Balloon 'Moon' Attempt Fails

Dulles, Chiang Kai-shek Agree Solidarity Needed

Nationalists And U.S. Will Stand Together

Final Cease-Fire Talk Slated For Today
TAIPEI, Formosa (AP) — Secretary of State Dulles and President Chiang Kai-shek agreed Wednesday night that their countries must stand together against Communist China.

An exchange of toasts at a state dinner cleared the way for a new statement of solidarity expected after their Thursday windup conference on the Formosa crisis.

The meeting was expected to be the final one in three days of crisis talks. The second day brought a warning from Dulles that U.S. warships may return to escort duty on the supply run to Quemoy because of renewed Communist shelling.

Artillery Duel
Throughout the day mainland Red gunners and Nationalists on Quemoy Island engaged in a fierce artillery duel, but the firing dropped off at nightfall.

The dinner was at Chiang's palace on Grass Mountain, outside Taipei.

Chiang said a Red China campaign to divide the two allies "makes it of paramount importance to reaffirm our joint stand of solidarity and resoluteness vis-a-vis the enemy."

He toasted President Eisenhower and praised Dulles as "an uncompromising antagonist to communism."

The Nationalist information office quoted Dulles as replying that the downfall of Red China depends on the free world's determination, courage and dedication. The information bureau said Dulles also had reaffirmed as his "real conviction" a statement at San Francisco last year that Communist rule in mainland China is a passing phase and Americans "should contribute to that passing."

Deny Them Success
"In resisting against continuous Communist aggression, our purpose is to deny them more successes. . . Without successes the Communists will not be able to carry on," Dulles said.

The dinner was followed by more talks among the principals. Dulles also conferred with Gen. Maxwell Taylor, U.S. Army chief of staff, indicating the offshore military situation again figured in the talks with Chiang.

While the talks went on, Red guns and Nationalist artillery on Quemoy fought their duel. By Nationalist count, the Reds rained 8,376 rounds on the off-shore islands between 6 a.m. and 6 p.m.

At the peak of fire the shells were coming in at the rate of 1,000 per hour, AP Correspondent David Lancashire reported from Quemoy. He said nine civilians had been killed and seven wounded since the Communists ended their 15-day cease-fire Monday afternoon. In addition, 35 soldiers were wounded during the first two days of firing.

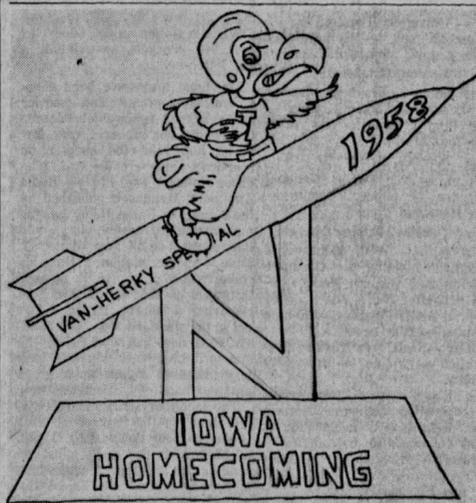

Lancashire said that in the answering fire, Nationalist artillery commanders, claimed their 355 mm. cannon and newly arrived U.S.-made 8-inch howitzers had knocked out 15 Red guns, 12 gun positions, and an observation post.

Could Withstand Siege
The Nationalist said they landed enough ammunition and supplies during the 15-day cease-fire to withstand a winter siege and answer the Red bombardment shell for shell.

A statement authorized by Dulles said U.S. warships may return to Quemoy escort duty if the renewed Red shelling makes it a military necessity.

This statement was followed by a briefing by Walter Robertson, No. 2 American at the talks. He is undersecretary of state for Far Eastern affairs.

Robertson went to some pains to deny there was any U.S. Nationalist rift. Rumors of a rift were circulated by low-level Nationalist officials who fear the United States wants Chiang to reduce his 100,000-man garrison on the off-shore islands.

Daily Iowan Sketch Of The 1958 Homecoming Monument

20-Foot Corn Monument Beginning To Take Shape

The pile of boards and rows of nails in front of Old Capital Monday are beginning to take shape today as the 1958 Homecoming corn monument construction gets into high gear.

The monument, 20 feet high, will put Herky on top of a white "Van-Herky Special" rocket. The rocket will be resting on a big purple "N", symbolizing Northwestern, and this in turn will be supported by a gold base with the black letters "Iowa Homecoming."

"We had hoped to finish the monument by Thursday," John Rump, E4, Burlington, publicity chairman for the corn monument committee, said, "but due to the rain Tuesday, we may not complete it until Friday."

The SUI Engineering students began work on the monument Oct. 13.

Members of this year's Corn Monument committee are: R. E. Beckett, associate professor in mechanics and hydraulics; Howard W. McCauley, associate professor of civil engineering; Don Waller, E4, Iowa City, student chairman; Bill Emanuel, E4, Iowa City; Tom Church, E4, Moline, Ill., and Ron Yaggy, E4, Mason City.

Darald Schultz, A2, Cedar Rapids, is supervising the art work on Herky.

The winning design for the traditional monument was submitted by Lionel Onomura, E2, Honokaa, Hawaii. He will receive a \$15 prize for his design.

Second place went to Teodoro Segura, E2, Mexico City. He also placed second in the contest last year and will receive a \$10 prize.

If the Hawkeyes are victorious in the Iowa-Northwestern football game Saturday, the monument will be burned to the ground.

It Seems Nothing A Fellow Does Turns Out Right
MONROE, Mich. (AP) — Two weeks ago, Albert McMullen's house burned.

Friday, his neighbors staged a benefit dance and raised \$180 for him, his wife and four children.

Tuesday, McMullen was arrested on a charge of arson in the destruction of his home.

Weather Forecast

WEATHER TODAY
Fair and warmer. High 70s, low 50s.
FRIDAY
Partly cloudy, mild.

SUI's 'Picnic' Opens Tonight At U-Theatre

Entire Run Almost A Complete Sellout

University Theatre's production of "Picnic" is a near-sellout for its entire run. About 50 tickets are left—all for Tuesday night's performance.

When the curtain goes up on William Inge's prize-winning play at 8 p.m. today, it also will open the Theatre's 38th dramatic season. Directed by Ronald Gee, drama professor, "Picnic" will run through Saturday this week and Tuesday through Saturday next week.

Not Like Movie
Gee says he never saw the movie version of "Picnic." He said he has attempted to give his own interpretation of the play instead of trying to reproduce the Hollywood production. Gee has even substituted other music for "Moonlight" and "Picnic" which moviegoers remember.

Inge set the play in a prairie town typical of his native Kansas. In a village of clapboard houses and quiet streets he develops a drama around the not-so-quiet lives of several of its citizens.

Top Playwright
Considered one of the outstanding playwrights of contemporary American Theatre, Inge also has written "Come Back, Little Sheba," "Bus Stop" and "The Dark at the Top of the Stairs," which is still playing in New York.

Students and faculty may get tickets—as long as they last—by showing their ID's or staff cards at the East Lobby Desk in the Iowa Memorial Union, open 9 a.m. until 4:30 p.m. Monday through Friday and 9 a.m. until noon Saturday.

Drake University Denies It Intends To Quit Football

DES MOINES (AP) — Dr. Henry G. Harmon, president of Drake University, said Wednesday night the school has no plans to abolish intercollegiate football.

"The dropping of football is not under consideration," he said in a statement. The Drake Athletic Council planned a meeting today to make recommendations on the future course of Drake athletics, particularly football.

"I am positive that football will be continued at Drake," Harmon said. "We are in a program of building athletics at Drake which obviously could not include discontinuance of a major sport."

From Delightful Opening Mozart—

A Brilliant "First Of The Season" Concert

—A Fantastic Symphonie Fantastique

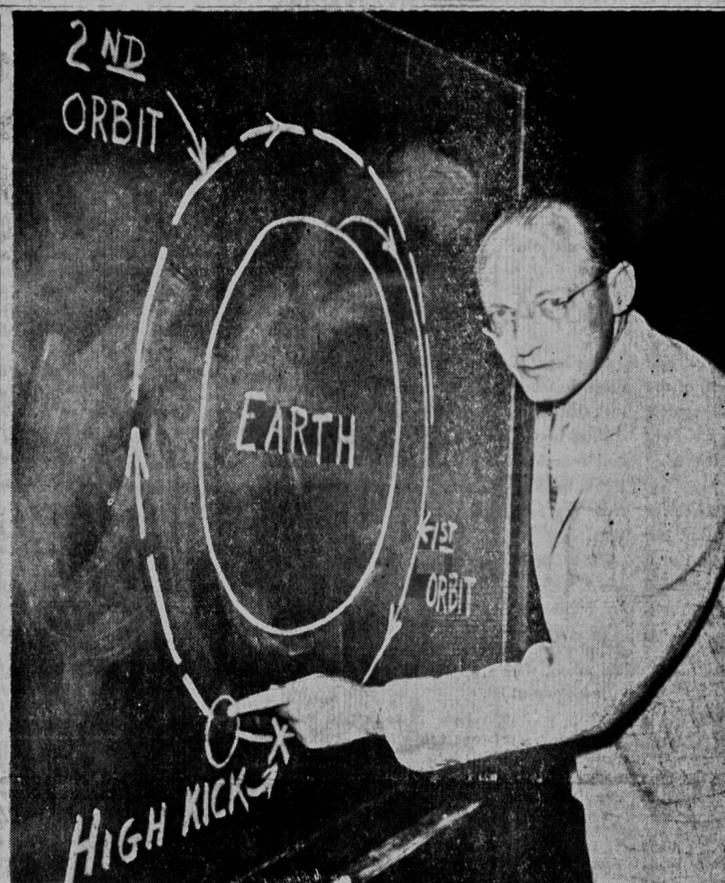

A Daily Iowan Review By JIM WILKE

The State University of Iowa Symphony Orchestra, under the baton of James Dixon, turned in a fine performance of staple material Wednesday night to a sell-out crowd in the Main Lounge of the Iowa Memorial Union. It was an appreciative audience, and rightfully so, for the concert was one of the best "First of the Season" concerts ever to be heard by these ears.

The opening "Overture to Don Giovanni" by Mozart, was treated with the usual lightness and good taste that make Mozart delightful opening material. Except for a couple of slightly rough spots in the more difficult passages, the orchestra was quite unified and the performance was good.

Violin soloist Stuart Canin performed well in the A Minor Violin Concerto by Glazounoff, as did the rest of the orchestra. The horns, and other sections, performed as if the rehearsal for this selection had been highly intensive, which undoubtedly, it had.

Mr. Canin, especially, performed the most difficult passages (including those for the violin alone) with apparent ease. The sections that rapidly were played with considerable facility on the part of all members of the orchestra. Only once did the orchestra appear to lag, and then only briefly, as Mr. Dixon's baton soon coaxed the orchestra to its

Orbit Of Balloon
FATHER OF BALLOON SATELLITE, William J. O'Sullivan, explained Wednesday the plan to rocket the balloon 400 miles into space with a Jupiter C missile Wednesday night. O'Sullivan designed the 12-foot aluminum foil sphere which, if orbiting around the earth, would be clearly visible with the naked eye. —AP Wirephoto.

Ike, Hagerty, Truman, Nixon, Stevenson — Politics Busting Out All Over

By THE ASSOCIATED PRESS
President Eisenhower wound up a coast-to-coast campaign tour Wednesday night with a blistering attack on domestic policies of the Democrats. He said the Democrats could only offer the country deadlocked government.

Democratic leaders, campaigning just as hard for votes in the Nov. 4 congressional elections, accused Mr. Eisenhower of "surrendering" in Korea and Vice President Nixon of smearing the opposition.

Former President Truman accused President Eisenhower and Secretary of State Dulles of bringing about the present crisis in the Formosa Strait through a policy of "blunder, bluster and brink of war."

He told newsmen in Wilmington, Del., where he later addressed a rally, that Mr. Eisenhower went to Korea in 1952 "and surrendered to the Communists."

In Chicago, the President's press secretary, James C. Hagerty, promptly fired back an assertion that Truman was doing some political rewriting of history. He

said the former president would have a hard time selling it to the people.

Vice President Nixon said the nation may pay the price of runaway inflation if it gives "radical" Democrats the balance of power in Congress.

In appearances at Hartford, Conn., and Burlington, Vt., he bid for support of Democrats and independent voters. He said he thinks many of them agree that the six years of the Eisenhower administration have been the best of their lives.

In Washington, addressing the National Press Club, Democratic National Chairman Paul M. Butler blamed the recession on the Republicans and said they had created a \$12 billion deficit.

Butler accused President Eisenhower of campaign name calling and said the Democrats are indignant.

Butler said Vice President Nixon has been using ugly language and that GOP National Chairman Meade ALCorn has been trying to scare the voters by saying a Democratic victory in next month's Congressional elections would lead to socialism. He added: "We are angry at the smears which have been leveled against us. We are indignant over the name-calling. We are going to fight back hard and clean and with redoubled vigor. And when we win we are not going to stoop to recrimination and partisan bickering during the last two years of the Eisenhower term."

Whereabouts Of 'Beacon' A Mystery

Radio Contact Lost Before 3rd Stage Fires

CAPE CANAVERAL, Fla. (AP) — The Army launched a balloon satellite toward space Wednesday night but apparently failed to put it into orbit.

A statement issued in Washington by the Defense Department and the International Geophysical Year Committee 2 1/2 hours after the launching said:

"Radio records received from the satellite instruments package show the performance of the rocket was not normal.

"While the information available is not easily interpreted it is practically certain the experiment was not successful and an orbit was not achieved."

The spectacular launching at 9:21 p.m. (Iowa time) appeared to be perfect from the ground, but when the signals were lost 10 seconds before the second stage of the mighty Jupiter-C launching rocket was due to ignite, the whereabouts of the "Beacon" became a mystery.

But scientists said it was possible that the satellite might start beeping again 90 minutes after launching when a small radio transmitter within the satellite was due to start operating. This would come when the balloon was scheduled to pop free of the 50-inch-long cylindrical satellite case on the start of its hoped-for orbit.

This was the sixth attempt by the Army to fire its mighty Jupiter-C spaceward.

Three of the previous launchings were completely successful. The shot was unique in that an attempt was to be made to free and inflate the balloon after a 50-inch long cylindrical case was fired into an orbit some 1,500 miles above the earth.

If everything went well, the United States would have the first satellite visible to the naked eye.

Even at maximum altitude, the 12-foot diameter balloon while reflecting the sun should be as bright as the stars in the Big Dipper. It will glow brighter as it descends toward earth in its orbit, and will be observable just before dawn and at twilight.

The 94-pound balloon, called Beacon by the sponsoring National Aeronautics and Space Administration, was made of a tough plastic called mylar with a thin coat of aluminum. If successful, it could float around the globe for a week or a little longer before dropping back into the earth's atmosphere.

During that time, scientists hope to track Beacon visually to learn more about the behavior of the varying density of the earth's atmosphere at extreme altitudes.

The balloon-equipped satellite and its propelling rocket vehicle comprise perhaps the most complex long-range missile ever fired from this testing ground. Four rocket stages had to fire in sequence before the satellite case, weighing 28.6 pounds, was finally hurled into orbit at an 18,000-mile-an-hour speed.

Then, when it had gone halfway around the earth, a tiny solid-fuel booster rocket in the nose of the satellite was to give the payload what missilemen call "a kick in the apogee." That meant it should boost the satellite far from the earth so that the apogee — the most distant point — of its elliptical orbit would be some 1,500 miles. The perigee-point in orbit nearest the earth — was expected to approximate 400 miles.

If all went according to plan, two other new satellite objects in addition to the balloon would be placed in orbit. They were the satellite case carrying a 2-inch channel radio transmitter and the spent fourth-stage rocket.

The transmitter, operating on 108.3 megacycles, will help tracking stations locate the satellites during the initial stage of the orbit.

The stainless steel case was decorated with 42 big white polka dots to protect the transmitter against extremes of heat and cold. Earlier Explorer satellites used vertical stripes of aluminum oxide paint to balance the temperature.

The Daily Iowan is written and edited by students and is governed by a board of five student trustees elected by the student body and four faculty trustees appointed by the president of the University.

Sneak Preview

Pulses quickening, corn monument going up on the lawn of Old Capitol, students working frantically in some old barn over a mass of chicken wire and napkins, all signs indicate that Homecoming is near.

Clouds of smoke will drift over campus as students try to fire up a dew-dampened corn monument, finally succeed in igniting a feeble blaze by pouring on used oil obtained from a nearby service station.

The Bottle, Nikita, And Iowa

Iowa might be able to use a man like Nikita Khrushchev. The tipping head of the Soviet Union has proclaimed a crusade against drunkenness, something this state has long needed in order to enact legislation legalizing liquor by the drink.

Perhaps there's another reason Iowans don't demand liquor by the drink. A legend says that an ancient pagan czar in Russia was casting about for a religion for his people and considered conversion to Islam.

Red Overtures Toward Yugoslavia

Nikita Khrushchev Marshal Tito Soviet Union Again Wooing Yugoslavia

By J. M. ROBERTS AP News Analyst

Nikita Khrushchev has rejected the American proposal for a United Nations economic aid program in the Middle East. This comes as no surprise. The surprise would have been if he had agreed.

pendence of Soviet political control again last spring, and the water was cut off again. Red China abetted the Soviet action by cutting off trade. Now the Soviet Union is renewing its efforts to make the Middle East believe that aid from Moscow is safer than from the West.

Cardinal Can't Go To Papal Election

VIENNA (AP) — Red-ruled Hungary has rejected an American request to let Josef Cardinal Mindszenty go to Vatican City for the papal election.

The disclosure Wednesday night by U.S. Charge d'Affaires Garret Ackerson at Budapest said the U.S. Government asked for safe conduct for the Cardinal through Hungary. He took asylum in the Budapest embassy during the 1956 Hungarian revolt and has been there ever since.

Secretary of State Dulles, now on Mindszenty Formosa, attended final rites for the late Pope Pius XII at the Vatican last Sunday as one of President Eisenhower's three personal representatives. Mr. Dulles presumably interceded for Cardinal Mindszenty.

Deemed Traitor

Budapest Radio said the Cardinal had been deemed a traitor and said the American appeal was a fresh attempt to interfere in Hungarian internal affairs.

Ackerson said the Hungarian Communist Foreign Ministry handed him a note branding as "gross interference in Hungarian domestic affairs" the American request for safe conduct for the Cardinal to attend the Conclave of Cardinals to elect a new Pope.

The U.S. government made the request on behalf of the Vatican.

Hungarian Note

The Hungarian note stated: "Per-

mission for Josef Mindszenty to leave the country, remission of his sentence or its suspension are entirely internal matters for Hungary which cannot constitute a proper subject for any Hungarian-American negotiations."

Cardinal Mindszenty was under life sentence for treason when Hungarian Freedom Fighters released him in October, 1956.

In Vatican City, deep regret was expressed by Vatican circles over Hungary's rejection of the American request.

Remains As Symbol

Cardinal Mindszenty has never left Hungary in the 13 years of Communist rule. In the past, he has expressed fear that the Communists would not let him return. He preferred to remain as a symbol for Hungarian Catholics, even in confinement or refuge.

Radio Budapest stressed that the Cardinal had been deemed a traitor. It broadcast the rejection without mentioning the fact the U.S. request for permission for him to leave the country was for Cardinal Mindszenty to travel to Vatican City for the conclave to elect a new Pope.

Six Killed In Air Force Plane Crash

HARRISBURG, Pa. (AP) — A twin-engine C-47 Air Force plane crashed yesterday into a fog-shrouded mountain two miles from its destination during a driving rainstorm, killing four crew members and two military passengers.

The plane, flying on instruments through the rain and overcast, smashed into the tip of the 700-foot mountain, tore through 150 feet of dense woods, and then flipped over and burned.

All of the bodies were found pinned in the smoldering wreckage.

Air Force officials said these men were aboard the plane and were killed in the crash:

Capt. E. D. Kossick, pilot, of Struthers, Ohio; Capt. J. O. McMichael, copilot, of Cotton Valley, La.; Airman 2c William C. Bailey, flight engineer, of Williamston, N.C.; and Lt. Col. J. F. Tracy, navigator, of Rochester, Mass., and these passengers: Sgt. C. D. Jolley, of Buzzards Bay, Mass., and Sgt. S. W. Christian, of New Haven, Conn.

Officials said all the men were stationed at Perrin Air Force Base, Denison, Tex.

The craft was on a routine flight from Perrin AFB, Denison, Tex., to Olmsted AFB, a few miles from Harrisburg.

U.S. Has 1st Triple-Header A-Bomb Test

ATOMIC TEST SITE, Nev. (AP) — Three atomic weapons blasted the skies yesterday in the first triple-header ever staged by nuclear testers here.

The blasts were set off from anchored balloons at 6:30 a.m., 9:50 a.m. and 4:40 p.m. (Iowa time).

The Atomic Energy Commission is rushing to complete its schedule of shots before Oct. 31, date of a proposed ban on atomic tests. Total number of tests in the series has not been announced.

The first shot yesterday morning was the 10th and largest of the series. Its force was rated at more than that of 10,000 tons of TNT. There have been three other tests in the series in the same range, but this was slightly more potent. Much larger tests have been made in past years.

Heavens Turned Gold

The predawn blast from a balloon tethered at 1,500 feet fleetingly turned the heavens a gorgeous gold over several Western states. The mushroom cloud soared to 25,000 feet.

The second explosion, also from a 1,500-foot balloon, came in broad daylight. Even so, its flash was visible in Las Vegas 90 miles away. Its energy was something less than that of 10,000 tons of TNT.

The third shot was exploded at an elevation of 500 feet. Its power was announced as well below nominal.

Busy Day

All in all, it was one of the busiest days in test site history. Besides the conventional tests — aimed at developing an arsenal of small nuclear weapons — scientists conducted a safety test at 1:30 p.m. (Iowa time).

The safety test was held atop a 25-foot wooden tower. No details were given. Such tests are to determine the susceptibility of atomic devices to accidental explosion.

The most shots previously conducted at the site in a single day was two.

U.S. Has 1st Triple-Header A-Bomb Test

Record Vote Predicted For Nov. 4

WASHINGTON (AP) — A total of 76,565,504 voters are qualified to ballot in the Nov. 4 elections, according to official and unofficial estimates.

These sources predict a probable vote of 48,131,226.

Both figures, if borne out, would be records for a mid-term election. They contradict in some degree widespread reports of disinterest in the election of the fourth Congress of the Eisenhower Administration.

The tabulations are based on estimates and some official figures gathered by The Associated Press from state officials, party chairmen, and in some instances political writers.

The estimated registration is an increase of 1,686,358 over 1954, the previous record for a mid-term election.

It includes an official registration of 6,769,904 in New York State, made public Tuesday night. This is a record for a non-presidential year in the Empire State and is believed to reflect unusual interest in the lively Harriman-Rockefeller gubernatorial battle.

The estimated vote of 48,131,226 includes the 284,226 already officially recorded in the senatorial election in Maine on Sept. 8. It represents a gain of more than 3 1/2 million over the previous highest mid-term vote in 1954 and would be almost 63 per cent of the estimated registration.

Only a few states gather official registration figures, and some of these are not available until election day or later.

The total registration estimate for the country compares with a Census Bureau estimate of 104,600,000 potential voters — citizens 21 years of age and over in most states, 18 and over in Georgia and Kentucky. The potential vote increased 4,377,000 over 1954.

G.I.'s Money, Blood Save German Boy

BALTIMORE (AP) — Money from U. S. soldiers in Germany and blood from U.S. soldiers at nearby Ft. Meade helped give a 5-year-old German lad a new lease on life yesterday.

Blond-haired Klaus Kaemmerer underwent a "blue baby" operation at famed Johns Hopkins Hospital to correct a congenital heart defect. It prevented sufficient oxygen from getting to his lungs.

Some 500 members of the 71st Artillery in Karlsruhe, Germany, footed the bill for the trip and the operation by collecting \$2,500. Half of the blood used in the operation, a rare O-negative type, came from Meade soldiers.

"I'm happy it's over," said Mrs. Sigrid Kaemmerer, 26, who flew here Tuesday to be with her son. "I just couldn't sleep last night."

The attractive, blue-eyed mother looked tired when she talked to newsmen after the three-hour operation. But she had a ready smile when talking about her boy.

Dr. Alfred Blalock, the surgeon who developed the "blue baby" technique, performed the operation himself.

Klaus was placed on the critical list but this is routine after such an operation. He will remain critical, and in the recovery room, about three days.

Religious Organizations To Award Fellowships

Kent Fellowships for graduate study leading to professional work in higher education are now available to men and women committed to a religious life.

Election to the Society of Fellows of the National Council on Religion in Higher Education is necessary to receive a Kent Fellowship. The Council was founded to advance the concern for religion in liberal education. The Society of Fellows, an interdenominational organization, is comprised of men and women representing a wide variety of academic fields and religious affiliations.

Any Graduate Eligible

Any college graduate may apply for membership in the society.

Persons elected may receive awards for the academic year ranging up to \$1,800 for married students and \$1,200 for single students. Fellowships are awarded to between 10 and 15 persons each year.

Candidates must have intellectual ability and personal religious orientation in the chosen field.

Request Forms

Prospective applicants should request application forms from the National Council on Religion in Higher Education, 400 Prospect St., New Haven 11, Conn., allowing time to submit the completed application on or before Jan. 24. Winners will announce prior to April 15.

All applicants must take a Graduate Record Examinations Aptitude Test, reporting scores to the National Council. Candidates who have not already taken this examination should take it either the Nov. 15 or Jan. 17 nation-wide testing. Information and an application blank may be obtained from Educational Testing Service, 20 Nassau St., Princeton, N.Y., or 4640 Hollywood Blvd., Los Angeles, 27, Calif.

Kingdon Writes Article On Religion And Politics In 16th Century Europe

Robert M. Kingdon, assistant professor of History at SUI, published an article titled "The Political Resistance of Calvinists in France and the Low Countries" in the September issue of "Church History."

The article is an expanded version of a paper read last December at the Society for Reformation Research, and the American Society of Church History.

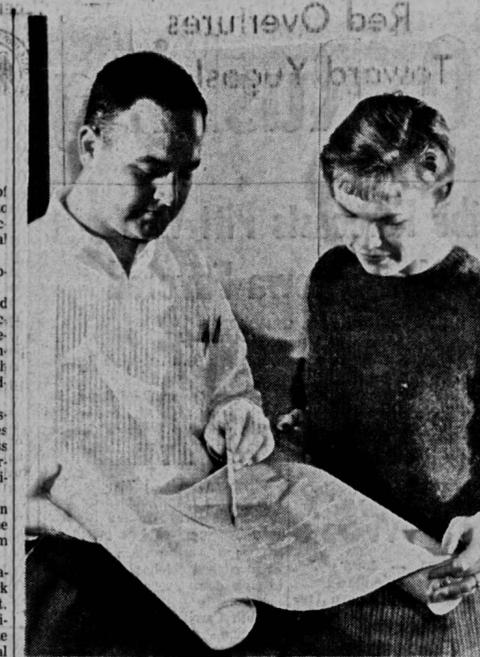

Kingdon's article explores the relationships between religion and politics in a period when they were particularly strong and important — in Europe during the sixteenth century.

The periodical "Church History" is an official publication of the American Society of Church History.

DENTISTS IN MEETING

Dr. Daniel E. Waite and Dr. Robert E. Swan of the department of oral surgery in the State University of Iowa college of dentistry participated in the Mississippi Valley Dental Meeting held in Davenport yesterday under sponsorship of the Rock Island and Davenport District Dental Societies.

Dr. Waite spoke on oral surgery and Dr. Swan on periodontics.

Data From "Pioneer"

Coded data from the 1 1/2 ounce radiation intensity detector carried in the pay load of the U.S. Army moon rocket "Pioneer" was returned to the State University of Iowa Wednesday for processing. Carl McIlwain of the SUI physics department, who brought the data to SUI from Space Technology Laboratories in Los Angeles, points out details of the coded graph to Pam Burke, A1, Homewood, Ill. The radiation intensity detector was developed at SUI by McIlwain and Dr. James Van Allen, head of the SUI physics department.

IOWA NURSES Association of the 5th District will meet at Mercy Hospital in Cedar Rapids at 7:30 p.m. Woodrow W. Morris, director of the Institute of Gerontology, will speak on "Psychology of Interpersonal Relationships in Hospitals."

AVIATION EDUCATION Association Officers will meet at 7 p.m. in the Recreation Area Conference Room in the Iowa Memorial Union.

UNION BOARD Opeh House Dance will be held in the River Room from 8:45 to 11:45 p.m. Friday. The party is open to SUI students, visiting high school bands and alumni. Jim Wilke and his combo will provide the music.

Moon Flight Possible, Ike Says

CHICAGO (AP) — President Eisenhower took a look into the space age yesterday and suggested that the wilder dreams of science fiction writers may be too tame.

"I think that what we have done in three years makes Buck Rogers in the funny papers look funnier," the President told a group of Republican women in a panel broadcast.

Asked if a flight to the moon is a possibility, Mr. Eisenhower replied: "It is not out of the realm of reason at all."

Edward S. Rose says —

Have you taken your VITAMIN — it pays to take the Proper Vitamin each day — the Proper Vitamin like our multiple Vitamin — a carefully formulated Vitamin Product of Vitamins, Minerals and Liver Extract — high Potency and priced low.

Jauch 2nd In Big 10 Rushing

Furlong Fifth; Duncan No. 2 Loop Passer

Ray Jauch of Iowa dropped to second place in the Big Ten rushing figures behind Ohio State's Bob White, according to figures released by the conference service bureau Wednesday.

White has gained 151 yards in 46 attempts while Jauch has picked up 142 yards in only 16 rushes. Both have played two games with White averaging 3.3 yards per carry and Jauch 8.9.

Furlong Fifth
Iowa's Kevin Furlong is listed in the No. 5 spot with 94 yards gained in 18 attempts, and Hawkeye full-

Shares Honor

DICK THORNTON, Northwestern quarterback, became co-back-of-the-week with Richie Petitbon, of Tulane, for outstanding performances last Saturday. Football experts from all over the nation gave the two equal honors in the Associated Press poll. Thornton was a major factor in the Wildcats surprising 55-24 win over Michigan.—AP Wirephoto.

back Don Horn is 10th with 80 yards in 17 carries.

Randy Duncan lost his No. 1 position to Bob Hickey of Illinois when the Illinois quarterback hurled a pair of long touchdown strikes in a 20-8 victory over Minnesota. Hickey has 12 completions on 27 passes for 267 yards and three TDs, Duncan 15 of 31 for 239 yards and one score. Mitch Ogiego of Iowa ranks ninth with six successful aerials on 16 tosses for 62 yards.

Hickey also moves to the No. 1 spot in total offense with 272 yards — five by rushing while Duncan is second with 259 — 20 by running. Jauch's 142 yards put him eighth in total offense.

White Leads
White, by scoring four touchdowns in the Buckeyes' 49-8 win over Indiana, takes over as the Big Ten's leading scorer with six TDs for 36 points. Duncan and Ron Burton of Northwestern are tied for second with three touchdowns for 18 points.

Don Norton, Iowa end, caught only one pass in the Hawkeyes' 20-9 victory over Wisconsin and dropped from first in pass receptions to a tie for second with Fred Williamson of Northwestern with five. Norton has 65 yards by passes, Williamson 63.

Rich Kreitling of Illinois, who was on the receiving end of the two long aerials by Hickey, ranks first with seven catches for 212 yards.

Two Big 'I's' Says Hawks' Scheuerman

The success of the Iowa basketball team this season depends on at least two big "I's," Sharm Scheuerman, Iowa's new head basketball coach, told the Iowa City Optimist Club Wednesday.

If Frank Mundt can develop at the center position, and if Nolden Gentry can become more "offensive conscious," Scheuerman said, the Iowa team could have a good year.

Strong Squad
Scheuerman described the squad as strong at the guard positions, with five veterans — Mike Heitman, Bobby Washington, Earl Nau, Clarence Wordlaw, and Joe Williams — returning this year. Two sophomores, Bob Carpenter and Ron Zager, and junior Les Kenney, a former Illinois all-stater, are also top guard prospects, Scheuerman said.

The Hawkeye coach predicted that Northwestern, Purdue, and Michigan State would be the toughest teams in the Big Ten this season and that the conference would be stronger this year than last.

Spirit High
Scheuerman said that the spirit of his squad, which began practice a week ago, is high. He said that he had worked with a nucleus of five or six of the players while assisting the late Frank "Bucky" O'Connor, and that the relationship he had formed with them would be helpful in his first year as head coach.

In speaking of Iowa generally, Scheuerman predicted that it would remain at the high level it has been in past seasons. He said that the spirit of the players, the support from fans across the state, and the athletic staff assembled at SUI would all contribute toward maintaining Iowa's position as a top basketball power.

Hawks Prime Pass Attack

Iowa's Hawkeyes stressed offense Wednesday afternoon in preparation for their homecoming game Saturday with Northwestern. Quarterbacks Randy Duncan and Mitch Ogiego looked sharp in a passing drill.

Captain John Nocera, who missed the Wisconsin game with an injured knee, alternated with John Brown at fullback on the second unit. Two other injured players, end Al Miller and halfback Bill Gravel, also rejoined the second team. Miller and Jeff Langston worked at left end, and Gravel alternated with Bob Jeter at left halfback.

Senior tackle Bill Scott had his hand in a cast Wednesday. He was stepped on in Tuesday's practice, but head trainer Doyle Allsup says he'll be ready by Saturday.

Two other line-up moves had Lloyd Humphreys at first string center, and Jerry Mauren alternating with Willie Fleming at right halfback on the second team.

EVANSTON, Ill. — Gene Gossage, left tackle and a key Northwestern lineman, Wednesday was able to participate in his first contact drills of the week after nursing a bruised shoulder.

Coach Ara Parseghian said morale remained high for the Iowa game and there is no sign of a let down after running up the 55-24 victory over Michigan last week.

Sophomore tackle Dewitt Hoopes of Massillon, Ohio, was suited up after X-rays of his foot showed no fracture.

Scribe Forecasts Pitt Win Over Army; Iowa Favored

By WILL GRIMSLEY
Associated Press Sports Writer

NEW YORK (AP) — Eenie, meenie, miney, mo... catch a favorite by the toe... if he hollers, let us crow.

Georgia Tech, Iowa and Cornell gave us the smell of roses last week 37-13 for 740, but scents change swiftly. We look for another bad day for the titans.

Upsets Forecast
Pittsburgh 15, Army 14: Nation's No. 1 team hobbled by Pete Dawkins, Harry Walters injuries. Ivan Tonicic gives Pitt punch.

Iowa 21, Northwestern 14: Hawkeyes' rugged defense good enough to slow down speedy Ron Burton and Co.

South Carolina 18, Clemson 12: Tradition overwhelms form in this State Fair fixture Thursday, with another perfect record collapsing.

Navy 28, Penn 14: The Midshipmen bound back from last week's loss to Tulane.

Rice 12, Texas 7: When I doubt in the Southwest, go with the home team.

Notre Dame 14, Purdue 8: Good chance for the Boilermakers to score another upset here, but Irish casualties are returning.

34 Point Average
Princeton 33, Cornell 13: The Princetonians are averaging 34 points a game, improving with age.

California 6, Oregon 0: The Golden Bears are bold and confident.

Southern Methodist 13, Georgia Tech 7: This one is based on return of SMU's Don Meredith. If Meredith's out, so is SMU.

Washington State 8, Southern California 0: Quarterback Bob Newman the difference in a close game.

Ohio State 20, Wisconsin 7: Coach Woody Hayes should keep his shirt on this time.

Louisiana State 24, Florida 8: Billy Cannon is one of the best operatives in all Dixie.

Jeff Langston Unsung Hero Of The Week

CHICAGO (AP) — Iowa's Jeff Langston, an erstwhile third string end Wednesday was named "unsung hero" of the week by the Chicago Football Writers Association, for his play in the Hawkeyes' 20-9 defeat of Wisconsin.

Langston, normally No. 3 left end, was elevated to second string because of injury to another man. Against Wisconsin, he grabbed a fumble in the air and raced 21 yards for a touchdown which gave Iowa a 13-9 lead over the Badgers.

Play Praised
Jeff Langston, Iowa's unsung hero, is shown in a black and white photograph. He is wearing a dark jersey and is looking towards the camera with a slight smile.

Younkin—On A Limb

Iowa Fourth In Nation,
But Wisconsin Third?

By LOU YOUNKIN
Sports Editor

I see by a well-known weekly news magazine that I read all the Time that Wisconsin is the third-rated team in the nation and Iowa fourth. And the reason given for this amazing bit of deep thinking is this:

Wisconsin No. 3 "upset by a scrapping Iowa team 20-9 but still rated above the Hawkeyes because Quarterback Dale Hackbart had a bad day, setting up two Iowa touchdowns with fumbles."

What a great bit of thinking this is. Randy Duncan only completed six passes Saturday in 18 attempts although he went into the game with a completion average of 64.2 per cent. That was hardly a good day for Duncan but I failed to find his name anywhere on the glossy page.

Hackbart fumbled twice, true, but he didn't set the ball on the ground and whistle for the Hawkeyes to come and get it. His first fumble was, when badly rushed, he got off a poor ritchout that was pounced on by Iowa's alert Kevin Furlong and led to Iowa's first score of the game.

The second fumble was when the Hawks' line stormed through to break up a pass and Don Norton really creamed him. The ball bounced into the hands of Jeff Langston and the Iowa City end hot-footed it across the double chalk-line to give the Hawkeyes the lead they never relinquished.

What the heck was Hackbart supposed to do? I personally thought he was quite a ball player. He directed the Badgers well and threw a 31-yard TD pass to Ron Steiner, but he had a bad day.

I don't think so. I think it was just a case of Iowa having a good day even if some people don't think so.

One thing Time didn't mention was that the Hawks stalled Wisconsin three times inside the 10-yard-line. It must have been that darn Hackbart. He only directed them that far, from then on they were on their own.

Iowa won the statistical edge too. In fact the Hawkeyes took everything but the goal posts, but Wisconsin ranks higher because Hackbart had a bad day. Baloney.

With thinking like this the Milwaukee Braves are the World Champions of baseball. Of course the Yankees won the series, but it was because the Braves failed to hit with men on base the last three games and had some costly errors.

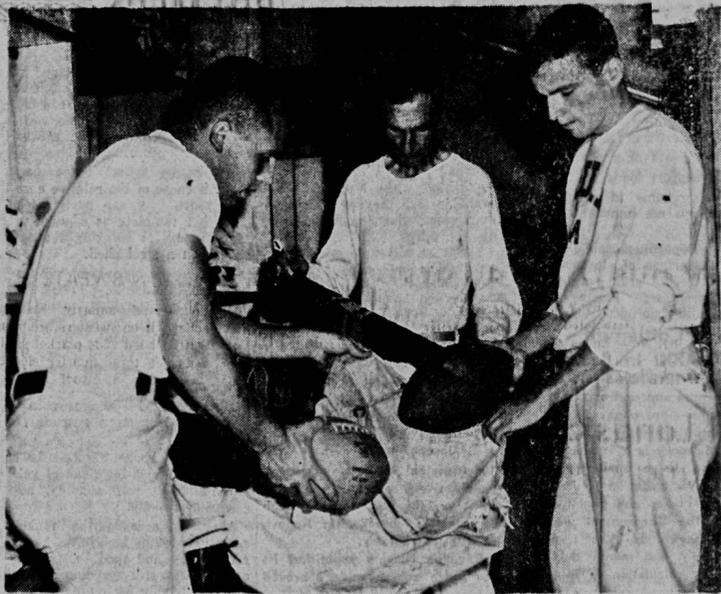

The facts are the Yanks won the Series because they had the better team when the chips were down which is exactly what Iowa proved against Wisconsin Saturday. Another similarity is Iowa overcame a 9-0 halftime deficit and New York won the championship after trailing three games to one.

Another bit of picking of them out of the hat was Ohio State in first place. Woody "Out-On-The-Field" Hayes has another fine team at Columbus, but as yet the Buckeyes have not proven themselves as a No. 1 team.

Ohio State ripped up pitiful Indiana, 49-8 Saturday and this is what evidently put them in the top slot. It was the Buckeyes' first show of strength this year after squeaking by in their earlier games and I don't think by blasting a building Hoosier team they deserve the top billing. At the moment only Army has torn up all its opponents and that includes a 14-2 win over always tough Notre Dame.

I'm convinced that someone in the sports department closes his eyes, points to a page with a list of the country's major football teams on it, and says, "Look fellows, Ohio State is first this week, how'll we explain it?"

I guess I should be grateful he pointed to Iowa fourth. It looks good in the big national magazines you know.

Ready For Homecoming

THREE MEMBERS OF the Iowa football picture, from left, Bob Steele, A4, Cedar Rapids, senior manager; Doyle Allsup, head trainer; and Jack Grier, C3, Ottumwa, junior manager, prepared equipment Wednesday afternoon for Iowa's homecoming football game with Northwestern University's unbeaten Wildcats Saturday.—Daily Iowan photo by Scott Clark.

Hawks Try Eager Wildcats In Iowa's 47th Homecoming

Iowa's first homecoming football game was 46 years ago, back in 1912.

Homecoming No. 47 will be Saturday and the game will be played against a new opponent, Northwestern. Both Hawkeyes and Wildcats have 2-0 marks in league play and share the lead with Ohio State.

Great Battles
The homecoming record now stands 22 wins for Iowa, 20 for opponents, and four ties and some of the greatest games in Iowa history have been played before the homecomers.

Teams coached by Forest Evanshevi have a mark of four wins, one loss to Michigan in 1956 in the final 66 seconds and one tie. His teams have played a different Big Ten opponent each year since 1952.

One of the greatest upsets in Big Ten history was enacted before homecomers just six years

ago Saturday. Evy's first Iowa team beat Ohio State, 8-0, when the Hawkeyes, underdog by several TDs, did not permit the Buckeyes to get inside the Iowa 30-yard line and held them to 42 yards by rushing.

Other Victories
Some of the other fine wins: over Purdue in 1954, on a 25-point splurge in the first half; over Indiana in 1949, on a 28-point outburst in the second half; over Wisconsin in 1942, which kept the Badgers from title; over Minnesota in 1939, after trailing, 9-0; over Minnesota in 1918, first Iowa victory over Gophers after a dozen defeats; and over Illinois in 1925, when Red Grange was overshadowed.

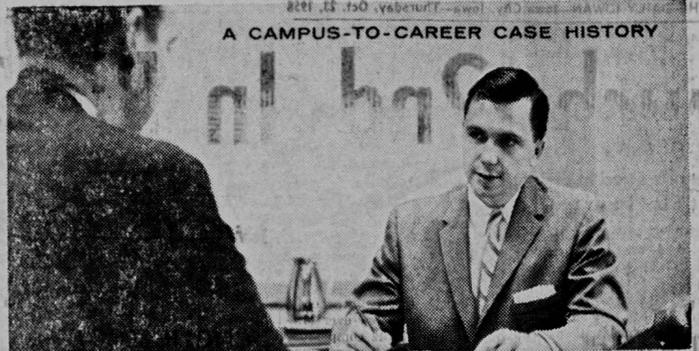

The biggest crowd of them all, some 59,400, is expected to be in Iowa stadium. The record of 58,147 was set when Iowa beat Wisconsin in the 1957 homecoming game.

Press, Radio Slate Heavy Coverage of Iowa, NU Contest

Heavy press and radio coverage in the University of Iowa's new press box has been assured for Saturday as the Iowa-Northwestern meeting of unbeaten Big Ten teams takes on added importance.

In addition to the Iowa regulars, the game will be covered by four Chicago newspapers, (Tribune, News, Sun-Times and American); Minneapolis Tribune, Omaha World-Herald, Detroit Free Press, Milwaukee Sentinel and Rockford, Ill. Star.

Fourteen radio stations will originate broadcasts and there will be 23 "feed" stations. Closed circuit television will be piped into auditoriums in Des Moines and Cedar Rapids.

A CAMPUS-TO-CAREER CASE HISTORY

"I have 43,000 reasons why I'm sold on my job"

Emil R. San Soucie got his A.B. degree from Harvard in 1954. He joined the Bell Telephone Company of Pennsylvania in early 1955. Today, three short years later, he's in charge of 35 employees in a West Philadelphia business office serving 43,000 customers.

"It's an interesting job," says Emil. "I guess that's because people are interesting. Every day, I talk with customers—and no two are alike. They all have different problems and service needs. That makes every working day different and stimulating for me."

"There's also a great sales opportunity. Homes and businesses need the convenience and efficiency that up-to-date telephone facilities offer. It's a

strong story, and we tell it often and enthusiastically.

"Outside the office, I'm active in local civic affairs. And I'm always a bit awed—and pleased—by the respect people show for the telephone company and for a young fellow in my position."

"I don't know where a man like me with management ambitions has a better opportunity."

Many young men are finding interesting and rewarding careers in the Bell Telephone Companies. There are opportunities for you, too. Talk with the Bell interviewer when he comes to your campus. Read the Bell Telephone booklet on file in your Placement Office.

Emil San Soucie sits in on a telephone sales contact by one of his Service Representatives to help her improve her sales technique.

Emil stimulates team competition in his office to increase interest in sales. Here he discusses quotas with his unit supervisors.

Iowa Roundup

By The Associated Press

Homer Hanged In Effigy; "Iliad" Is "Loser"

FAIRFIELD — An ancient Greek writer, dead nearly 3,000 years, was hung in effigy on the Parsons College campus here yesterday.

A small dummy found hanging in a large oak tree on the campus. Fastened to its coat was a letter sign, "Homer."

Homer was the author of the "Iliad," one of the great books being studied by Parsons students in a newly instituted humanities program.

Students have been engaged in a lively philosophical discussion over the roles of Hector and Achilles, two of the central characters in the book.

College officials said "whereas students at some schools vent their wrath on a football coach, Parsons students choose to level their sights on problems of an academic nature."

Driver Injured As Truck Struck By Train

RUTHVEN — A Milwaukee railroad passenger train hit an Iowa Public Service Co. truck at a country road crossing two miles east of here yesterday injuring the truck driver.

The driver, Chris Vanianbree, 37, of Emmetsburg, was taken to Palo Alto Memorial Hospital in Emmetsburg after the accident. His condition was not immediately determined.

Authorities said visibility is poor at the crossing because the train passes through a large cut near there.

Sioux City Woman Head Of Nursing Group

DES MOINES — M. B. Weiner of Sioux City was re-elected president of the Iowa Nursing Home Assn. yesterday.

Mrs. Mae Kennedy of Mount Pleasant and W. S. Bauman of Clarinda were re-elected secretary and treasurer, respectively.

Other officers elected were Walter E. Kyle of Waterloo, first vice president; Charles B. Shindler of Des Moines, second vice president, and Mrs. Eileen Dennis of Atlantic, historian.

Miss SUI Pageant Entry Blanks Due By 5 p.m. Saturday

Applications for committee members for the Miss SUI Pageant must be submitted to the Union Information Desk by 5 p.m. Saturday.

Miss SUI will be crowned at the Winter Formal, Dec. 5.

The Miss SUI Pageant operates under the auspices of the Pageant Board, composed of three members each from Central Party Committee, Student Council and Union Board.

Bill Heyman, A4, Des Moines, has been selected chairman of the Pageant Board. Jim Farrell, A3, Perry, has been elected director of the 1958-59 Miss SUI Pageant.

Farrell will direct the Pageant Committee, composed of six students to be selected from the applications. Applicants who qualify for interviews will be notified Sunday.

2 SUI Profs In LeMars Meeting

More than 100 representatives of business, labor, agriculture and education will meet at Westmar College, LeMars, Nov. 1 to discuss a program of taxes and expenditures by state and local government units in Iowa, according to Marjorie Copeland of the Bureau of Business and Economic Research at SUI. The institute is co-sponsored by Westmar College and the Iowa Council on Economic Education, of which Miss Copeland is secretary-treasurer.

Two SUI economists will participate in the institute. Clark C. Bloom, SUI professor of economics, will speak on "Characteristics of the Iowa Economy," and C. Woody Thompson, director of the SUI bureau on "The Iowa College-Community Research Center." Presenting the "Prospects for a Prosperous Economy in the Upper Midwest States," will be Karl A. Scheid, economist with the Federal Reserve Bank of Chicago, formerly an instructor in economics at SUI.

World's Smallest

The world's smallest research rocket, the 1 1/2-inch-thick "Dart," is examined by Aldeane Comito, A1, Des Moines, and Donald Simanek, A4, Walker, co-chairmen of the SUI Physics Club Homecoming display. The Dart was used in Hudson Bay experiments conducted by Don Goedke, G, Maggard, in conjunction with the International Geophysical Year activities. It will be on display at the Physics Club exhibit this weekend in the Iowa Memorial Union. —Daily Iowan Photo

Displays To Feature Rockets, Rock Tools

Crude stone tools made by prehistoric Iowa Indians will contrast with modern man's outer space vehicles in two of the 17 exhibits at the State University of Iowa Memorial Union Open House Friday from 8:30 p.m. to 12 p.m.

Artifacts used by Iowa Indians hundreds of years ago will be mounted on a series of nine panels, showing various phases of Indian life. The articles on display will come from the collection of items uncovered by faculty and students of anthropology at SUI. Photos will show the site of recent excavations at Toolsboro near Wapello.

Towering above other exhibits, visitors at the Homecoming Open House will see a mock-up of the Jupiter-C rocket which powered the Explorer satellites into orbit.

"Spare Satellites" — the physics display will include "spare Explorer I and IV satellites, Deacon and Dart rockets and

other pieces of equipment used in outer space research which were developed at SUI as part of the nation's International Geophysical Year efforts.

Faculty and staff members will explain many of the exhibits to visitors attending the open house. Some of the displays are set up so that viewers may participate in carrying out experiments.

For instance, at the women's physical education booth, visitors will have a chance to test steadiness and their strength. Another part of the display will feature examples of nature craft made from native materials, such as cornhusk dolls and "pixies," which are representations of animals and people made from nuts and cones.

"Black Light" — The mysteries of "black light" — the ultra-violet light which minerals "glow in the dark" — will be demonstrated and explained at the geology department's exhibit. Rocks and minerals and many Iowa fossils, including a Mammoth tooth found in Iowa, will be on display.

Visitors can test their reaction time and also see demonstrations of the Galvanic skin-resistance test at the psychology department's exhibit. The principle of the Galvanic skin-resistance test is used in the lie detector.

A ball will float in air above a "jet table" at the mechanics and hydraulics department booth — which will contain research equipment used to explore the behavior of strong jets of air shot into surrounding air.

New Weapons — The Army and Air Force sections of the SUI military department will both have displays featuring new developments in weapons. The army exhibit will include models of missiles, atomic weapons and satellite replicas, while the Air Force display will include model airplanes ranging from the F-84 to the F-108, bomber models, and charts indicating the heights man has reached in his explorations of the skies.

The life-saving mechanical heart-lung machine used in delicate heart surgery at University Hospitals will be on display and a technician will explain how it works.

Safe Driving Club Meets Cool Reception

By BILL SCHUSTER Staff Writer

"Wait a minute! We are in no hurry to join a club as vague as that," is the general opinion of Iowa City high school students concerning a proposed safe driving club.

"We are not against such a club," said Miss Phoebe Welt, student council president of City High School. "If after all the facts are presented an efficient, worthwhile organization can be formed, we will participate."

The club under discussion was suggested by the Iowa City School Study Council at its last monthly meeting. Its purpose would be to encourage safe driving by high school students by giving them some form of recognition.

Students Make Rules — Rules would be drawn up by students with adult supervision. Each club would be free to organize membership as the students in that school desire. Early plans call for a student court of honor system or jury to determine membership.

Peter Perret, student council president of University High School also feels that not enough facts are known to take any definite action at the present time.

"The opinion among students with whom I have talked seems to be that no one knows exactly what the club will be or do," Perret said.

Express Misgivings — Miss Welt said that student opinion varies but "most students are expressing misgivings now." She explained, "Nearly 50 per cent of City High students have drivers licenses, so the feeling exists that it is not a very exclusive club."

"Also, students who now most need attention and help, those with violations, cannot join." Perret said that most of the students at University High are against limiting membership to those with no violations. Both schools seem to take a "wait and see" attitude.

News Digest

Agriculture Department To Offer Storage Loans On Grain Sorghums

WASHINGTON — The Agriculture Department announced yesterday it will offer special 90-day price support loans on 1958 crop grain sorghums in areas where storage is not immediately available.

The Department said there may be a shortage of storage as this year's record grain sorghum harvest progresses. Farmers unable to fulfill storage requirements would thus be unable to obtain regular price support loans.

The temporary loan program is designed to assist farmers during the period when storage is not available and prevent premature marketings which would depress market prices.

The loans will mature in 90 days after taken out or on March 31, 1959, whichever date is earlier.

They will be at 80 per cent of the regular county loan rates.

Iowa Cattleman Ordered To Pay \$805,000 In Back Income Taxes

WASHINGTON — A motion by Harry Schroeder, Tabor, Iowa, cattleman and real estate operator, to vacate and reconsider an order directing him to pay \$805,000 in additional income tax and penalties has been denied by U.S. Tax Court Judge John Mulrone.

Mulrone is a former member of the Iowa Supreme Court. The Judge made no comment in denying Schroeder's motion, which was based on grounds that he had new evidence to offer.

The taxes and penalties involved cover the years 1944 through 1947. The Government won its case against Schroeder in August, 1957, leaving the exact amount to be determined later.

Early last month the Internal Revenue Service submitted its \$805,000 calculation to Mulrone. The judge subsequently approved the amount.

A separate case involving about \$72,500 in tax claims against Schroeder for 1953 is still pending.

Another Powerful Russian A-Bomb Detonated North Of Arctic Circle

WASHINGTON — The Atomic Energy Commission last night announced detection of another Soviet nuclear weapons test, which it said was a powerful one.

This is the 12th Russian detonation announced by the United States since Sept. 30, when Russia resume testing. Like others, this one took place north of the Arctic Circle.

The launching came 21 minutes after the designated zero hour. This meant that several slight delays were called during the countdown to adjust minor technical problems.

Gen. John B. Medaris, Army missile and space chief told a reporter in Washington shortly before the launching that he anticipated no trouble in getting the rocket off the ground.

Wernher von Braun, the German-born chief scientist of the Army's missile program, watched the launching from Cape Canaveral.

Of the three previous Army satellite successes, Explorer I and radiation-probing Explorer IV still are

Jordan Whips Ortega In 12 Rounds; Promised Shot At Welterweight Champ

LONG BEACH, Calif. — Don Jordan of Los Angeles earned a crack at the world welterweight championship last night when he scored a split 12-round decision over Gaspar "Indian" Ortega of Mexico before a fanlike crowd in the ballroom of a local hotel.

Referee Frankie Van, under California's 10-point per round system, scored it 116-114 for Jordan and Judge Tommy Hart had it 116-114 for the Los Angeles contender.

Matchmaker Georger Parnassus promised the winner a match with the world champion, Virgil Akins of St. Louis, in Los Angeles in December.

For Sale: Moon House; Will Cost Only \$325,000

NEW YORK — For sale: moon house, prefabricated aluminum construction, air-conditioned; 54,000 square feet. Will build on your moon site. Price: F.O.B. earth, \$325,000.

That is the message a Chicago manufacturer will give the Government Tuesday when he presents a six-foot scale model of a proposed moon building design. The model was shown for the first time at a news conference yesterday.

The actual building would consist of a cigar-shaped living chamber, 520 feet long, 160 feet wide and 65 feet high. This domed, Quonset-type structure would be protected by a shield, 460 feet

31 Killed As British Airliner, Italian Jet Collide Over Anzio

ANZIO, Italy (AP) — A British turboprop airliner and an Italian jet fighter collided in a cloudless sky four miles over this World War II battlefield Wednesday.

Among the victims were a honeymooning American girl, the blonde former Diana Muckerman, 26, of New York City, and the Englishman she married in London Tuesday. The husband was Desmond Cubitt, son of a wealthy British building contractor.

The 31 persons in the passenger plane plummeted to death. The fighter pilot parachuted into the sea and was rescued.

The four-engine British European Airways Viscount was flying at 23,500 feet. The weather was clear but cold.

An airline spokesman said the collision tore open the front of the airliner's fuselage. The plane's pressurized cabin was decompressed suddenly, and most of the passengers were sucked out into the air.

Saw Bodies Falling
Mrs. Alida Carini, a Nettuno housewife, looked up and saw the

bodies falling, dark against the sky. "It looked like they were throwing leaflets out of the plane," she said.

Cosimo Baggialemani said he was picking mushrooms when he heard an explosion. He looked up and saw the flames. Then debris began plummeting all around him.

The Viscount plunged onto an Italian army artillery range about 500 yards from the Mediterranean and burst into flames. Pieces of wreckage flew over an area of more than a mile.

One Still Alive
One man was still alive when rescuers reached the scene, but he died in the ambulance taking him to a hospital.

The bodies of 27 others were scattered around the plane. Three bodies were found inside the burned fuselage.

There were 26 passengers and a crew of five on the plane. It was en route from London to Naples and Malta.

Among the passengers was Jane

Buckingham, 24, auburn-haired London model flying to Naples to see Indian Prince Shiv, to straighten out a romantic tangle.

Prince Not in Naples
Before leaving London Miss Buckingham accused Hungarian actress Eva Bartok of trying to woo the Indian prince away from her. But a spokesman for the prince's family said he was not in Naples. He was reported en route from London to Naples by car.

Also aboard the plane were two British reporters and a photographer who hoped to interview the 27-year-old prince in Naples.

The Italian airman, Capt. Giovanni Savorelli, ejected himself from his single-seater fighter plane seconds before it exploded after the collision. A fishing boat picked him up in the Mediterranean. He was taken to a hospital in grave condition.

Near Battle Ground
This fishing port, 30 miles south of Rome, and the adjoining town of Nettuno are where U.S. and British troops stormed ashore in one of the costliest battles of the Italian Campaign in World War II.

An American military cemetery, with the remains of U.S. war dead of the Mediterranean theater, is located on the opposite side of Nettuno from the crash scene.

AWK!
RAWSON, N. D. (AP) — Dispatching a chicken for the pot isn't a pleasant job.

Take the case of Duane Evanson, who swung a hatchet to decapitate a rooster, but missed. Well, not entirely. He severed the tip of a finger on the hand with which he was holding the fowl.

Almost 5,000 Homecoming Badges Sold

Nearly one fourth of the 20,000 Homecoming badges were sold by Wednesday afternoon, according to Ellis Newsome, chairman of the Homecoming Badge Sale committee and associate professor in marketing and journalism.

The 9-member team leading the sale at noon Wednesday was under the leadership of Reva Cohen, N2, Des Moines, Sigma Delta Tau. The team headed by Carol Sather, A3, Estherville, Alpha Chi Omega, is second.

The standings are based on money turned in at badge headquarters in the Key Room of Old Dental Building.

The other 20 teams and their captains are: Connie Coover, A1, Nevada, Jackie Bremhorst, A3, Des Moines, Polly Reynolds, A1, Charles City, and Julie Henderson, N1, Ankeny, all of Burge Hall; Jean Harmon, A2, Cedar Rapids, Delta Gamma; Karen Lee, A1, Chicago, Ill., Alpha Delta Pi.

The sale is being handled by the campus YWCA and they will earn a substantial share of their 1958-59 budget through commissions. The badge sale, totaling around \$5,000 will support the Homecoming activities.

Received Photo Awards
Gromer has won grand awards from the Photographic Society of America, and has received the Ralph F. Windoes trophies for being the most popular film-lecturer on the 23 town circuit of the World Travel Series for two consecutive seasons.

Other film lectures this season will include: "Italy—A Tale of Ten Cities" and "Brussels World Fair"; "All-Girl African Safari"; "South America Coast to Coast"; "Congo Conquest"; and "Jets, Missiles, and Man-Made Moons."

NO CHOP, BUT WOW!
NEWPORT, R. I. (AP) — John B. Dowdell, 21, of New York City, entered Wan Foo's Chinese restaurant and was hit with a bill for \$2,500 before he had even a morsel of food.

Dowdell came in through a 12-foot plate glass window with his car. The \$2,500 was for damages.

Merwin Hans Joins Department Of Labor
SUI graduate Mervin S. Hans, former Chief of Technical Services, Iowa State Department of Employment Security, has joined the Kansas City Regional Office staff of the U.S. Labor Department's Bureau of Employment Security.

Hans received his B.A. degree from SUI in 1943, and his Master's degree in 1949 from the University of Denver. A Lieutenant-Commander in the Naval Reserve, Hans is married and the father of two children.

Lecture On Amazon First Of Mountaineers Series

"The Mighty Amazon," a film lecture by Julian Gromer, will be presented in Macbride Auditorium at 7:45 p.m. Sunday as the first of the Iowa Mountaineers lecture series.

Tickets are available at Lind's Photo & Art Supply, 9 S. Dubuque; in the East Lobby of the Iowa Memorial Union Friday, Saturday, and Sunday; at the auditorium before the program; or by writing to the following address: Film-Lectures, P. O. box 163, Iowa City, Iowa.

Prices
Admission price for a single lecture is 80 cents for adults, and 50 cents for students and children. A seven program season passport costs \$4 for adults, and \$2.50 for students and children. A 14 program season passport for adults costs \$7.50.

This Sunday's film will include a visit to Belem at the mouth of the Amazon; Marajo Island, where cowboys ride horses, water buffaloes, or dugout canoes; and Manaus, the rubber-boom town of a half century ago, its past reflected throughout the city.

From the deck of a river boat running one thousand miles upstream, Gromer has photographed villages, tropical rain forests, river trains, and native wildlife.

Flier Starts Last Lap Of 7,000 Mile Flight
JUNEAU, Alaska (AP) — Distance flier Charles Banfe Jr. set out again Wednesday on what he hoped would be a 25-hour 10 minute nonstop flight from the Alaska capital to New York's Idlewild Airport.

The 39-year-old pilot lifted his Mooney Mark 20A plane from Juneau's Municipal Airport on a course over Seattle, about 1,000 miles southeast of Juneau. From there, he planned to turn eastward, for New York.

Banfe, a commercial airlines pilot who lives in Palo Alto, Calif., was forced down at Cardova, Alaska, last Friday less than halfway on a planned 7,022-mile flight from Tokyo to Miami.

Youth Returns To Eldora; Ran Away After SUI Meeting

Virgil White was returned to the Eldora Training School for Boys Wednesday, after being held for a day by Johnson County authorities.

White fled from a teacher and a group of other Eldora boys Monday in the Amana colonies. The group had been attending a meeting of the Iowa High School Press Association at SUI.

White turned himself in Tuesday afternoon.

SUI Pharmacists Elected To Office
Two SUI pharmacists were elected to offices this week at the meeting of the Fifth District of the American Association of Colleges of Pharmacy and the National Association of Boards of Pharmacy in Minneapolis.

Wendle L. Kerr, assistant professor and station pharmacist, was elected co-chairman of the Fifth District.

Henry P. Baumann, assistant professor, was elected secretary of the Fifth District.

Patrol Planes To Watch Back Roads

DES MOINES (AP) — The Iowa Highway Patrol's two airplanes, which have been responsible for 235 arrests on the highways in the last month and a half, are going to start concentrating on secondary roads.

Patrol headquarters said Wednesday the planes will be used to support an enforcement drive now in progress on farm and county roads.

Most of the 235 offenses spotted by pilots of the patrol planes in September and the first half of October were improper passing and stop sign violations, the Patrol said. Many were observed by the pilots while flying over secondary roads.

When a pilot spots a highway driving offense he directs a nearby patrol car to apprehend the driver.

Highway patrolmen and sheriffs throughout Iowa are setting up secondary road patrols because of an increase of 140 per cent this month in the traffic death rate of these roads.

Incomes At All-time High, Ike Says

CHICAGO (AP) — President Eisenhower said Wednesday night his Administration has brought the income of the American people to an all-time high without any help from "a federal wheelchair."

The President addressed his remarks to a Republican precinct workers rally in the International Amphitheater, winding up a coast-to-coast tour on behalf of Republican candidates in the Nov. 4 congressional election.

He quoted a report from the Council of Economic Advisors, Dr. Raymond S. Saurin, saying "personal income Mr. Eisenhower is at an all-time high and is continuing to rise. We can confidently expect further increases in jobs and in incomes as our economy expands."

Earlier, in the course of the President's campaign swing from Iowa to California, the White House accused former President Truman of trying to rewrite history in order to justify an "impossible" war in Korea—a "can't-win-it-war" that was taking a toll in Wednesday night's speech, Mr. Eisenhower, continuing what might be called his own version of

"give-em-hell" technique, accused the Democrats of spending too much money, trying to push into state and local affairs, and of being divided to the point where they are "incapable of offering America anything except deadlocked government."

Mr. Eisenhower said both Democrats and Republicans are united in a search for a peaceable world and a strong defense.

"But on matters domestic and nonmilitary," he said, "our political parties part company."

"Republicans practice efficiency and thrift. The dominant wing of the other party most assuredly does not."

"Republicans favor less Federal intrusion into America's city and community life. The radicals stand exactly for the opposite."

"Yet the opposition is so bitterly split as in fact to constitute two distinct parties, masquerading under one name. By virtue of its built-in antagonisms the opposition is incapable of offering America anything except deadlocked government."

In Wednesday night's speech, Mr. Eisenhower hit the same theme he sounded in California—where he first pinned the label "radical" on the Democrats and said they are dominated by left-wing elements.

Regents Meet Today, Friday In Old Capitol

The State Board of Regents, governing body of SU, will hold its regular October meeting today and Friday in Old Capitol.

It is customary for the regents to meet at the University at the beginning of the annual Homecoming weekend.

This month's meeting agenda lists only routine business affecting the University, SU officials said. The usual schedule for a board meeting includes committee meetings on Thursday and sessions of the whole board Friday.

Many members of the board will remain in Iowa City to take part in Homecoming activities.

Harry H. Hagemann, Waverly, is president of the board and David A. Dancer, Des Moines, is secretary.

Other board members are: Arthur Barlow, Cedar Rapids; Mrs. Morris Berkness, Armstrong; Mrs. Kenneth A. Evans, Emerson; Lester Gillette, Fortoria; Richard H. Plock, Burlington; Mrs. Joseph Rosenfield, Des Moines; Roy E. Stevens, Ottumwa; and Clifford Strawman, Anamosa.

Man Charged With Raping Girl, 15, Atop A Flagpole

EL PASO, Tex. (AP) — A 34-year-old El Paso car salesman Wednesday was charged with statutory rape of a 15-year-old girl he allegedly romanced atop a 65-foot high flagpole.

Charges were filed Tuesday against William H. Pettit, who spent 64 days on a flagpole as an advertising stunt.

Police Capt. H. T. Vogel said the girl, whose name was not revealed, had told officers she had been seduced about five times after climbing a rope ladder to the top of the pole several times.

Police said Pettit had been atop the flagpole on a 4 1/2 x 5 1/2 foot wooden platform for over two months. He finished his stint and descended about a week ago.

The parents of the girl brought her to the El Paso Police Department Tuesday where the girl gave a statement. They told officers they had known of her relations with Pettit but were not aware of any violation of the law when the girl consented. She had wanted to marry him, they said, but parental consent was withheld.

Several Hundred Tickets Left For Danish Concert

There are several hundred tickets left for the Danish National Orchestra concert, which will be given in the Main Lounge of the Iowa Memorial Union at 8:30 and 8 p.m. Monday.

Students and faculty may pick up free tickets by presenting their ID of staff cards at the Union Information Desk through Friday between 9 a.m. and 5 p.m., Saturday, 1 to 5 p.m., and the following Monday, 9 a.m. to 3 p.m.

Tickets for the concert will be available to the general public on Friday at 9 a.m.

The Danish National Orchestra, under the patronage of His Majesty, King Frederick IX of Denmark, is making its second American tour during October and November. The present 6-week tour takes it to 37 cities from coast to coast.

The orchestra will be under the direction of Thomas Jensen and John Frandsen.

The repertoire for this year's tour will be divided between Danish Masterpieces and the acknowledgment milestones of the international symphonic repertoire.

Murray Says Loveless Just Wants Elected

John Frandsen Conductor

LEAVE KOREA

TOKYO (AP) — Radio Peiping said Gen. Yang Yung, commander-in-chief of the Chinese Communist forces withdrawing from North Korea, left Wednesday for home. The radio said the withdrawal of Chinese forces from North Korea will be completed soon.

CLINTON (AP) — William G. Murray said Wednesday night Gov. Herschel Loveless is more interested in "retaining personal power" than in doing what is good for Iowa.

In remarks prepared for a Republican meeting here, Murray, Republican nominee for governor, said Loveless hasn't demonstrated "in one single instance... his interest in any positive good for Iowa."

He said the governor vetoed the Republican-controlled Legislature's program and that in the present campaign, instead of "fighting for the progress of Iowa," he has been "trying vainly to explain why Iowa has not progressed."

"What is he interested in?" Murray asked. "He is interested in getting re-elected, by whatever means, and when you have said that, you have summed up his entire campaign."

Army Missile Leaders Rap Space Agency Scientist Grab

WASHINGTON (AP) — Army missile leaders rose up in open protest Wednesday against the proposal that the new civilian space agency take over most of the Army's team of space-missile scientists.

The Army counterattack was launched at the annual convention of the U.S. Army Association, composed of active and reserve officers and representatives of military industry.

Heretofore, the Army leaders had been timid in voicing their feelings on the issue of surrendering their top men and much of their facilities for missile-space work.

"Disastrous" But now these officers, fortified by strong resolutions adopted by the convention, used such words as "disastrous" and "fatal" in describing proposals by the new civilian space administration.

Lt. Gen. Arthur Trudeau, Army chief of research and development, was one high-ranking critic of the proposals made by civilian space administrator Keith Glennan.

Trudeau said a breakup of the Army's space-missile team—including more than 100 German-born scientists—could result in the nation paying a price, and paying it soon, in defense against aggression from space.

Maj. Gen. John B. Medaris, the Army's missile boss, put it more bluntly, saying the proposal to split the Army's strictly space work from its military missile development could "obviously be a fatal thing."

Plan To like The Army association resolutions urged President Eisenhower to maintain the Army Ordnance Missile Command which has its headquarters at Redstone Arsenal, Huntsville, Ala.

The resolutions called for continued work by this Army group in "advancing the space capabilities of the nation and in developing essential military missiles." The Army got the word of the

impending proposal to surrender its major space and missile work about 10 days ago. Dr. Glennan, who became director of the new National Aeronautics and Space Administration made his request verbally to Army Secretary Wilber Brucker. This approach was made directly to the Army with the knowledge of the Defense Department and the White House.

Officials said Glennan had asked for about 2,100 missile scientists and engineers employed at Redstone Arsenal and the entire facilities and personnel of the Army's Jet Propulsion Laboratory at Los Angeles.

Last Wednesday, Mr. Eisenhower told his news conference that the final decision will be his, and it may not come for some time.

Trudeau said Wednesday the decision might be reached at a meeting of the President's space council on Oct. 28.

POLITICAL ADVERTISEMENT

MEMORANDUM
FROM THE DESK OF CHARLES A. HALLECK

We need more men of his calibre in Washington

Rep. Halleck, assistant minority leader, House of Representatives:

No member of Congress has demonstrated a better understanding of what is at stake. He is recognized by his colleagues as a man devoted to the American way, and dedicated to proving it is still the greatest system of government ever conceived.

I have in mind particularly his effective help on vital legislation involving mutual security, reciprocal trade and defense reorganization.

I have in mind also the splendid work Fred is doing among the young people of his district, to give them greater knowledge and appreciation of the way our government operates.

His record offers clear evidence of the energy with which he has worked for the people of the First District and the solid contributions he has made in drafting sound, far-sighted legislation.

Experienced Able and Dedicated

TODAY... The \$38,000,000 Electric Grid is Working for Iowans!

PROGRESS IS SHOWN on this map of today's Iowa Grid. The solid lines are high-voltage power circuits in the Grid System, which have been completed and are in operation. The dotted lines are circuits which are either in the construction or planning stages. Additional lines will be built as the need develops.

FIVE YEARS AGO the Utility Companies of Iowa backed up their faith in by announcing an ambitious plan for a state-wide electric Grid System which would interconnect the electric generating facilities of the various companies with high-voltage, high-capacity lines to provide better living electricity throughout Iowa. Today those promises have been fulfilled and the Grid System is in full operation. The participating companies are also connected and interchange power with utilities in neighboring states.

This availability of economical power in large quantities throughout Iowa means more jobs, more income and a brighter future for folks in all walks of life.

The Grid System will be expanded well ahead of the actual need for additional power in keeping with authentic, analytical forecast of the continuing industrial growth and development of Iowa. It is the pledge of these companies to keep plentiful power supplies available well ahead of your needs.

yours for better living
