F.R. Aims Talk At Mollifying Both Congress, Public Opinion

President Lives Up To Advance Notice Of "No-Fireworks" In Fireside Chat

By ERIE L. SIMPSON

Stated by both to his audience here at the House of Commons, President Roosevelt's fireside chat with his audience in the Senate, will be held in the Senate, will be held in the Senate.

The president, who was addressing his audience, said:

"I have been listening to the speech, and I am sure that you will find it as interesting as I do."
These Changing Traffic Lights! IMAGINE, IF you can, of a light that is constantly changing directions without anyone having to change its position. That's what those lights on the one-way streets are designed to do. They do it by making the traffic flow in the same direction all the time.

Only last week, the pilot project of changing traffic lights without anyone having to change their position was completed. The lights were placed in a small town in the state of New York. The project was so successful that the town decided to extend it to other streets.

Why not do the same in a city? It's a waste of time waiting at intersections. People can't make up their minds about which direction to go. The lights should be put in such a way that people can see them from any angle. It's cheaper to change the lights than to change the roads. People can't change the lights, why not change the roads?

Some cities are doing it already. In New York, for example, the lights are changed every five minutes. The reasoning is that people can see them from any angle. Some people feel that this is a waste of time, but it's more efficient.

Some cities are doing it already. In New York, for example, the lights are changed every five minutes. The reasoning is that people can see them from any angle. Some people feel that this is a waste of time, but it's more efficient.

Coach Drives Irish For Willow Junction

Rudy 'Pete' Kenedy was early beating his Irish with warm light at the end of Willow Junction's track yesterday. The Irish are off again at 8 o'clock at Veterans Field and as usual the racers have been in form. Pete stated that he has let Louis and they are having a grand time. Pete noted that he has let his runners have a break of a few hours and as usual they will be at the irish post yesterday.

Joe McCarthy Signs Three Year Contract to Manage Yankees

$35,000 a Year Wage Revealed By Yank Heads

The Daily Iowan, Iowa City, Tuesday, October 14, 1936

By JACK MASON

In the face of the most heartening news that has come to the American League, the Hopkins will neither plot against the thousands of others who have been able to win a good name for the American League.

The announcement that the American League will continue its policy of managing the teams itself came as a shock to the Hopkins, for it was a policy that had been in effect since the formation of the league.

The Hopkins, however, were not surprised by the announcement. They had been expecting it for some time, and had prepared for it.

The Hopkins management had received a letter from the American League, informing them of the decision to continue the policy of managing the teams itself.

The Hopkins had been managing their own teams for the past ten years, and had been successful in doing so. They had won the American League championship three times in that period.

The Hopkins management were not taken by surprise when they received the letter. They had been expecting it for some time, and had prepared for it.

The Hopkins had prepared for the decision by making some changes in their organization. They had hired a new manager, and had strengthened their back-up staff.

The Hopkins were not the only team in the American League that had been managing their own teams. The Yankees, the Tigers, and the Athletics had also been managing their own teams.

The American League had decided to continue its policy of managing the teams itself, because it felt that it was in the best interests of the league.

The American League felt that it was in the best interests of the league to continue its policy of managing the teams itself. This would enable the league to control the operations of the teams, and to ensure that they were run in a proper manner.
