Life Expectancy of Satellite Rallied to Possible 6 Months

Scientists fear that the satellite, which was launched last week, will not survive for more than six months. The satellite was launched to study the effects of cosmic radiation on Earth's atmosphere. Scientists believe that the satellite will be exposed to high levels of radiation, which could cause it to fail prematurely. The satellite was launched from Cape Canaveral, Florida, and is scheduled to orbit Earth for approximately six months. If successful, the satellite will provide valuable data on the effects of cosmic radiation on Earth's atmosphere. The satellite will be monitored by scientists from around the world, who will use the data to improve our understanding of Earth's atmosphere.

The Daily Iowan

The latest attempt by the Iowa Safety Dep-artment to control drivers and habitual delin-quent drivers off Iowa's roads is commendable in its own right, but it is not without its problems. And, as the old saw goes, it's the car that gets the run, not the people behind the wheel.

The Safety Department, presumably the same people who are attempting to cut the crime rate in Iowa's towns to a minimum, has to be lauded for taking the first step. In a move to effect a big shift in the mental approach to traffic violations, Iowa's towns have taken a lead.

The plan is to go into effect April 1.

Under the new plan, any driver who偶尔 poil points will automatically have their license revoked. Fines will be based on the seriousness of the offense ranging from $5 (sometimes probation) for such things as driving while intoxicated, to $75 for relatively minor offenses like failing to stop for a school bus. A year of driving without of- fenses would result in the reduction of five points from the driver's point total.

All actions taken will be positive.

Thus the highway situation will continue until the number of bad drivers is reduced. "Bad drivers" will only be discovered through

Prejudicial Stones

"Many ethnic and racial groups today seem to be super-sensitive about their group. We must find out why this never seems to be a problem in the dominant group." A study by Dr. John V. Wilson of the University of Iowa.

The charge has finally been made by San Francisco Mayor George Christopher, a Tur-kean candidate for the California, that his Greek ancestry was a matter how innocently a remark is made, the remark or a story before labeling the person, who has the manual dexterity but not the emotional maturity necessary for safe driving.

Driving is a privilege, not a right. It should be treated that way.

By ANDREW EYSTER

The University's Department of Communications and Information Services announced that the "Service to the Community" program is now in effect.

The program, which began on September 1st, is designed to provide a greater understanding of the community's needs and to promote the university's role in meeting those needs.

The program will be conducted by the university's personnel and will cover a variety of topics, including community service, public relations, and media relations.

College Foundation will open a new store in the University Mall. The store will carry a wide variety of products, including clothing, books, and office supplies. The store will be open Monday through Friday from 8:00 a.m. to 5:00 p.m., and on Saturday from 9:00 a.m. to 1:00 p.m.

Engel's Bridge Angles

By Michael Engel

The regulation adds another layer of control to the University's Student Parking Regulations, which already include the "point system." The new regulation will result in the suspension of driving privileges for a number of offenses.

Hawkeye Champions Could Finish in Top Five

BY DAK KUSTER

Bret Morris

It will be the last big swimming event for Iowa's athletes in 1961, and the last big team meet for Iowa's athletes in 1961, and the last big swimming event for Iowa's athletes in 1961. At the Fillmore meet today and shortly thereafter, the Iowa Hawkeyes will compete for the NCAA championship in the men's swimming and diving division.

In the past, the Fillmore meet has been a key event for Iowa's swimming and diving teams. The meet is held in honor of the late Fillmore College graduate, John Fillmore, who was an outstanding swimmer in his own right.

The meet features some of the best teams in the country, including Iowa, Ohio State, Michigan, and Stanford. These teams will compete in various events such as the 200-yard freestyle, 400-yard medley relay, and 800-yard freestyle.

Last year, Iowa finished fourth at the meet, but this year, the Hawkeyes have high expectations. With several talented swimmers and divers on their roster, Iowa is looking to improve on last year's performance.

One of the key events at the meet will be the 100-yard backstroke, where Iowa's Bret Morris is expected to compete. Morris is a three-time All-American and the 1961 Big Ten champion in the 100-yard backstroke.

In addition to Morris, Iowa has several other strong performers, including Tom Halford, John Tim, and Earl Ellis. These athletes will be key to Iowa's success at the meet.

The meet will be held in Fillmore, New York, and is expected to draw a large crowd of fans. The meet is a great opportunity for Iowa's athletes to showcase their talents and compete against some of the best teams in the country.
Kinsey Report Says Modern Women Have Less Abortions

NEW YORK (AP) — Married women, particularly those married before they turn 30, have had the abortion rate decline for the second straight year, the Kinsey Institute said Thursday.

The report, based on interviews with 10,000 women in the United States, found that the abortion rate among married women declined from 19.4 per 1,000 women in 1968 to 15.9 per 1,000 in 1970. The rate among unmarried women was 8.4 per 1,000 in 1970, down from 10.6 per 1,000 in 1968.

The report also said that the rate of abortion among unmarried women who had a pregnancy resulting in a birth was 5.8 per 1,000 in 1970, down from 7.2 per 1,000 in 1968.

The Kinsey institute, directed by Dr. William H. Masters, is a research center at Indiana University. The report is based on interviews with 10,000 women in the United States, conducted between 1967 and 1968.

The report also notes that the rate of abortion among married women who had a pregnancy resulting in a birth was 5.8 per 1,000 in 1970, down from 7.2 per 1,000 in 1968.

Audio-Visual Workshop Opens Today

The spring workshop meeting of the audio-visual educators association of Iowa will open at 7:30 a.m. at the hotel.

The Kinsey institute, directed by Dr. William H. Masters, is a research center at Indiana University. The report is based on interviews with 10,000 women in the United States, conducted between 1967 and 1968.

The report also notes that the rate of abortion among married women who had a pregnancy resulting in a birth was 5.8 per 1,000 in 1970, down from 7.2 per 1,000 in 1968.

Town Women

Marvin Slater, A.B., Edward King, and Warren Church, all of the Iowa women's for the 1970-71 season.

Other officers are: Pauline Hergenrother, president, Iowa City; and Lucille Cooper, vice-president, and Paul Miller, A.I., Iowa City, secretary.

The board also elected a new board of directors for the 1970-71 season, including a new director of the Monticello Branch.
