Professor Davies Addresses Group
Prof. George R. Davies of the college of commerce, in addressing the discussion group of the Iowa City League of Women Voters yesterday afternoon, said he believed there would have been recovery without Roosevelt and his New Deal.

"There might have been, at least, a recovery in fair measure. We could have come to bloodshed if things had gone on as they were before the New Deal came into effect," the speaker stated.

"Hoover started new measures in his administration, but they were not so extreme or daring as those of Roosevelt have been. There must be speculation in order to put more money back into circulation. The investment brokers must be free to speculate to some extent," Professor Davies said.

Professor Davies' speech followed a regular board meeting of the group in the board room of the public library at which plans for the continuing study of city government were made.

Spirituals, Latin Phrases Mingle In Sacred Concert by Chorus

The melancholy wail of Negro spirituals and calm and sustained Latin phrases blended in the annual spring sacred concert of the university chorus conducted by Walton L. Multer of the music department Sunday in the main lounge of Iowa Union, for an appreciative audience of about 600.

The mixed chorus of 65 selected voices sang their entire program without any accomplishment except the opening assurance of a chord sounded for each selection by Stephen B. Williams.

The program was divided into six parts, and contained some of the more famous religious music of the world composed by outstanding authors in the field.

The peculiarly syncopated rhythm of the Negro song of praise to the Lord came as direct contrast to the three Latin numbers which, true to their tradition, were sung with restraint, and in their ancient manner.

The difficult and involved "All Breathing Life, Sing and Praise Ye the Lord" by Bach was executed with tuneful accuracy, producing a marked climax with this part of the fugue composed by the old master.

"Wade in the Water" and "I Got Religion" denoted with its swell of sorrow the age-old sadness of a downtrodden race seeking salvation from the only source to which it could turn.

These were followed by a Latin prayer, "Nunc Dimittis" which had a calmly reassuring effect after the rather wildly despairing mood which preceded.

LUCKIES are All-Ways kind to your throat

so round, so firm, so fully packed—no loose ends that's why you'll find Luckies do not dry out

We think you'd be impressed if you saw Luckies being made. You'd see those clean, silky center leaves—and you really wouldn't have to be a tobacco expert to know why farmers get higher prices for them. They are the mildest leaves—they taste better.

that you'll be truly fascinated when you see how Luckies are rolled round and firm, and fully packed with long golden strands of choice tobaccos. That's why Luckies "keep in condition"—why you'll find that Luckies do not dry out—an important point to every smoker. And you'll get the full meaning of our statement that Luckies are always in all-ways kind to your throat.

SEEN
from
Old Capitol
By TOM YOSELOFF

The extension division has 2,000 cots and 1,400 blankets, and 2,000 sheets. But that isn't what's worrying the extension division. The question is—where to put the cots, the sheets, and the blankets.

That's the problem confronting Bruce E. Mahan, director of the division, and which he put before the Chamber of Commerce, at a luncheon yesterday noon. About 4,000 high school musicians, a greater number than ever before, will invade Iowa City next week for the annual state music festival. Where, asks Mr. Mahan, are the cots, the blankets, the sheets—and the high school lads and lassies to be put.

The Quadrangle is filled. East-lawn is filled, there is space for only 50 in Currier hall, and another unestimated number can be put in the college, Manhattan, Kan.; and the Oklahoma Agricultural and Mechanical college, Stillwater, Okla.

Enter solution: Mr. Mahan pointed out that, if one might find enough vacant houses in Iowa City, and if one could obtain sufficient cooperation to secure the use of those houses for the three days of the contest, the problem might be solved. And, Mr. Mahan added, a few hundred—or thousand—blankets might also be tossed in for good measure.

Houses, cots, sheets, blankets, combined with interesting window displays and a bit of a goodwill, and there, Mr. Mahan suggested, are the makings of a successful festival, both for the high school kiddies and for Iowa City. A word to the wise...

Hands across the sea: Members of the Iowa Academy of Science went to far-off Spain to pick a president. All of which is not quite so surprising as it may seem at first glance. For Prof. Edward Bartow, head of the chemistry department at the University of Iowa, is now on a trip to Spain, where he attended an international chemists' meeting. Professor Bartow having been picked vice president last year, the society followed its usual bent, and elevated him to the position of the presidency.

The Student Senate, which was

the subject of contention less than two weeks ago, is again ready to "blow the lid off." This time it's going to be the set-up of student publications and their control on the Iowa campus that will come in for discussion. The "senate," which was created ostensibly for the purpose of allowing free discussion by Iowa students on current topics, will convene at 8 o'clock tonight in the liberal arts auditorium.

Schump, Larsen Go On Inspection Trip

The group is also attending the second annual conference of the midwest student branches of the American Society of Mechanical Engineers.

Letter to the Editor

Editor, The Daily Iowan:
The theme of this letter needs no introduction. Every student on the campus has been forced to read the conspicuous chalk writing of anti-Semetic nature during recent months. This is a disgrace to our college community and should not be tolerated by the student body.

It is not a question of prejudice. Should we be tolerant enough to permit others to be intolerant? Even if the answer to this question is affirmative, the act remains that this anonymous propaganda is unjust and offensive.

In a city as large as ours it is not logical to believe that the offender, as active as he is and as crude as he appears to be, can long remain unknown. If, however, the student body grants an amused tolerance, a principle will be given sanction which is as defacing to our educational character as the writing is to our campus.

Clearly our course is individually to try to apprehend the offender. Such organized disapproval will stop the practice if not punish.

Yours truly,
Robert J. Blakely
