U.S. Plans A-Bomb Production Step-up

WASHINGTON (AP) — A major speedup of American atomic production at an eventual cost of more than \$300-million was disclosed on Capitol Hill Tuesday night.

Chairman Brien McMahon (D-Conn.) of the senate-house atomic energy committee announced that President Truman has authorized the start of the accelerated program.

McMahon called it "a major expansion effort." Other sources placed the cost at more than \$300-million.

While McMahon cautiously declined to link the step-up with President Truman's disclosure last month that an atomic explosion has occurred in Russia, there was little doubt among other lawmakers that there was a link.

McMahon said it is "an acceleration of planned production which has been in the planning stage since early last spring."

McMahon's announcement followed a closed-door session of the joint congressional atomic committee with officials of the atomic energy commission.

It said the AEC is going to speed up operations immediately at its two great atomic plants at Oak Ridge, Tenn., and Hanford, Wash.

"The president has authorized the AEC to use some of its budgetary reserves to get started on this proposition," McMahon told newsmen.

From other informants it was learned that the AEC's budgetary surplus is approximately \$59-million.

McMahon said it would probably result in speeding up the present construction program by three or four months.

In a related move, the senate Tuesday night quickly approved a bill to ease certain curbs on AEC spending which had been written into an appropriations bill for the current fiscal year.

As the law now reads, the AEC must clear its plans through the budget bureau before starting new construction. McMahon contended this might delay the program by as much as six months. The senate agreed.

Majority Leader Scott Lucas (D-Ill.) and Senators Eugene Millikin (R-Colo.) and Bourke Hickenlooper (R-Iowa), joined McMahon in urging approval of the bill.

Further Lag Seen In Rutledge Appeal

DES MOINES (AP) — Legal action authorized Tuesday indicated that the Iowa supreme court will not hear an appeal from Dr. Robert Rutledge Jr., 28, St. Louis, until almost a year from now.

Chief Justice Norman Hays of the state supreme court signed an order granting Rutledge's attorneys until May 1, 1950 to file a printed abstract of his trial in district court at Cedar Rapids.

Sentenced to 70 years in prison, Rutledge was convicted of second degree murder in the knife-slashing of Byron Hattman, 29, St. Louis. Rutledge is in Iowa's Fort Madison penitentiary.

Tells of Russ A-Bomb in '47

LAKE SUCCESS (AP) — Russia's Andrei Vishinsky, blasting anew at a campaign to put Yugoslavia on the security council, said Tuesday that for Russia the atomic bomb has been "a real weapon" since 1947.

He threatened "painful consequences" for the United Nations if Yugoslavia wins a security council seat with American support over Soviet-sponsored Czechoslovakia.

At a news conference Vishinsky reminded reporters of the Tass communique of last Sept. 25 which disclosed that Russia has had an atomic weapon since 1947.

Vishinsky said: "V.M. Molotov (former foreign minister) said in 1947 the American monopoly no longer exists. It happens to be a real weapon since 1947."

This was the farthest Vishinsky has gone in the current UN session on Russia's possession of the A-bomb. On Sept. 23 he said the United States has no monopoly on the bomb but did not amplify the statement.

Tuesday Vishinsky said that the Soviet Union was "not bluffing" when it issued the Tass statement that Russia had the atomic bomb.

Vishinsky called a news conference in the spacious economic and social council chamber at United Nations headquarters to protest once more against Yugoslavia's race for the security council.

The English text of Vishinsky's statement distributed to newsmen said "painful effects" but the UN interpreter who always handles Vishinsky's speeches said "painful consequences."

Economist Attacks Government Policy

WASHINGTON (AP) — Dr. Edwin Nourse, quitting within two weeks as chairman of the President's council of economic advisers, Tuesday loosed a blast at the government for "slipping back into deficits as a way of life."

Instead, Nourse declared, the federal government should be "putting its fiscal house in order and husbanding reserves to support the economy if less prosperous times overtake us."

The government's No. 1 economist for the last three years delivered his views to the National Retail Farm Equipment association, at its 50th anniversary celebration.

Driverless Car Takes Wild Ride

AN UNWELCOME VISITOR at the Anthony Woitczek home, 24 W. College street, at 1:30 p.m. Tuesday was this driverless car which, police reported, jumped the curb and careened into the house. No one was injured, but the porch column on Woitczek's home was sheared off and the siding smashed in. The accident happened, police said, when a car belonging to William Yansky, 428 N. Riverside drive, backed out of a parking place on the south side of College street and locked bumpers with the driverless car belonging to Anthony J. Geary, 230 1/2 S. Dubuque street, parked on the north side. The bumpers must have become unhooked when the Yansky car stopped, allowing Geary's car to roll downhill, police said.

Symington Hits B-36 Critics, Advocates 70-Group Airforce

WASHINGTON (AP) — Air Secretary Stuart Symington Tuesday roundly denounced navy critics who have called the B-36 bomber a "billion dollar blunder" and said they have exposed some of this country's top military secrets.

Testifying before the house armed services committee, Symington urged a greater U.S. air fleet to counter Russia's possession of the atomic bomb.

He said he favors a minimum of 70 air groups—compared with the 58 groups approved by senate-house conferees. And he said President Truman agrees with him on the 70-group figure when the nation can afford it.

As lead-off man for the air force and the army in replying to bitter navy attacks on the military high command, Symington said that under the present circumstances he favors a single force to deliver long-range attacks against the enemy in the event of war.

This is known in military parlance as "strategic bombing"—striking at objectives in the heart of the enemy's homeland—in contrast to "tactical bombing" or the aerial support of ground troops.

"If we can afford only one strategic bombing force, I think it should be the air force, and I don't think we can afford more than that," Symington told the lawmakers.

The navy contends that its power to carry the fight to a distant enemy is being ruined under the unified defense setup. The navy claims that its carriers, such as sent forth the historic Doolittle bombing onslaught against Tokyo, should again play a major role in any future conflict.

Jury Chosen to Hear Second Tucker Trial

CHICAGO (AP) — A jury of six men and six women was chosen Tuesday in the second trial of Preston Tucker and seven associates on mail fraud and conspiracy charges. The first trial of the would-be auto builder ended in mistrial.

Three alternates also were chosen because of the expected length of the trial. The government will begin repeating testimony given in the first trial before it was halted.

Howling winds blew down trees and damaged roofs in many parts of England.

BERWICK, ENG. (AP) — The unfinished aircraft carrier Albion and a coal freighter collided in a gale off England's North Sea coast Tuesday and 20 British seamen were lost.

The 20 went down with the 2,025-ton steamer Maystone. Only four of her crew of 24 were picked up by the civilian crew of the Albion. The freighter, which was carrying coal from Methil, Scotland, to London, sank immediately.

The 18,300-ton Albion, fourth of the light Hermes class, was being towed by tugs from the Jarrow shipyards to the Scottish drydock at Rosyth for completion. Holed on the portside near her propellers, she continued on her way, though a naval spokesman said she was weathering "tremendous difficulties" in the heavy seas.

Mass Meeting Set In Student Protest At Bowling Green

BOWLING GREEN, OHIO (AP) — Should co-eds at Bowling Green State university be allowed to ride in automobiles and buses? No, say college officials. Yes, say many of the students.

The dispute may boil over today into a student strike.

A mass meeting of the university's 4,600 students is set for 7:30 a.m. today. Just what called it is open to question. There is no question, however, that most students will attend.

A mimeographed sheet was posted Tuesday in dormitories and fraternity houses. It announced the mass meeting. Students, it said, want more freedom of self-government and permission to publish the student newspaper without faculty censorship.

At Bowling Green, a co-ed can't take a Sunday ride with her parent in the family automobile—unless she has special permission from the faculty. She needs permission, too, before accepting, say, her landlady's offer of a ride to school on a rainy morning. Permission is necessary for a bus ride, also.

Both disputes are fast approaching the critical stage. The coal strike has forced idleness on thousands of workers in allied industries while steel shortages have started cutting down industrial production.

Weary Congressmen Drive For Adjournment

Blood in His Eye? Not a Drop!

SANTA MONICA, CAL., (AP) — Richard Mossman, 24, sat quietly in court while officers testified they knew he must have been intoxicated when arrested Aug. 14 on a drunk charge because his eyes were both bloodshot.

The defendant took the witness stand, reached up and removed his glass right eye, showing it to the jury. He was acquitted.

U.S. Increases Efforts To End Labor Disputes

By the Associated Press

The government stepped up its efforts to settle the twin coal-steel strikes Tuesday. Both disputes seem to be nearing a showdown.

Unless Mediation Chief Cyrus H. Ching makes headway in either strike this week, there are strong indications he will turn them over to President Truman as hopeless.

Then Mr. Truman would decide whether or not to use a Taft-Hartley court injunction or industry seizure to get the strikers back to work.

Ching and his chief assistants met for several hours Tuesday with Arthur Goldberg, general counsel for the CIO and the striking steelworkers union.

The meeting was in preparation for conferences in New York Wednesday between Ching and officials of the U.S. Steel corporation. This meeting will be the first between government representatives and big steel since 500,000 steelworkers struck Oct. 1 for free pensions and insurance.

Conciliators already have met with representatives of the Bethlehem Steel and Youngstown Sheet and Tube companies.

Ching allowed John L. Lewis and the nation's soft coal operators at least another 24 hours before he moves in on their strike negotiations.

Southern operators met with the union at Bluefield, W. Va., but reported no progress. Similar negotiations between the union and northern and western operators at White Sulphur Springs also showed no result.

Ching has made it clear he would re-enter the coal negotiations this week unless there is some sign of early settlement. The 380,000 United Mine Workers have been on strike since Sept. 19 in a dispute over a new contract and coal royalty payments to the miners' welfare fund.

Both disputes are fast approaching the critical stage. The coal strike has forced idleness on thousands of workers in allied industries while steel shortages have started cutting down industrial production.

Farm, Defense Snags Broken By Lawmakers

WASHINGTON — Congress Tuesday drove toward its promised adjournment with a burst of speed that broke deadlocks on farm legislation and the biggest peacetime defense budget in history.

Administration leaders said with confidence the long and tiring session can wind up today, but some believed the "go home" order might be delayed until Thursday.

In rapid-fire order the weary lawmakers:

Reached a compromise on the politically-hot farm bill that had been deadlocked five days on when and how much the government should reduce its price guarantees to farmers. The senate and house may ratify the compromise today.

Pushed toward the White House big defense spending bills including a record peacetime \$15,585,863,498 for the United States' armed forces and \$1,314,010,000 to provide planes, tanks, guns and ammunition to friendly nations in Europe, Asia and the Pacific.

The giant appropriation for the U.S. army, navy and air force whipped through the house with little debate. The senate reluctantly agreed to its provision for a 58-group air force. It now goes to President Truman who, like the senate, thought a 48-group force was enough.

The bill providing money for arms aid to Europe goes back to the house because of some changes the senate made.

Last-minute agreements also were reached on several other measures which now go to the White House. Among them were:

A measure raising the national minimum wage law from 40 cents an hour to 75 cents. President Truman urged the increase but he might object to the fact the bill also cuts down the coverage of the federal wage-hour law.

Pay raises for more than 400,000 postal employees, a flat \$120 a year, plus other benefits; and for about 900,000 civil service workers, an average of \$140 annually.

Authorizations for a \$252-million program of aeronautical research which includes construction of transonic and supersonic wind tunnels.

Power for the defense department to spend \$166,550,000 on military construction in Alaska and Okinawa.

A \$25-million loan program to improve rural telephone service.

The senate also passed and sent to the house a bill authorizing a loan up to \$7-million to the United Nations food and agriculture organization for a headquarters building in Washington.

The superintendent said he expected the case to "go the whole route," first his complete suspension, appeal to the county superintendent, then to the state superintendent of public instruction and possibly a court appeal.

Hickenlooper Participates in 'Iowa Day'

(AP Wirephoto)

SEN. BOURKE HICKENLOOPER (R-IOWA) got an assist from Mayabell Young, a Cornell Bluffs native employed as a model in Washington, Tuesday during a hotel fashion show in Washington. Hickenlooper is shown feeding a calf. The occasion was "Iowa Day" in a series of weekly fashion reviews.

'I Think I'll Make Spades Trump'

(AP Wirephoto)

WHEN BOB WILSON of Long Beach, Calif., picked up his hand during a pinochle game at a Long Beach Masonic lodge he could hardly believe his eyes. Staring back at him were 12 spades. Nothing like it had happened to him in 25 years of regular pinochle playing, Wilson said.

One of Iowa's Immortals —

(Dewey B. Stuit, dean of the liberal arts college, was one of the men who worked with Dean Carl E. Seashore, who died Sunday. He has written this short tribute for The Daily Iowan.)

The memory of Dean Seashore's life and work will linger long in the hearts and minds of those who were privileged to know him and to work with him. His good judgment, wise counsel, creative spirit and dynamic energy were a marvel to all of us. Despite his busy schedule he always had time to stop and discuss a new idea, pushing out the boundaries of knowledge was one of his major goals in life.

His achievements as a psychologist, teacher and administrator have received universal acclaim. We are saddened by his passing and we shall miss him greatly, but at the same time we stand in admiration of all that he accomplished in his lifetime. We owe him much and are grateful that he gave so generously of his time and talent to this institution. He is truly one of Iowa's immortals.

Needed: More Oil —

James Reston, foreign affairs expert on the New York Times, recently reported that the state department's attitude on priority for the Oriental situation is moving from third spot up to the top notch for official "worriers."

This is, in itself, an indication of the importance of the far eastern situation, although the state department seems a bit slow to recognize it. The ideal time would have been several months ago, before the Russians got around to recognizing the Communist government of Mao Tse-tung.

Now we are faced with the inevitability of having also to recognize this government, not because we want to, but because the exigencies of world trade will force the action on us.

China is not the beginning of an unnatural situation. China is the result of an unnatural policy. The problems of Burma, Malaya and Indonesia have been with us since the war ended. India's stability is more the result of luck than of anything the state department has done to pour oil on troubled waters.

The time has come when more oil is needed in our far eastern policy. We need urgently to assign more attention to the troublesome problems presented in the Orient. For example, when the world coal situation gets more ticklish than it is now, where will we stand on getting coal out of China?

Admittedly, this is a long range problem, but we need to do long range planning or we'll find ourselves out in the cold—and from more than lack of coal, too.

It's time we switched from state department fumbling to line plungers, from broken field running to bucking the line.

Five-Cent Pop —

The nicker bottle of pop is as taken-for-granted as Saturday afternoon football and stomachaches around the last of November. Soft drink manufacturers drop a gentle hint, however, that it may be on the way out.

Reason: sugar prices are getting too high, they claim, and costs of production are going up. Big target of their gripe is the Sugar act of 1948, which subsidizes American cane and beet growers so they can compete with foreign growers, and generally holds the price of sugar at an artificial high.

On the face, it looks like the industry, which employs 80,000 persons, has a valid complaint.

Sugar that was 4½-cents a pound in 1939 is now 8-cents. Pop that was a nicker is still generally the same price.

However, before you dash over to the bottling works for your winter's supply of five-cent beverage, take a brief look at the present condition of what appears to be a pretty healthy industry.

Millions are spent each year on advertising and promotion. A few of the larger firms now operate on an international scale.

The answer to their continued prosperity undoubtedly lies in the fact that soft drinks can be produced so cheaply that higher sugar prices do not eat much into profits.

The makers feel that any price hikes would result in a loss of sales. Certainly soft drinks have an elastic demand.

This is not to defend the sugar bill that is making homemaker as well as manufacturer pay more for sugar. Whether protection of domestic producers justifies the pegged high price is not to be considered right now.

Don't worry too much about higher priced pop, however. It looks like a little manufacturer's "beef."

Unwilling Servant

Little Comrades Who Play With Fire —

Interpreting the News — Now at 1941 Size, Soviet Army Could Grow Quickly

By J. M. ROBERTS JR.
(AP) Foreign Affairs Analyst

General Omar Bradley, estimating Russian military strength for the senate appropriations committee, indicates that the Soviet army is about the same size, numerically, as in 1941 when Europe already was at war.

That the Russian army is more modernly equipped can hardly be doubted. The Russian airforce, which had few medium bombers and a relative handful of what were then called long range bombers, undoubtedly is vastly superior now.

Bradly estimates that Russia now has 175 combat divisions, could put 300 into the field within 60 days, and could have 500 in a matter of months. He credits the Russian airforce with 16,000 planes.

According to figures given the United States by Stalin in July 1941, he had 180 divisions when the Germans attacked in June of that year.

Russia's peak army strength before the war ended was believed to have surpassed 500 divisions. In all, she mobilized something like 20-million men.

When Russia was attacked, although she had been spending

more than half of her national budget on the army, she urgently needed a million rifles, more light automatic weapons, and was exceedingly short of anti-aircraft guns and aluminum for planes. Stalin asked the U.S. for them.

Russia had more than 7,000 fighter planes, but of old types. She was producing 1,000 tanks per month, 1,200 fighters, and hoped to get plane production up to 2,500 per month by June 1942.

After drastic reductions in the army following the war, Russia's last annual budget indicated that she was speeding up her preparedness program. She is quite possibly spending as much as all the western powers combined.

In one field, particularly the production and development of long range bombers — she is believed to have learned a lesson from the past war and will not again be caught short.

She has been building prototypes of the American B-29, now somewhat prematurely called a medium bomber by U.S. airmen who have a few B-36's. Now that Russia has to prepare for delivery of the atom bomb, she can be

expected to redouble her activities in this field.

News that Russia's army is as large as it was during an actual war in Europe could have little meaning. For one thing, the Russians were just on a standby basis in 1941, despite warnings that Hitler might turn on them.

Stalin told Harry Hopkins six weeks after the attack, as quoted in Robert Sherwood's book, that he had not believed Germany would invade Russia.

But it could have great meaning, too. As long as the west can't know, it must go ahead with great expenditures for preparedness which are a drain on economic development. And that in itself could be a major part of the Kremlin's idea, too.

LETTERS TO THE EDITOR

(Readers are invited to express opinion in Letters to the Editor. All letters must include hand written signatures and address — typewritten signatures not acceptable. Letters become the property of The Daily Iowan; we reserve the right to edit or withhold letters. We suggest letters be limited to 300 words or less. Opinions expressed do not necessarily represent those of The Daily Iowan.)

TO THE EDITOR:

One of the really great men ever to serve on the State University of Iowa campus is now gone. But he will never be forgotten.

Dean Carl E. Seashore was a man of unusual insight whose long experience in guiding students was indeed valuable to all who like me, were able to discuss our problems with him. He was never too busy or too tired to aid those who sought his counsel. His wit and thought were never dulled by age.

Dean Seashore's observations were always friendly, clear and full of the vigor which has a special appeal to college youth. No man had a greater understanding of human nature. He possessed the rare art of putting himself in the place of another and clearly analyzing each problem in a sincere and sympathetic manner.

He was always one who kept his feet on the ground and helped his students to do the same. The dean continually opened up great vistas of personal and social service so that one might develop to the utmost his propensities toward the happy, the useful and the good.

For all who knew him or read his many works Dean Seashore made an indelible impression. His writings will always serve as intellectual food and drink for those who are left. His life stands as an example of success based on the highest things in life.

We will miss Dean Seashore, but we can never forget the great heritage he has left us.

Tom Dorsey
820 E. Burlington Street

By GIL PEARLMAN

I LOVE a parade. (From the song of the same title.) I love to watch a parade. Better yet, I love to watch the people who watch a parade.

There is something about a parade which stimulates me to swear that I will never view another one. But everytime I hear the music of a marching band I can't help but join the throng of neck-stretchers.

Last Friday night, for instance, I planned to stay within the four walls and catch up on my procrastination. However, once again, upon hearing the melodic strains of bagpipes, I set sail for Dubuque street.

You may think this amusing, since the parade was on Clinton street. But if you spent a half hour leaning on a Dubuque street lamp-post, waiting anxiously and lonely like I did, it would cease to be funny.

THROUGH POWERS of navigation I learned while a small boy, and through powers of vision enabling me to see the crowd, I finally made the pilgrimage to Clinton street.

Being extremely lucky upon arrival, I obtained a front row stand — until some members of the weaker sex pushed me back so that I couldn't see a thing.

Being unable to witness the proceedings I wished that I could have gone home and listened to it over the radio. I also lamented the fact that Iowa City did not have television.

Noticing that other people were in the same predicament, I sent my inventive genius to work and popped up with an idea, which I think will revolutionize parades.

Please keep this between us since I have not had enough time to patent it, but this revolutionary innovation of mine is... elevator shoes for parade-goers.

Nothing short of terrific, huh? This will enable all those standing in the fifth or sixth row to view the procession with amazing ease.

If one of those unfortunates is only 5 feet, 6 inches in height all he must do is slip on this special slipper and he will immediately hit the measuring stick at 7 feet, 8 inches.

THE MOST wonderful thing about this entire gimmick is that no one will know the difference except maybe your immediate family who will simply think you have been eating an extremely well-balanced diet.

All of the height building materials, you see, are hidden inside the shoe. Of course, the outside of the shoe, in order to hide said materials, comes up to your knee, but this can be concealed by lengthening your trousers about three feet.

If this invention proves to be a commercial success, I will endeavor to manufacture the same style of shoe for shorter than average, but talented, basketball players.

While working out the blueprints for producing my brain-storm I missed a fourth of the parade. I missed another fourth of the spectacle when I was blinded by the flood lights attached to the posts along the street.

I didn't miss, however, the cheesecake that was included. No invention can be that great or any flood lights that strong. The sighs produced when the Dolphin queen, the can-can dancers and the sorority float passed resembled a mild tornado.

I also remember when a float of a local laundry passed with a clean white shirt attached to the side. One otherwise quiet man yelled, "So that's what they did with my shirt they've had for three weeks." He was wrong, that was my shirt and they've had it for five weeks.

Just an afterthought. Whosever idea the parade was deserves a lot of credit. Events like that can boost school spirit to a height it should reach.

RUSSIAN HERO DIES

LONDON (TUESDAY) (AP)—The Moscow Radio announced Monday the death of Marshal Feodor Tolbukhin, 65, one of Russia's military heroes of the last war.

Old 'Baroque' Art Used in Modern Design

The logical outcome of the baroque influence in art... is the pretzel.

That is what Prof. Claude Marks, SUI art instructor, told a large audience who attended the first Humanities society lecture in the Art auditorium.

Marks, speaking on "The Persistent Baroque," said that form of art is usually pictured as over-decorative and useless, but it actually has a persistent influence in our culture.

The style, known for its elaborate curve designs, is seen in more modern forms than pretzels and silverware patterns. Modern traffic intersections and roadways often follow a graceful and useful baroque form, as do many modern buildings and the streetways of planned cities.

This style is usually associated with the 16th, 17th and 18th centuries, he said; but its earlier forms are found in Greek and Spanish art and its methods are reflected even in modern art.

The influence that led Copernicus to ponder the spaces and Columbus to wonder at the shape of the earth also led the artists and architects of that date to escape their rigid confines and explore new methods of art, Marks said.

This explains the abundance of curved lines and infinite designs found in works of the baroque period. The artist "wanted to explore the spaces; to get even with reality," he said.

The baroque style has a "controlled explosiveness," Marks said, "that gives a feeling of movement, space, turbulence and rhythm."

LEOPOLD AGREES BRUSSELS, BELGIUM (AP)—Exiled King Leopold III has agreed to give up his throne for good unless he gets 55 percent of the vote in a national plebiscite, it was announced Tuesday night.

Almost Bomb Proof — Walls, Furniture of Stainless Steel

Nothing short of an atom bomb could demolish the apartment V. J. Moravec, 607 S. Gilbert street, has designed and constructed for himself.

Its interior features stainless steel, a material used extensively for hospital and dairy equipment. The apartment — home is probably one of the most revolutionary in its use of material of all the new residences in Iowa City. "Steel provides a durable, fireproof surface which needs only an occasional washing," Mr. Moravec said.

The master sheet — metal worker who has lived in Iowa City for 34 years, originated plans for his stainless steel apartment about two years ago.

Most of the 34 tons of steel used for building were purchased from army salvage yards and junk yards after the war, Moravec related.

The apartment features four rooms and a bath, all in steel. Only the window frames are constructed from wood.

Picturesque both in design and practicality, the apartment features stainless steel base boards, cupboards, bookcases, cabinets, fireplaces, dressers and stainless steel trimming in all accessories.

A focal point in the dining room — kitchen is the eight-day clock, completely constructed from stainless steel.

"Most of the steel I use in the apartment comes from the scrap heap," Moravec said, "but when I buy the material from the factory it comes in 26 to 24 gauge thicknesses."

It is cut then to required dimensions with edges allowed for the finished specifications. Next the parts are assembled and welded with sheet-metal screws to unite the joints.

"Steel has a great advantage," Moravec pointed out. "It is practically immune to rusting and ordinary corrosion, having chromium as its essential alloying constituent."

(Daily Iowan Photo)

AN ENAMELED, stainless steel fireplace has been constructed and designed by V.J. Moravec, 607 S. Gilbert street, to blend in with the rest of the steel apartment. A blower is attached which forces the warm air throughout the rooms.

Reinforced concrete composes the floor and ceiling with two layers of insulation encased in the ceiling. To increase the efficiency of the fireplace, a blower is attached which forces the heat over the entire apartment. It has three flues and is made from enameled stainless steel. "The fireplace gives as much radiant heat as any furnace," Moravec declared.

According to Mr. Moravec, this is the only housing unit in the city which has warm-air heated floors. In finishing his apartment, Mr. Moravec has used his own imagination, skill and machinery. He says anyone can do it if they have a little knack, ability and equipment. "I like my home — I've put a lot of work into it," he added. "When the apartment is completed, all I'll need is someone to wash dishes for me."

YMCA, YWCA to Attend Iowa Conference at Boone

"Christian Insight into World Crises" is the theme for the Iowa area YMCA-YWCA fall conference Friday, Saturday and Sunday at Boone.

The conference will bring together YMCA and YWCA representatives from college campuses all over the state, including SUI, Iowa State college, Cornell college and Drake university.

"We are designing this conference to bring about action, not attitudes—action based on the motivation of our Christian faith and heritage," explained Meredith Saunders, A3, Mason City, chairman of the Iowa area YMCA, and co-chairman in charge of the conference. Jennie Schneider, Iowa State college, will assist Saunders as co-chairman of the conference. Huntley Dupre, professor of political science at Macalister college, St. Paul, is the keynote speaker for the occasion.

"Dupre, whose opinion on American student life is highly respected, helps students think through their problems in religion and society. Lecturing at student conferences is his specialty," commented YMCA Executive Secretary Ralph Schlotting.

"Power Politics and the Christian's Dilemma in Facing THIS Today" is the topic of Dupre's first lecture. "Christianity vs. Communism" and "What Student Organizations Are and Can Do for the Realization of World Peace" will also be discussed.

The conference will consider plans for a Social Action day, Bible study conference, an Iowa area news sheet, the spring conference and the possibility of setting up new commissions.

Displays of former summer projects and plans for future ones will be included in the conference agenda.

The program also will feature a movie and panel discussion entitled "Boundary Lines."

Representatives from the regional council meeting, held Sept. 25 at Palos Park, Ill., will present reports on that meeting.

SUI YWCA is responsible for a conference book sale and an international display, Schlotting said.

SUI conferees will leave from the Iowa Union at 4:30 p.m. Friday and return late Sunday afternoon.

Students' Parents To Be Guests at Dad's Day Dance

Ticket holders for the annual SUI Dad's Day dance Oct. 28 will be allowed to bring their parents and also the parents of their dates.

Gene Glenn, A4, Ottumwa, ODK Dad's Day committee chairman Tuesday said the dance will be held from 9 to 12 p.m., featuring the music of Benny Strong's orchestra.

Tickets for the dance will go on sale Monday at 8 a.m. at the main desk in the Iowa Union lounge at a cost of \$2.50 a couple.

Glenn reminded SUI students to turn in their nominations for the Alumni Dad of 1949 to the Office of Student Affairs before Thursday noon this week. The Alumni Dad and Student Dad will be presented at intermission during the dance.

Prior to the presentation, the Hillcrest men's chorus will sing.

Guests of honor at the dance will include Mr. and Mrs. Marion Huit, Dean and Mrs. Dewey Stuit, Mr. and Mrs. Loren Hickerson, Prof. and Mrs. Russell Whitesel and Prof. and Mrs. A. Craig Baird.

Hillcrest Men Plan Annual Fall Dance

"Autumn Nocturne" will be the theme of the Hillcrest association's annual fall dance Saturday evening in the Iowa Union main lounge, Tom Moffit, A2, Tipton, said Tuesday.

Music for dancing will be furnished by Larry Barrett and his orchestra from 9 to 12 p.m.

Intermission entertainment will feature the Hillcrest chorus under the direction of Gene Thomson, A4, Garrison, Moffit said.

Chaperones for the dance will be Mr. and Mrs. Waldo Geiger, Mr. and Mrs. M.L. Huit and Mrs. Marie Swords.

WORDS OF WISDOM from a "doll". That's Effie, Information First's publicity mascot, on the left "informing" Helen Hays, A2, Iowa City, about Information First's initial program of the year.

IC Women Voters Set Group Meetings

Dates for discussion groups sponsored by the League of Women Voters have been announced by Mrs. William Downing, board member in charge of the groups.

The purpose of these groups is to provide opportunities for citizens to exchange views on government problems and to encourage them to participate in government activity, Mrs. Downing said.

Northwest group five will meet at the home of Mrs. C.L. Gillies, 719 McLean at 1:30 p.m. today. Central group two will meet at 8:00 tonight with Mrs. Lydia Bailey, 212 South Johnson.

Southwest group six will meet Thursday at 8:00 p.m. at the home of Mrs. Leslie Hays, 200 Koser.

Mrs. George L. Horner 1422 East College will lead East group three which will meet next Tuesday at 1:30. Northeast group four will meet October 27 at 8:00 p.m. at the home of Mrs. A.C. Kearn on 409 Market.

Three Students to Discuss Trips to Europe

"Europe Through 'S-U-Eyes'" an informal discussion by four SUI students who traveled in Europe this summer, will highlight Information First's initial program of the year Thursday at 4:30 p.m. in the Senate chamber of Old Capitol.

Participants in the first program will be Mary Louise Annerberg, A3, Carroll, and H. Rand Petersen, A3, Harlan, who studied in Europe under the auspices of the European Work and Study

seminar sponsored by the YWCA, YMCA and UNESCO; Mary McMahon, A4, Manning, who traveled through Europe on her own and attended two meetings of the Student Christian Movement conference in England and Switzerland; and Larry Fryer, C4, Des Moines, who traveled on his own via box car and hitch-hiking.

The discussion will be led by Dr. John Haefner, assistant professor of history and head of social studies at SUI.

Town 'n' Campus

CHRISTIAN SCIENCE STUDENT ORGANIZATION—Members of the Christian Science Student organization will hold their weekly meeting in the little chapel of the Congregational church tonight at 6:45.

IOWA CITY WOMAN'S CLUB—The Iowa City Woman's club will hold a special guest day meeting Thursday at 2:30 p.m. at the home of Mrs. G.W. Moeller, 518 S. Capitol street. Any woman who has come to Iowa City to make a home for her son or daughter while they are attending SUI is invited. Assisting hostesses will be Mrs. William Sanger and Mrs. J.S. McLaughlin. Roll call will be answered by "My Most Realistic Dream."

WOMEN'S RECREATION ASSOCIATION—A board meeting of the Women's Recreation association will be held Thursday at 7:30 p.m. in the recreation rooms of the women's gymnasium. WRA president, Helen Faulk will preside.

AUW DRAMA GROUP—The American Association of University Women Drama group will meet Thursday at 8 p.m. at the home of Mrs. Catherine Kollros, 331 Melrose court. Betty Bennett will read a contemporary play.

GARDEN DEPARTMENT, IOWA CITY WOMAN'S CLUB—A flower arranging class will be conducted for members of the garden department of the Iowa City Woman's club Thursday from 9:30 to 3:45 in the Community building. Mrs. F.B. Ebersole will be in charge. The class

will study dry and dried arrangements. Members are asked to bring their own flowers, containers, holders, scissors and old newspapers. There will be a sack luncheon at noon.

DELTA SIGMA DELTA WIVES CLUB—A meeting of the Delta Sigma Delta Wives club will be held Thursday at 7:30 p.m. at the chapter house 108 River street. Members unable to attend are asked to notify Mrs. Clare Teeter, 8-0842 or Mrs. Robert Nelson, R-35F12.

OFFICERS' WIVES CLUB—Members of the Officers' Wives club will meet for a bridge-luncheon Thursday at 1 p.m. in the Rose room of Hotel Jefferson. Hostess will be Mrs. Charles A. Birk.

Law Group Plans To Initiate Pledges

Phi chapter of Gamma Et Gamma, professional law fraternity, will initiate ten pledges into their active chapter at 4:30 this afternoon in the River room of the Iowa Union.

A 6 p.m. dinner at Reich's cafe will follow the initiation ceremony. Steve Nugent, Cedar Rapids, will be the principal speaker.

The following men will be initiated: George Long, Tom Stewart, Arley Wasson, Ralph Graves, Henry Cutler, George Benedict, Boyd Milroy, George Hofman, Jim Atchinson and Joe Allen.

Horn Addresses Group

Prof. Ernest Horn, SUI college of education, was one of the principal speakers at the Louisiana state conference of school superintendents in Baton Rouge, La., Friday and Saturday.

The meeting was held at the University of Louisiana. Prof. Horn spoke on "A Design for Elementary Education" and "Child Development Through Reading."

TEST ROOMS CHANGED

The business letter writing test originally scheduled today in the chemistry auditorium will be held in rooms 321 and 314 in the chemistry building, college of commerce officials announced Tuesday.

Examination Service to Test Freshman Orientation Exams

SUI is trying to find out how good its freshman orientation program is by sending out questionnaires with its entrance examination results.

Prof. Robert Ebel, director of university examinations service, said Tuesday 200 freshmen had been chosen at random to judge the examinations and activities of new student week by answering the anonymous question sheets.

These questionnaires will either be mailed out or handed to the students in their communication skills section with their scores from the entrance examinations and a booklet explaining the scores, he said.

The questions concern administration of the tests, effects of the tests on students, importance of the scores to the student, value of the explanatory booklet and leave a space for general comments on the tests, Ebel said.

The second half of the questionnaire asks if the student attended the different open houses and parties during the first week and if the student can think of any way of improving the extracurricular activities of that week, Ebel said.

Attached to the test results of those scoring in the upper or lower 25 percent is a note defining that position, he said.

"Some students in the higher group do falling work and some in the lower group do satisfactory work and graduate," Ebel said.

The booklet describes each test the new student took and includes a chart so the student can draw his own profile of test scores the same as the examination service does, he said.

Technician Finds —

Signatures Don't Weigh Much

By PHIL BLUMER

Your signature wouldn't carry much weight with Homer Hall, who is in charge of the SUI chemistry department's instrument maintenance.

He says that his own name, penciled on a piece of paper, weighs only about .00005 grams more than the blank sheet. At that rate, it would take several million signatures to make a pound.

Weighing such a minute thing as a pencil mark is no new trick for Hall. He frequently uses a chemical balance capable of such accuracy.

In fact, accuracy like this is necessary in some of his everyday work. For instance, he has the job of checking weights used in other businesses throughout the department.

The task has its headaches, Hall said. When the weather is warm and humid, he pointed out, moisture fogs the weight pans in the balance, making it erratic.

Then, Hall explained, the instrument must be readjusted by means of an extremely accurate standard weight.

The chemistry department technician started working in the department about 26 years ago as a worker in the stockroom.

Later he was chosen to help some of the professors set up equipment for research and for laboratory demonstrations. Because of his natural interest in the

Wine, Women

AS PRETTY a pedal-presser as ever trod the grape demonstrates the ancient method of crushing grapes as part of National Wine week observance at a New York wine center. Her name is Rosemary Williamson if you're interested.

Seek Clues in Los Angeles Doctor's Death

LOS ANGELES POLICE scrape up ground in search for clues in the mysterious bludgeon murder last week of Dr. Donald E. Buge, whose brutally beaten body lies at right. The doctor's body was found after he had left a card club he had visited with his wife, Violet, who had left the club earlier.

Need More 'Jennifers' —

Quad Movie Promises 'New Developments'

If you find a movie camera aimed your way during the next few weeks, don't look for your smiling face to show up in one of the local movie houses. Where you might look for it, though, is at the first showing of the new Quadrangle movie, to be held some time around Thanksgiving day.

Official interest in the project was shown Monday night when the Quad council voted an appropriation of \$175 as an expense account for the movie-makers.

In the planning stages for more than a week, production has begun on an experimental Quadrangle movie. And the first few hundred feet of film, though undeveloped, holds promise of interesting developments in the future.

The reason: Wednesday night's first step in the shooting schedule was the filming of 12 finalists in the "Quad Queen" contest.

The aspiring queens were on hand to be voted on by Quad residents that night. The field will be narrowed to a queen and four attendants—to be announced at the Quad-sponsored "Autumn Leaves" dance Friday.

The stress on sex, other than

male, has set a precedent as far as the Quad movie-makers are concerned. Originally scheduled as a male dominated film, deep interest has been expressed for including more of the skirted sex.

Producer Hal Davidson, A4, Brooklyn, N. Y., said Friday, "More Jennifers (Jennifer Jones is the wife of Hollywood Producer David O. Selznick) are needed for the film."

The script has already been written by Gil Taylor (he insists on the small "t"), A1, Erie, Penn., who has two years experience behind him, writing scripts for a community theater.

Davidson is highly secretive about the film. He has said however, that a comic character tentatively labeled Joe Quad, will carry the movie-goer through the film.

Giving a further clue to the sequence of events, he said the film will open with shots of Iowa City, then the campus, and finally swing into the Quadrangle.

International aspects of the film were evident in the roster of some

of those helping in production: Kris Khandelwal, Calcutta, India; Francisco de Regil, E3, Merida, Yucatan, Mexico, and Nelson Yu, G, Fookien, China.

New School Addition Ready in Six Weeks

Lincoln grade school's new addition will be ready for use in about six weeks, Magnus Christensen, superintendent of construction, reported.

The nearly complete structure will add four classrooms and a new front entrance to the Lincoln building.

Black boards, bulletin boards, wardrobes and steel lockers are to be installed in the new classrooms. The woodwork is finished in birch and the flooring will be hard maple.

The work is being completed and corridor is clear white pine.

The woodwork in the vestibule by the Weitz Construction company, Des Moines, which also holds the contract for SUI's new library.

Try and Stop Me

By BENNETT CERF

THE biggest brokerage house in Wall Street is named Merrill Lynch, Pierce, Fenner and Beane: a combination of so many formerly independent concerns that it numbers 84 partners. Rival firms, possibly a bit jealous, refer to Merrill Lynch and its 98 branches as "We, the People" and "All This and Fenner too."

The Pittsburgh newspapers recently chronicled the extraordinary luck of an old crone who brought a package of withered, crumbling stock certificates into the Merrill Lynch office there and wondered if they might be worth a couple of dollars. She had found them in an old bureau in her attic. Statisticians made a careful check and sent her dancing to a department store for a complete new wardrobe. Her stocks were worth over \$60,000 at current market prices.

I always have liked William Lyon Phelps' definition of a gentleman: "A person who is nice to those who can be of no possible service to him."

Mrs. Lentz Answers Suit Against Estate

Says Willard Clark Not Legally Adopted

Mrs. Elizabeth Lentz, Johnson county, filed an answer in district court Tuesday to Willard Clark's \$18,000 suit against her, claiming Clark was never legally adopted son as he alleged. Clark brought suit against Mrs. Lentz Oct. 10, seeking to establish his rights to a share of the estate of Charles Lentz, deceased husband of Elizabeth Lentz.

Clark claimed he was legally adopted from a Cedar Rapids orphanage when he was 3 and one-half years old by Charles and Elizabeth Lentz. He said he came to love and respect Mr. and Mrs. Lentz as the only parents he ever knew. He said he worked on the Lentz farm until he was 35 years old.

In March, 1941, Clark entered the armed forces and was stationed in Ireland when Charles Lentz died June 16, 1942. Mrs. Elizabeth Lentz was named administratrix of the Lentz estate, valued at \$18,000. Clark claimed Mrs. Lentz made no provision for his inheritance and that she concealed the fact he was an adopted son of the family.

Clark asked a judgment against Mrs. Lentz for a two-thirds share of the estate or \$12,000, plus \$6,000 for work he allegedly performed for the Lentz family for 12 years after he reached 21 years of age.

Mrs. Lentz denied Clark was legally adopted, but said he was merely put in her care by a guardian.

She said he performed no work for the Lentz family after he reached 21 years of age and that he was gainfully employed elsewhere.

In her answer, Mrs. Lentz claims Clark filed suit to coerce her to pay him money.

SUI Goethe Festival To Feature Lecture By German Educator

Prof. Arnold Bergtraesser, University of Chicago German department, will be the principle speaker for SUI's Goethe celebration at 8 p.m. Friday in Macbride hall.

His lecture, "Goethe and Our Time," will be broadcast by WSUI.

Born in Darmstadt, Germany, Bergtraesser studied in the universities of Tubingen, Munich,

Berlin and Heidelberg, and taught political science and international relations at the University of Heidelberg and the Academy of Politics at Berlin.

Bergtraesser served as a member of the League of Nations conference on state and economic life and of the Franco-German Student exchange, intended to bring about a closer mutual understanding between the two countries.

Besides several books and articles in the field of political science, Bergtraesser has published a number of articles and a book on Goethe, "Goethe's Image of Man and Society"—just off the press.

RIVER DISCUSSED HERE
Mississippi river turbulence (agitation) problems of an undisclosed nature were discussed in Iowa City Tuesday by two employees of the Vicksburg, Miss. Waterways Experiment station and Prof. Hunter Rouse, director of the Iowa Institute of Hydraulic Research.

SUI Students Plan Iowa-Wisconsin Trip

(Daily Iowan Photo)

FOLLOW THE HAWKS TO MADISON is the motto of these members of the Iowa-Wisconsin trip committee. This will be the only student trip of the year and today is the last day to get tickets for it. Standing (left to right) are Jim Urice, C3, Wilmette, Ill.; Andy Anderson, C4, Omeida, Ill. and Gene Fredericks, A3, Buffalo Center. Seated (left to right) are Peg Jensen, A2, Denison; Pauline Clausen, C4, Harlan; Bob Wolford, C3, Shenandoah; Marjory Day, A4, Missouri Valley; Sue Gronau, A4, Minot, S. D.; Nancy Bevins, A3, Spirit Lake; Judy Fein, A2, E. Chicago, Ind.; Mary Anneberg, A3, Carroll, and Dorothy Klawans, A4, Chicago.

Bridge Demolition To Continue Here

Demolition of the old Benton street bridge continued Tuesday as workmen set off more dynamite charges in an attempt to loosen the east span from its supporting piers.

Using a crane to move the huge sections of steel, E. V. Jensen company workers are dismantling and salvaging the east span of the 42-year-old structure. The Jensen company, Des Moines, last July finished building the new bridge which now alleviates traffic snarls on the heavily-traveled Burlington street and Iowa avenue bridges.

Demolition of the old bridge should be finished within a week, workmen said Tuesday.

Traffic Lights Help In Travel Control On Dubuque Street

Iowa City's much-traveled Dubuque street now has systematic traffic control since the recent installation of new traffic signals at five of its busy intersections, according to Police Chief E.K. Ruppert.

The five new signals are at consecutive intersections where Dubuque street intersects College avenue, Jefferson street and Market street.

The lights are synchronized so a vehicle crossing the first intersection with a green light may move along the entire five-block stretch between Burlington street and Market street at "about 13 or 14 miles per hour" without having to stop, Ruppert said.

The signals are set so all five change at the same time, he added.

The new signals may be operated by hand or turned off when traffic is going predominantly in one direction. During rush hours, traffic "moves faster when we turn off the signals and direct the motorists by hand, Ruppert said.

Part of a city-wide traffic control program, the new signals were installed by the H.B. Allen company, Des Moines.

DIVORCE SUIT FILED

Mrs. Mabel Donohoe, Iowa City, has filed suit for divorce in Johnson county district court from Clarence T. Donohoe. She charged cruel and inhuman treatment and asked restoration of her maiden name and costs of the action.

'Blue Babies' Cure Speeded

Addition of Film Changer Helps Determine If Surgery Could Cure Heart Condition

Help for many Iowa "blue babies" may be speeded with the addition of a rapid cassette changer, or film changer, by the department of radiology at the SUI college of medicine.

The cassette changer is used as part of a "sifting" process to determine whether a child is a good candidate for surgery to cure the "blue baby" condition.

"Blue babies" are born without some of the valves in the heart, or with some of them misplaced. As a result, not enough blood picks up oxygen from the lungs, and the child's skin turns blue.

Surgery can frequently correct the condition at the right age, which is preferably three years, and not less than one year.

After recommendation by the family physician and preliminary examination at the University hospitals, a fluid called "diodrast," which makes an impression on X-ray film, is injected rapidly into the child's blood stream. Then the X-ray films are made.

The rapid cassette changer makes possible taking of films as rapidly as two a second. The films "stop" the progress of the fluid through the blood stream.

The cassette machine holds 20 cassettes and feeds them into position at a pre-determined rate. As each cassette slides into position a film shows the location of the "diodrast" fluid in the circulatory system.

Through observing the X-ray films, the doctor can determine the position of the heart's abnormalities and simplify the surgeon's job.

The procedure, known as angiocardigraphy, is not routine,

Iowa City to Have Christmas Greens

Ten thousand feet of balsam roping has been ordered by the Iowa City chamber of commerce for use in Christmas decorations.

More than 60 merchants and business men will use the evergreen roping to frame their ground floor display windows during the holiday season, Secretary Robert Gage said Tuesday. The chamber of commerce is furnishing the decorating materials and is seeking a 35-foot evergreen tree to be erected in the business district.

Files Suit for Divorce

Mrs. Lillian Kabella, Iowa City, has filed suit for divorce in district court from Philip Kabella. She charged cruel and inhuman treatment and asked for household furniture belonging to the couple, costs of court action and alimony and support to be determined by the court.

Iowa Drills on Defense to Stop Burson, Murakowski, Tunnickliff

Expect Possible Crowd of 50,000

Head Coach Eddie Anderson gave his Hawkeye gridders their first look at Northwestern players in a dummy scrimmage Tuesday. Much work on defense will be done this week because the fast and powerful Northwestern offense showed its stuff in the 21-20 upset of Michigan last Saturday, Anderson said.

Quarterback Don Burson returned to form with five completions in eight attempts for 124 yards and two touchdowns. He now leads Big Ten passers with 11 completions in 29 tosses for 183 yards and an average of .550.

"It will take our best defensive play to stop Gaspar Perricone and Art Murakowski, the fullbacks; Miller and Tunnickliff, the halfbacks, not only are fast ball-carriers but they can grab passes," Dr. Anderson said.

End Bob McKenzie and Tackle Don Winslow were named again to co-captain the Hawks in the game with the 1949 Rose Bowl kings. They shared the honor last week in Iowa's 35-9 thrashing of Indiana.

Dr. Anderson said he hopes to have the Hawks up both mentally and physically for Saturday's crucial game.

"You never know until right

DUANE BRANDT
Interception Specialist

up to game-time how a team will react. Sometimes the game is even well under way before we find out. It's my aim to have the team moving as it was in the second half against Indiana when they scored four touchdowns," he asserted.

Individual Hawkeyes bettered their positions in the Big Ten statistics as a result of the Hoosier game last Saturday.

McKenzie is first in pass-receiving with eight catches for 84 yards and one touchdown

and End Jack Dittmer is third with six receptions for 156 yards and three touchdowns.

Halfback Duane Brandt ranks first in pass interceptions, 4 for 43 yards and Dittmer is tied for first in scoring with 18 points.

Other top Hawks include Quarterback Glenn Drahn, second in passing, 14 of 39 attempts for 203 yards and three touchdowns; Fullback Bill Reichardt, third in kick-off returns, five for an average of 26 yards, and Drahn, fourth in total offense, 44 plays for 222 yards.

The largest home crowd of the year is expected for Saturday's game. Business Manager Frank Hlavicek said Tuesday.

He said that less than 3,000 tickets remain on sale, which indicates a possible crowd of better than 50,000.

City High Frosh-Sophs Beat St. Ambrose, 7-0

City high's frosh-sophomore football team gained its third straight victory downing the St. Ambrose underclassmen, 7-0, here Tuesday afternoon.

Coach Bob White's men threatened the goal line several times, but couldn't cross until Keith Hopp plunged over in the fourth quarter.

Dittmer, Denning, Drahn, Reichardt Top Iowa Statistics

Leading the Hawkeyes in individual statistics after four games are End Jack Dittmer, pass-catching and scoring; Quarterback Glenn Drahn, passing; Fullback Bill Reichardt, rushing, and Quarterback Chuck Denning, punting.

Dittmer has caught 10 passes for 235 yards and four touchdowns and leads the scorers with 24 points. Drahn has completed 26 of 63 tosses for 405 yards, five touchdowns and a .412 average.

Reichardt has 155 yards in 25 rushing trials for a 6.2 average. Denning has averaged 38.1 yards on 18 punts.

Other individuals who rank high include Halfback Don Commack, second in rushing with 120 yards and a 4.1 average; End Bob McKenzie, second in pass-catching, 9 receptions for 90 yards, and Reichardt, runner-up in scoring with 16 points on one touchdown and 10 successful place-kicks in 11 trials after touchdowns.

The team now has gained 1,142 yards — 630 rushing and 512 passing. The rushing average per play is 3.8. Opponents have travelled 1,200 yards, 790 on the ground and 430 through the air.

In breaking even in four games, Iowa has outscored opponents, 95 to 77. First downs are even at 52. Iowa has made 26 by rushing, 20 by passing and six by penalty.

Other team figures: kick returns, 466 for Iowa and 488 for opponents; 71 to 41 for Iowa on interception returns, 17 Iowa fumbles and 10 times ball lost to 16 and 11 by opponents.

Irish Retain Top Position In Grid Poll

NEW YORK (AP) — Top-placed Notre Dame sits it out this week end but other members of college football's "first ten" face muscular foes who should give the ranking another vigorous shuffle.

Three new teams moved into the select list after last week's wave of upsets, but the Fighting Irish strengthened their hold on the No. 1 position by making highly-touted Tulane, 46-7.

Sports writers and broadcasters participating in the Associated Press' weekly poll were so impressed by this show of might that they gave the Irish a wallop rating vote.

Notre Dame received 146 of 170 first place votes and a 200-point lead over Army, which hung on to second place, with Minnesota, hurdling Oklahoma to take third.

Finishing out the top ten, in order, are: Oklahoma, California, North Carolina, Kentucky, Cornell, Rice and Texas.

Three newcomers are Cornell, Rice and Texas. They shoved out Michigan, the mythical national champion, Tulane and Southern Methodist, the most distinguished upset victims.

Michigan, beaten by Northwestern for its second defeat in a row, dropped to 20th. SMU, subdued by Rice, plummeted from 10th to 17th.

Notre Dame is idle Saturday, enjoying an open date before its Oct. 29 engagement with Navy at Baltimore. The South Benders' main challengers for national honors will all be busy — Minnesota, Kentucky, Texas and Rice perhaps busier than the rest.

Rice, No. 9, and Texas, No. 10, clash at Austin in the only game involving two members of the top ten. Minnesota, No. 3, plays Michigan, and Kentucky, No. 7, meets SMU on the rebound.

Army figures to have little trouble with Columbia. Oklahoma, No. 4, goes against Nebraska. California, No. 5, plays a Washington team that has lost three in a row. North Carolina, No. 6, meets Louisiana State. Cornell, No. 8, opposes Princeton.

The total vote with points figured on a 10-9-8-7-6-5-4-3-2-1 basis (first place vote in parentheses):

1. Notre Dame (146).....	1,315
2. Army (10).....	1,282
3. Minnesota (8).....	1,279
4. Oklahoma (6).....	1,111
5. California.....	835
6. North Carolina (6).....	826
7. Kentucky (3).....	798
8. Cornell.....	345
9. Rice.....	186
10. Texas.....	126

The second ten: 11. Baylor, 129; 12. Michigan, 119; 13. Northwestern, 82; 14. Pennsylvania, 71; 15. Michigan State, 67; 16. Pittsburgh, 65; 17. Southern Methodist, 42; 18. Missouri, 37; 19. Southern California, 36; 20. Tulane, 35.

Others receiving one or more votes: Ohio State, 22; Wisconsin, 16; Oklahoma A & M, 12; Boston U. and Virginia, 10 each; UCLA and Oregon, 8 each; Santa Clara and Georgia Tech, 6 each; Georgia Tech and Wyoming, 5 each; Vanderbilt and Villanova, 4 each; Princeton, TCU and LSU, 3 each; Arkansas, Georgetown, Duke and Stanford, 2 each; Penn State, Iowa State and Mississippi, 1 each.

Correction
In regard to an error pertaining to the high school mile team race held here Saturday, Merrill Wells of Central City was first for his team instead of Derrell Lindley as reported in The Daily Iowan. Lindley was third for his team while Jack Sweet was second. Central City won the class C title for the fourth consecutive year.

Klotz Calls for Tennis Prospects to Report

Iowa Tennis Coach Don Klotz has issued a call to practice for any interested tennis players, as preparation is underway now for competition next spring.

Klotz says prospects should report to the fieldhouse, room 205, or come directly to the tennis courts near the northwest corner of the fieldhouse. A practice schedule will be continued through the winter.

Intramural Volleyball Play to Start Today

Play in the intramural outdoor volleyball tournament begins today with eight social fraternities slated to see action. Four courts located northeast of the stadium will be available.

Today's schedule (games start at 4:30 p.m.):
Court 1—Alpha Tau Omega vs Phi Kappa Psi
Court 2—Delta Upsilon vs Pi Kappa Alpha
Court 3—Sigma Phi Epsilon vs Theta Xi
Court 4—Sigma Nu vs Phi Delta Theta

Gophers' Attack, Defense Tops

CHICAGO (AP) — A good offense is the best defense, the grid adage goes, but undefeated Minnesota works it both ways.

The grinding Gophers will carry the Big Ten's leading defense and strongest running attack into their third conference start against defending champion Michigan at Ann Arbor Saturday. Ohio State, trimmed 27-0 by Minnesota last Saturday, possesses the league's best combined ground-passing record.

Official league statistics released Tuesday showed the Gophers have yielded an average of only 72 yards by running and 123.5 by passing in two league contests against Northwestern and the Buckeyes.

That gave the huge Minnesota defenders an over-all average of 195.5 yards surrendered, the only sub-200 total in the conference. On the attack, the Gophers have averaged 282.5 yards per game on the ground, the Big Ten's best running game since Michigan's 320 average in its 1943 title push.

Ohio maintained its over-all offensive leadership with a 379-yard average in two games, 174.5 by rushing and 204.5 by passing.

Although Ohio has completed an average of 12 passes in 25 passes per game, the league's most accurate passing team is Northwestern with an average of seven completions in 13 attempts for a .564 per game percentage.

Wildcats 'Up' for Hawks

Heartened by 21-20 Upset of Michigan

EVANSTON, ILL. — Heartened by its 21-20 triumph over Michigan last week, Northwestern university's football team will resume Big Ten competition Saturday against Iowa at Iowa City.

It will be the first game between the two schools since 1939 and the first appearance of the Wildcats in Iowa City since 1931. In their last meeting, the 1939 Ironmen battled the Cats to a 7-7 deadlock at Dwyer stadium.

The overall standing of the series gives the Hawkeyes a margin of 13 victories against eight for Northwestern. Three games ended in ties.

The Wildcats broke a two-game losing streak against Michigan in which they had bowed to Pittsburg, 16-7, and Minnesota, 21-7. It was the first win for the Purple since defeating Purdue, 20-0, in the opening game of the season.

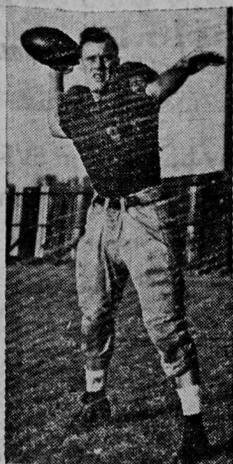

The Wildcats came up with their best offensive performance of the year against the Wolverines as they rolled up 283 yards, 159 by rushing and 124 by passing.

Northwestern's pass defense which had been highly vulnerable in early games, improved greatly against Michigan. Five Wolverine hurlers were able to connect with but eight passes in 21 attempts for 66 yards.

Northwestern's attack was sparked by the return of Ed Tunnick, right halfback, who had not seen action since the Pitt game when he sustained a head injury. He counted Northwestern's first touchdown on a 66-yard sprint after taking a pass from Burson. His blocking ability also paved the way for teammates on a number of plays.

The big gun in the Purple ground attack was Fullback Gaspar Perricone who pierced the Wolverine defenses for 90 yards in nine carries. One of his runs a 35-yard end sweep, set the stage for a touchdown.

Coach Bob Voigts announced Tuesday that Perricone has been named first string fullback in

DON BURSON
Evened a score

place of Art Murakowski, the standout on last year's Rose Bowl squad who made several all-America teams.

Voigts did not comment on Murakowski's shortcomings this year, but said he was highly pleased with Perricone's recent work. A senior, Perricone has been behind Murakowski on the squad for three years.

The Wildcats will face Iowa minus the services of Joe Zurlavlev, left end who was sidelined with a sprained ankle in practice. He is expected to be out of action for at least another week.

Iowa is highly regarded by the Wildcats.

Bob Clifford, Northwestern's scout for the last three Iowa games, described the Hawkeyes as "a bunch of opportunists."

"They've recovered six fumbles within the 30-yard line and they've capitalized for touchdowns on every one," he said. "Two more touchdowns have come on pass interceptions."

"Iowa is the most improved ball team in the Big Ten," he added.

Iowa Next on List For Cats' Burson

EVANSTON, ILL. — Don Burson, who will quarterback the Northwestern Wildcats against the Hawkeyes Saturday, evened a personal score that had stood since 1946 when he pitched two passes that helped the Cats beat Michigan last weekend.

As a freshmen four years ago, Burson was playing quarterback on a Northwestern team that was holding a 14-7 lead over Michigan late in the fourth quarter.

Then Wolverine Fullback Bob Weiss intercepted one of Burson's passes, lateraled to Halfback Bump Elliott who raced for the game-tying touchdown.

During the next two years the Wildcats, with Burson as quarterback, fell victim to Michigan's national champions. Last week's game was Burson's final chance to avenge that 1946 pass that backfired, and this time he proved equal to the occasion.

The crafty Lakewood, Ohio, veteran played the entire game on offense, not only masterminding the Purple attack but handling all of the passing. He threw eight passes and completed five for 124 yards. Two of his tosses went for touchdowns.

His performance was reminiscent of his brilliant achievement of a year ago when he rallied the Wildcats to victory over Minnesota after the Gophers had piled up a 16-0 first quarter lead. He threw two touchdown strikes in a whirlwind second period which saw the Wildcats take a 19-16 lead which they protected in the second half.

Burson's passing played a big role in Northwestern's march to the Rose Bowl last year. In the 1948 campaign he completed 33 out of 80 passes to rank as one of the outstanding passers in the conference.

SUSPENDS LAMOTTA
BOSTON (AP)—The Massachusetts Boxing commission Tuesday night reported Middleweight Champion Jake LaMotta of New York had been suspended "in cooperation with the New York State commission."

Blue Hawks Drill For West Liberty

In high spirits after blasting New London, 33-0, last week, U-high's Blue Hawks are drilling on both offense and defense again this week.

The Blue Hawks will go out of town Friday night for an Eastern Iowa Hawkeye conference battle against the defending champions, West Liberty.

West Liberty has a record of one tie and four defeats in conference competition. The Comets lost nearly all of last year's team through graduation and have scored only once this year.

The Blue Hawks suffered no injuries in the New London contest and should be in top form when they meet West Liberty. They will be out to avenge the 14-12 defeat handed them by the Comets last year.

LAFF-A-DAY

Fer as Football Players Go —

West Virginy Grows 'em Big 'n Tall

— As Seen in Johnston, DeProspero

By JACK SQUIRE

"I want to go back to West Virginia," is the way the old song goes and undoubtedly more than a few of the Hawkeyes' Big Ten opponents wish that Hubert Johnston and Dave DeProspero had the same longing.

These sophomore giants from the Mountaineer state are currently performing at tackle and end respectively for Dr. Eddie Anderson's eleven. While nobody is brash enough to rank them with the top linemen of the conference, failure to achieve such a status in the future will cause a good many sport scribes to devour a few hundred well chosen adjectives.

Of the pair, Johnston, a 6-foot, 5 1/2 inch, 218-pound husky is better known to Hawkeye fans. Pre-season dope had Hubert tabbed as a likely prospect but still a good deal away from prominence.

However, the opening kickoff against UCLA found the eager 18-year-old at right tackle and subsequent events have done no-

thing to alter Anderson's faith in Johnston's ability to handle the job.

DeProspero, on the other hand, has seen less action thus far. The presence of Jack Dittmer, Bob McKenzie and other veteran ends has limited Dave to spot appearances in which he has handled himself credibly. At 6-foot, 5-inches and 215 pounds, he has the natural build to justify the high hopes of the coaching staff.

Although both are sophomores and went to the same high school in Wheeling, Johnston and De Prospero never played together before coming to SUL.

"Dave was a senior when I was a sophomore," explained Johnston. "I didn't go out for sports till my junior year. We knew each other to say 'hello' but we weren't really close."

"I went into the army after graduation," said Dave, "and just thought of Hube as a kid. When I got out and saw that he was all-state in basketball and all-conference in football, boy was I surprised!"

DeProspero himself was a prominent figure in West Virginia scholastic sports. He captured the state high hurdles title and starred as a fullback on the gridiron. While in the service, Dave won the Korean Olympics in diving and the 110-meter high hurdles. He also played end on the 24th corps football team which won the Pacific championship.

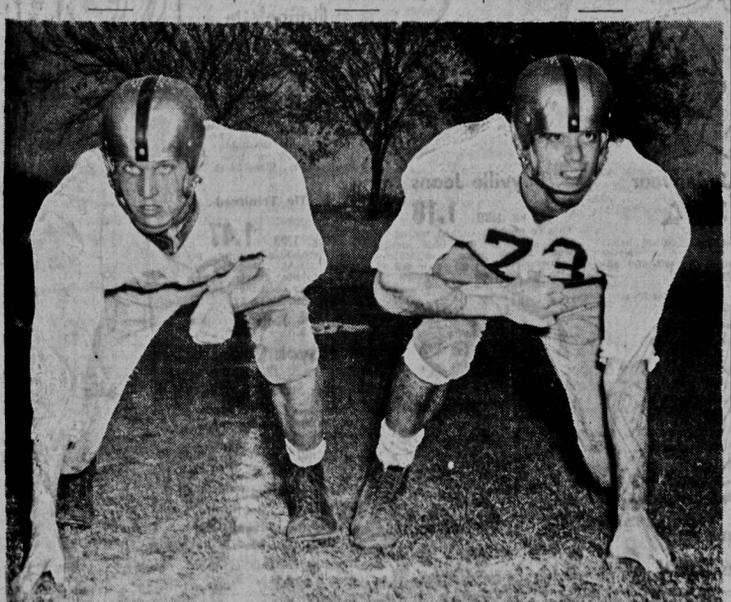

Their reaction to Big Ten brand of football differ considerably. Hubert, victim of a knee injury against Purdue and a near concussion in the Illinois game, is thoroughly impressed.

"It's plenty rough," he commented. "I'll never forget the first time I scrimmaged against the varsity last year. On the first play Bill Kay darn near trampled me."

DeProspero, however, is "disappointed." "I'll never forget the first time I scrimmaged against the varsity last year. On the first play Bill Kay darn near trampled me."

"They play hard but it's not as rugged as I expected," was his appraisal.

Maybe Gophers Nomellini and Tonnenmaker will change his mind.

(Daily Iowan Photo)
 A PAIR OF TOWERING SOPHOMORES from Wheeling, W. Va., Iowa Tackle Hubert Johnston (left) and End Dave DeProspero, are highly rated newcomers to Big Ten football. Johnston, after winning a regular berth, has been sidelined with injuries, but is slated to see action against Northwestern Saturday. Hitherto a spot performer, DeProspero is likely to see more duty against the Wildcats with Ralph Woodard, regular defensive end, sidelined with a broken leg suffered against Indiana last Saturday.

U.S. Student Jumps from Eiffel Tower

PARIS (AP) — Patricia Hunter, 27-year-old student from Port Chester, N.Y., fell to death Tuesday from the second platform of the Eiffel tower, 984-foot Parisian landmark.

Reported ill recently, she dropped 170 feet to the first platform at the spreading base of the tower. French police said she had destroyed her papers during an hour of waiting, but her identity

was established by torn check-books and a check made out to her. These were found in her handbag, along with a French-English dictionary.

Her skull was broken by the fall. Her only jewelry was a wrist watch, still running when her body was picked up. A pretty brunette, she was wearing a gray suit with brown hat and matching gloves.

The tower has been the scene of various violent deaths in the past. A young man committed suicide by hurling himself from the same platform about two years ago.

Authorities at Sarah Lawrence college in Bronxville, N.Y., said Miss Hunter attended that college in 1941 and 1942.

At Miss Hunter's Rye, N.Y., home an aunt, Mrs. Lee Hunter, said the young woman's death could only have been an accident. The aunt said she had recently been with Miss Hunter in Paris and "everything seemed to be very happy and satisfactory."

50 Chinese Students Eligible for Money For Study at SUI

Fifty Chinese students at SUI may be eligible for a share of the \$4-million recently made available for the assistance of needy Chinese students studying in accredited American colleges.

Richard Sweitzer, foreign students advisor, said Tuesday. Applications for the funds have been received and the students Deadline for the return of the applications is set at Oct. 26, so they can be sent to Washington, D.C., he added.

A similar fund totaling \$500,000 was made available this summer for 600 Chinese students, he said. Nine at SUI received help under that program.

To receive help, the student must be a citizen of China, must have enrolled in a course of study beginning last year and must be taking a full load of courses now. He must be in financial need and in good academic standing, Sweitzer added.

The student must also enter three references with this application and return to China as soon as possible after finishing his work, the advisor said.

The money can be used for board, room, tuition, books and clothing with the amount varying with the individual's need. No particular courses must be taken to be eligible, Sweitzer said.

Move Daily Iowan Circulation Office

Subscribers who fail to receive their copies of The Daily Iowan or who wish to report a change of address should call city phone 8-2151 instead of 4191, John Davenport, circulation director, said Tuesday.

The circulation department has moved to its new location in the back of the old journalism building at the corner of Iowa avenue and Dubuque street where the former carrier room was located.

The room will now house the business office, mail room, and a smaller carrier room, Davenport said. He stressed that the new office is away from the editorial and advertising departments of The Daily Iowan which are in the basement of East Hall.

A sign above the door plainly marks the new office which may be approached from the alley on the west side of Dubuque street between Iowa avenue and Jefferson street.

Tailfeathers Contest Won by Gold Team

Members of the Tailfeathers' gold team sold a total of 19,304 Homecoming badges to win the team sales contest, President E.K. Jones said Tuesday night at the official SUI pep club's meeting in Macbride auditorium.

Black team members sold a total of 11,622 Homecoming badges, Jones said.

Bob Stupay, A4, Lisle, Ill., ranked first as individual salesman with a total sales of 1,035 badges to his credit. Second and third highest individual salesmen were Mary Ruth Offringa, A2, West Branch, 875 badges, and Ruby Nicks, A2, Corning, 773 badges, Jones said.

Girl Leaps from Eiffel Tower

(AP Wirephoto) A COVERED STRETCHER BEARING THE BODY of Patricia Hunter, 27 year old art student from Port Chester, N.Y., is being removed from beneath the Eiffel Tower in Paris. Miss Hunter plunged to her death Tuesday from the second platform of the tower, 380 feet from the ground.

Iowa's '49 Polio Total About the Same as 1948

Eight Johnson county persons have been polio patients in University hospitals this year, Dr. W.D. Paul, director of physical medicine and professor of internal medicine in the SUI college of medicine, said Tuesday.

And only one Johnson county person has died of polio this year, he added.

The number of polio cases this year are "about the same as last year," both for Johnson county and Iowa, Paul said. In 1948, five cases were reported from Johnson county and a total of 1,236 in Iowa. Until last Saturday 976 cases had been reported in the state.

"Possibly we may not have as many cases as last year," Paul said, observing that polio cases have been dropping sharply at University hospitals the past few weeks.

Active polio, cases under treatment at University hospitals Tuesday fell to 13 as four new patients were admitted and eight were transferred to inactive wards.

Those admitted to active wards Tuesday, all in "fair" condition, were Jeannette McCarthy, 17, McIntire; Joyce Kickbride, 3, Hampton; Robert White, 5, Nashua, and Jerome Kuhn, 18, Calmar.

Four Hampton children and three from Waterloo were among the eight transferred to the inactive list Tuesday.

Those from Hampton were Dela Mosher, 6 month, Emma Mosher, 7, Charles Mosher, 9, and Marvin Kramer, 7.

The Waterloo children were James Noelting, 9 months, Carolyn Wagner, 3, and Victor O'Connor, 6.
