dean George F. Kay of the college of liberal arts, returned yesterday from Macomb, Ill., where he addressed the students of Western Illinois state teachers' college Monday morning on "Education for Tomorrow."

Five Governors Boost Stone Mount Memorial

These governors of five states met recently to help boost the sale of Stone Mountain Memorial half dollars. These coins, of a special design, are being sold as mementos for one dollar each to raise funds for

continuation of the memorial to the confederacy, started on Stone Mountain by Gutzon Borglum and being completed by August Luke-man. The governors, left to right, are: Gov. Clifford Walker, of Georgia;

Gov. Thomas G. McLeod, of S. Carolina; Gov. John W. Martin, of Florida; Gov. W. W. Brandon, of Alabama, and Gov. Henry L. Whitfield, of Mississippi.

Dean's Son Goes to Columbia U. Kay, Freie to Act as Graduate Assistants in Geology Dept.

Marshall Kay, son of Dean and Mrs. George F. Kay, left Iowa City yesterday for Columbia university where he has an appointment as graduate assistant in geology. He was accompanied by A. J. Freie, of Waverly, who is to be a graduate assistant in the geology department of the university this fall.

Mr. Kay received his B. A. degree from the university in 1924 and his M. A. last June. During the summer, he has been doing field work on the Decorah formation in the northeastern part of the state. His work at Columbia will be toward a doctor's degree.

Kay and Freie will spend some time on the way east as their plans include a trip through Ontario and Quebec by way of Wisconsin, then through the New England states visiting the geological formations of those regions.

Mr. Freie expects to return to Iowa City in time for the opening of the fall term of the university.

Auction off Gun That Killed Sheriff; Will Erect Marker

CHICAGO, Aug. 18 (AP)—Placing of the best works of western artists of the highest ability, in the homes of art lovers, instead of letting them remain in their original environment of the studio, has been made possible here through the creation of the Chicago Galleries association and its novel plan for distribution of the artists' work. Curtis B. Camp, an attorney of Chicago, is president. The association is to be conducted as a non-profit one.

The rule of the association says: "It is our problem first of all to give each layman the picture that he likes and that he wants from the exhibition for the money he has paid, and secondly to see that the pictures thus selected are the best pictures in the show and that the prizes are properly awarded to these pictures."

City Briefs

Clifford A. Rummels and Marjorie Ellison, both of West Branch, secured a marriage license at the office of clerk of courts Benda yesterday.

E. G. Stowell, boy scout master of Iowa City was the speaker at the Kiwanis Club luncheon at the Red Ball Inn yesterday. He explained what the boy scout movement stood for and the benefits to the boys derived by the training in citizenship and leadership.

E. B. Delzell, a member of the Shenandoah Kiwanis club who has recently moved to Iowa City, was present at the luncheon.

Mrs. Elizabeth Blakeley, of Colfax, came yesterday to make a short visit at the home of her sister, Mrs. A. C. Harmon.

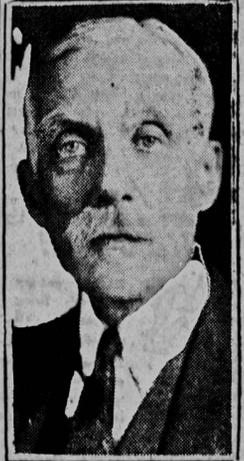

Mrs. V. A. Gunette, home demonstration agent for Johnson county, has left the city for a vacation in Illinois. She will be gone two weeks.

William D. Johnson and Bertha Mann, both of Cedar Rapids, were married Monday afternoon by Justice of the Peace C. C. Roup. Mr. and Mrs. J. M. Boyle, also of Cedar Rapids, attended them as witnesses.

Reports from the Iowa City Canning company, which opened Monday for the season's run, indicate that the sweet corn this year will probably average five tons to the acre. Records for previous years show that the corn has been decidedly lower than it is estimated to be this year.

Two hundred persons will be employed by the company this year.

Tax Slash in March Promised by Mellon

Enactment of a tax reduction bill before March 15 when first payments of the new year are due, has just been promised by President Coolidge following a conference with Secretary of the Treasury Andrew Mellon. Estimates of the treasury were presented by Secretary Mellon, and the tax reduction bill will be the major issue to be taken up in the early sessions of congress. A slash in income rates is promised by the administration.

Forsee Improved Bank Conditions Bankers Optimistic Over Situation in State

"A change for the better has come over banking conditions in the state, due entirely to the improvement in the farmers' status," said a representative of the state banking department who was here yesterday, but who prefers to remain unidentified. He believes that banking conditions are showing much improvement generally throughout the state.

Attention was drawn to an analysis of the banking situation by Clyde E. Brenton, vice president of the Iowa National bank of Des Moines, in which he says that "the only way I can summarize the banking situation is to say that the good are getting better and the bad are getting worse," adding that in Des Moines banks are especially prosperous at present.

The state banking department, which supervises only state banks, has record of the reopening of twelve state banks in the past year. "Loans which have been frozen for the past few years are now being paid, and in many cases, have allowed banks to reopen", the department representative pointed out.

Local bankers join in the belief that banks are entering the most prosperous times in many years, likewise ascribing the cause to improved farm conditions.

German General Advocates Alliance of France, Germany

ZERBST, Germany, Aug. 18 (AP)—The failure of Germany and France to come together will signify the suicide of Europe, declared General von Schoenich at a German pacifist meeting recently. The general was advocating the Pan-European movement before 7,000 Reichsbanner members.

All American politics, he asserted, aimed at the formation of a greater American group, and that America was on the right track was already shown, he thought, by the fact that today every sixth person in the United States is the owner of an automobile and that the majority of American workmen are not obliged to live in squalid cities, but could afford to have their home "in the green country and rear rosy-cheeked children."

Iowa Ranks Second in Honey Producing

AMES, Aug. 18 (AP)—Iowa now ranks second in the union as a honey producing state, officials at Iowa State college here declare. In 1919 the state ranked fifth.

In the former year the per colony production was 62 pounds, in 1924 it had risen to 78.

Germany Aids Tourists

BERLIN, Aug. 18 (AP)—Uniformed interpreters for the convenience of tourists have been stationed at the three principal railroad terminals in Berlin. They are on hand at the arrival and departure of all trains and their services are given to the traveling public without charge.

Tokyo's New Radio Station to Have Lady Announcers

TOKYO, Aug. 18 (AP)—The raucous-voiced male radio announcer may become a thing of the past in Japan if the officials of the new Tokyo broadcasting station succeed in setting a new style. In fact, women are to be employed exclusively as announcers in the new broadcasting studio.

They are being chosen by examination, it is said, and only those with excellent enunciation ability will be employed. One of the requirements is that the announcer have the pure Tokyo dialect, so that the station will not be mistaken for the one at Osaka. There is much difference in the speech of the two cities.

MODERN EXPERTS (New York World)

In Baltimore a blasting expert was called in to raise a brick chimney. He arranged his powder and then, 200 feet from the base of the chimney, he drove a stake. Here, he announced, was where the top of the chimney would fall. When the powder was set off, the chimney toppled and fell squarely on the stake. The crowd which had assembled was delighted. The expert could tell to the inch where that chimney would fall seemed magical.

And in a sense it was. Modern accuracy we have come to take for granted. The navigator who brings a ship to port without missing by so much as a mile, the astronomer who forecasts an eclipse within nine seconds, the tunnel-builder whose entries meet at a predetermined spot—all these we have grown used to. What they do is of course just as exact as what the chimney-blaster did. Only, when this skill displays itself on something we are not used to, something that goes off with a fine loud noise, we crowd and clap our hands like children. Well, we yield a deserved tribute.

Coroner to Hold Inquest on Triple Tragedy Today

Calls 12 Witnesses; Will Bar Public From Hearing

An inquest to inquire into the circumstances surrounding the electrocution of John and Paul Miller and Joe Wall last Friday afternoon will be held at 2 o'clock today in the office of J. H. Donohue, county coroner, at the Donohue mortuary.

Jury members impaneled for the inquest are Dr. John Voss, Fred W. Kemmerle, of the Iowa City Produce company, and Edwin B. Raymond, bookkeeper. The jury examined the bodies of the victims before their burial and have also visited the scene of the tragedy.

It is expected that twelve witnesses will be examined. Coroner Donohue has announced that the public will not be admitted to the hearing.
