90 West Point Cadets Expelled For Cheating

WASHINGTON (AP) — Ninety West Point cadets, including football stars and other athletes, have been fired for cheating on exams in a scandal which probably will wreck the army's powerful gridiron team.

The mass dismissals, announced by the army Friday, were the largest since the United States Military Academy was founded in 1802.

Sen. Harry F. Byrd (D-Va.) said he had been told by Gen. J. Lawton Collins, army chief of staff, that a majority of the West Point football team was involved in breaking the academy's code of honor.

The army was tight-lipped about details of the misconduct of its student officers. Byrd reported, however, that at a conference of senators in his office, Collins said the cheating had been going on for four or five years.

It was reported that the same questions were used for exams given at different times. Men who took them first passed the questions on to cadets scheduled to take later exams.

Maj. Gen. Frederick A. Irving, the academy's superintendent, acknowledged that the action taken against the 90 cadets was "stern and uncompromising," but he added in a statement issued at West Point:

"After weighing all factors most carefully, I, and the responsible heads of the army, are convinced that there should be no compromise solution that would preserve the vital honor system of West Point, which is the very heart of the academy."

The army's announcement said the names of the discharged cadets will not be released "so that no undue criticism of the individuals concerned will result."

There will still be football at West Point this fall. Army sources said Irving has promised that the team will play out its schedule even if West Point were to lose every game, 100-0.

Collins was said to have blamed an over-emphasis on football for the unexpected breakdown in the academy's honor system. Byrd quoted him as saying that the cribbing started among the football players, who found it difficult to keep up their work while spending so much time practicing.

An army spokesman disclosed that it was the honor system itself which exposed the cribbers. The action was initiated about six months ago by the cadets' own honor committee. Eighty of the 90 cadets have signed confessions, a Washington source said.

Before the disciplinary action was taken, General Collins set up a special board to investigate the situation. It was composed of Judge Learned Hand, recently retired from the U.S. court of appeals in New York; Lt. Gen. Troy H. Middleton, now president of Louisiana State University, and Maj. Gen. Robert M. Danford, retired, a former president of the West Point Graduates association.

The board made a unanimous recommendation, which was approved by Collins and Secretary of the Army Pace before the dismissals were announced. A group of West Point officers also made an independent investigation.

Covering Up Details Of West Point Story Arouses Protests

WASHINGTON (AP) — Strong protests were registered Friday night against the U.S. army's policy of covering up details of the big cheating scandal at West Point.

Editors and others protested that it was unfair to innocent ex-cadets to withhold the names of the 90 students, including football players, who were ousted for violating the military academy's code of honor in examinations.

Many students leave the academy annually because of impaired health, failure in exams, or other reasons. The army was told these students would tend to be under a cloud as long as the names of the 90 were kept secret.

The army, on the other hand, took the position that the 90 were "only kids" and should not be stigmatized for life.

The army also was reluctant to reveal other details of the scandal. Its announcement of the dismissals gave the number involved and the general nature of the violations, but officers would not say exactly how the cribbing was done or how many football players were involved.

Nominee for Federal Judgeship

ONE OF PRESIDENT TRUMAN'S NOMINEES for a federal judgeship in Illinois, Judge Cornelius J. Harrington packed away his notes after a sudden postponement of the senate judiciary committee hearing on his fitness to the position. The postponement was requested by the Justice department which said it wanted to look further into the nominees' qualifications. Sen. Paul Douglas (D-Ill.) opposed the President's appointments.

Senate Group Delays Federal Judge Hearings

WASHINGTON (AP) — President Truman's lieutenants made a mysterious maneuver Friday which senate officials called a bid for peace with Sen. Paul H. Douglas (D-Ill.) in his feud with the White House over two Illinois judgeship appointments.

All that happened—on the surface—was that Deputy Attorney General Peyton Ford asked and got a one-week postponement of senate judiciary committee hearings on one of Mr. Truman's nominees, Cornelius J. Harrington.

Ford told a reporter he wanted additional time in which to round up letters from attorneys and bar associations endorsing Harrington.

Two senate informants, one of them close to the administration, said that the delay was sought to give Mr. Truman a chance to work out a compromise with Douglas.

They said Mr. Truman was prepared to withdraw his nomination of Joseph J. Drucker, whom Douglas opposes, and substitute Benjamin J. Epstein, whom Douglas supports, if Douglas in turn will go along with the Harrington appointment and drop his fight on behalf of William H. K.

But the White House promptly announced that President Truman had nothing to do with the postponement, and did not even know about it in advance.

Douglas told the United Press that "no offer of a compromise has been made to me . . . yet." He added that "I stand on my present candidates."

There was speculation in informed quarters that the justice department may have sought the delay on its own initiative in the hopes of playing peacemaker between Douglas and the White House.

In support of this thesis, author-

Registration Forms Due Next Tuesday

Registration materials for the SUI independent study unit, which begins Thursday and continues through Sept. 5, must be turned in to the registrar's office by next Tuesday.

The forms require only the signature of the student's adviser. Veterans not paying their own tuition should sign rebate vouchers at the same time they turn in their completed forms.

One credit a week or a total of four semester hours may be earned during the session. Students paying their own fees should make their payments at the treasurer's office before 4 p.m. next Thursday. The fee is \$5 a semester hour.

Michigan Prof Kills Self with Snake Poison

ANN ARBOR, MICH. (AP) — The 54-year-old head of the University of Michigan bacteriology department killed himself Friday by injecting snake venom into his veins a few hours after he had been ousted for misappropriating university funds.

Malcolm H. Soule, world-famous tropical disease expert, injected a combination of snake venom and morphine into his veins, then collapsed in the basement of his home. His wife, Alma, found him 15 minutes later, but he told her what he had done and said "it won't do any good to call for help because there's no antidote for this formula."

Mrs. Soule said her husband was still conscious when she found him and that he tried to keep her from seeking aid. Dr. Cyrus Sturgis, head of the university's medical school's department of internal medicine, lives nearby and Mrs. Soule called hysterically for him to come help her.

Sturgis said that when he got to the basement, Soule was unconscious and that he died a few minutes later.

Soule made the fatal injection only three hours after the university board of regents notified him that his resignation had been accepted. The scientist quit under fire after he had been accused of "misusing" university funds.

The board of regents declined to elaborate on the charge, although it said he had made restitution for \$487.05. That was believed to be the full amount of money missing.

Soule, who was an expert on leprosy and many tropical diseases, left a suicide note. Detective Duane Bauer said the note "gave his dismissal as the reason for his suicide."

The regents issued a terse announcement of the scientist's resignation at the conclusion of their regular monthly meeting Friday. The statement merely said that his resignation had been accepted because he had "misused" university funds and that he had made restitution of \$487.05.

University sources declined to elaborate. However, it was learned that Soule was accused of tampering with funds set aside to pay the expenses of visiting lecturers.

Soule is survived by his wife and a daughter.

Union To Be Open 8 to 5 after Aug. 8

The Iowa Memorial Union will be open from 8 a.m. to 5 p.m. daily from the end of the summer session to the beginning of the fall semester, Aug. 9 to Sept. 13.

The Union dining services will not be operating during that period. The first meal will be served in the cafeteria the morning of Sept. 13. The usual library and television facilities will be available.

Redecoration and rehabilitation of the interior of the Union will occur during this period, Frank Burge, director of the Union, said.

The present number of polio cases is 15.

McCarren said the subcommittee's hearings, which are to be resumed next Tuesday, will show later "how this conspiracy is operating today."

He told reporters that such a conspiracy not only has operated in the past but "still exists today."

Americans were used and still are being used, he said, to "soften up" the will of the people of this country to resist the spread of Communism and to strengthen themselves militarily.

McCarran said the subcommittee's hearings, which are to be resumed next Tuesday, will show later "how this conspiracy is operating today."

Who the next witness will be was not disclosed immediately but McCarran said he expected to announce this shortly.

At yesterday's hearing, Hede Massing testified that as a pre-war Soviet espionage agent she recruited Noel Field and Lawrence Duggan into her "apparatus."

That was in 1933 and 1934 when both Field and Duggan were state department officials. Field since has disappeared behind the iron curtain while Duggan plunged to his death from a New York office building in 1948.

The Vienna-born Mrs. Massing,

former wife of Gerhardt Eisler, also testified that she and Alger Hiss, another former state department official and a convicted perjurer, had competed for Field's services.

McCarran said at the hearing that he realized the names of some dead persons would be brought into the testimony and that he was reluctant to have this happen.

But he said that a congressional committee "must present every possible fact to shed light on this day conspiracy."

"An association of five or ten years back involving a man or woman now dead can well illuminate a relationship of today or aid in characterizing a living conspirator," he added.

Mrs. Massing was a witness at the second trial of Hiss, who was convicted of having lied in denying that he gave state department documents to a pre-war Soviet spy courier.

In her testimony before the senate committee, Mrs. Massing said that she became a Communist after she had married Eisler in 1917 and remained one until 1938.

Eisler, who jumped \$23,500 bail in May, 1949 and fled aboard the Polish liner *Batory*, once was named by the house un-American activities committee as the No. 1 Communist in the United States.

Talks Resume Over Buffer Zone; Allies Hint China-Russia Split

New Rotation Plan For Far East Troops Announced by Army

TOKYO (SATURDAY) (AP) — A new rotation plan affecting all U.S. army personnel in the Far East command will become effective Sept. 1, Brig. Gen. Bryan L. Milburn, assistant chief of staff, announced today.

This new program will replace the rotation program which now applies only to army personnel in Korea. Soldiers in Korea have been rotated to the United States after serving a minimum of six months in combat.

Milburn said enlisted personnel in Korea who were eligible to return home before June 1 will be sent home prior to Sept. 1 if possible. Officers eligible for combat rotation as of June 1 will be rotated as soon as possible but not necessarily prior to Sept. 1.

The announcement did not say what the minimum service would be to be eligible for rotation but said it "would depend on the number of replacements available."

Combat soldiers will get credit for four months for each month of service in computing time served in the Far East. Soldiers serving in non-combat areas of Korea will be credited with two months for each one served.

In other words, the combat soldier in Korea will be eligible to go home twice as fast as the non-combat soldier in Korea.

Those serving in Japan who are unmarried or married with their families in Japan will be credited with time actually served. Married men who have served without their dependents subsequent to July 1, 1950, will be credited with a month and a half.

Amputee Reported In 'Good' Condition

Raymond Klinkhammer, 27, 506 S. Linn st., was in "good" condition in Mercy hospital Friday night after he was injured Tuesday in an accident with an alfalfa cutter on a farm seven miles west of Iowa City.

Doctors at the hospital amputated Klinkhammer's arm near the shoulder following the accident.

Officials at the Iowa Alvey Milling Co., where Klinkhammer was employed, said he was operating the machine in a field and had stopped to check the machinery when his arm became entangled in the cutting blade of the machine.

He was unable to free himself for almost an hour. A truck driver hauling the alfalfa from the field told hospital officials he found Klinkhammer and summoned several farmers to help in freeing him.

Heals in a week, he said.

Doctors said he will be able to walk again in a week.

He was admitted to the hospital with a broken arm and a fractured shoulder.

He was operated on yesterday and is expected to be home in a week.

HOLLYWOOD — The hopefuls who wander through the back streets of Hollywood, waiting for their chance to reign over movie-land, are usually just unknowns.

Today that crowd includes a celebrity from someplace else.

White Man To Be Retried on Charge Of Raping Negress

WINTON, N.C. (UPI) — An outraged old judge ordered a white man acquitted of a morals charge involving a 15-year-old Negro girl back to jail Friday on a rape warrant for the same offense, declaring bitterly I am "ashamed of my state."

Eighty-year-old judge Henry Grady, the oldest superior court jurist in North Carolina, furiously denounced the all-white male jury which acquitted Frank Newsome, 45-year-old tenant farmer's son, and said if he had his way "none of them would ever sit on a jury again."

The evidence was overwhelmingly in favor of the state. The verdict was based solely on the fact that the prosecuting witness was a colored girl and the defendant a white man," the dignified, white-haired jurist said.

Newson, married and the father of three, operates a delicatessen in Mamaroneck, N.Y. He was arrested last June and charged with attacking Hattie Louise Hoggard. The slim, quiet Negro girl told officers Newsome hired her as a baby-sitter while he was visiting his father here and raped her five times at her brother's home.

A grand jury from this rural northeastern county, whose population is 62 per cent Negro, changed the indictment bill from rape to carnal knowledge. Rape is punishable by death in North Carolina, carnal knowledge of females by up to 30 years in prison.

The jury's verdict was "a disgrace to the white race," judge Grady said. He doubted whether another trial here would bring a conviction and said he told solicitor E. R. Tyler "I would move it out of the county to get a jury with sense enough and character enough to do the right thing."

Flames Ravage Bulk Oil Plant in Minnesota

FIREMEN, WORKING behind a metal signboard as protection against intense heat, edge close to fiercely burning gasoline tanks at a bulk oil plant just south of Rochester, Minn. One man was killed and a second seriously hurt in the spectacular fire that sent dense smoke over the city, home of the famed Mayo clinic, Wednesday.

US Could Lick Russia in War, Stassen Says

SOUTH ST. PAUL (UPI) — Harold Stassen predicted Friday that the United States would defeat Russia in "less than three years time" if the Communists touched off a world war tomorrow.

"I am confident that the Russian Politburo knows this and that therefore the long odds are that they will not start a third world war," Stassen said.

The former Minnesota governor, an honor guest at a community celebration here, where he maintains a permanent residence, said there were "two main reasons" for his optimism.

"First, American air and production strength and the fighting quality of our men," Stassen said. "Second, millions of people of the Soviet empire would revolt against the Kremlin if they started a war against America."

Stassen said President Truman and Secretary of State Acheson have both made recent speeches emphasizing "how much armament and how many large armies" the Communists have.

"The figures they gave you are probably correct," Stassen said. "But I wish to emphasize to you tonight that America should not be afraid of these Communist forces."

"If the Communists start a world war tomorrow, America will win and will win in less than three years time."

However, Stassen added, "if our America is alert and courageous and wise, we can win a victory for freedom and civilization" without war.

The president of the University of Pennsylvania, now sounding out midwest sentiment on his possible candidacy for the Republican presidential nomination, winds up his four-day Minnesota tour today. He returns again in three weeks.

O'Dwyer Is Cleared By State Department In Bank Draft Row

WASHINGTON (UPI) — The state department said Friday that a \$1 million bank draft made out to former New York Mayor William O'Dwyer was simply a routine transaction between the U.S. and Mexican governments.

It said O'Dwyer's name was on the draft "in his official capacity" as American ambassador to Mexico, and there was "nothing extraordinary or irregular" about the affair.

State department spokesman Michael J. McDermott recalled that on Wednesday the New York Daily News said in a copyrighted story that a \$1 million "letter of credit" was deposited to O'Dwyer's account in a New York bank and cancelled after O'Dwyer testified before the senate crime committee.

The crime committee, which has accused O'Dwyer of failing to suppress rackets during his term as mayor of New York, promptly dispatched a staff investigator to Mexico City to look into the report.

McDermott said a full explanation was being issued to clear the "unfortunate imprecision" that these events created.

How SUI Couples Live: Building Their Own Home

BUILDING OF THE CASSILL'S NEW HOME, located at 1819 G st., begun a year ago last May, is still going on. Popularly known as "chicken coop" in style, the house is entirely of frame, has four rooms plus bath and utility space. In two rooms the ceiling follows the slant of the rafters. Except for plumbing, the construction was done entirely by amateurs — Verlin and Kathie Cassill, and the friends. Expense records were thrown away when building costs passed the Cassills' original estimate of \$4,000.

KATHIE FIXES A SALAD, many of the ingredients for which come from the Cassill's own 20 ft. by 60 ft. garden. In the second year they have planted the garden; it now yields 14 different kinds of vegetables, including "four generations of corn." The four foot counter at which Kathie works divides kitchen and living room. Designed to make the house look more spacious, it also enables Kathie to hear what's going on while she fixes dinner. Since both she and Verlin hold regular jobs, "whoever feels like it" fixes the noon lunches.

ALL IS NOT WORK AT THE CASSILLS and they often find time to relax in their pleasant living room or big back yard. For recreation, both read a lot, play badminton, entertain and visit friends. During the two months before they moved into their new home both came out nearly every day to work on it, including times it rained and sleeted. "Verlin and I both feel the house was worth it," Kathie said, "but I don't know if we'd ever undertake building another one."

GARDEN TIPS

Old strawberry plants with the tops clipped off after the fruit has been harvested are said to produce many more berries the following season than those left unclipped. Old strawberry plants

have produced 11,000 quarts per acre, compared to 7,000 quarts per acre for runner plants.

Fads in gardening have cost us many of the old-time vegetables which never should have gone out of favor. An outstanding example

is Golden Bantam corn, which has brought about gradual elimination of all white-kernelled varieties, although the latter are actually sweeter and richer in flavor.

Old-time Country Gentleman, picked before it begins to form

By JEAN SHARDA
(Editor's Note: This is the last in a series of three articles on how SUI couples live.)

One year ago Kathie and Verlin Cassill had just moved into their new home — a rather unfinished new home.

"It had the necessary parts," Verlin, an instructor in the SUI English department, would tell you, "... a floor and a ceiling."

Today that new home is still unfinished, but in the meantime it has achieved a much more "lived in" look.

Weared of Rent

About the first of last year Verlin and his wife wearied of paying rent to the extent that they thought in terms of a home of their own.

They toyed with the idea of purchasing a surplus defense barracks, but gave it up when they found the city hadn't passed on the legality of erecting one within city limits.

Then they decided to build a home of their own in a style popularly known as "chicken-coop." It is of frame construction throughout.

Has 4 Rooms

There are four rooms plus a bathroom and a utility space which contains a furnace, water heater, and shelves for storage. The floor is concrete slab; the foundations are poured concrete.

In two rooms of the house the ceiling follows the slant of the rafters, permitting inclusion of clerestory windows in these rooms, so that each receives light from three directions.

Dimensions of the house were determined by the lengths of suitable standard lumber, Kathie said, and the floor plan was designed to provide maximum efficiency as cheaply as possible.

Designed for Light

The rest of the house, including a big picture window, was designed to admit as much light as possible.

Both Kathie and Verlin agreed there should be a four-foot counter between kitchen and living room because it made a house look more spacious. Also, Kathie said, "I can hear what's going on while I'm getting dinner."

The Cassills estimated they could build their house for \$4,000 but said they gave up keeping track when expenses passed that mark.

Last March they bought a 150 ft. by 80 ft. lot at 1819 G st. They began laying the foundation soon after. Actual building began in May.

Worked after School

Aside from the professional help of a plumber, Cecil Alberhasky, the Cassills, with the help of their friends, did all the labor. Although Verlin was teaching at SUI when they started building, he and Kathie worked on the house after school hours and on weekends.

"About the only morning I didn't go out," Kathie recalled, "was when they dug the sewer trench. When I got there in the afternoon the trench was so deep and the clay so wet I couldn't lift it the six feet to throw it

out." However, Kathie admitted that she did hammer and saw and help lift walls.

Had Troubles

They had their share of troubles, the Cassills reported. The forms they built for the foundation weren't strong enough and spread when the concrete was poured in. It sleeted when they dug the sewer trench.

One day the yard was so soft the truck with concrete was forced to stay in the road. The Cassills were forced to carry the concrete in bucketfuls to the house—in the pouring rain.

"We must have carried a ton," Kathie declared.

But the building also had its bright spots. For instance, a sink insured against Kathie's having to stoop was designed by Verlin's measuring the point where her fingers touched when she stood in front of the sink counter.

Painting Scheduled

Still to be completed are the painting of the exterior, living room, kitchen and study. The Cassills also plan to make a couple more shelves for the built-in bookcase, cover the living room floor with asphalt tile, and a living room wall with burlap.

The burlap will go on the wall on which hang four of the 10 paintings in the house. Some of these Verlin has done; the rest are by his brother, Carroll, and other artist friends.

Verlin has also made a kitchen table and chairs, a dining table, coffee table and the bookcases.

Works on Novel

Although he took several art courses at SUI and worked on WPA art projects in Iowa, most of Verlin's free time is spent writing. He is now working on his third novel.

Kathie said Verlin does most of his writing during the hours she works as librarian in the Journalism Reading Room; but when he does work at it, she utilizes that time for reading.

Meal getting and some other household duties are done by "whoever feels like it;" there's no set schedule. Outdoors, Verlin does more of the lawn mowing; Kathie more of the gardening.

This is the second year the Cassills have planted a 20 ft. by 60 ft. garden, which now yields 14 different vegetables, including "four generations of corn."

Cans, Makes Jelly

Last year Kathie canned beans and tomatoes and made jelly; this year, since she has a job, she hasn't and doesn't intend to, she declared.

Besides the garden their lot also has several small fruit and shade trees, variety unknown, flowers and berry bushes, all of which they've planted. Future plans include a hedge.

The lawn also is a source of recreation and the Cassills often take time out from their work to play badminton and visit with friends in their large back yard.

Work Out Fine

Kathie said a job and housekeeping work out fine "if I just didn't have to wash and iron. But possibly this is true because I don't worry if my house isn't always clean."

"Now I wonder how I managed to spend all my time when I wasn't working."

The Cassells will take a vacation after summer school ends and where do you suppose they'll spend that one full week with pay?

"Not this time," said Kathie. "We're renting a cabin at Lake Okoboji."

"We both feel the house is worth it," Kathie concluded, "but I don't know if we'd ever undertake building another one."

Sue Gray Honored At Bridal Shower

Miss Sue Gray, G, Fort Madison, was guest of honor at a bridal shower given by the Misses Yvonne Werner and Mary Tremaine, both of Iowa City, Friday evening at 324 E. Fairchild st.

Miss Gray will become the bride of James Merritt, M4, Columbus Junction, on Sept. 8.

Guests at the shower included Mrs. Carroll Bickford, Mrs. Gaylord Ward, Mrs. Paul Herman, Mrs. E. Davy, the Misses Shirley Bloomer, Eileen Vasey, Eleanor Kirshman and Carolyn Gustafson.

Capsules Lick Pests

A new control for soil insects which damages vegetable crops now is available. An ingenious manufacturer is packaging ethylene dibromide, a highly effective soil fumigant, in heavy gelatin capsules. The capsules, big as old-fashioned horse pills, are pressed into the soil at intervals throughout the garden.

STILL TO BE COMPLETED in their home are the built-in bookcases, which lack a couple of shelves, and the living room floor, which will be covered with asphalt tile. The Cassills also plan to paint the house's exterior, and the study, kitchen and living room, except for one wall which will be covered with burlap. Many of the furnishings, including the bookcases, kitchen chairs, and kitchen, dining and coffee tables were built by Verlin. He also made several of the many paintings which hang in living room, bedroom and bathroom. Other paintings were done by his brother, Carroll, and artist friends.

IN HIS STUDY VERLIN TALKS OVER a manuscript with its author, William Berge, a member of the SUI Writers' Workshop. An instructor in the SUI English department, Verlin often holds conferences with students in his home. In hours he's not teaching, Verlin works on his third novel, usually during the time Kathie works as librarian in the Journalism Reading Room. Kathie said a job and housekeeping worked out fine, but perhaps this was true because "I don't worry if my house isn't always clean."

Window Treatment Should Consider Style

Have you noticed how people's eyes tend naturally to shift to the windows of a room? That's reason enough to make your windows an attractive part of your decorating scheme.

Style of window treatment will be determined by the number, size, and placement of your windows—as well as by the kind of furniture that you have. The world outside makes a difference, too. The view is yours to enjoy when you hang traverse draperies on the wall so they'll pull clear of the window by day.

To soften light, or to blur a view that is just so-so, you might hang sheer or opaque glass curtains over the window. If your view is downright bad, cover the windows with decorative draperies or curtains to dramatize your color scheme.

Rubbish Is Hazard

Rubbish stored in the open is an extremely dangerous fire hazard during the warm months because it dries out rapidly and becomes highly flammable, safety officials warn.

They advise keeping all waste materials in covered metal garbage cans.

WITH MIXED EMOTIONS OF PLEASURE AND RESPECT, Hillman Robbins Jr., of Memphis, Tenn., looks at the trophy he just won with a 3 and 2 victory over Tom Brennan of Milwaukee, Wis., Friday in the finals of the Western Junior golf tournament on SUI's Finkbine field.

Yanks Split, Only 1/2 Game Up

NEW YORK (AP) — The last place St. Browns walloped the New York Yankees, 10-2, in the second game Friday after the league leaders won the opener, 3-4.

Both Yankee runs off Jim McDonald were unearned. The young righthander, who was purchased from the Boston Red Sox a couple of weeks ago after Boston recalled him from Louisville, scattered nine hits.

The Browns clinched the game in the fourth inning by scoring seven runs, the largest one-inning against the Yankees all season. Bob Weisler, fast rookie lefty from Kansas City, was knocked out in that frame.

In the first game, Tommy Byrne, former Yankee, was laced for six runs in the second inning as the Yankees sent 11 men to bat. Two walks, a hit batsman and five hits were included in the attack. Gil McDougald, rookie infielder, climaxed it with his 8th home run on an.

Indians 3, A's 2

BOSTON (AP) — Lefty Maury McDermott fired the Boston Red Sox to a 5-2 win Friday night over the Detroit Tigers.

This series opener, interrupted by rain for 56 minutes after the eighth inning, was decided by McDermott's first major league homerun. It was slammed against loser Dizzy Trout with two on base in the second inning.

McDermott received but little offensive support. Ted Williams went hitless on four tries and Clyde Vollmer struck out three times before grounding into a double play.

In addition to scattering seven Detroit hits and totaling six strikeouts, thereby boosting his season's total to 108 in 26 games, McDermott connected safely.

On his last turn at bat, in the sixth, he singled in Billy Goodwin with the final Boston mark-

er.

Phil 5, Pirates 4

PITTSBURGH (AP) — Robin Roberts hurled his 14th win of the season Friday night as the Philadelphia Phillies edged the Pittsburgh Pirates 5-4 before a crowd of 13,607. The Pirates scored all of their runs in the third inning.

Roberts gave up only seven hits, five of them when the Pirates scored their runs to take a temporary one-run lead. He fanned eight.

The Phillies scored single runs in each of the first three innings, sewing up the game with a two-run outburst when they knocked Vernon Law out of the box.

Relief pitcher Bill Werle pitched hitless ball the last 5 2/3 innings.

THE MAP CHARTS the existing video network (solid black lines) and new lineup (dotted line) that will inaugurate television's transcontinental coverage on Sept. 30. The basic link will be over the American Telephone and Telegraph's \$40 million microwave radio-relay system between New York city and San Francisco, presently in operation as far as Omaha.

Transcontinental TV To Begin Sept. 30

NEW YORK (AP)—Television goes transcontinental Sept. 30, just 25 and three-quarter years after the first coast-to-coast radio hookup.

The American Telephone and Telegraph company announced

Iowa Fight Song Published for Band

A full band arrangement of the "Iowa Fight Song," dedicated to SUI has just been released by Bourne Inc., New York music publishers.

Prof. Charles B. Righter, director of SUI bands, wrote the band arrangement, the same one performed by the band last winter at the Iowa-Indiana basketball game.

Righter points out that the band arrangement is in the same key as the sheet music version of the song, making it possible for Iowa fans to sing along with the band.

The "Iowa Fight Song" was written for SUI by Meredith Wilson, a native of Mason City, who is now musical director of the National Broadcasting company's "The Big Show."

It was written at the suggestion of Les Zacheis, columnist for the Cedar Rapids Gazette, and was performed publicly for the first time on "The Big Show" program last December.

Prof. Edie to Judge Art at Minnesota Fair

Prof. Stuart Edie, art department, will go to St. Paul, Minn., Aug. 17, to be a judge at the art salon at the Minnesota state fair.

Edie was one of a jury of three members named by the Minnesota artist association.

A member of the SUI art department has been a judge at the Minnesota state fair the last three years.

CHURCH CALENDAR

BETHANY BAPTIST CHURCH

Community building

The Rev. Leonard Thompson, pastor

Sunday, 9:30 a.m., Sunday school,

10:45 a.m., morning worship, 6:30 p.m.

Wednesday, 7:30 p.m., evangelistic service

Bible study and prayer hour in the pastor's home, 6:15 p.m. Johnson st.

FIRST BAPTIST CHURCH

Corner of Burlington and S. Clinton sts.

The Rev. Elmer E. Diers, pastor

Rev. Leonard M. Sizer, associate pastor

Sunday, 8:30 a.m., evangelistic morning worship service. The Rev. Andrew Webster, general missionary of the American Baptist convention in Puerto Rico will speak.

The primary, junior and intermediate departments of the Sunday school will view pictures of Puerto Rico. 6:30 p.m., the Sunday Evening club will meet at the Roger Williams house for a pot-luck supper.

The Mr. Webster Fellowship will share the meeting of the Sunday Evening club.

Thursday, 7:30 p.m., the church will meet for a business session at the church.

CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS

918 E. Fairchild st.

L. Stephen Richards Jr., branch president

Saturday, 10:30 a.m., primary association

Sunday, 9 a.m., Sunday school, 11:15 a.m., testimony meeting.

ORGANIZED CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS

North Littleton conference room, Iowa Memorial Union

Daniel Waitz, pastor

Sunday, 9:30 a.m., Sunday school, Lyle Woodcock teaching, 10 a.m., blessing of the children, 10:45 a.m., communion service.

CONGREGATIONAL CHURCH

Clinton and Jefferson sts.

The Rev. John G. Craig, pastor

Sunday, 10:45 a.m., the Rev. John G. Craig will have charge of the first of the Union Services to be held in the First Congregational Church, through Sept. 2.

Wednesday, 7:15 p.m., Boy Scout troop will meet at the church.

CLARK ST. MENNONITE CHURCH

614 Clark st.

The Rev. Norman Hobbs, pastor

Sunday, 10 a.m., Sunday school, 11:15 a.m., morning worship, 7:30 p.m., young people's meeting and sermon.

Thursday, 7:30 p.m., prayer meeting.

THE CHURCH OF CHRIST

Conference room 1, Iowa Memorial Union

Sunday, 10 a.m., song service and com-

munity.

SUI Alumnus Renews Memories

(Daily Iowan Photo.)

LEONARD STEVENS (left) 1949 SUI graduate and Prof. Arthur Barnes, head of the radio journalism sequence at SUI, look over one of Stevens' cartoons printed in The Daily Iowan in 1949. Stevens was in Iowa City Friday on his way to Alaska where he will do free lance writing and photography work on the Alcan highway.

Adventurous Grad Visits SUI on Way to Alaska

An SUI graduate who has held jobs ranging from hot dog hustler in a circus to a member of the citizen's committee for the Hoover report stopped off in Iowa City Friday on his way to his latest job, a free lance picture expedition to Alaska and the Alcan highway.

He is Leonard Stevens, Lisbon, N.H., who received a B.A. degree from SUI in 1947 and an M.A. degree in 1949.

Stevens and another SUI graduate, Charles Guggenheim, recent winner of the 1950 George F. Peabody award for his work in producing a television show, "Saturday at the Zoo," in New York, plan to make the trip together.

On the Alaska trip, Stevens and Guggenheim hope to take movies and still shots of the Alcan highway. Stevens also hopes to write several articles on the highway.

The pair hopes to start the trip about next Wednesday and return Sept. 10.

At SUI, Stevens was an editorial cartoonist for The Daily Iowan. Nearly 100 of his cartoons were printed in the paper from 1946 to 1949.

He was news editor for radio station WSUI from September, 1947 to February, 1949.

Stevens took a job with the Hoover commission in 1949 and will return to that job after his trip to Alaska.

The yen for adventure has frequently taken Stevens off on jobs and trips far afield from his chosen work.

In 1941, Stevens dropped out of St. Anselm's college in Manchester, N.H., to take a job as a member of a ski patrol at a winter resort in the White mountains near his home.

The summer of 1948, Stevens and another SUI student left Iowa

City to seek employment on a ship going to South America.

In New York Stevens met a friend who informed him that Ringling Brothers circus was in need of roustabouts.

Stevens and his friend went to Providence, R.I., and were hired by the circus.

For the rest of the summer he was a hot dog salesman for the show. He toured the New England states and midwest until time for school to start in the fall.

With the Hoover commission, Stevens wrote news releases, did radio interviewing and gave over 300 lectures throughout the midwest and east.

He was also a member of the "Cracker Barrel Caravan" sponsored by the commission. The caravan was made up of five motorized units including a semi-trailer truck that folded into a mock general store.

The caravan toured 77 eastern cities in 1950. At each stop Stevens gave speeches on government reorganization to audiences ranging in size from 200 to 2,000.

Des Moines Couple Die from Shooting

DES MOINES (UPI) — Cyrus Cassell, 31, and his estranged wife, Lucie Marie, 29, died Friday as the result of a double shooting.

Police said Cassell shot his wife twice in the chest and then shot himself in the head Thursday night. Neighbors found the wounded pair on the front porch of their home. Mr. and Mrs. Cassell died at Broadlawns general hospital Friday.

Officers said Mrs. Cassell, a cataloging clerk at Drake university, filed for a divorce last week.

Charms Air Force —**Blonde Rides Wrong Plane**

— Ends Up in Jail

AUSTIN, TEX. (UPI) — A wise-cracking strawberry blonde, pretty enough to put some air force officers in a spin, explained through jail bars Friday she got in trouble because she hitched a ride with the wrong airline.

Madelo Frances Evans talked her way into a free ride on an air force plane from Biggs field at El Paso, Tex., to Austin's Bergstrom air force base, where she lived the life of the "brass" four days, posing as a lieutenant in the women's air force.

The escapade came to an end in the Bergstrom officers' club, where shapely Mrs. Evans had been welcomed as an attractive addition to the scenery, when military agents hauled her out and turned her over to civil authorities. She was jailed on a charge of impersonating a federal officer.

Mrs. Evans has behind her at 26 a varied and lively career, by her own statements. She describes herself as an ex-California showgirl, a former stewardess on the Trans-Pacific Flying Tigers airline, cheer leader at University of Miami, and "the Sweetheart of Sigma Chi" at University of Hawaii and University of South Carolina.

While cheerfully regaling reporters at the jail with her life story, Mrs. Evans said she also

would have been sweetheart of Sigma Chi at University of California "but I didn't have time to stay for the ceremonies."

(At Miami, Fla., University of Miami officials debunked her claim to cheerleading fame. They said a Madel Frances Evans applied for entrance last October, but records did not show she ever attended classes or led any cheers.)

Mrs. Evans wore blue dungarees rolled up to the knees, a red plaid blouse open at the throat and white moccasins, one inscribed "Dolly" and the other "Evans."

She opined airy that she got in trouble with the air force through indiscreet selection of her transportation. "I carried a pass good on any airline in the country but one," she quipped. "And I picked the wrong one."

She said she intended no harm, her chief motive being to spare her husband, Sgt. Rufus Evans of Biggs field, from being transferred to duty outside the United States. As an officer, she said, she thought she could keep him on duty closer to home.

Meteor Hunt

Proposed by Prof. Wylie For Midwest

A "meteor hunt" by residents of the midwest has been proposed by Prof. C. C. Wylie, the head of the department of astronomy.

Wylie has asked all persons in Iowa and nearby states to report all spectacular meteors to their local newspapers or radio stations, which are asked to forward the information to Wylie. Observers may send the information directly to the department if they like.

According to Wylie, a spectacular meteor is one which lights up the night sky like a flash of lightning. By day such a meteor looks like a piece of the sun falling.

The department of astronomy at SUI is beginning a research project on meteors and meteorites under a grant from the office of naval research. The navy is interested in the study since meteors are super-sonic and give information which is of value in the design of rockets and jet airplanes.

As a preliminary to the project, Wylie is asking for reports on a meteor which fell at about 8:30 p.m. Saturday, July 28. Wylie states that first reports indicate this meteor should have been seen over the entire state of Iowa, and in parts of adjoining states.

In doing this research, Wylie will be continuing a study which he carried on at SUI in the late 1920's and early 1930's.

Using the public as a watch dog and relying on the press and radio to inform him whenever a spectacular meteor showed up, Wylie and his assistants recovered during an eight-year span more meteors in the midwest than were recovered in all the rest of the country. They worked only during the summer months.

By checking reports on a particular meteor from various sections of the midwest, the actual location of the meteor can be determined. In addition, the path, orbit and air resistance encountered can be found following interviews with observers.

Records indicate that August is a good month for observing spectacular meteors, Wylie declares. He states that one reason is the warm weather which keeps persons outdoors later at night than normally.

Synhorst to Check Beer Permit Rules

DES MOINES (UPI) — Secretary of State Melvin Synhorst said Friday he would seek the answers to two questions as part of his campaign to enforce the state beer laws.

Synhorst, who is chairman of the state beer permit board, said he would ask the attorney general if the state beer board could deny a beer permit to an applicant who admitted he held a federal liquor stamp.

Synhorst said he also would ask Atty. Gen. Robert Larson if holders of class B permits could be compelled to obtain Iowa restaurant permits.

Synhorst said the application forms for class B permits include a question on whether the applicant holds a federal liquor stamp. He said that in the past the answer apparently had little to do with whether the permit was issued or not.

Synhorst said the second question was raised because tavern owners outside of city corporation limits can escape inspection by not having restaurant licenses.

"There is no reason," he said, "why they should not be required to meet the same standards of sanitary conditions that are required of operators holding restaurant licenses."

Des Moines Man Pleads Innocent

DES MOINES (UPI) — Harold Conner, a tourist court operator, pleaded innocent Friday to a charge of illegal importation of liquor into Iowa.

Conner was charged with illegal importation and his wife was charged with violation of the general prohibition section of the state liquor laws as the result of a raid July 23. Sheriff's deputies said they seized 20 bottles of whisky in a raid at the tourist camp.

City Record**DEATHS**

Patricia Ann Falls, 11, Oxford, Friday at Mercy hospital.

MARRIAGE LICENSES

James D. Brooks, 24, and Ruth A. Lowry, 20, both of Iowa City.

Alfred M. Stutzman, 25, and Frances Plowman, 27, both of Muscatine.

Ronald H. Hummer, 19, Oxford, and Joan Villauer, 17, Iowa City.

BUILDING PERMITS

Ben E. Summerhill, Manville addition, for a garage, \$1,000.

George H. Frohwein, for a residence with a double garage in LuCon drive, \$15,000.

Princess Elizabeth To Visit America As Truman's Guest

LONDON (UPI) — Princess Elizabeth and Prince Philip announced Friday they "have accepted with pleasure" an invitation from President Truman to be his guest on a visit to the United States this October.

An announcement from Clarence house, residence of the young couple, said they would visit Washington Oct. 24 to 26.

The trip to Washington will follow a state tour to Canada. It was not yet known whether Elizabeth and Philip will visit any other American cities.

It will be the first American visit for both Elizabeth, 25, and mother of two children and the 30-year-old Philip, who has just given up a sea career to help his wife in her rigid routine of public duties.

Elizabeth was only 13 when her parents, King George and Queen Elizabeth ate hot dogs at Hyde park with the late President Roosevelt during their prewar vacation.

She once told American friends how she listened enthralled to her parents' accounts of that visit, and ever since it has been her dream to make the trip herself.

Today's announcement said the couple would stay at Blair house in Washington as guests of the President.

The visit will give the Princess an opportunity to renew her acquaintance with Margaret Truman, whom she met during Miss Truman's recent visit to England.

The refugees, who asked for political asylum in Sweden, gave up two pistols and a handful of empty cartridges to police who detained them for questioning. They said they had seized other

4 Poles Fly To Sweden; Seek Asylum

STOCKHOLM (UPI) — Four haggard refugees who apparently shot their way out of Poland, landed in Sweden Friday in a bullet-marked patchwork plane to join a sudden movement of Poles from their Soviet-dominated country.

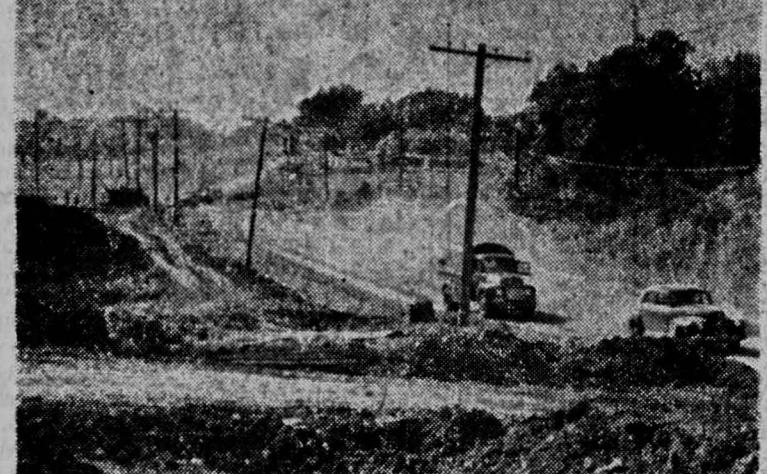

The four Poles—three men and a woman—came down in their "flying heap of junk" after a hazardous zig-zag flight over the southern Baltic to escape detection.

They arrived less than 24 hours after seamen of a Polish minesweeper mutinied in the Baltic, locked up their officers and sailed to Sweden to ask asylum as refugees.

Twelve of the Polish sailors remained in Sweden Friday as the minesweeper sailed back to Poland with five officers and 16 crewmen aboard. Four of the returning crewmen also were reported to have been among the mutineers, but chose to return.

The four refugees landed their craft early Friday at Bulltofta airstrip near Malmo in southern Sweden. Their plane had a bullet hole in it and the occupants told witness they had "eliminated" airport guards "somewhere in Poland."

The refugees, who asked for political asylum in Sweden, gave up two pistols and a handful of empty cartridges to police who detained them for questioning. They said they had seized other

Construction Work Closes Road

(Daily Iowan Photo.)

HIGHWAY 6 along Finkbine golf course is closed to traffic between Iowa City and Coralville. Only vehicles connected with widening and resurfacing construction work drive the dusty road shown above. Iowa City-Coralville traffic is being rerouted over the IWW road. Highway commission officials estimate the detour will have to be maintained for at least a month.

Reserve Program Baffles Lawmaker

WASHINGTON (UPI) — A wordy groggy law maker has asked the defense department if it couldn't put its reserve program "in pictures and diagrams."

Rep. W. Sterling Cole (R-N.Y.) after listening to several days complicated testimony on the department's proposed reserve bill commented Thursday that it was beyond his lawyer's mind to figure out its workings.

"I understand there are some good 'photographs' in the air force. Why can't they draw some pictures of this thing?" he asked.

Butler's Anti-Tydings Campaign Denounced

WASHINGTON (UPI) — The Senate elections subcommittee Friday scathingly denounced the "Jekyll-Hyde" election campaign of Sen. John M. Butler, (R-Md.) and called for drastic revision in election laws to prevent such tactics in the future.

The subcommittee's unanimous report did not ask for Butler's removal. But it urged legislation which would permit the Senate to deny seats to future senators who use "defamatory literature" in their campaigns.

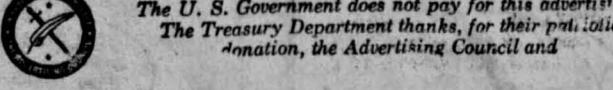

It also recommended that other senators—not only those directly involved in the campaign—be made subject to expulsion if they are found guilty of practices showing them "unfit" for senatorial roles.

The subcommittee's hearing disclosed that Sen. Joseph R. McCarthy (R-Wis.) played a prominent part in Butler's campaign. McCarthy's office supplied material for the tabloid used against Butler's opponent—former Sen. Millard E. Tydings, (D-Md.).

McCarthy promptly accused the subcommittee of "whitewashing" the charges used against Tydings in the Butler campaign. He said the group had in effect found that Tydings was a "good loyal American" in his handling of McCarthy's red-skin government charges last year.

He bitterly assailed the two Republicans on the subcommittee—Sens. Robert C. Hendrickson, (N.J.) and Margaret Chase Smith, (ME.) but added he was not surprised at their actions.
