Warplanes Deal Double Blow
At Italian, French Warships
In Far-Reaching Air Attacks

Report Raids an Airrome in Steily Leaving
Hangars, Wrecking Flaming Runway
More Men Called

LONDON, July 7 (Sunday) (AP) — German planes flew in relay over a series of Italian airfields and French town today after an undefined number of civilians had been killed in two German air raids late yesterday.

Several of the latest wave of raiders were spotted by Italian observers about 15 miles north of Genoa, and others were also observed in the same area.

At home, a strike by another 300,000 men has been
continuously expanding armed manpower, poised now for invasion.

"Stirring action," by the correspondent, was reported from a distance of Camer, British, seeing the raiders move away.

They included the German airmen and the German warships in the Mediterranean, the New York Times correspondent reported.

**What Next in Europe?**

The debate on what the British navy should capture from the French fleet in possession of the town of Dunkirk.

Prince William Winston Churchill surmised that the decision on the fate of the town of Dunkirk is a momentous one. If the British navy forced the French to evacuate the town, it would be a significant victory. Churchill suggested that the decision should be made in the interest of peace and diplomacy.

**Uncle Sam's Fatigue**

French vessels whenever they come to port will be arrested pending the consideration of the question of the disposition of the fleet which is now in possession of the town of Dunkirk.

**A Frenchman's View**

The French reading public is anxious to see the fate of the French fleet in Dunkirk resolved. They believe that the British navy should accept the surrender of the French fleet.

State of Iowa Getting Ready To Elect Anderson, Four Men

Kinnick, Prasse, Evans, Buzz Dean And Paul Derringer

By OSCAR BARNABY New York

As the state of Iowa's official delegate to the College Football Hall of Fame and its chairman and members of its faculty will choose the team, the task of coming up with a list of players from Iowa is left to the state's residents.

Four Backwards

First Sergeant Benjamin W. Kinnick, Capt. Buzz Dean and Capt. Paul Derringer both of the University of Iowa, and Capt. Paul Derringer of the University of Dakota, will make up the four-man list from the state of Iowa. They are the only players from Iowa to be named to the All-American team.

Derringer, who will be present to receive the award, will be accompanied by Paul Derringer and Buzz Dean, who were named to the All-American team last season. They are the only players from Iowa to be named to the All-American team.

The team will be shingled with thorough performance. The State of Iowa is the only state in the country where the players are chosen by the residents of the state. The team is composed of the four-man list from Iowa, the four-man list from Minnesota, the four-man list from Wisconsin, and the four-man list from Illinois.

The team will be announced in the next issue of the College Football Hall of Fame magazine, which is published by the University of Iowa, and will be available for purchase at the college's bookstore.

Construction of Chinch Bug Barriers to Be Demonstrated

Three Farmers Report Damage To Corn Crop

Farms in Western Southern Sections Claim Insect Pest

Plans are now made for farm demonstration of the construction of corn barriers at the annual state convention of the Iowa Crop Improvement Association at the hotel conclave next week. In addition to the demonstration, a number of corn investigators throughout the state will appear at the meeting of the state corn and soybean crops advisory committee at the hotel to give the farmers a chance to voice their problems against the corn borer and blackstem rust. The meeting is under the direction of Dr. H. F. Hulbert of Iowa State University.

The corn barrier, which is a four-foot fence made from the corn stalks of the previous year, will be built by the farmers as a demonstration project. The fence will be placed around the field in a straight line and the corn will be planted in the center of the field. The fences will be used to demonstrate the effectiveness of the barrier in controlling the corn borer and blackstem rust. The demonstration will be a valuable tool for farmers to improve their corn crop and increase their yield.
