On New Hawkeye Apartments

Firm To Analyze Iowa City Planning

By TOM MAINE
Staff Writer

Studies of Iowa City's population, economy, zoning and schools as well as a street plan are among the proposals listed in a contract the city has signed with a St. Louis, Mo., planning and zoning firm.

Representatives of the firm, Harland Bartholomew and Associates, estimate the project will take about 18 months to complete and will be started soon. The cost to Iowa City will be \$23,500.

To carry out the population study, the firm will estimate the future population increase by analyzing Iowa City's past growth and comparing this with other communities which were in the same condition 20 or 30 years ago.

Estimate Growth

The estimate of Iowa City's growth will be related to national and state population growth and to the increase in SUI enrollment.

Statistics from the U.S. Census and from the Employment Service will be used to study the economic condition of the city. No new survey is provided in the contract.

Results of the economic study will show the number employed in each major type of activity such as education, retail trade, wholesale trade and manufacturing.

Economic Factors

Factors including the tax rate, the financial structure of the city, transportation, power, climate and water supply will be analyzed since

they influence the economy of Iowa City.

An analysis of present zoning regulations will be made and a comprehensive revision of these regulations will be presented by the firm.

A questionnaire will be sent to administrators of the local schools to determine the adequacy of present school facilities and to predict the probable future enrollment.

Traffic Counts

Traffic counts will be made on all major streets. These counts will be combined with information already obtained from a state highway survey, a survey by the Federal Bureau of Roads, and a street traffic plan conducted by another firm.

The completed street plan will consist of maps, flow diagrams, and suggested changes.

New surveys will be made on the parking problem in Iowa City. A five-year program of parking improvement will be recommended.

Other conditions to be studied are housing, public buildings and administration of the plan. Bartholomew and Associates will suggest a five-year capital expenditures program to finance the changes recommended in the study.

Molotov in Moscow, But Not at Reception

MOSCOW (AP) — V. M. Molotov, Soviet ambassador to Outer Mongolia, is in Moscow.

The former Soviet foreign minister, sent to the remote post after he was ousted a little over a year ago from the Communist party leadership, has been seen here by Western newsmen.

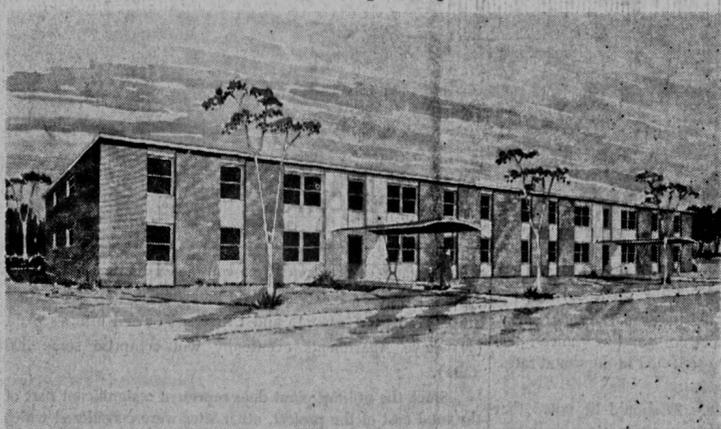

Diplomats noted however, that he was absent from a reception Wednesday night at the Mongolian Embassy for delegations engaged in Soviet-Mongolian economic talks. This indicates he may not be participating in the talks.

DE GAULLE, FANFANI MEET

PARIS (AP) — Premier Amintore Fanfani of Italy arrived by plane Thursday for talks with Premier Charles de Gaulle.

French sources said the French and Italian leaders agreed that the free nations of Europe should consult on questions of major importance for Europe's future and the future of the Middle East.

New Hawkeye Apartments

We Believe . . .

An Editorial

A mock-up of one unit of the proposed Hawkeye Apartment project is now open for inspection by students and faculty (see General Notices). Because this project has been the subject of so much campus controversy, we hope you'll take the time to read the editorial article published in today's Daily Iowan. We have attempted to be fair to everyone involved, to accept certain unverifiable statements on faith, and present a clear and logical picture of the married student housing situation here at SUI as it applies to Hawkeye Apartments.

As you will be aware after reading the article, we feel any valid differences of opinion still remaining must concern only one area; that is, we feel the facts warrant the conclusion that the current plans for the project result in the lowest possible rents; and the only pertinent question, then, is "Should any units at all be built?"

To answer this we must consider four main points: future enrollment, both married and single students; availability of private housing; students' financial capabilities; and obligations of the University.

It is apparent that the first three areas concern estimates — or if you will, educated guesses. No one can say with certainty what the enrollment will be a few years from now, or what the average student's income will be; the best that can be done is to analyze, interpret and project trends. If the enrollment figures for the next ten years are reasonably close to the University's calculations, it is almost certain that Iowa City will not be able to absorb the influx of students and provide suitable housing.

The fourth area, the obligations of the University, also are somewhat nebulous and formulated on implied but undefined principles. From discussions with University officials, we have found a feeling that it would be morally inexcusable to recognize a need for future housing and yet do nothing to provide such housing.

Because of this, the University anticipates that within the next ten years, the Hawkeye project will be enlarged to comprise 500 units, and at least one — more probably two — additional single students' dormitories approximately the size of Burge Hall will be built.

If, after examining the facts, you are convinced as we are that there is a need for more housing and that current plans will result in the lowest cost to the students, then you must accept the inevitable, as we have.

We recognize a present and future need for housing; we think such construction will increase married students' rents more than is desirable; yet we feel necessity dictates that such housing must be forthcoming — even if it must rent for \$85 per month plus electricity.

Nationalists, MIGs Clash at Quemoy

TAIPEI, Formosa (AP) — Amid a drumbeat of war warnings, Formosa authorities announced that Nationalist planes clashed Thursday with Communist MIGs near Quemoy Island.

Air force headquarters said more than 10 of the fast, late model Soviet jets had jumped two formation of Nationalist planes on patrol over Formosa Strait, then streaked westward toward the mainland when the Nationalists fired back.

The announcement said the Nationalist planes returned unscathed to Formosan bases.

Peiping radio confirmed the clash. It said two waves of Nationalist planes flew over the Red China coastal area of Fukien province. Communist pilots drove them off, it said, damaging one plane.

U.N. Strategy Charted By Ike, Dulles

WASHINGTON (AP) — President Eisenhower met with Secretary of State Dulles Thursday to chart new strategy for countering expected Soviet denunciation at an emergency United Nations General Assembly meeting.

Within minutes after Dulles had returned from a flying visit to Brazil, he conferred with Eisenhower as part of a broad review of Middle East policy.

The White House gave no details about their 30-minute meeting, but Press Secretary James C. Hagerty said it had covered topics in addition to Dulles' three-day Brazilian visit.

Arriving at the airport, Dulles assailed what he called the erratic course followed by Soviet Premier Khrushchev in first accepting, then rejecting a summit conference with Eisenhower.

"First he's on again, then off again Finnegans," Dulles said.

The secretary brushed aside queries about whether he and Eisenhower would attend the U.N. meeting. Eisenhower is reported seriously considering an appearance to outline an approach to easing Middle East tensions.

Security Council Compromise Calls for Emergency Meeting Of General Assembly Today

UNITED NATIONS, N.Y. (AP) — The U.N. General Assembly was summoned to meet Friday afternoon in emergency session on the Middle East. Secretary General Dag Hammarskjold issued the call Thursday night shortly after the Security Council agreed unanimously in a last-minute compromise to call for a full meeting of the 81-nation Assembly.

He set the opening meeting for 6 p.m. (Iowa time). It is expected to be limited to organizational details.

The United States declared it wants the Assembly to deal with broad and fundamental problems of the Middle East.

Suggests Delay

Sir Pearson Dixon of Britain suggested that formal debate on this and other proposals be delayed until Wednesday in order to give delegates sufficient time to prepare their speeches.

The compromise was reached in a final round of good-natured give-and-take by both sides.

As adopted, the compromise deletes specific reference to the Lebanese and Jordanian problems, and simply calls for an emergency meeting of the Assembly.

The resolution, originally sponsored by the United States, was changed to include suggestions offered by Panama, the Soviet Union and Britain.

Drops Resolution

The Soviet Union dropped its own resolution calling on the Assembly to consider immediate withdrawal of U.S. troops from Lebanon and British forces from Jordan.

Ambassador Henry Cabot Lodge made clear the United States wants the Assembly to go far beyond stop-gap measures in order to stabilize the Middle East.

Lodge spoke after Soviet Delegate Arkady A. Sobolev accused the United States and Britain of wrecking a summit conference on the Middle East, and risking a war by sending troops to Lebanon and Jordan.

Informants have already said the United States is shaping up a broad political and economic pro-

gram aimed at stabilizing the Middle East. It envisages a key role for the United Nations in such a program.

No Stopgaps

Lodge did not give any details, but declared: "We believe that the General Assembly will want to deal constructively with the fundamental and broad problems involved, and not be satisfied with mere stopgaps."

"The calling of the General Assembly by the Security Council as the United States has requested will make this possible."

In a hard-hitting speech Lodge said Sobolev had made his usual "completely falsified" account of events, both in the Security Council and the Middle East.

He said the Soviet Union had made a complete somersault on holding a summit conference on the Middle East.

Conferred With Mao

He also noted this came after Khrushchev's trip to Red China to confer with Mao Tze-tung, the Red Chinese Communist leader.

"Mr. Khrushchev made his trip to Peking, and after it changed his mind," Lodge asserted. "Future historians may someday know why."

He said the changes made in the Soviet resolution does not alter the fact that the Soviet Union has "never been truly interested in the withdrawal of U.S. troops from Lebanon."

He said the true Soviet aim is to prevent the United States from maintaining the independence and integrity of small nations.

Fifteen Dead As Tankers Collide, Burn

NEWPORT, R.I. (AP) — Two tankers, groping through an early morning fog, collided and caught fire Thursday at the mouth of Newport Harbor.

At least 15 lives were lost. Three others were still missing, however, according to a crew list issued by the Gulf Oil Co. The Coast Guard said they may have signed on but never boarded the craft.

Thirty-five crewmen — many with flesh seared by gasoline-fueled flames — and a harbor pilot were hospitalized.

The Coast Guard called off the search in midafternoon figuring all hands had been accounted for.

The vessels were the Gulfoil, 10,340 tons, which was outward bound, empty, from Providence; and the S. E. Graham, a 250-foot motor tanker, inbound to Providence with 650,000 gallons of gasoline.

Frank Powell, 42, of Matthews, Va., who was at the wheel of the S. E. Graham, said the Gulfoil, heading for Port Arthur, Tex., struck his ship on the port bow, just aft of the forecastle.

Flames broke out almost instantly. Gasoline spewed out on the calm, fog-shrouded waters and blazed furiously.

"We couldn't see the other ship until she was right upon us," said Seaman Alfred Pelletier, 43, of Lewiston, Maine, aboard the Gulfoil.

He jumped overboard when he saw the flames.

Both tankers were beached quickly. Scores of small craft searched the waters for survivors.

The Graham later was pulled off the southern tip of Rose Island into open water. Then several Navy fire-fighting tugs, impervious to the danger of a possible explosion, nosed their prows into the Graham's starboard side and played hoses on the flaming and charred craft.

Flames leaped high in the sky and sent black puffs of smoke toward land. That was about all spectators, who lined the shore could see.

As the fog lifted, five helicopters circled to locate missing crewmen.

Cool, Man

A MAN HAS GOTTA keep cool. About every third barracks at Finkbine Park, Thursday, had a plastic wading pool in the yard. As the mercury pushed into the 90's for the fourth day, the Finkbine kids and SUI students alike, spent most of their time trying to keep cool.

Joe Michel, daughter of Mr. and Mrs. James Michel, 309 Finkbine Park, solved the problem with a bucket. His sister, Nancy, decided Joe was really all well and spent most of her time sailing boats.

—Daily Iowan Photo by Robert Malow

Weather

Start manufacturing those ice cubes — by noon today the mercury may hit 100. The weatherman promises today will be hot and humid but by tonight, scattered showers may stir up a breeze or two. Further outlook for Saturday calls for partly cloudy skies and high thermometer readings.

Heavy Winds, Hail Lash Southeast Iowa

A heavy wind and hail storm with gusts up to 80 miles an hour lashed a Mississippi River area in southeast Iowa and northwest Illinois yesterday afternoon and evening.

Winds up to 80 mph were reported at Argyle in Lee County. A number of trees were uprooted in that small town but no homes were affected.

The storm extended from Quincy, Ill., north to DeWitt in the Davernport area. The Weather Bureau said clusters of hail measuring up to four inches in diameter were reported at De Witt.

Winds of 50 miles an hour and more were reported throughout the area, including Ottumwa and Bloomfield.

Hot, humid weather prevailed over Iowa Thursday with varied temperatures. High readings ranged from 86 at Waterloo and Burlington to 96 at Sioux City. Forecasts indicated that temperatures Friday may reach near 100 degree mark.

Kierdorf Fatally Burned In Arson Try: Officials

PONTIAC, Mich. (AP) — Death sealed the lips of Teamster Union business agent Frank Kierdorf Thursday only a few hours after Michigan officials charged he became a human torch while trying to set a Flint dry cleaning shop on fire.

Kierdorf, who was horribly burned over 85 per cent of his body, maintained in his only statement to police that he was abducted by two unidentified men who tossed some fluid on him and set it afire.

The intensive police search for the alleged assailants slowed as investigation uncovered many discrepancies in Kierdorf's account.

Caught in Fire

Michigan Atty. Gen. Paul L. Adams, who headed the many police agencies probing the burning, said Thursday that he was convinced Kierdorf, instead of being the victim of a plot, actually was caught in a fire he himself had helped start.

Adams said he also believed that Herman Kierdorf, 68, Frank's missing uncle and a recently resigned official of the Teamsters Union, was "in on the deal."

Authorities questioned Frank Kierdorf many times in efforts to shake his story but he stubbornly refused any further statements. He lapsed into a coma Thursday and died shortly after noon.

Died Without Talking

Just moments before he died, the 56-year-old Teamsters official raised his right hand above the hospital bed sheets as if he wanted to say something. But the arm slumped back and he died minutes later.

Even as Kierdorf lay dying, Adams and other officials continued to rip apart his story of being set ablaze by two strangers.

With Frank's death, the hunt for his missing uncle was stepped up as Adams expressed confidence that the uncle could provide many answers as to what happened early Monday.

The first break came in Frank's story, Adams said, when a witness told of seeing two men race from a blazing dry cleaning shop Sunday night at nearby Flint.

Closely Guarded

Adams said the witness was closely guarded in protective custody. He refused to identify the man, saying only he was from Port Huron, 67 miles east of Flint.

The witness told Adams he heard the wailing cries of someone trapped inside the inferno shortly after seeing flames shoot up to the tree tops in an explosion.

Adams said at an afternoon news conference that police may have located the get-away car from the Flint blaze and the man who drove it.

Owned By Local

The car is one Adams said Herman Kierdorf had sold Monday to a used car dealer for \$1,700 before he disappeared. The title was in the name of a Detroit Teamsters local. Adams said it was signed over by the local vice president enabling Herman to collect the money.

Held in protective custody was Donald Edward Keller, 34, of Detroit, who Adams said had driven Herman Kierdorf to the car lot where the automobile was sold.

Keller denied being at the scene of the fire.

OLDE ENGLISH CUSTOM

LONDON (AP) — You can get into legal trouble here by whistling like a wolf. Magistrate Geoffrey Rose found Edward P. Bengtson, 20, guilty of a charge of insulting behavior for whistling at a girl walking with a boy friend and fined him 10 shillings — \$1.40.

Macmillan Still Favors Summit Meet

LONDON (AP) — Prime Minister Macmillan told Nikita Khrushchev Friday he is still anxious to take part in a summit conference to end the East-West cold war.

In a 350-word note to the Soviet Premier, Macmillan also left open the door for summit talks with Russia on the Mideast.

The British leader was replying to Khrushchev's message Tuesday rejecting American-British proposals for a summit-level session of the U.N. Security Council.

Khrushchev Does About-Face

Instead Khrushchev, shifting his position after a four-day conference in Peiping with Red China's Mao Tze-tung, called for a special meeting of the U.N. General Assembly to tackle the Middle East crisis.

Macmillan rapped Khrushchev for turning his back on the British-American suggestion for a meeting of government chiefs in the Security Council.

He expressed regret that the Soviet Premier had so acted after notifying Western leaders July 23 he was in fact ready to take part in such a conference.

Favors Session

Of Khrushchev's latest proposal Macmillan wrote: "A special session of the General Assembly would be acceptable to Her Majesty's government."

"I do, however, still think that more progress could have been made on Middle East questions by a meeting of the Security Council, especially one where the heads of government could negotiate as well as debate."

He then turned to what he called "the summit meeting of the large character" which has been a subject of East-West discussion since last January. The purpose of this would be to seek an end to the main causes of world tension.

Henry Cabot Lodge Urges Session

Propose Teen-age Driving Awards To Cut Accidents

A system of awards to cut down automobile accidents by teen-agers has been proposed by the Iowa City School Study Council.

Colored decals and wallet cards will be given to students who have driven six months without an accident if Iowa City student councils and school principals approve the plan.

The awards have been approved by the City Council and the School Board, Mrs. R. T. Herdlika, chairman of the committee in charge of the project, said Thursday.

She pointed out that now the success of the program depends mainly on the students.

Phoebe Welt, 16, daughter Mr. and Mrs. Dale Welt and president of the Iowa City High School student council, said, "If the plan is presented properly, I am sure the students would go for it."

The state highway patrolmen and the Iowa City police approve the plan wholeheartedly, Mrs. Herdlika said. The award system is being used effectively in Highland Park, Ill., she said.

The Story Behind Hawkeye Apartments

Study Shows Project Based on Students' Needs

By JIM DAVIES
Editor

(Editor's note: This is the first of a two-part article on the Hawkeye Apartment project. The second part, to be published in next Tuesday's Daily Iowan, will be concerned with the method of financing the Hawkeye project, and the system of loan repayments.)

The decision by the State University of Iowa to construct new permanent married student housing units to rent for approximately \$85 per month has been the subject of prolonged discussion and controversy. Letters to the editor, official statements, questions and answers have flooded The Daily Iowan.

To help clarify if we can, and attempt to present the issues in their proper perspective, the staff of this newspaper has consulted with both students and University officials. The result of those talks is this article.

To begin, a thorough and exhaustive (and exhausting) study of the University's plans for Hawkeye Apartments was made, as well as an evaluation of the criticisms levelled against those plans.

Financing and Loans

The two most prevalent issues raised concerned the relatively high rent to be charged, and the method of financing the units and providing for loan repayment.

These two questions break down somewhat as follows:

1. Will the housing satisfy the married students' need or is \$85 per month plus electricity too much for them to pay? Could cheaper housing be constructed which would result in lower rents.

2. Where is the money going which is currently being collected for barracks housing rentals, and what is the recent \$10 per month rent hike being used for; are married students financing single students' housing.

These are the questions for which we sought answers from the University officials involved, including James Jordan, assistant professor and director of University Relations; Ray Mossman, Assistant University Secretary; Ted Rehder, Director of Dining and Dormitory Services; George Horner, Superintendent of Planning and Construction; Virgil Copeland, Manager of Dormitory Operations; Gordon Strayer, editor of News and Information Services.

It has been the contention of some that the University was more interested in making a good investment and providing attractive units (Hawkeye Apartments) than it was in keeping students' rents at the lowest possible level.

The Daily Iowan has commented editorially that the University seemed to be examining alternative housing with the wrong basic philosophy in mind, i.e., a conflict was seen to exist between securing the Ultimate best (in dollar return for dollar invested) and the Relative best (considering the students' means).

No Conflict Seen

After thorough examination and evaluation of the facts, this writer no longer feels this conflict exists. The goal of minimum rentals seems consistent with the present construction plans for Hawkeye Apartments.

To begin: If rents are to be less than the proposed \$85 per month, costs will necessarily have to be reduced. This might be done in a number of ways, but the most obvious method would seem to be to lower the basic outlay for the units themselves. In other words, construct units costing, say \$8,500 instead of the proposed \$10,100.

While this seems a logical step inasmuch as other institutions — namely Iowa State College — currently are doing this very thing, it is not a solution for SU.

The plain and possibly bitter truth is that if this cheaper type of housing were constructed here, the resultant rent per unit would be HIGHER than it is now expected to be.

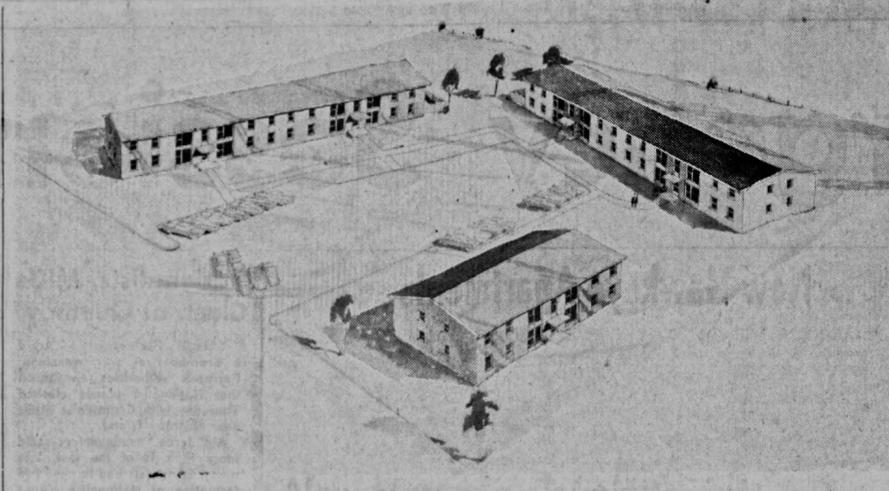

There are a number of reasons for this involving increased insurance rates, maintenance costs and interest rates. The most easily illustrated comparison is the financing costs for various types of housing.

Units such as those Iowa State College is building, for example, can be financed only on a 30-year basis; the proposed Hawkeye Apartments will be financed on a 40-year basis. Assuming the costs of utilities for any SU units to remain constant, the comparative rents would look something like this:

Cost of unit:	\$10,100 (Hawkeye)	\$8,500
Utilities:	3,500	3,500
Total:	\$13,600	\$12,000

Thus it appears that there is an appreciable savings since present plans for Hawkeye Apartments call for an expenditure of \$13,600 per unit, while per unit cost for structures similar to those Ames is building would amount to only \$12,000. But is this actually a savings which will result in lower student rents? No.

The explanation for this is simply a matter of mathematics. The lower figure (\$12,000) must be repaid in 30 years while the higher figure can be stretched out over 40 years. The relative rents would thus be \$28 per month for the more expensive con-

New Housing Development

struction, and \$33 for the more cheaply constructed units. (Cost per unit divided by number of months in loan period.)

The discrepancy probably would be even greater than indicated due to increased maintenance costs and insurance rates. And these higher costs would be reflected in the rental rates.

This Is Cheapest

And this is only one illustration. It should be noted that Ames-type construction was not the only alternative which was considered. House trailers, prefabricated units, barracks-type units also were considered, and cost per unit per year calculated. In all cases the resultant rents would have been higher than is presently anticipated.

House trailers, for instance, could be financed for only ten years, and monthly rentals would have to be substantially more than the \$85 currently proposed for Hawkeye Apartments.

University officials consulted during this study were emphatic in their statements that their primary concern in weighing the relative merit of each type of construction was cost to the student. Their final decision was influenced to a great extent by the estimated monthly rental necessary for each type of unit.

It seems fair to say, then, that the University's basic construction plans for Hawkeye Apartments coincide with students' basic desires — minimum rents.

Problem of Cost

Can costs be lowered in some other way?

Well, it has been suggested that costs could be reduced by eliminating certain features termed non-essential. However, it is the contention of the University that present construction plans call for no rent-raising "non-essential" features. The administrators are highly disturbed that some critics of the Hawkeye project have termed the proposed units "luxury" apartments. In no sense, University spokesmen say, is this true. For the record, then, here are the facts on construction plans:

Basic construction will be of brick on the outside and concrete block, painted, on the inside. The interior partitions will be of solid plaster and the floor will be of concrete joists, with block filler, painted.

What Apartments Contain

Each apartment will consist of two bedrooms, a bathroom, a kitchen-dining room, and a living room. Floor space will be slightly larger than that in the barracks apartments.

Each unit will be furnished with a refrigerator, a cookstove and kitchen cabinets, and each probably will be equipped with a sink-installed garbage disposal unit.

Stoves and refrigerators are considered necessary because most student couples either cannot afford or do not wish to purchase them until they have located more permanently. Too, most "unfurnished" apartments contain these basic conveniences.

The disposals perhaps could be eliminated, but studies to date show this would not result in a savings. While each disposal adds approximately \$40 to the cost per unit, their use will result in lower maintenance costs for waste removal. Thus, while the Dempsey Dumpsters still will be in evidence for such trash as tin cans, the maintenance crews will not find it necessary to make daily trips as they would if there were no disposals. Officials believe the resultant lower maintenance costs will more than offset the \$40 price of the disposals, and thus help keep rents at a minimum.

Cost of Utility Plant

Another factor adding greatly to the cost of the Hawkeye project is the need for a utility plant. There is no possibility that utility service could be provided by existing facilities. This makes construction of a new plant necessary which will cost approximately \$3,500 per unit. This cost is reflected in the proposed rents.

The only way to avoid this initially high cost is to install individual water heaters and heating units, and to have the utility services provided by private power facilities.

From all figures and estimates available, the indications are that the portion of the \$85 rent which is a reflection of the cost of a central utilities plant is less than if individual units were

provided and commercial firms contracted to serve the units. Again, it appears that immediate and long range interests are best served by a separate and University-owned utilities plant (Hawkeye Apartments eventually will comprise some 500 units).

Since the utilities plant does represent a significant part of the total cost of the project, other sites were considered which would eliminate the necessity of plant construction. None were thought to be feasible or consistent with other anticipated University construction plans.

Problem of Site

Many sites closer to town and the campus were rejected as being necessary for future expansion of educational facilities. Others got the thumbs down sign because they are probable future sites of single student housing (which the University feels must be kept within walking distance of the campus).

The only way to eliminate the high cost of utilities, then, is to secure a subsidization from the state legislature — or a private source — for construction of the plant. This would reduce the rental rates substantially, but there seems little likelihood of any such subsidy or grant forthcoming.

Considering all these facts individually and collectively, it seems evident that the proposed construction plans for Hawkeye Apartments result in the lowest possible rent per unit and are therefore consistent with the students' interests.

This means the choice lies between constructing Hawkeye Apartments as they are now planned, or constructing nothing. It has been suggested earlier by a married student representative that if this should prove the case, he favors constructing nothing.

The Purpose of Apartments

But on what should we base a decision such as this? First, of course, comes the question of the purpose of Hawkeye Apartments. Who are they being constructed for, and will they satisfy a need?

Obviously, the new units are being constructed to house married students and their families. Whether they will satisfy this need or not is more difficult to answer, and any answer can be little more than an educated guess because of the difficulties and variables encountered when predicting future economic conditions.

One fact stands out in any discussion of future needs: College enrollments are increasing, and the number of married students is increasing. If we accept this fact, it is evident that more married student housing will be needed.

We Must Build

On this assumption, it would be foolish to say that unless we can build cheaper housing, we should build nothing. We must build. Married students — and single students — will need a place to live. Private sources have not come forth with any recent construction and can not be counted on to do so. This throws the problem squarely upon the University.

The University has met the problem by proposing and gaining the Regents approval for the Hawkeye Apartment project. Unfortunately, in many eyes, the rent of \$85 per month seems outside students' means.

The question now becomes, "Will the new apartments fill a need?"

Again, if students are able to afford the cost of the new units, a need will be filled; if the rent will be more than students can meet, no need will be filled. The University, in reaching their decision to go ahead with Hawkeye apartments, made studies and consulted specialists to forecast as nearly as possible the future economic conditions.

The figures and trends indicate, to their satisfaction, that the proposed necessary rental figures will be within the means of at least a portion of the married students. It should be emphasized that this is a considered opinion. No one can state positively what the economic conditions will be even as little as two years ahead. The wisdom of constructing units to rent for \$85 per month can only be verified or refuted by future events.

Good Listening— Today on WSUI

GIRL SCOUTS IN EUROPE are the subject of Morning Feature at 9:45 when Emma Sue Phelps interviews the chaperone of such a tour. Guest Fran Walker will reveal the terrible trials and tender tribulations encountered while escorting a group of area Girl Scouts abroad.

GRAND CANYON SUITE, by Ferde Grofe, will be one of the selections heard during Kitchen Concert this morning from 10:15 to 11:45. This is the new recording by Eugene Ormandy and the Philadelphia Orchestra.

UN RADIO PRESENTS: "The Food and Agriculture Organization," another in the series of documentary programs devoted to a history of international cooperation leading to the growth of the United Nations. At 11:45 a.m.

CANADIAN-AMERICAN RELATIONS, much in the news these days and apt to receive some attention at 12:30 p.m., will be better understood by listeners who stay tuned for the regular weekly survey of Canadian press opinion, "Over the Back Fence" at 12:45.

MOSTLY MUSIC makes its final full appearance of the summer this afternoon from 1 to 4. Having been interrupted only for brief news summaries, it will now be interrupted for the rest of August and most of September. To be featured today: Suite in B Flat Major, Op. 4, by Richard Strauss played by the Vienna Philharmonic Wind Group.

AU REVOIR: Masterworks from France will be heard for the last time for some time to come today at 2 p.m.

MAURICE RAVEL'S String Quartet in F Major is the principal work to be heard on this evening's Dinner Hour at 6 p.m.

BROADWAY TONIGHT ends its summer season with a presentation of the Hellman-Bernstein opera based on Voltaire's "Candide" at 7 p.m. Starred are Robert Rounseville and Barbara Cook.

"VISIT TO A SMALL PLANET Where the Artist is Enemy" is the title of the discussion which closes out the current series called Ideas and the Theatre at 8:30 p.m. Prominent guests.

TRY TRIO TONIGHT: It consists of one part sensational trombone played by Urbie Green (dance music), one part Helen O'Connell (vocal music), one part Jazz Messengers (stir) at 9 p.m.

6:00-9:00 p.m. Feature work will be MOZART: Symphony No. 38 in D.

General Notices

General Notices must be received at The Daily Iowan office, Room 201, Communications Center, by 4 a.m. for publication the following morning. They must be typed or legibly written and signed; they will not be accepted by telephone. The Daily Iowan reserves the right to edit all General Notices.

HAWKEYE APARTMENTS — Students and faculty members and their families are invited to view a full-size "mock-up" of one of the new Hawkeye Apartments. The "mock-up" will be open for student visits Friday from 3:30 to 5:30 p.m. and from 7:30 to 9 p.m. Faculty members are invited to visit it Monday at the same hours. The "mock-up" is located in one of the temporary steel dining halls immediately east of Hillcrest Dormitory; entrance from the northeast corner of Hillcrest. Parking permitted while viewing the "mock-up."

RECREATIONAL SWIMMING HOUR at the Women's Gymnasium pool will be from 4:15 to 5:15 Monday through Friday. It is open to all women students and staff members. Please bring cap.

PARKING — The University parking committee reminds student motorists that the 12-hour parking limit applies to all University lots except the storage lot south of the Hydraulics Laboratory.

SUMMER HOURS for the MAIN LIBRARY

SUMMER SCHOOL STUDENTS registered with the Educational Placement Office should report change of address before leaving the campus.

THE P.H.D. FRENCH examination will be given on Friday, Aug. 8, 2:30-5 p.m., in room 309 Schaeffer Hall. No advance registration is necessary.

THE FOREIGN LANGUAGE Achievement Tests in French, German and Latin will be given on Friday afternoon, August 8. See departmental bulletin boards for time and room number. The Achievement Test in Spanish will be given on Tuesday, August 12, from 7 to 9 p.m. in room 221A Schaeffer Hall.

CANDIDATES FOR DEGREES IN AUGUST — Commencement announcements have arrived. Orders may be picked up at Alumni House across from Iowa Union.

FOREIGN STUDENTS who are receiving their degrees at SU's August Commencement and those who will be leaving campus at the end of the summer session will be guests of honor at a farewell party at the International Center Sunday evening, Aug. 10, beginning at 7 p.m. All friends are invited to attend.

KOREAN VETERANS: University students and staff members who entered service for the Korean Conflict while a resident of the State of Iowa may secure application blanks for the Iowa Korean Service Compensation (Bonus) from the Veterans Service in University Hall beginning Tuesday, July 29, 1958. Beginning at once, the Veterans Service will distribute sheets giving information about eligibility, procedure, etc. Office open hours are 8:30 a.m. to noon and 1 to 4:30 p.m. weekdays.

DEGREE CANDIDATES: Candidates for degrees in August may secure their academic apparel in the center of the basement floor in Macbride Hall from 8 to 12 a.m. and 1 to 5 p.m. on Monday, Tuesday, and Wednesday, August 11, 12, and 13.

THE UNIVERSITY Cooperative Baby-Sitting League book will be in charge of Mrs. Hesler from August 5th to August 19th. Telephone her at 9877, after 1 p.m. if a sitter or information about joining the group is desired.

Apple Core Hits Margaret's Dress

MONTREAL (AP) — A woman who threw an apple core that hit Princess Margaret's dress has been ordered held for mental examination.

The woman, about 39, appeared in court on a charge of disturbing the peace.

Police said they didn't believe she threw the core into the car intentionally. She had aimed it for the open street but misjudged the speed of the approaching cavalcade.

The apple hit the royal car and bounced inside. Princess Margaret picked it up and tossed it out.

RECOVER FROM ACCIDENT — SIOUX NARROWS, Ont. (AP) — Police said Ken Ellis of Rockford, Ill., who suffered shock when he and three others were pitched into the Lake of the Woods Tuesday was being released from the hospital Thursday.

Dwight Robert Jones, 35, of Windsor, Ill., drowned when their boat overturned.

Mock-up of Housing Project Open for Inspection Today

Unit Floor Plan and Suggested Furnishings

By JEAN DAVIES
City Editor

Whether is a four-room, second-story apartment or a ten-room split-level house, from a woman's point of view, it's space that counts. Not just that the living room is 12 feet, 3 inches by 16 feet, 10 inches. Floor space is important, too, but it's the closets and cupboards that are going to bulge by the time they are filled with a 20-year accumulation of clothes, books, etc.

The mock-up of a full-size Hawkeye Apartment, which is 578 square feet with four rooms and a bath, quiets all qualms about storage — it has a total of 30 square feet of closet space.

The living-dining area has a floor to ceiling closet that is 3 feet, 4 inches long and 2 feet deep, and each of the two bedrooms have a floor to ceiling closet that is 4 feet wide and 2 feet, 2 inches deep. And that's not all — there is a fourth closet in the kitchen — perfect for brooms and cleaning supplies — that is 2 feet wide and 1 foot, 7 inches deep. All four closets also have two top storage shelves.

Even if you have three sets of dishes, you'll have room to display them with the ample cupboard space in the kitchen.

Although the kitchen unit on display in the mock-up will not necessarily be the same one that will be put on the permanent apartments, the model offers units comparable to those which actually will be provided. Bids will be let sometime in September and final plans cannot be made until then.

Eight head-cupboards extend three-fourths of the length of the kitchen and there are also five lower-cupboards, and a total of three open shelves.

The refrigerator, range, sink and cabinets will be furnished by the University for each apartment, but students will have to provide all other furnishings.

Work-table space in the kitchen is far better than you will find in many new homes, and the stainless steel sink and garbage disposal add extra points for convenience.

At the end of the work-table, in the kitchen, there is an empty

space that will accommodate an automatic washer and dryer. If you don't own your own washing facilities, the extra space will be perfect for a table and two or three chairs.

The color-scheme for the mock-up is neutral, and will blend well with any furnishings. The living-dining area is a light green, the kitchen is a bright yellow, the bath is pink and the two bedrooms are a light turquoise.

The furniture shown in the mock-up is purely to help visualize the amount of floor space and to provide some idea of how the apartment will look when occupied by student families.

The mock-up shows a davenport, large chair, desk, extra chair and coffee table in the living room and a large table and four chairs in the dining area. It's amazing how much floor space there is after all of this furniture is arranged.

Because the apartments will be rented unfurnished, students will have an opportunity to select the amount of furniture that fits their individual tastes, and there are no odd-shaped corners so arrangement should be quite easy.

There are two medium sized windows in the living-room and both bedrooms. The aluminum windows come about half-way down the middle of the wall and are a regular size, so it will be easy to find curtains or short drapes to fit them.

The master bedroom is 12 feet by 10 feet and provides adequate space for a double size bed and a chest of drawers. The second bedroom is 10 feet by 9 feet, 9 inches and the University shows two twin size beds in the mock-up but for added sleeping space two bunk beds could be used.

The outside walls of each apartment will be constructed of painted concrete block, rather than the plaster-board used in the mock-up. The inside walls, however, will be plaster-board.

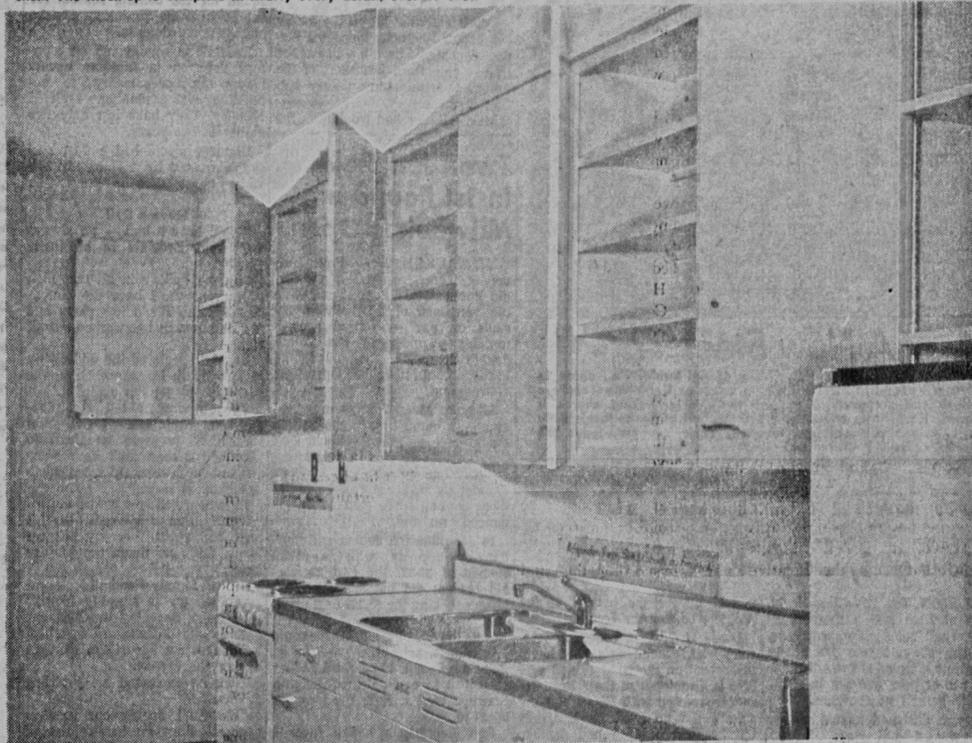

The apartment floors will be tiled with vinyl-asbestos tile. The mock-up stands on the Hillcrest Dining Room linoleum floor.

Floor space, closet space, cupboard space and walking space — Hawkeye Apartments seem to be designed to make the most advantageous use of the space available.

Daily Iowan Photos by Walter Kleine

LOOK AT THE CUPBOARD SPACE! Judy Clark, A3, Cedar Falls, Student Council vice-president, was amazed at the room in the kitchen. The mock-up is complete in nearly every detail, even to showing electrical outlets, which are located in places to afford convenient arrangement of furniture and electrical appliances.

THE KITCHENS IN THE HAWKEYE Apartments will have room for enough dishes and pans to serve half of the University. The space at the far left shows the room reserved for students to place an automatic washer and dryer. The kitchens will be furnished with electric stoves, a stainless steel sink and garbage disposal and cabinets. All other furnishings must be provided by the student.

A full-size "mock-up" of a Hawkeye Apartment will be open for inspection today and Monday by SUI students and faculty members.

Built from preliminary plans for the Hawkeye Apartments, 192 new permanent apartment units to be constructed west of Iowa City on the IWV road, the "mock-up" is used to check design details before final blueprints are drawn for the project, T. M. Rehder of SUI dormitories and dining services said.

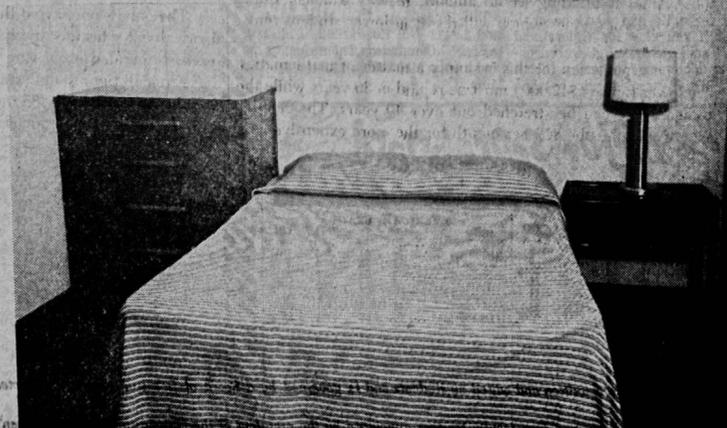

The structure will be open for viewing by students and their families today from 3:30 to 5:30 p.m. and from 7:30 to 9 p.m. Faculty members and other Iowa Citizens are invited to view the "mock-up" Monday at the same hours.

THE DINING AREA occupies space at one end of the living room. A large table and several chairs fit comfortably. Len Flanders, L2, Iowa City, student council president, and Judy Clark found that there is enough room in the living-dining area to sit at the table and watch television at the other end of the room.

THE LIVING ROOM, in the full-size mock-up of one of the new Hawkeye Apartments, is 12 feet, 3 inches by 16 feet, 10 inches and is spacious enough to include as much furniture as students desire. Two student wives, Mrs. John Hennings, Davenport, and Mrs. Donald Fitzgerald, Ames, previewed the living room this week and gave their complete approval. —University Photo.

THE MASTER BEDROOM is large enough for various arrangements of the furniture shown here. An easy chair could fit easily. The picture above shows the bedroom as you look right from the door. To the left of the door is a large floor to ceiling closet. On the wall to the left of the chest, there are two medium size windows.

Aussie Runner Beats Elliott, Sets World 2-Mile Mark

DUBLIN, Ireland (AP) — Albert Thomas, a tiny Australian clerk, broke the world's record for two miles Thursday night with a time of 8:32.0.

In doing so, he defeated by 25 yards Herb Elliott, another Australian, who on this same lightning fast track Wednesday night pushed the world mile record down to 3:54.5.

Thomas' performance establishes him as one of the greatest and most versatile of distance runners. Wednesday night he ran the mile in 3:58.6 in fifth place behind Elliott. On July 9 he set a world three-mile record here.

The accepted two mile record is 8:33.4, set by Sandor Iharos of Hungary in 1955. Thomas bettered this by one and four-tenths second.

Again a capacity crowd of 20,000 went wild over running feats of the athletes from Down Under. Wednesday night they came out to cheer their own hero, Ron Delany, but Delany finished third in 3:57.8, and so they acclaimed Elliott. Thursday they came to urge on Elliott, but Thomas won their hearts.

The lap times for the sizzling two miles were: 63 seconds, 2:10.0, 3:17.0, 4:22.0, 5:23.0, 6:30.0, 7:31.0, and 8:32.0 for the world record.

Elliott stayed ahead of Thomas until the last two laps, when the 5-foot, 5-inch Sydney clerk stepped up the pace. Thomas ran the last half mile in 2:02, and that was too much for Elliott, who finished in 8:37.6.

Thomas is 23 and until he burst on the track world with his three-mile record he was comparatively obscure, overshadowed in Australia by Elliott, Merv Lincoln, and of course John Landy, who holds the accepted world mile mark at 3:58.

In effect, the two miles was a turnout for the two rivals. Thomas set the early pace Wednesday and it was so fast he helped Elliott to his mile mark. Elliott set the early pace here, until Thomas took over in the sixth lap.

Weather conditions were perfect, even better than for Elliott's mile Wednesday night.

Thomas piled up a seven-yard lead over Elliott in the seventh lap, which he spun in 61 seconds, and

made it 25 yards by maintaining the same pace for the eighth and final turn around the quarter-mile track.

This was Elliott's fourth race in four days, apparently too much even for the runner many call "an animal" because of his brute strength and speed. Elliott ran two

half-miles in the London area Monday and his great mile Wednesday night. He is slated to run a mile in Edinburgh Saturday.

The time for the first mile was comparatively slow — 4:22. Elliott showed he was feeling the effects of his tremendous effort by his failure to set a faster early pace.

Miss Fladoos in Women's Western Junior Final

CHICAGO (AP) — Sharon Fladoos, 15, Dubuque, and Carol Ann Mann, 17, Olympia Fields, Ill., will meet for the Women's Western Junior Golf title today.

In Thursday's semifinals, Miss Fladoos eliminated the meet medalist and defending champion, Sherry Wheeler, Glasgow, Ky., 3 and 2, and Miss Mann eliminated Carol Sorenson, Janesville, Wis., 3 and 1.

Miss Fladoos continued her crisp chipping game as she upset the defending champion. The Iowa lass had nine one-putt greens, but only one of the putts was longer than three feet.

Miss Mann, a tall blonde, fired one-under-par golf for the 17 holes she required to defeat Miss Sorenson.

Consistently out hit off the tee by her bigger Kentucky foe, Miss Fladoos repeatedly used a six or seven iron to chip from just short of the greens to within almost easy putting distance.

Miss Wheeler had trouble on the

carpet, three-putting four holes. Miss Mann was three under par over the first nine for a two-up lead over Miss Sorenson. She closed the match on the 17th by chipping to within two feet of the pin for a winning birdie four.

Eddie's '58 Club Doesn't Worry Him

SAN FRANCISCO (AP) — Navy Coach Eddie Erdelatz says he isn't worried about replacing 21 of the 36 players in his 1957 football squad for the coming season. He has faith in his Simplicity System and jitterbug defense.

Erdelatz is winding up his summer vacation in familiar haunts hereabouts, preparatory to rebuilding his graduation-depleted Middies. They have lost only two games in two years.

His 1957 squad had a 9-1-1 record, climaxed by a smashing 20-7 victory over Rice in the Cotton Bowl.

Have a Ball "We'll have a ball — we always do," said Erdelatz in an interview.

"I don't believe in all that high pressure stuff. I have the Simplicity System. It's a few plays and few defenses. It has worked out all right. Erdelatz declared the underlying philosophy in his approach to the game is "to get fun out of it."

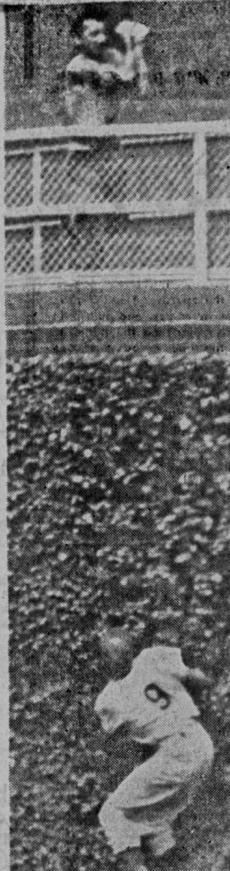

"That's what I tell my players," he explained. "I tell them there's no pressure on them to play and if they can't have some fun to turn in their suits. No scholarship is at stake."

He was asked how he did it. "Well, I've discovered that it isn't how much I or my coaches know, but how much the players know."

Simply Football "So we try to simplify football so a baby can play it. Once our offense and defense are installed, we make just superficial changes during the season."

Then he explained his jitterbug defense. "We don't anchor our men in concrete. They are moving around like jitterbugs before the ball is snapped."

"So far nobody has found the solution to this defense."

Disputed Play

THE BALL drops toward Los Angeles Dodger outfielder Gino Cimoli, No. 9, in the second inning Thursday after Bobby Thomson of the Chicago Cubs hit it against the screen along the catwalk above the fence. It was ruled a homer, the Dodgers put up a fuss, and Johnny Podres, Dodger pitcher who was sitting in the dugout, was bounced by umpire Jocko Conlon. The fellow on the ramp appears to have missed at a try to catch the ball. —AP Wirephoto.

Braves Extend Lead to 7 After 3-2 Win over Pirates

MILWAUKEE (AP) — A three-run seventh inning rally featured by Ed Mathews' 23rd home run gave Milwaukee a 3-2 decision over Pittsburgh Thursday and extended the Braves' National League lead to 6½ games.

Warren Spahn like the Pirates' Bob Friend bidding for his 15th victory of the season, got the decision in a sharply pitched game. Friend had a two-hit shutout going into the disastrous four-hit seventh. Spahn, now 15-7, gave up seven hits. Friend's record now is 14-12.

In the seventh inning, the Braves' Red Schoendienst singled and Mathews followed with No. 23. Henry Aaron singled, advanced on a sacrifice by Joe Adcock and scored on a single by Frank Torre. But at that point, Johnny Logan hit into an inning-ending double play.

Pittsburgh . . . 010 000 010 — 2 7 2 Milwaukee . . . 000 000 200 — 3 6 7

Friend, Gross (8) and Folles; Spahn and Crandall. L — Friend. Home runs — Milwaukee, Mathews (23).

Cards 12, Frisco 1

ST. LOUIS (AP) — The revived St. Louis Cardinals bombed the staggering San Francisco Giants 12-1 Thursday night with Sam Jones holding the Giants to four scattered hits. It was the ninth defeat in 10 games for the second-place Giants, now seven games behind Milwaukee, and a fourth straight triumph for the Cardinals.

The wobbly Giants made four damaging errors, two of them by Daryl Spencer.

Rigney went out to the mound as Monzant fumed over Umpire Al Barlick's call of a pitch to Ken Boyer. Rigney then marked an "X" on the pitcher's mound with his foot, apparently to indicate he thought it was a bad call.

Barlick, still behind the plate, waved Rigney out of the game. San Francisco . . . 000 000 001 — 1 1 4 St. Louis . . . 305 003 01X — 12 13 0

McCormick, Monzant (3), Johnson and Thomas, Schmidt (8), Jones and Green, H. Smith (6). McCormick, Home runs — St. Louis, Moon (4).

Dodgers 3, Cubs 1

CHICAGO (AP) — Johnny Klippstein made his 10th save, his fifth as a Dodger, Thursday as Los Angeles sweated out a 20-minute rain in the ninth inning before defeating the Chicago Cubs 3-1 and sweeping the two-game series.

After Sandy Koufax walked Ernie Banks and Bobby Thomson with one out in the ninth, Klippstein came aboard to retire the side and save Koufax' ninth win. Sandy has lost five.

Los Angeles . . . 010 020 000 — 3 5 0 Chicago . . . 010 000 000 — 1 4 1

Koufax, Klippstein (9) and Pignatano, Solis, Ekston (5), Hobbie (9), and Thacker, Neuman (9). W — Koufax. L — Solis.

Home runs — Chicago, Thomson (14).

Red Sox 8, Senators 4

BOSTON (AP) — Mighty Ted Williams cracked a tape-measure homer and chipped in a two-run single Thursday as the Boston Red Sox extended their unbeaten string to five games by defeating the Washington Senators 8-4.

Williams picked out the first pitch from Truman Clevering with the bases empty in the seventh and sent a towering drive some 20 rows into the bleachers behind the visitor's bullpen in right field.

Homers by Jim Lemon and Roy Sievers were good for the four Washington runs.

Washington . . . 010 300 000 — 4 8 0 Boston . . . 330 101 00X — 8 11 1

Griggs, Clevering (2), Valentini (7) and Courtney, Sullivan and White. L — Griggs.

Home runs — Washington, Lemon (23), Sievers (31), Boston, Buddin (8), Williams (20).

Phillies 3, Redlegs 2

CINCINNATI (AP) — Dave Philley's triple and Chico Fernandez' sacrifice fly produced the tie-breaking run in the eighth inning in a 3-2 victory by the Philadelphia Phils over the Cincinnati Redlegs Thursday night.

The triumph boosted the Phils ahead of Cincinnati into fourth place in the National League.

The Phils got their winning run after the Redlegs had tied the score at 2-2 in the last of the seventh. Philley started the inning with his triple down the right field foul line and promptly scored when Fernandez flied to Bob Thurman.

Philadelphia . . . 100 001 010 — 3 9 0 Cincinnati . . . 009 000 200 — 2 9 1

Cardwell and Sawatski; Purkey and Bailey.

NAME DIRECTOR

NEW YORK (AP) — Eileen Stubb of Augusta, Ga., has been named promotional director of the Ladies Professional Golfers Assn., Fred Corcoran, LPGA business manager, said Thursday.

A New Steeler?

SEVEN-YEAR-OLD Steve Berlinsky of California, Pa., came to the new Pittsburgh Steeler training camp at California Teachers College and prepared to assume the quarterbacking chores if needed. Here he is shown handing the ball to halfback Billy Wells as recently acquired fullback, Tank Younger, leads the interference. —AP Wirephoto.

New Extra Point Rule for The Fans, Says Rice Coach

HOUSTON, Tex. (AP) — Jess Neely, coach of Rice and a member of the football rules committee, said Thursday the new rule that allows two points after touchdown if made on a run or pass was put in solely for the benefit of the fans.

"It was designed to add zest to what was a dull play," he declared when interviewed at the Texas coaching school, where he is lecturing on the T formation.

Commenting on reports that many coaches resented putting in the rule because they had not been consulted on it — and one coach said there were no coaches on the rules committee — Neely said he felt most of the coaches liked the change. He added that he felt a little put-out at an insinuation that there were no coaches on the committee. "There are nine who at least get paid for it," Neely declared.

Neely, former president of the American College Football Coaches Assn., said the rule never would have been accepted had the ball not been placed on the 3-yard line instead of the two for a try after touchdown.

"The coaches will be giving more practice time to defending plays from the 3-yard line," Neely said. "They will be setting their defenses to stop the 2-point plays rather than placements. You can't block those kicks anyway."

Neely said the coaches on the committee wanted the new rule although it would put more pressure on them. "What to do when you score a touchdown and can either kick for a tie or run or pass for victory," commented Neely. "You'll be criticized if you play for a tie and you'll be criticized if you play for victory and fail," said Neely. "But we coaches aren't going to worry about that. We favor this rule because

it will be for the benefit of the people who pay the freight."

David N. Nelson, coach of Delaware who is lecturing at the coaching school on the wing T, and who also is a member of the rules committee, agreed with Neely that the rule would be good for the fans but he said he also had another reason for voting for it — to equalize the scoring.

"Football is a 2-to-1 ratio in everything except trying for the extra point," he said. "A touchdown is six points and a field goal three. But we've never allowed but one point for the try after touchdown whether we kicked, ran or passed, how we got down there to try for it, or considering the relative strength of the two teams."

Iowan Rule Advances in Golf Tourney

DETROIT LAKES, Minn. (AP) — Medalist Jack Rule of Waterloo, Iowa, continued his sub-par pace in the Pine to Palm golf tournament Thursday and defeated Bob Teyro, of Huntington, W. Va., 7 and 6 in the first round of match play.

Other Iowans who won first round victories were:

Jack Webb of Spirit Lake, former champion, 1 up in 19 holes over Walter Johnson of Minneapolis.

George Lee, Humboldt, 5 and 4 over Stan Topolniski of Winnepeg.

John Eymann, Forest City, 3 and 2 over Ben Dablow, St. Paul.

Bill Ferguson, Des Moines, 4 and 3 over Bill Hood, Sioux Falls.

Bruce Osmundson, Thompson, 4 and 3 over Mel Eiken, Montevideo, Minn.

Handle 5,000 SUI Calls Daily— 2,512 Phones on Exchange

By CLARENCE TRAFFORD
Staff Writer

You pick up your telephone receiver and dial University extension 8-0511. What happens? A series of clicks and buzzes. Then the familiar, "University." More clicks and buzzes and your party answers.

Where does all this happen? At the University PBX (private branch exchange) office located in the telephone building at 302 S. Linn St., where an amazing system of cooperation takes place between the University and Northwestern Bell Telephone Co.

There are 2,512 University phones which keep three shifts of operators busy 24 hours a day. On busy days the operators handle about 5,000 calls.

SUI was one of the first universities to have phones installed in each room of the dormitories. Most colleges operate their own exchanges but service is usually limited to certain hours.

How does the system work? When you call from one exchange number to another the connection is automatic. A student dials the desired number, then a mechanism known as the line finder selects the correct line to place the call. Next the selector switch selects the number dialed, and finally the number is rung by the connector switch.

Directly in front of the operator is a panel with extension jacks. A jack is a hole in the panel where plugs are inserted to complete the circuits. Directly below the extension jacks is a double row of fifteen answering jacks.

On the switchboard table below the double row of jacks are two rows of plugs. The inner row is extension plugs which are inserted into the correct number on the panel above. The outer row of plugs is used to make connections to the answering jacks when the call first comes in.

The two rows of plugs are called a bank. Each plug is on a long elastic cord which is connected below the panel top with the plug parallel to it, forming one circuit.

The PBX handles only those calls coming into the University from the outside. The steps involved in handling these calls are as follows:

When a call comes in a green light comes on just below one of the 30 answering jacks, depending on which line the call comes through. Then the operator takes

a plug from the outer bank (the answering plug) and plugs it into the jack where the green light is on.

When the connection is made, the green light goes off and an amber light comes on. The operator answers the call into the mouthpiece clamped over her head and takes your number.

Next the operator takes a plug from the inner row and puts it in the correct jack on the panel to see if the line is busy. If the line is not busy, she plugs it in fully and the connection is made.

The operator rings the number by using the ringing key, which is on the table near her left hand. When the party answers, the operator usually places a white disc over the ringing key to show that the call has been completed and she will have no further use for the key until the connection is broken.

When one of the parties hangs up, a red light will flash above the ringing key. Then the operator pulls both plugs out.

Some years ago a constant problem was charging the correct roommate for home calls. Students now are requested to give their names, thus alleviating the problem.

SUI and Iowa City switch boards operate in the same office and together they handle about 5,800 long distance calls daily. Outgoing long distance calls are handled by dialing 110 and placing the call with the city operator.

Miss Hattie Goody, chief operator, said it takes about two weeks to train an operator at the PBX.

The University PBX service is a rental service to which the University subscribes. Northwestern Bell Telephone Co. has a contract with SUI fixing rental rates and costs of operation. This company furnishes the operators for the University PBX.

SUI Hospitals have their own operators, but Northwestern Bell Telephone Co. owns and maintains the equipment.

July Weather Not Typical, Marked by Rains, Coolness

DES MOINES (AP) — You can tuck July, 1958 away in your memory as a month that to say the least was hardly typical of midsummer Iowa. "It was marked," the Iowa Monthly Weather Summary observed, "by unseasonable coolness throughout the period and by unusually heavy rains in much of the state."

Set Some Records
The total rainfall set July records at most points in the southwest and in parts of the south central, west central and central portions of the state.

At least 10 counties in southwest and west central Iowa received rainfall more than 10 inches above normal. The rains brought flood and storm damage estimated at around 15 million dollars, mostly in the counties along the Nishnabotna River. Eighteen lives were lost in the floods.

Yet, the northwest division of Iowa showed up at month's end with a deficit in rainfall averaging .28 of an inch and ranging to more than an inch in some localities.

Temperatures Below Normal
The weather summary said July temperatures averaged four to eight degrees below normal. From July 15-20, often the year's hottest period, the mercury hovered in a range from 10 to 15 degrees below typical levels.

The hottest temperatures recorded were only 96 degrees as compared with the over-100 readings so often encountered in July, and on July 16 Spencer reported a cool low of 44.

Southwest Iowa points averaged an almost incredible 9.57 inches above normal rainfall in July, and the south central section was close behind with an average surplus of 8.28.

Other sections had rainfall above normal by these amounts:
North Central .76; northeast .71; west central 5.20; central 5.34; east central 1.82; and southwest 5.66.

10 Receive B.A. Degrees At Hospital

Graduation exercises were held Thursday afternoon for 10 students of the Veterans Administration Hospital School of Medical Technology at Veterans Hospital.

Emory D. Warner, professor and head of the SUI Department of Pathology was the speaker. Dr. Leland E. Stilwell, hospital manager, presented the certificates to the graduates.

Students who received degrees Thursday have spent their senior year of college in the VA Hospital school of medical technology. Affiliated with SUI, the school grants 30 semester credit hours for the hospital training year. The graduates received B.A. degrees.

Director of the school is Kenneth R. Cross, clinical associate professor. Miss Gladys Downey is technical assistant.

Graduates included: Jean Felix, Oakdale; Mrs. Marcia Richards, Iowa City; Martha Ollivier, Reseda, Calif.; Mary Ann McNeil, Duquaque; Sally Shook, Burlington; Bonnie Reid, Boone; Mrs. Robert Pohl, Jefferson; Ann Risk, Wingate, Ind.; Jean Gloppen Park Ridge, Ill.; and Alice Schrody, Rapids.

Indiana Mayor Trades Cadillac for Truck

GARY, Ind. (AP) — Mayor George Chacharis said Thursday he will trade in his \$6,000 city-owned Cadillac on a garbage truck.

Chacharis is a bachelor and doesn't drive — and he said he wasn't about to hire a chauffeur. Besides, Chacharis said the city needs another garbage truck of the type that costs over \$10,000.

Big Girl

THE UNUSUAL title of Miss Tall America went Wednesday to 5-foot-11-inch Miss Shirley Thaxton, 25, Cincinnati legal secretary. Starting up north, her other statistics read 34-21-34. Miss Thaxton was selected at the annual convention of the American Affiliation of Tall Clubs.

Gore Widens Lead In Tennessee Primary

NASHVILLE, Tenn. (AP) — Sen. Albert Gore, campaigning for re-nomination on his record, pulled into a commanding lead ahead of ardent segregationist Prentice Cooper as returns mounted in Thursday's Tennessee Democratic primary. Cooper had led in early returns.

tion was not a major issue in this campaign. Leads in Rural Sections Returns from 1,138 of Tennessee's 2,636 precincts gave Gore 92,899 votes and Cooper 71,902. These returns came primarily from rural areas in all sections of Tennessee. Late closing city polls were still to be tabulated.

News Digest

Navy Returns Fleet Units To Normal Operations

WASHINGTON (AP) — The Navy said Thursday that all ships and units of the fleet have returned to normal operating procedures, ending the 4-hour alert ordered at the beginning of the crisis in the Middle East.

AFL-CIO Protests Forecasts Of Early End to Recession

WASHINGTON (AP) — The AFL-CIO protested Thursday that forecasts of an early end to the recession are drawing attention away from "the critical and continuing problem of unemployment."

SUIowan Reports At Moscow Meeting

MOSCOW (AP) — Explorer IV is fulfilling its mission to measure the enormously intense band of mystery radiation around the earth, an American scientist said in Moscow Thursday.

The word is that radiation keeps getting more intense up to the 1,000-mile height measured so far with no signs of its decreasing, said Ernest C. Ray, assistant professor of physics from SUI.

Gauges are counting 6,000 high energy particles per square inch per second.

Whether this can be harmful to human astronauts is still not clear.

Reads Cable
Ray read a cablegram from Dr. James Van Allen, head of the SUI Physics Department, reporting the first results to the International Geophysical Year (IGY) meeting here.

Russia's Sputnik III also finds this radiation gets hotter the higher you go, Soviet scientists reported in a series of papers. One American expert says he believes the Soviets are giving out all their data now when they have it.

Van Allen's cable said most of the total radiation measured appears due to low energy electrons and are not high energy particles. At the 1,000-mile altitude, radiation gives exposure equal to ten roentgens (x-rays) per hour.

Need Shields
A space vehicle might zip through without harm if radiation does not extend too far out. But shielding probably will be needed to protect humans aboard research satellites which would be circling the earth like the Explorers and the Sputniks.

Explorer IV's first report covered three days, July 26-29. All detectors are operating properly. They are finding that radiation intensity increases several thousand fold between 200 and 1,000 miles with a rapid rise starting at 250 miles.

Van Allen said this seems to suggest that electrons come from secondary cosmic rays which die when bouncing back after collisions of cosmic rays and the earth's air. Electrons are trapped in the earth's magnetic field and stay there.

State Plans To Promote Water Safety

DES MOINES (AP) — Widespread publicity to promote safe swimming and boating practices holds the best immediate hope for reducing drowning deaths in Iowa, a group of state officials agreed Thursday.

They also discussed long range proposals for legislative action and increased supervision at swimming and boating places to help curb Iowa's water death toll.

Gov. Herschel Loveless called the group together after 12 persons were reported drowned in three days ending last Monday.

Attending were Dr. Edmund G. Zimmerman, state health commissioner; Chief David Herrick of the Iowa Highway Patrol; L. A. Faber, assistant director of the Iowa Conservation Commission; and Wilbur Rush, head of the commission's division of lands and waters.

The group agreed that since only about 30 to 40 days remain in the swimming season this summer, no elaborate program of new rules and regulations governing boating and swimming could be made effective this year.

But at the suggestion of the other members, the governor said he would seek to enlist the aid of Iowa news media to promote water safety. He proposed that television stations be asked to present Red Cross or Boy Scout films on water safety.

Ten SUI Men to Receive U.S. Army Commissions

Ten SUI students will be commissioned 2nd Lieutenants in the U.S. Army Reserves Aug. 13, at 6 p.m. in the Shambaugh Auditorium of University Library.

The students are: Brad Bathey, A4, Des Moines; John Bouma, L1, Pocahontas; Robert Hornaday, L1, Des Moines; Howard Houghen, L1, Waterloo; James Irwin, L1, Iowa City; Arthur Houghland, A4, Iowa City; William Kirtley, L1, Des Moines; Steven Norman, L1, Ames; William Pierson, L1, Humboldt; and Roger Stoltenberg, L1, Donahue.

These men expect to be called to active duty within a year to serve 6 months or 2 years in the infantry.

Construction Bill Sent to President

WASHINGTON (AP) — The Senate Thursday sent to President Eisenhower a \$1,695,000,000 military construction bill authorizing hundreds of projects in this country and abroad.

The measure, a compromise worked out by a Senate-House Conference Committee, was passed by voice vote. The House passed it Wednesday by a roll-call vote of 256-135.

Money for the construction project is carried in a separate appropriation bill which is still pending in the Senate.

Urban Facilities Cost Half Of Interstate Highway System

DES MOINES (AP) — Urban traffic facilities such as the Des Moines freeway are as much a part of the interstate highway system as those in rural areas, a member of the Iowa Highway Commission said here Thursday.

Commissioner Robert Beck told Des Moines Rotarians Congress in authorizing the Interstate System, appropriated \$11 billion for urban and \$12 billion for rural construction.

Forty-eight per cent of the interstate money allotted to Iowa is for urban highways, including facilities in Des Moines, Davenport, Sioux City, and Council Bluffs. The other 52 per cent is for rural construction, Beck said.

He said 38 per cent of the state's population will live within 25 miles of Iowa's completed 710-mile stretch of completed interstate highways.

He said traffic experts estimate that the "safety-engineered" highways will mean a reduction of 55 traffic deaths a year in the state.

"The interstate system in Iowa will amount to only three-fifths of one per cent of the state's total road mileage but will carry an estimated 13.4 per cent of the traffic," Beck said.

"While there are conflicting interests and pressures in the development of any highway program," he continued, "Iowans respond to progress when they are informed about its goals. I will not buy the claim that Iowa is a backward state."

House rejection of a new farm bill Wednesday prompted Speaker Sam Rayburn (D-Tex.), to pronounce farm legislation dead for this session. Rayburn's views were echoed by Rep. Harold Cooley (D-N.C.), chairman of the House Agriculture Committee.

Senate Probers Accuse Hoffa Of Going Back on Promise

WASHINGTON (AP) — Senate probers accused James R. Hoffa Thursday of going back on his promise to drive racketeers and hoodlums out of his big Teamsters Union.

Reasonable men, Sen. John L. McClellan (D-Ark) told the chunky little union boss, can only conclude that "you surround yourself with criminals, and that you keep them there and intend to keep them there if you can have your way."

"There will be action taken in due time," Hoffa replied evenly. He spent a rough day before a special Senate Rackets Committee headed by McClellan—a day in which:

1. A transcript of some Hoffa testimony before the committee last year was sent to the Justice Department for a decision on whether he or another witness who appeared Thursday has perjured himself.

2. Hoffa was asked whether he ever had given any arson assignments to Frank Kierdorf, a Teamsters business agent in Flint, Mich., who died Thursday of mysteriously inflicted burns. Hoffa replied with an indignant denial.

The senators demanded to know what Hoffa had done about Teamster's officials with criminal records and those who had taken the Fifth Amendment and refused to testify before the committee. They ticked off a sizable list of names in this connection and asked Hoffa to say where the men are.

In almost every case Hoffa's answer was that while he had talked to the men, he had done nothing about removing them.

Dim Prospects
Prospects of a housecleaning, McClellan remarked, seem to get dimmer all the time. He added that Hoffa's testimony "has created the impression that you are in the same category as those you are failing to take action against."

Hoffa snapped back: "It's not right or fair for you to say there is something wrong with my leadership because I don't deprive people of a right to a living."

In connection with the perjury inquiry, McClellan said there was

Iowa Included In Russ Tour

Dean Mason Ladd To Attend Meeting

Dean Ladd To Attend Law Meeting

Mason Ladd, dean of SUI Law College, plans to leave for Los Angeles Aug. 17, to attend the annual meeting of the National Conference of Commissioners on Uniform State Laws.

Ladd is a commissioner representing Iowa and chairman of a conference section engaged in the drafting of a Uniform Water Rights Law, a Uniform Reciprocal Enforcement of Support Act for Children of Separated and Divorced Parents, a Uniform Act on Paternity Proceedings, and amendments to the Uniform Narcotic Drug Act.

Ladd said the competitive interests of municipalities, industry, irrigation, domestic uses, and the interests in recreation and wild life create many special problems where there is not enough water to serve all purposes.

The commissioners in joint session plan to consider drafts of many other acts of national significance.

Other commissioners from Iowa are Wiley E. Mayne, Sioux City, and William O. Weaver, Wapello.

Following the meeting of the commissioners Ladd plans to attend the annual meeting of the American Bar Association in Los Angeles.

WASHINGTON (AP) — A Russian farm delegation went to Raleigh, N.C., Thursday to start a month-long tour of U.S. farm areas which includes Iowa.

The group, which will study livestock production, is the second Soviet farm delegation on tour in this country. The first is now in the midwest. The United States and Russia are exchanging six such teams this summer.

The itinerary of the second delegation includes Aug. 19, Pioneer Hybrid Seed Co. and Hy-Line Poultry Farm, near Des Moines.

Aug. 20, Garst and Thomas Hybrid Seed Farm, Coon Rapids; Aug. 21-22, Iowa State College, Ames; Aug. 23-24, Iowa State Fair, Des Moines; and Aug. 25, Animal Disease Eradication Division Field Office, Agricultural Research Service, Agriculture Dept., Omaha, Neb.

Iowa Liquor Sales Increase Over Three Per Cent

DES MOINES (AP) — The Iowa Liquor Control Commission reported Thursday that liquor sales in eastern and western border cities jumped eight per cent during the fiscal year that ended June 30.

The gain for the state as a whole was a little more than 3 per cent.

Officials attributed part of the sales spurt in border stores to efforts by law enforcement officers to reduce the flow of out-of-state liquor into Iowa.

Sales in nine eastern and western border cities totaled \$5,900,000, an increase of nearly \$442,000 over the previous year.

In the last fiscal year, Store No. 6 at Sioux City reported sales totaling \$564,031, compared to \$562,880 the previous year. Store No. 170 there reported \$589,830 in sales last year, \$506,772 the year before.

At Davenport, the No. 3 store reported \$396,378 in sales the last fiscal year as compared to \$389,311 the year before. The No. 175 store there reported 1957-58 sales at \$775,559, compared to \$713,967 the year before.

Senate Talks Extra Session

WASHINGTON (AP) — Talk of a special session if Congress does not pass a farm bill before adjournment arose in the Senate Thursday.

Sen. George D. Aiken of Vermont, senior Republican on the Agriculture Committee, said President Eisenhower may be justified in calling a special session if forthcoming cotton crop reports show as grave a situation as he expects.

Aiken spoke up during a speech by Sen. John Stennis (D-Miss.), who said that if Congress adjourns without enacting a farm bill the situation would be so serious that Mr. Eisenhower would have to summon a special session before year's end.

Stennis, pointing out that cotton farmers would have to take a 20 per cent cut in acreage next year unless present law is changed, urged a conference between Congress members and Secretary of Agriculture Ezra Benson in an effort to work out an acceptable bill before Congress quits.

House rejection of a new farm bill Wednesday prompted Speaker Sam Rayburn (D-Tex.), to pronounce farm legislation dead for this session. Rayburn's views were echoed by Rep. Harold Cooley (D-N.C.), chairman of the House Agriculture Committee.

Small Tornado Jumps Milwaukee

MILWAUKEE (AP) — A tiny tornado lashed at Milwaukee Thursday but did not touch the ground before whipping out over Lake Michigan, leaving property damage but no injuries in its wake.

One witness described the funnel as a "whirling mass of junk" that carried garbage cans, roof shingles and other debris through the air.

Earl Carsten, operator, said his bar was "swept clean" of glasses being used by more than a dozen patrons. A scaffold outside the tavern was blown down on top of several parked cars.

Carsten said wind-blown debris was "draped over the telephone wires."

The weather bureau said the funnel was "awfully small," and did not come within 1,000 feet of the earth.

It flashed over a business-residential section of the northwest side of the city accompanied by the heavy rain. Damage was spread throughout a mile square area.

SUI Balloon Launching Postponed at Hudson Bay

The Skyhook balloon flight planned for Thursday had to be temporarily postponed because of high winds, according to word sent by SUI physicist Kinsey Anderson to the SUI Physics Department.

The balloon was to have gone up from Fort Churchill on Hudson Bay for the longest flight of any of the 14 balloons to date.

The SUI Physics Department is sending the helium-filled balloon

No Pepper Market in Subway

THE MAN WITH THE PEPPERY PROBLEM is Spencer Faison, 22, of Crescent City, Fla. He sits forlornly among baskets of peppers far from their destination on Philadelphia's Dock Street. Faison got his peppers unloaded from his truck after he got lost in a subway tunnel 6-blocks underground. Someone told him to "follow the car tracks" and he did. However, he followed them too far and ended up smack into the subway-surface tube and was 6-blocks underground. His truck was wrecked bouncing along the ties and he wound up with a wreckless driving ticket, no truck and lots of peppers.—AP Wirephoto.

'Free Press' Speech in College Text

Excerpts from a speech given by an SUI professor will be reprinted this fall in a supplementary text for college-level public speaking courses.

Leslie G. Moeller, professor and director of SUI's School of Journalism, delivered the speech, "How Free Is the Press," last September at the Rochester (N.Y.) Photo Conference. It was later published in Vital Speeches for Oct. 1, 1957.

The excerpt in the speech textbook will include about half the speech.

To include 15 essays, the book will be published this fall for use at Cornell, Harvard and Washington (at St. Louis) Universities.

In his speech, Moeller declared, "The citizen must know what's happening, and for this reason he must realize that freedom of the press in a modern mass society is the basis for all other freedoms." Freedom of the press, he continued, "is the amplification of freedom of speech, and these together represent the greatest and most basic of the freedoms, which is intellectual freedom, freedom of the mind. Economic freedom, and political freedom, and spiritual freedom are all important, but these rest essentially and finally upon intellectual freedom, and they cannot endure without it."

Moeller cited numerous instances of citizens' unconcern with, and willingness to let Governments limit, our basic freedoms, and noted particularly that for the first time the Federal Government formally espouses the theme that "the public does not have a right to know." He called "right of access" to news the "great problem area today in freedom of the press."

Reciprocal Trade Program Passes House, 161-56

By J. W. DAVIS
WASHINGTON (AP)—The House voted 161-56 Thursday for a four-year extension of the reciprocal trade program, giving President Eisenhower most of what he asked.

While the bill "does not contain everything which I believe is desirable, it is nevertheless acceptable to me," Mr. Eisenhower said. The President gave his endorsement in a letter to Rep. Wilbur Mills (D-Ark.), chairman of the House Ways and Means Committee. Mills read the letter to the House, before the standing vote on passage.

The bill is a compromise, worked out Wednesday by a Senate-House Conference Committee. The House had originally voted a five-year extension, as Eisenhower had asked, while the Senate voted for three years.

The four-year extension is the longest ever voted for the program. It was fathered 24 years ago by Secretary of State Cordell Hull under President Franklin D. Roosevelt and has had bipartisan support, as well as bipartisan opposition.

This program empowers the president to negotiate with other nations to cut tariffs on a tariff-by-tariff basis.

Man Forfeits \$30 Bond On Intoxication Charge

One person forfeited bond and another was fined in police court Thursday.

Donald Woods, North Liberty, forfeited \$30 bond for non-appearance on an intoxication charge.

Thomas J. Renno, Kalona, pleaded guilty to an expired driver's license charge and was fined \$5 and \$4 costs.

'Cue' Shows Ingenuity, Creativeness of WSUI

By AL SCHAFER
Staff Writer

If you've been a Saturday morning radio listener like most college students, chances are you've run across a 10-12 a.m. show on WSUI entitled "Cue." If so, you've undoubtedly been entertained by this 2-hour "monitor type" local show that includes everything from a take off on Dizzy and Buddy to an on-the-spot account of news happenings throughout the country.

The interesting way this show was dreamed up, entitled, organized, and each week produced is certainly a feather in the hat of WSUI's personnel which operates the University station.

The idea for such a show began early last fall. WSUI personnel realized the need for a fashionable, light Saturday morning show—something along the line of Monitor, only more sophisticated.

Service-Type Program
It was finally decided that basically a service-type program was needed. In order to keep the show interesting and entertaining, however, it was felt music, interviews, and comic bits should be included in the programming.

Since it was then during the football season, weather and road condition announcements for visiting fans became popular. Also information on campus happenings such as plays, meetings, and concerts.

Public Relief Files Cost \$50,000

Since Iowa public assistance rolls were first opened to general public inspection on July 1, 1953, it has cost the state about \$50,000 to show the lists to 268 people, or about \$187 per person, the Iowa Department of Social Welfare announced Thursday.

Law passed five years ago by the Iowa Legislature requires that lists containing name, address, and amount of monthly assistance grant to each recipient of payments for Old Age Assistance, Aid to the Needy Blind, and Aid to Dependent Children be published.

Monthly Reports
The monthly reports, listing grants for each county, cost about \$10,000 a year, including cost of labor, paper, postage, delivery charges, etc.

Requests to inspect the lists have dwindled from 81 in the first year to 30 in each of the past two years. In 33 counties, there were no requests during the five years.

Aid to Dependent Children payments in July were granted to 8,081 families, or 29,618 individuals, at a total cost of \$1,034,318.50. This averaged \$127.99 per family or \$4.92 per person.

In Johnson County, the total cost was \$6,476, averaging \$126.98 for each family and \$36.18 for each individual.

Old Age Assistance
The state granted Old Age Assistance to 36,983 individuals in July, totaling \$2,496,417.50 out an average of \$67.50 each.

In Johnson County, there were 306 recipients receiving an average grant of \$65.33 each, a total of \$20,067.50.

Aid to the Blind for July in the state totaled \$1,218,843 and was paid to 1,469 persons at an average of \$82.94 each.

In Johnson County, the total was \$1,102.50, paid to 12 individuals at an average of \$91.88.

ENVOY TO GREECE
ADDIS ABABA, Ethiopia (AP)—U.S. Dep. Undersecretary of State Robert D. Murphy, President Eisenhower's special, Mideast envoy, arrived from Cairo Thursday for talks with Emperor Haile Selassie. Friday Murphy heads for Greece.

Musically, this show presented an opportunity to play some of the more unusual type selections along the Stan Freberg line, in addition to standard favorites that command a large audience.

Fans were also interested in what Evy or one of his coaches or players thought of the upcoming football game, so interviews were taped just before or even after the show had begun for presentation.

Once this basic program format was determined, the problem of titling the show was faced. Most suggestions, such as Saturday Morning Service Show, were either too formal or overused. Finally, however, the word "Cue," meaning "tip" or "word of advice" was hit upon and selected.

No One-Man Show
Larry Walcott, producer of Cue, was fortunate in having a fine crew of men to work with. It was decided that one man running the show would turn it into a personality program. So two very versatile men, Dave Carter, veteran WSUI newsmen, and Jim Wilke, student director of popular music at the station, were selected to share the task.

Backing these men up at the present time are newsmen Tom Keeton, sportscaster Paul Ellis, Larry Barrett who is a humorous and satiric critic of rock 'n roll, and others who conduct interviews.

Work on the show begins Monday and runs up to a few minutes before the show goes off the air. Walcott, who is also in charge of special events, is always hunting for something new, while Wilke is continually on the lookout for an unusual record, or someone else is producing a new comic bit.

Anything Can Happen
Besides the basic format of three newscasts and one sportscast, the show is so informal that anything is likely to be delivered at any time from anywhere. In fact, this is what Walcott and crew always strive for, and the odder the better.

An example of a Cue special event: a WSUI staff member was in Little Rock during the integration dispute last fall. So a phone interview direct from the scene was taped and presented on the program.

Two basic pieces of equipment are responsible for Cue's flexibility. One is a Beeper Phone, an instrument which records telephone conversations, and the other a portable tape recorder, capable of recording anything that has sound anywhere.

Safety Features
WSUI members were even allowed to travel with the Iowa State Highway Patrol, taping conversations with drivers who were stopped. The microphones were hidden in the patrolmen's coats.

Highway safety is given major emphasis on this show. Continual "Drive Safely" reminders and tips are given along with fatality counts and road and weather conditions.

Whenever celebrities in any field visit the Iowa campus, you can be sure to hear them on the Saturday morning show. "Cue" listeners have been treated to interviews with personalities such as Mrs. Eleanor Roosevelt, Anna Russell, Louie Armstrong, Woody Herman, the Four Freshmen, and many others.

The man-on-the-street interview is also a somewhat regular feature of the show. When something new comes onto the scene, people in downtown Iowa City are stopped and asked their opinions on the subject. Rock 'n Roll, the chemist dress, and Sputnik have been topics.

The comic bits are created and produced by the Cue staff. Everyone gets into and enjoys the impersonations, background impressions, and other comic devices utilized in these light productions.

All in all, this Saturday morning show has been a combination of ingenuity, creativeness, hard work, and fun.

AF Missile Off Target

CAPE CANAVERAL, Fla. (AP)—A speedy Bomarc air defense interceptor missile was launched successfully by remote control from 1,500 miles away Thursday but it failed to find its target.

The Bomarc missile, touted as the nation's most highly developed air defense weapon, roared aloft on spectacular launching after someone pressed a button in Kingston, N.Y.

The button was connected to one of the world's largest electronic computers—a part of the American air defense network.

The Air Force announced the mid-course guidance system failed to function properly as the Bomarc streaked at three times the speed of sound across the South Atlantic. The missile was aimed at a simulated enemy bomber—actually an unmanned B17 drone—cruising some 250 miles off the cape.

The cause of the malfunction will not be known until telemetry data on the flight has been analyzed, officials said.

The primary objective of the shot was to test the Bomarc working with "SAGE"—a complex network of radar sites and computers that helps screen the nation from enemy air attack.

SAGE, which means Semi-Automatic Ground Environment, went into effect June 27.

SUI Instructor To Address AEJ Convention

Walter Wilcox, instructor in journalism at SUI, will speak on "Liberal Education in American Journalism" at the annual convention of the Association for Education in Journalism Aug. 26 at the University of Missouri at Columbia.

Wilcox, who recently ended a 2-year term as executive secretary of the accrediting committee of the American Council on Education for Journalism, will discuss the role of liberal education in journalism education and the relation of liberal education courses to journalism courses in professional journalism schools.

His presentation to AEJ will be based on research for his doctoral dissertation. He will receive the Ph.D. degree in mass communications from SUI at the Aug. 13 commencement. Wilcox has accepted a position as associate professor of journalism at Tulane University, New Orleans, beginning in September.

Wilcox joined the SUI faculty in 1956. He had previously been a news executive and publisher on daily and weekly newspapers in the west, and had taught journalism at the University of Wyoming, Laramie.

Eleven Students Awarded Carr Scholarships at SUI

Eleven students who will attend SUI this fall have been awarded Carr Scholarships for 1958-59, according to Helen Reich, chairman of the University Scholarship Committee.

Students receiving the awards are Kay Hammond N3, Atlantic; Charles L. Hutchins, A3, Belle Plaine; Robert Hemesath, E4, Calmar; Marjorie Long, A3, Cedar Rapids; Lynn C. Makeever, A3, Davenport; John Easton, C4, Monona; Magnus Craford, E2, Onawa; Jeanine Tranter, A2, Bensenville, Ill.; Irwin Magerkurth, E3, Cambridge, Ill.; Conrad Stucky, A3, West Concord, Minn.; Diane Cherry, A3, Cincinnati, O.

Established in 1900 by an endowment gift of \$50,000 from the late A. Whitney Carr of Jordan, N.Y., these scholarships pay full basic fees for the winners, who must be enrolled in the SUI Colleges of Liberal Arts, Commerce, Engineering, Nursing or Pharmacy. Awards are made on the basis of scholastic achievement and financial need.

SAFE LANDING
