ITALIANS HAVE THEIR CHANCE

What shall be done with Italy after the momentous developments of the past year or two? That question, a paramount one in our minds, will grow in importance as fighting in Italy moves toward an end.

Italy's past record, partly on the degree of its anti-German activity and partly toward the allied cause during the past two years, should be a consideration to be taken into account in the solution of this difficult problem.

According to the Paris peace conference, Italy is a neutral state, and neutral states are supposed to have no foreign policy. Such an interpretation would be absurd. Italy is not a neutral state, and its foreign policy should be considered as such. The Italian people have been fighting against the Axis powers and their sympathizers.

The question now is: What is Italy's future? What is its role in the post-war world? Is it to be a member of the League of Nations? Is it to be a member of the United Nations? Is it to be an ally of the United States? Or is it to be a neutral state?

The Italian people have been fighting against the Axis powers and their sympathizers. They have been fighting for their freedom and their independence. They have been fighting for their lives. They have been fighting for their future. They have been fighting for their country.

The Italian people have been fighting for their freedom and their independence. They have been fighting for their lives. They have been fighting for their future. They have been fighting for their country.

THE FOLLOWING APPEAL IS A DIRECT QUOTATION OF
HENRY MORGENTHAU, JR.
Secretary of the Treasury

"Will the Fall of Italy
Mean a Home Front Defeat?"

"The fall of Italy is glorious news—"we take it as the end of round one instead of the finish of
the fight. It could mean a home front defeat—if Americans start pulling their punches. It
could mean good news to our two major enemies—if anybody takes it as a signal to slow up, let down, or quit backing the war with everything they've got.

As a matter of fact, the long, hard march to Berlin and Tokyo has just begun. If you think it
will be easy, you are wrong, dangerously wrong.

Before the last shot is fired, a lot of lives are going to be lost and a lot of billions spent.
The more American dollars that go into superior equipment, the less American blood is going to redden foreign soil.

It cost 46 million dollars to lay Hudson Bay. It cost another 300 million to train, equip
and transport the crews and ready everything for the task. And Hudson Bay is just one enemy
city. War bonds must provide much of the money for the bitter struggle yet ahead. You—not
the fellow next door—have a personal responsibility to dig deeper than is pleasant and
convenient to make the third war loan a success.

It will be a success only if every American opens his heart and his pocket
and decides to back the attack.
