Reds Make New Charges Against Allies

TOKYO (Saturday) (AP) - A new charge that an American plane had, in fact, collided with a Japanese war balloon, was made today by the Japanese Foreign Ministry, which asked the United Nations to investigate the incident.

The broadcast said that the plane had been shot down by an American gunboat in the China seas and that the crew had been killed.

The Tokyo government said that it had no information about the incident.

The United Nations, which had not been informed of the incident, said that it would investigate.

Parity cloudy and cool today. Sun may show at night. Expect cloudy and cool weather with occasional showers. High, 72; low, 65. High Friday, 70; low, 61.
From Beneath the Sea, Sulpher Comes to Aid Our Defense

By F.L. McKENNON
Central Press Correspondent

Down in the deep Delta country the French sulphur producers are beginning an extensive operation to drill for a low sulphur supply. This means they are continuing history because they will be the first to tap an under-water site.

Half of their new Bay St. Louis location is marshy coastline and the other half lies below the waters of the Gulf of Mexico.

Anyone who has smelled sulphur can imagine what the yellow powder for a tonic may wonder why so much of it is used to make jewelry. The stuff, Ypsilanti, has been struggling for 4,000 years to maintain a substantial supply.

Brinisi, literally burning snow, as sulphur was called in earlier days, was in demand 2,000 years before Christianity for use by pagan priests in ceremonies. Its bright flame and pentant odors made it popular in Colonial times and even in our days practical uses were found for sulphur. It is used in bleaching linen and cotton. Sulphur compounds were used in Egypt in mummy paintings.

When Cleopatra returned home after her well-publicized voyage and killed her husband through his wife's affections, he burned sulphur to impress his neighbors. It tells us. The Chinese made gun powder during the time of Confucius, using 15% sulphur in it. It is still an important ingredient in explosives. In the first century A.D., the Romans listed medicinal uses for sulphur.

Throughout its early history, sulphur was a precious commodity. In the olden days of the volcano areas or near hot springs. Wherever a deposit was located it was scooped out until the supply was exhausted. Sicily became the greatest producer in the 14th century and maintained this distinction for years. In 1739 a process for the manufacture of sulphuric acid was invented and the sulphur production of Sicily ceased.

Sulphuric acid is the prime ingredient in gunpowder, matches and bleaches. Since people of the 18th century were beginning to read and like their clothes somewhat whiter than blackberries, sulphuric acid became one of the prime items of commerce. To increase the demand for the acid, the Aragonese gained control of the Sicilian sulphur deposits in 1780 and fixed the price of sulphur from $25 to $75 per ton. Europe in modern inflation this would be quite a jump.

At that time many countries were unable to pay such a charge. In 1869 large sulphur deposits were located in Louisiana but because they were buried under quicksand and deadly brownish sulphide gases, old methods of mining were impractical.

Dr. Herman Frasch in 1890 devised a method of using a stream of hot water to bring sulphur to the surface. His plan was delayed and people laughed publicly, saying he was trying to net oil from the sea. However, after great difficulty, in 1894 he pumped the first yellow flow of liquid sulphur from the Louisiana sources, today small mountains of sparkling clean sulphur are above ground testifying to the practicability of his "wild" idea.

The public that sneered at Frasch's plan would be amazed by the present plans to go down below sea to mine sulphur.

The entire setup will have to be built 75 miles distant and floated to the Bay St. Elaine site on barges. There it will be put into operation and the liquid sulphur cooled again on barges to dry land where it will be solidified and put into usable form.

Such efforts are worthwhile at this time. Although the sulphur industry has kept our supply in good order since 1900, the present war emergency is making ever increasing demands. Oil refineries would be crippled without the mineral. It is of major importance in ammunition production. The old brimstone is the material that changed rubber from a jungle curiosity into a basic ingredient for civilization on wheels.

One of the amazing factors in the sulphur industry is the contrast between expensive equipment and the low cost of the basic material. The Frasch mining method requires precision machinery which entails a tremendous outlay of capital, yet sulphur won sells for only $22 per ton. This contract is due chiefly to the efficiency of the industry and the tremendous market for sulphur. Millions of tons a year are mined and sold in this country class. Sulphur is one of the few remaining supplies not subsidized in any way by the federal government.

And in domestic uses, it is vitally needed. Soap, sugar, dyes and paints are produced in large quantities only if sulphur is available. Even the paper and Tpa with which we write are dependent on sulphur derivatives. Almost every product we use comes into contact directly or indirectly with sulphur acid.

Sulphathallium, sulphathiazole and the other sulphur based are important products which owe their origin from sulphur.

If you like a tonic your grand mother tried, using mining sulphur and molasses. Old-timers say it "tastes the blood."
John McElroy Weds Miss Evelyn Brown In Cleveland, Ohio

Mrs. John McElroy

The wedding of Miss Evelyn Brown, daughter of Mr. and Mrs. Phillip Brown of Cleveland, O., and John E. McElroy, son of Mrs. Anna McElroy of Kent, Cleveland, O., took place Aug. 18 in Christ the King church in Cleveland.

The bride, John Johnson performed the double ring service.

Miss Elizabeth Nagey, Cleveland, was maid of honor. William J. Brennan of East Cleveland served as best man.

Following a reception at Owen's Plantation the couple left on a wedding trip to the Adirondack Mountains.

The bride is a graduate of Colerain high school and Floral Mound mother's college, where she was a member of Sigma Omega, social sorority. Both schools are in Cleveland.

The background was graduated from Emmerich high school in Cincinnati and has been employed in the sales promotion of the General Electric company.

The couple is living in Euclid, Ohio.

TODAY'S MENU

Chicken with Dampings
Pork Chops

Fresh Grape Tart Vegetable

Juicy pear tart: ¼ quart Concord grapes (after grapes have been taken off bough, ¾ cup water, ½ cup sugar, 1 heaping tsp. cinnamon, 3 drops vanilla, dash of salt, 2 tablespoon flour, lemon juice, 1 teaspoon butter. Bake 35 minutes @ 350 degrees.

Method: Wash and drain measured grapes; put in suacerpan and cook down, stirring in sugar, water, and spices. Cook down to a syrup; strain and add flour and lemon juice. Bake in buttered, whipped cream.

This little girl seems mighty blessed to hang her dress away so nicely in the new wardrobe which was designed by the young- sters by Chicagoan Henry F. Glass. The two almost hid and two drop dresses, all made of dark green chiffon, are swung in or out by her touch. The wardrobe, as well as matching pieces in a coordinated line of juvenile prints, are marked in bright, contrasting colors. Glass has also designed a desk, key chest, table and stools, a bench which can double as a low sofa for the two seats, and a bed and flexible bookcases. The same double principle that appears in the pieces that are carried is out in the table and stools ensemble. Each of the four sections serves as a leg of the rounded table-shaped sofa also is one of the "Leg-of-Three-stool" style.

4 SUV Engineers Win Cash Awards In Welding Contest

Four SUV engineering students have won awards in the engineering undergraduate award and scholarship program sponsored by Lincoln Arc Welding foundation of Cleveland, Ohio.

They are among 60 students in 24 engineering schools who have won the awards for designs on welding, fabrication, research or welding knowledge of machines or structures in which welding is used.

David C. Dineen and John E. Whiting, civil engineering students, were given $115.50 for their paper on "A Design for an Air Welded, Multi-Purpose High Pressure Frame Building." They were sponsored by the American Institute of Civil Engineers.

One of the judges said that the design was unusually complete and that the students had demonstrated a thorough knowledge of the subject.

Fireman Unable to Act Watch Tower Burn

Fire destroyed a house trailer at the Forest View trailer camp, North Liberty, Friday. It was the first trailer fire in the city limits.

The trailer was owned by J. G. Cortinitz, who was not on the premises.

Firemen were unable to save the trailer because there was no water supply on the street.

Missigj紧迫Sent Man Found by Air Force In Wilderness

WINNINIAN, S.D.—Two American fishermen missing in northern Minnesota for the past six days were found alive Monday morning.

The two men were found by an Air Force search plane which had been sent out to search for them.

The men were found on a lake in the Boundary Waters area of Minnesota.

They had been missing since Sept. 2.

The search plane was returned to the base after the men were found.

150 Newspapers And All of Them About MacArthur

Arrives to Sign Treaty

AN ESTIMATED $780,000 seven-alarm fire destroyed two lumber yards and four buildings in North Philadelphia at the peak of the evening traffic rush hour. Thirty firemen were overcome battling the blaze which tied up all homecoming traffic.

JIMMY GALLINS, Newport News, Va., restauranteur man, displayed a novel collection of headlines proclaiming MacArthur's return to the U.S. and receptions in various cities. Gallins wrote newspapers for the collection, consisting of 150 papers from all 48 states and Hawaii. He hopes to present a photographic copy of the collection to Gen. MacArthur when the general arrives in Norfolk in the fall.

1st Polio Prevention
Experiment to be Conducted in Utah

PROVO, Utah (AP).- The first
experiment to prevent
myelitis paralysis in humans,
through inoculation with gamma globulin, will begin
Tuesday.

The National Foundation for In-
fantile Paralyztes announced
Thursday that Dr. R. K. Hammon,
leave from Univer-
sity of Minnesota for
the experiment.

Children in the age group of
three to eight years will be used
in the test, which will be con-
ducted actively through Sept. 8.

The foundation says it hopes to
try out the usefulness of gamma globulin, a blood product,
the 12,500 children in the age
group in Utah county.

Foundation officials said this
blood fraction, a part of human
blood, contains a large amount of anti-bodies, has proved
successful in preventing paralysis in
mucloes suffering from the
crippling disease.

Gamma globulin is extracted from
blood donated to the Red
Cross. It is not expected to be
a cure or prevent.

The foundation hopes only to gain
successful results in
paralysis in those who contract
disease.

Utah county was chosen for the
best site because it is in the midst
of a polio epidemic. The founda-
tion says an epidemic exists when
20 and 10,000 persons in a com-

nity have the disease. The county
has reported 20 cases this year in
a population of 8,192.
If Facial Expressions Won Tennis Matches...  

The only all-American returning for the men's singles competition at the 1930 U.S. National Championships was Clay Ford, whose chances of winning are rated 25 to 1. The others are considered to be in the class of good but not very strong competitors. Ford is the American record holder in the singles game and also the winner of the 1929 tournament. The only American player to have won a match against a foreigner in the quarter-finals of the 1929 championships was Elmer Smith. However, Smith was defeated in the semi-finals by Bill Tilden, the American champion.

The group includes 26 seniors and 7 juniors. Among the juniors are the best-known players and those who are expected to do well in the tournament. The seniors include many who have played at the highest level for several years and have gained a great deal of experience.

The American entry is not as strong as last year, but there are some strong players among the seniors. The chances of winning the championship are rated as follows:

- Clay Ford: 25 to 1
- Bill Tilden: 6 to 1
- Rod Laver: 5 to 1
- Jimmy Connors: 8 to 1
- Ken Rosewall: 9 to 1
- Lew Hoad: 10 to 1
- Tony Trabert: 20 to 1
- Pancho Gonzales: 25 to 1
- Pancho Segura: 50 to 1
- Althea Gibson: 100 to 1

The players are listed in order of their chances of winning the championship. The tournament is scheduled to begin on September 15th and will last approximately two weeks.

**Additional Information**

- Clay Ford is the defending champion of the Men's Singles event at the 1929 U.S. National Championships.
- Bill Tilden is the reigning champion of the Men's Doubles event at the 1928 U.S. National Championships.
- Rod Laver is a former world No. 1 player and has won multiple Grand Slam titles.
- Ken Rosewall is a former world No. 1 player and has won multiple Grand Slam titles.
- Lew Hoad is a former world No. 1 player and has won multiple Grand Slam titles.
- Tony Trabert is a former world No. 1 player and has won multiple Grand Slam titles.
- Pancho Gonzales is a former world No. 1 player and has won multiple Grand Slam titles.
- Pancho Segura is a former world No. 1 player and has won multiple Grand Slam titles.
- Althea Gibson is a former world No. 1 player and has won multiple Grand Slam titles.
- Andy Roddick is a former world No. 1 player and has won multiple Grand Slam titles.
- John McEnroe is a former world No. 1 player and has won multiple Grand Slam titles.
- Pete Sampras is a former world No. 1 player and has won multiple Grand Slam titles.
- Roger Federer is a former world No. 1 player and has won multiple Grand Slam titles.
- Rafael Nadal is a former world No. 1 player and has won multiple Grand Slam titles.
- Novak Djokovic is a former world No. 1 player and has won multiple Grand Slam titles.
- Serena Williams is a former world No. 1 player and has won multiple Grand Slam titles.
- Maria Sharapova is a former world No. 1 player and has won multiple Grand Slam titles.

- Serena Williams is a former world No. 1 player and has won multiple Grand Slam titles.
- Maria Sharapova is a former world No. 1 player and has won multiple Grand Slam titles.
Charges Filed Against French Baker, Miller

As a result of an investigation conducted by federal officials, a French-Canadian woman has been charged with stealing a loaf of bread from a store.

"It's a serious offense," said a police officer at the scene. "We take bread theft very seriously around here."

The woman, who was identified as Yvonne Georgiana Biritz, is accused of removing a loaf of bread from a store and leaving without paying. She was arrested and taken to the police station for booking.

Biritz, 25, said she was "just too hungry." She added, "I didn't mean to do it. It's not like I do this kind of thing."

The incident occurred at a popular bakery on Main Street. According to witnesses, Biritz was seen taking the loaf of bread and leaving without paying.

"I saw her just grab the bread and walk out," said one witness. "I thought it was wrong and I called the police."}

Political Post Turned Down By Trooper Son

Buenos Aires (AP) - Mrs. Eva Peron, wife of President Juan D. Peron, declined to run for vice president in the Nov. 11 presidential election.

She made the announcement over a nationwide radio hook-up.

"Britta, as her admirers call her, said her decision was irrevocable and that she arrived at it of her own free will."

She was offered the nomination at a huge Labor Day rally Aug. 23, by the government-sponsored general federation of labor. After the rally, the Peronist party's high council announced her nomination, together with that of President Juan D. Peron for a second term.

The Peronist party national council accepted Evtia's refusal and nominated Horstman Quixote as Peron's running mate.

Mrs. Peron's decision had been the people's-the people who under- stand him and love him."}

Mom Jumps Not to Be Outdone By Trooper Son

Concord, Calif. (AP) - Mrs. Edith Soder, a striking 37-year-old housewife, never had made a parachute jump. But Thursday she watched her 21-year-old paramilitary son, Melvin, make a 3,000-foot leap from a place over Buchanan field.

"I can't do it," she said. "I'm too scared."

Melvin jumped to test the wind over the field.

Then his mother climbed into a plane. She expressed some anxiety and said to pilot Warren Bogert, "Please push me out the first time you cross the field."

But after circling once, her cour-age returned and she stepped from the plane.

Property owner Soder and his younger brother, Gene, 14, watched their mother's descent through binoculars, beaming with confidence with some high voltage wires.

Truman Signs Money Measure For U.S. Agencies

Washington (AP) - President Truman Friday signed the $6,162,451,750 bill, which contains the 1951 defense appropriation bill, completing the last major step in the $300,000,000,000 appropriation bills, including $12,000,000,000 for construction.

"I think this is a good bill," said President Truman. "It will help us build a stronger defense."
