By W. E. S. WOOLSEY

The first of the presidential elections is to be held on April 16, 1947, according to the schedule announced by the Soret Union, a political party which advocates the unification of the African states.

Fourth Annual Iowa City Lions Club Auto Show Opens At S. U. J. Fieldhouse Tonight
Doctors Work Together Now To Eradicate Dreaded Disease

**“Coffee Shop, Under New Management!”**

**Doctors Work Together Now To Eradicate Dreaded Disease**

Dr. Logan, Cincinnati Med., M.D.

I said yesterday that the great advance in the treatment of cancer has come about because we can now kill the disease directly with chemicals, and not in the way of the past through operation, radiation, and the like. The new medicines, which have been given the names of chemotherapy and radiation therapy, have opened a new chapter in the treatment of cancer.

The administration is not to be considered as having had its hands tied by the doctors. It is a case of the administration doing its part and the doctors doing theirs. They have worked closely together, and the success of their efforts has been outstanding.

**The Whole Town Is Talking!**

The impact of this story has been felt throughout the community. People are talking about it, and they are thinking about it. The whole town is talking about it.

**Doctors Work Together Now To Eradicate Dreaded Disease**

The administration has not been idle, either. They have taken the initiative and the opportunity to do something about the situation. They have done their part, and they have made a difference.

**Farewell to Youths!**

There is no need to say anything more. The message is clear: doctors and the administration are working together to fight cancer.

**Friend of Yours?**

That is all that needs to be said. The message is clear, and it is important.

**Daily Cross Word Puzzle**

**Tuning In with Margie Fastone**

When the “Advisers’ Forum” program goes on the air over the next few weeks, the audience will be able to see and hear the discussion in action. The program will be broadcast from 7:30 to 8:00 p.m. each evening, Monday through Friday.

**Other Events of Interest**

A special event will be held on Saturday, January 10, at 8:00 p.m., in the auditorium. It will be a benefit for the local chapter of the American Red Cross.

**Welcome to the New Year!**

Happy New Year to all our readers! May 1967 bring you joy, health, and prosperity.

**EDITORIAL**

The editors of the **THE DAILY IOWAN**, the student newspaper of the University of Iowa, would like to express their congratulations to all of you who have helped make this publication a success. We are proud of the work that we have done, and we look forward to continuing our success in the future.

Mr. Arthur O. Left has been appointed to teach public utilities in the College of Law. He will be the first person to teach this subject in the University of Iowa.

New Styles? Not For Goods When It's Pajama

By Helen Ries

Why start wearing pajamas in the house? Why sleep in a down-filled corduroy robe? Because the pajama style is now so popular! Pajamas are now available in a variety of materials and designs. From light cotton to heavy wool, there is a pajama style for everyone.

Steady demand for pajamas has been noted in all departments. The now popular "Nightgown" style is one of the most popular. Comfort and style are combined in this comfortable and fashionable nightwear.

Home Economics Club To Discuss Dinner

The Home Economics Club will hold a discussion on the topic of "Dinner Parties." The meeting will be held at the Union on Thursday evening at 8 p.m. All members are welcome to attend.

**IOWA CITY LIONS CLUB**
Auto Show Will Begin Tonight With Display of New Models

Lions Club Sponsors Fourth Annual Exhibit in Fieldhouse

This fourth annual lions club auto show will open tonight at 8:30 in the fieldhouse featuring a display of 35 models of 1938 cars. The show is sponsored by the club's recreation department and is open to the public for a nominal admission charge of 25 cents per autain.
Feature Safety
For New Cars
By Oldsmobile
Again reaching toward the heights of motor-city smartness, Oldsmobile will provide every new car with the latest in modern safety improvements as part of its normal equipment... Air-brakes will protect the driver from any sudden or dangerous stoppage of traffic ahead. The variable-speed governor is a safety feature that will prevent over-speeding. Gear-shifting is made safe by a self-locking mechanism, together with provision for engine running to prevent possible jumping of the car. A standard headlamp switch will prevent the car from running when the headlamps are off. There are also turn-signal indicators for each half of the car to alert other motorists. A new exhaust system is designed to prevent backdrafts, and the car is equipped with a special radiator cap to keep the engine cool in the event of an accident.

1938 Oldsmobile Eight Four-Door Touring Sedan
New DeSotos Employ Flowing Curves and Contours With Longer Wheelbase for 1938

The body of the new DeSoto, with flowing curves and contours sweeping from front to back, will appeal to motorists for its layout and lines. A new feature is the fact that the instrument panel is flowing into the back of the dashboard. The instrument panel is an improvement, and the car is designed to have a smooth, flowing appearance. The new DeSoto is designed to have a smooth, flowing appearance.

Plymouth
Outstanding Improvements Boost Luxury Level at Low Price Field

In celebration of Plymouth's 25th anniversary, the company has announced a new series of improvements which will boost the luxury level at low price. The new series of improvements includes a new engine, a more powerful braking system, and a new chassis. The new engine is lighter and more powerful, and the braking system is improved to give better handling. The new chassis is designed to be more rigid and to give better handling.

Feature Seven Body Types, Including Four-Door Touring Sedan with Trunk, and Convertible Coupe

Street and utility improvements include an automatic transmission, which is standard equipment. The car is equipped with a power steering unit, which is available as an extra. The car is designed to give better handling and to be more comfortable to drive.

The automobile industry is in a very important period of development, and the manufacturers are doing all they can to meet the needs of the public. Oldsmobile is doing its part by providing the latest in safety features, and Plymouth is doing its part by providing improvements to increase the luxury level at low price. These are just a few of the many improvements that are being made in the automobile industry to meet the needs of the public.
Pontiacs for 1938 Improved Mechanically and in Design

Latest Models Have New Gear Shift; Refined Body

Changes and refinements in appearance and body structure will mark the 1938 Pontiac six and eight and will also show the inside out.

The performance of the cars is up to the par. In fact, the new eight will hit 70 mph at a speed of 3,000 rpm.

Council Appoints Hemmington to Aid In W.S.U. Program

E. H. Hemmington, chairman of the college program committee of the 1937 Model A club, was appointed to assist in planning special programs to be given during the 1938 Model A club program meeting of the National Council meeting last month.

Other members of the committee are: Mr. Henry P. Hemmington, chairman of Model A club; Frank B. Hemmington, chairman of Model A club; and E. H. Hemmington, chairman of Model A club.

Hudson Super Terraplane Convertible Brougham

New Models Roomier

The new 1938 Dodge for Oldsmobile owners. Here’s how Oldsmobiles have stood the test of time. Several years ago, Oldsmobiles were considered to be the “cruised” cars. Today, Oldsmobiles are still the most popular for their reliability and low maintenance costs. The new 1938 Dodge is even better. It features a powerful 6-cylinder engine with a displacement of 300 cubic inches, providing smooth and quiet operation. The car also comes with a standard 3-speed manual transmission, allowing for smooth shifting and better fuel economy.

New Dodge Car Has Good Brakes

Dodge interiors this year are longer wheel bases, larger hydraulic brakes, beautifying clutch, wheels and other components. The new 1938 Dodge is equipped with a new hydraulic brake system, which provides better stopping power and greater control over the car. The car’s brakes are also designed to last longer, providing peace of mind to the driver.

Motor Club Wants Safety
Parents-Motorists
Urged To Assist In Protecting Children

E. Shudden, manager of the motor club's safety department, has urged parents and motorists to take steps to prevent the children from being injured in automobile accidents.

Working together, he said, parents, teachers, doctors, and others will be able to make the road safer and to protect the children from being injured in automobile accidents.

This is a very important matter, Mr. Shudden said, and it is one that must be handled with due care and attention.

Motor club safety workers have already begun their work, and they will continue working to make the road safer for all.

Studebakers Remodeled

Bodies Are Wider, Lighter, More Rigid; Engine Efficiency Increased

Folded into its work in the realm of design, engineering, the Studebaker Motor Car Company, one of the oldest automobile manufacturers in the world, has introduced a new line of six-cylinder, V-8, and V-12 cars. These are the new Studebakers, renowned for their speed, performance, and reliability, now with an even greater emphasis on comfort, safety, and efficiency.

Majority of U. S. Motorists Are Used-Car Buyers; Autos Average 8 Years

Approximately two-thirds of the motorists of the United States have purchased a used car. This, according to R. H. Barret, manager of the Motor Club of Iowa, is a reflection of the average life span of the automobile in America being about eight years.

Heated Towel Rails Are Standard Equipment

In every Studebaker, a heated towel rail is standard equipment, which is a welcome feature for those who enjoy the luxury of warm towels after a cold day.

Brann Offers a Convertible

Bigger than previous models, the new Studebaker convertible is a thrilling and different experience. It is equipped with a new type of hydraulic brake, which has a life of 20,000 miles, and is illustrated at the show.

New Ford V-8

The new front end of the 1938 Ford V-8 is another step forward. The spacious interior is a notable feature, and the car is equipped with a new type of hydraulic brake that has a life of 20,000 miles.

Styling

Distinguished by its streamlined form, the new Studebaker is a true representation of the modern automobile. It is equipped with a new type of hydraulic brake, which has a life of 20,000 miles.

For using a car, a man was arrested Sunday evening by the Davenport police and placed in the county jail on a charge of larceny.

New Model Packard

The new Packard Six, which was introduced in 1938, has a wheelbase of 117 inches and is powered by a 100-horsepower engine. The new model includes new upholstery, new dashboard, and new instrumentation.

"What's new and exciting at the Auto Show?"

I'll answer you in one word—PACKARD!

Here's the 1938 Packard news in a nutshell:

- New and Packard Eight power for full indoors—no need to plan for a winter room.
- New wood-trimmed roadster, which is really equal in every way to the original Packard Roadster.
- New wood-trimmed touring Packard, which is as roomy as the first Packard, but with more rubber on the road.
- New wood-trimmed sedan—Packard's roadster and touring car.
- New wood-trimmed coupe—Packard's roadster and touring car.

"Why, that's all there is!"
