Winston churchill, british prime minister, today was deeply upset by
the arrest of his close friend, sergent george roberts, 33, who was
charged with murder in the death of two women.

The british prime minister has been
in constant touch with police
officials here and in london.

The arrest of roberts, who
was widely considered to be
churchill's closest friend, came
as a shock to the prime minister.

Robert, who lived in
london, was last seen
in the company of
the women.

Reports said that
roberts was
killed in the collision.

The two women,
who were passengers in
the car with roberts,
were killed instantly.

Manpower Needs Quick Action

While thousands upon thousands of young men are returning from war, and with war doubts, numerous men and women are looking for jobs that offer wage equal to or better than those they left behind in the service. Numerous men and women are looking for work in the service, farm women

Already crops are being brought for market in Canada, France, England, and elsewhere. The demand for farm labor is great, and the supply is very small. A shortage of workers will be the order of the day for a long time to come.

The resulting shortage of food supplies will begin to be a serious problem when the harvest is ready for market.

International Disease Control
Urged by SUI Health Director

Disease no longer requires 
international boundaries, according to Dr. Alfred H. Barron, director of the department of health, who spoke on "The World of 
Public Health" last night in the meeting of the "World of the Future" lecture series. 

Within recent years the develop-
ment of air travel has revolu-
tioned one of controlling disease, and it is vital that the same control be kept up in the face of future events," Barron observed. "Disease cannot be conquered in an individ-
ual or isolated basis. It must be seen as an international problem, one that is not under the control of any one nation or any one group." 

The disease control must be conducted continuously, current, adjusted, a control which has been brought under the control of a wider organization. Illustrating his point, he cited the problems of disease by an organized, the development of new living standards, and the spread of tropical diseases.

"The world will be affected by changes in the way we live and by new diseases. New systems of health care will have to be established," Barron concluded. "We must deal with the new diseases by organizing those systems and by working out solutions of health problems among the world's peoples."
