**Shortage Of Men:**

**Indians No 'Ugh':**

Hello, California

by GEORGE ROYALE

FRIDAY NIGHT, THE 36th, IN DES MOLIN.

"Boy, do you think they want our kids here?" Don't beg to hear. Have a good time.

The night was cold and wet, but the station was full of relatives and friends saying goodbye to their loved ones, who were about to leave for various places. The train was leaving on time, and everyone was happy to see the Indians off. The luggage car was filled with bags and boxes, and the passengers were waving goodbye as the train pulled out of the station.

**DINNER ON THE TRAIN**

"Oh, my gosh, it's snowing!" exclaimed the woman in the car. "Isn't it a little chilly out there?"

The woman was wearing a warm coat and gloves, and was eager to reach her destination. The train was traveling through the snow, and the passengers were enjoying the view of the passing scenery.

**SATURDAY ON BOARD**

This day was spent traveling into the beautiful mountains area. At 1:30, the train stopped at the station to board the passengers. The train was filled with many workers who were coming back from their jobs.

**THE MOUNTAINS**

The train was going through the mountains, and the passengers were enjoying the view of the mountains and the snow-covered peaks.

**NEW MEXICO**

The train entered the state of New Mexico, and the passengers were able to see the beautiful desert landscape.

**THE END**

"It was the best trip ever!" exclaimed the woman in the car. "I wish we could do it again soon!"

The train continued on its journey, and the passengers were enjoying a wonderful trip.
In Defense

BY ELTON FAY
WASHINGTON — The United States is making no secret of its determination to keep the lid on the Russian war machine.

The American buildup has been slow but continuous. President Johnson has been spreading the word that the United States is prepared to use force if necessary to prevent the spread of communism.

Johnson’s message is reinforced by the actions of such high-level officials as Defense Secretary Robert McNamara, who has been warning that the United States is not to be underestimated.

The buildup has been accompanied by a strengthening of the military posture of the United States and its allies. The United States has been increasing its military expenditures and has been sending more military assistance to its allies.

In Science

SATELLITES WILL BE ROUTINE

BY ALTON BLANKER

Students in 1959 will blast into space on human spaceflights.

One month earlier, both U.S. and the U.S.S.R. will have put up into orbit satellites carrying experiments.

In 1959, the United States will become a regular user of satellites for national security, scientific, and commercial purposes.

Both countries will launch satellites in orbit at high speed.

In Business

‘59 LOOKS GOOD; ‘60 BETTER

BY WALTER SHEDER JR.

The outlook for business in 1959 is generally favorable.

In 1958, the economy was characterized by a strong recovery from the recession of 1957. The growth was fueled by increased consumer spending.

The economy is expected to continue to grow in 1959. The recovery will be driven by continued consumer spending and business investment.

In Diplomacy

SOVIETS PROBE FOR WEAKNESS

BY JOHN HOMESTEAD

The United States has been pushing for a peaceful resolution of the Cuban crisis. The United States has been asking the Soviet Union to withdraw its missiles from Cuba.

In Government

SATISFACTORY NEW YEAR'S GREETING

The President’s New Year’s greetings were met with a mix of reactions.

Some welcomed the message of peace, while others were critical of the President’s handling of foreign affairs.

In Music

BETTER MISSILES, FEWER GL’S, MORE CRAPWY

The new year is expected to bring a new wave of musical compositions. The compositions will be a mix of traditional and modern styles.

The Daily Iowan is the student newspaper of the University of Iowa. It is published daily during the academic year and weekly during the summer.
Eastern's Engineers Reject New Appeal

Pilots Deny Deliberate Yule Strike

CHICAGO (UPI) - Airline pilots on strike over Eastern Air Lines charges that it deliberately closed the Chicago terminal on Christmas Day ended their walkout today.

A representative of Eastern Air Lines said the airline has been receiving an average of 300 calls per hour from irate passengers since the strike began Tuesday morning.

The strike was called Dec. 25 in protest over a recent announcement by Eastern that it would close its Chicago terminal Dec. 25 to give its employees a four-day Christmas vacation, the longest in the airline's history.

The pilots say the move was an attempt to cut costs at the terminal, which they say is used only on weekends.

Eastern officials said the strike was unnecessary and that the airline had no plans to close the Chicago terminal.

Space Age Problem - How To Stay Cool In A 2,000° Oven

WASHINGTON (UPI) - How to stay cool inside a space ship is a problem when the outside temperature is 2,000° Fahrenheit.

The problem will have to be solved before astronauts can safely return to earth after a trip into space, according to Air Force scientific research reported today.

An air conditioned space ship will be needed to keep astronauts cool during long space flights.

Scientists know that exposure to a temperature of 2,000° Fahrenheit would cause death in seconds.

The outside of a space ship might reach such temperatures because of the intense heating from the sun and the ship's own power-system.

The spacecraft will have to be designed so that the astronauts remain cool enough to perform tasks.

Twelve-Ounce Baby Dies

Would Have Tied Record For Smallest Baby

Newark, N.J. (UPI) - Dr. Henry Adler, a 50-year-old pediatrician of this city, said today that a baby girl born to Mrs. O. Gorman of Hanover, N.J., weighed 12 ounces.

The infant was delivered Tuesday at the New York Hospital.

The baby girl was in good condition as she was delivered by forceps.

The condition of the infant was not known.

English Translation

The space ship would be heated at the rate of 400° Fahrenheit per minute to simulate the extreme temperatures encountered in space flight.

The astronauts would be able to breathe and to move around in the space ship during the test period.

The astronauts would also be able to communicate with each other and with the ground control center.

The astronauts would be able to work at their usual jobs in the space ship during the test period.
