Villains and Heroes in Business

"Mass production apparently makes even stronger fellows in politics than politicians."

By DONALD MALCOLM

The Daily Iowan

In the Daily Iowan of July 11, 1944, wrote, "I am not a politician, but I have been a student of politics for many years."

In this issue, we will discuss the role of villains and heroes in business with regard to the fact that mass production can make people even more powerful than politicians.

Hard Work Pays Off

Iowa received further recognition this week as a leader among the states in employment of scientific research workers. According to a recent study, Iowa has surpassed several other states in the number of employed scientific research workers, thereby earning recognition for its commitment to supporting scientific research.

UCLA Wants Athletic Revision

LOS ANGELES—Chancellor Raymond A. Allen of UCLA and three other Pacific Coast Conference presidents and a university athletic director have submitted to the NCAA a revised plan of intercollegiate athletics which they said satisfies the requirements of the athletic code which he voted to "resign en masse."

We Allen made his appeal in a letter to NCAA President Paul D. Fearn, president of the University of California, Los Angeles, and a joint letter from UCLA, Stanford, and the University of Southern California, which was signed by University of Southern California athletic director Bob Bowden, who returned Wednesday night from Washington, D.C., where he was polling the presidents of the major universities and other influential persons in Los Angeles and San Francisco concerning the conference's response to President Fearn's request.

Dr. Allen makes what is widely regarded as a virtual guarantee: "It's my great concern about the future of the Big Ten that if the conference and the NFL enter into a pact, if that pact is anything but 100% on the money, it is going to be over the head, without regard for the names or the revenues."

The letter was addressed to the members of the conference, including the three who had signed the joint letter with Allen to Bowden, as well as to the five other conference presidents. The letter was sent to them in response to a request from President Fearn.

The letter also states that the conference has "satisfied all the requirements of the major universities and other influential persons in Los Angeles and San Francisco concerning the conference's response to President Fearn's request."
**Wreck West of Iowa City**
