GOP Women Hear Party Outline Creed

Party Outnumbered By Democrats

WASHINGTON (UPI) - President Eisenhower spelled out a six-point creed for Republicans Monday and said that Federal spending should be governed by the needs of the nation, "not by political opportunism."

He told 2,000 women attending the seventh annual Republican Women's Conference here that the GOP is badly outnumbered by Democrats and "all of us have to work hard" if the party is to win in the 1960 elections.

He laid down the creed which he said has been "lived and expounded by a long line of Republicans beginning with Abraham Lincoln. He told the women: "They have invariably insisted (1) upon the security of our nation; (2) upon the liberty and rights of the individual (3) upon respect for the rights and responsibilities of the several states; (4) upon honesty in Government; (5) upon fiscal integrity; and (6) upon expanding economy, based upon a dollar that, earned today, will buy tomorrow and the next day an equal amount of groceries."

The President earlier told 300 businessmen attending an advertising council conference that the nation "can't afford to relax for a minute" in the fight against inflation because "we can be certain that the problem will return to beset us."

He belittled arguments of some Administration critics who contend that the President has overemphasized the danger of inflation.

"They forget that it is too late to repair a leaky roof when the rain is pouring down," Eisenhower said. He noted that prices have held relatively steady for almost a year, but he added:

"This is exactly the time to think about inflation, because we can be certain that the problem will return to beset us. Only the most persistent counter-pressures will keep prices where they belong."

The two speeches were crowded into a busy 24-hour interruption in his golfing vacation at Augusta, Ga. He planned to resume his Georgia rest this afternoon.

Immediately upon his arrival here, the President drove directly to Walter Reed Army Medical Center to confer with Cancer-stricken Secretary of State Dulles, who re-entered the hospital Sunday after a 13-day rest period in Florida.

He revealed afterward that Dulles must undergo further cancer treatments and that no action would be taken on Dulles' future Government role until the secretary's physicians have made a medical evaluation of the results of these new treatments.

The President planned to confer today with House and Senate Republican leaders - their first parley since the Congressional Easter recess - and to participate in the dedication of a memorial to the late Sen. Robert A. Taft (R-Ohio), the Senate Leader when Eisenhower first took office.

In his speech to the Republican Women, he said that GOP party workers should be proud of the Administration's accomplishments in the past six years.

"Our prosperity, the increased standard of living for Americans, the security for ourselves and our friends through strength and understanding are facts beyond dispute," he said. "They are worthy of your pride. They have resulted from faithful adherence to the Republican creed."

He said Republicans believe "that the level of Federal spending should be measured by necessity, not by political opportunism."

7 SUI Students Charged In Local Soda Pop Theft

Jack Rule, A2, Waterloo, and Bill Hird, A2, Ft. Dodge, two prominent Iowa golfers, were among seven SUI students arrested in connection with the theft of six cases of pop from the Iowa City Elks Country Club.

Rule, current Iowa amateur golf champ and former national junior champ, and Hird are transfers from the University of Houston.

Arrested with the two were Charles Clausen, A1, Tucson, Ariz.; Don Paisley Jr., A1, Englewood, Calif.; Ronald George, A3, Cherokee; Lester Cutler, A1, Grosse Pt., Mich.; and William Meyer Hoff, A1, Highland Park, Ill.

The group was arrested about 5 a. m. Saturday after Fred Carey, manager of the Elks Country Club, informed police of the theft.

Police Judge Ansel Chapman continued the cases for two weeks, and released the boys on their own bond.

Discoverer II In Orbit; Vanguard Rocket Fails

Two Satellites In One Shot Attempted

Drops Into Ocean After 2d Stage Malfunction

CAPE CANAVERAL, Fla., (UP) - A Vanguard failed Monday night in an attempt to launch two new U.S. satellites in one firing in a unique two-in-one experiment.

The second stage of the Vanguard's three-stage satellite launching vehicle failed to function. The remaining portion of the rocket-including the two satellites-fell back into the Atlantic. The air force four and one-half hours earlier launched successfully a Discoverer II satellite into orbit around the North and South Poles in a firing from Vandenberg Air Force Base, Calif.

Second stage malfunction caused Vanguard failures on three previous occasions.

It was this country's first attempt to fire two satellites in one launching. Air Force Rocketeers on the west coast hurled a 440-pound artificial moon into an orbit that crosses the North and South Poles.

Nestled in the smaller Vanguard's nose were two unique moonlets much smaller than the Discoverer II satellite which went into orbit earlier. But, like Discoverer II, the Vanguard satellites could provide vital information on manned space flight.

The first Vanguard moonlet was a lollipop-shaped device which would explore the mysteries of the earth's unpredictable magnetic field. It was made up of an 18-inch cylinder containing an instrument called a magnetometer, attached to a 13-inch fiberglass-resin sphere.

The second satellite was an inflatable plastic sphere coated with aluminum. This was supposed to be blown up to its full, 30-inch diameter by nitrogen after the magnetometer was ejected from the Vanguard's third stage by a spring device. It weighed only three-tenths of one pound.

The Vanguard was ignited at 8:50 p. m., and lifted slowly off its pad over a ball of orange flame. It climbed straight up through multilayers of thin clouds and was visible for about a minute and a half before disappearing in the overcast sky.

The magnetometer satellite was christened Vanguard III-A and the inflatable sphere, Vanguard III-B. The National Aeronautics and Space Administration (NASA), in charge of the Vanguard firing, said that "without a doubt, Vanguard III-B will be the most economical satellite ever attempted. The aluminum foil and plastic that form the skin cost only 65 cents."

NASA said it would be about two hours before scientists could determine whether the two satellites went into orbit.

The crucial part of the 72-foot Vanguard's flight was the first ten minutes. Even with the firing of all three stages an orbit was not certain.

This depended on whether the third stage attained the necessary 18,000-mile-an-hour speed, and was headed at the proper angle in relation to the earth when the satellites separated.

It was the ninth try for the Vanguard, which made good in only two of its previous attempts. The cartridge-shaped Vanguard put up 6.4-inch Vanguard I on March 17, 1958, into an orbit expected to last 2,000 years. Vanguard II, the sea-ting-eye weather satellite, was fired last Feb. 17.

Education Is Hanging 'Round 'Til You Catch On - Frost

Frost Jokes At SUI In Free Verse

By TED RASMUSSEN Editorial Page Editor

Squinting out over shaggy white eyebrows, Robert Frost gestured at the spotlights in the Main Lounge of the Iowa Memorial Union last night and asked that they be turned off. "They put out my eyes . . . just like TV," the 85-year-old poet told his standing room audience.

The bright lights out Robert Frost, slightly stooped, but with a strong voice and clear eyes that seemed to be completely surrounded by white eyebrows, began to "snap and quip" with the SUI audience.

"Some people think I'm a wise guy, and can tell them of the future of the world," he joked. Frost poked fun at the notion, took a few whimsical jabs at science and scientists, at reporters, and then pointed out: "I'm talking to you in free verse, you know."

Speaking conversationally into a small microphone which hung from his neck ("like the Ancient Mariner's albatross," Frost remarked that he was particularly fond of the couplet.

Like a minister at a wedding, he said with a hint of a smile, "it brings this and that together."

Many of his couplets, he remarked, fell together while riding on trains or just walking "after midnight." One, however, came to him while he was nearing the end of his appearance on a recent television program:

Forgive O'Lord my jokes on thee,  
And I'll forgive your great big one on me.

Frost recited several short verses, and then, with a deep-throated, almost Brooklyn accent, said a word or two about Marx and Engels:

Them two panacea guys,  
Being so economics wise,  
Did man so homogenize,  
That the cream shall never rise.

After a sip at a glass of water, Frost treated the audience to several longer poems, including his "Death of the Hired Man," which at times he read, and at times recited. Interspersed with the readings were numerous anecdotes about poems, poetry, poets, and almost anything else which seemed to come to the aged poet's mind.

Fort Dodge Man Gets 15-Month Prison Sentence

SIoux CITY (AP) - A Fort Dodge bank employee was sentenced Monday to serve 15 months in federal prison on his plea of guilty to four counts of embezzlement and two counts of falsifying records of a federally insured bank.

Federal Judge Henry N. Graven allowed Robert L. Becher, 47, 30 days in which to straighten out his affairs before being taken to the prison. Becher had entered his guilty plea in the federal court in Fort Dodge April 6. He was charged with taking \$38,500 from the Union Trust and Savings Bank, where he was employed as assistant cashier. The money was taken between June, 1954 and June, 1958. The bank said full restitution had been made.

Tells Students Won't Explain Own Poetry

By MARLENE JORGENSEN Staff Writer

"Education is simply hanging 'round 'til you catch on," Robert Frost told the Poetry Workshop Monday.

The 85-year-old poet said that one cannot understand and appreciate poetry through one year in a course or through any book which attempts to explain poetry, but one must do a lot of reading of poems written by everybody.

When asked what a teacher can do to teach poetry in a classroom, Frost said, "I always get out of saying anything about my fellow poets. It would be better to spend the time learning, reading for pleasure, and discussing philosophic questions. There are many ways to pass the hours in the classroom, but not by evaluation and comparison."

Poetry critics are best at making anthologies, Frost said. "No criticism ever made a difference to me," he said. "If a poem needs explaining, let's throw it away. Criticism is not my job."

Frost said he did not read criticisms of his own poems. "I just ask, 'was it pleasant? Was it on my side? If they say, 'yes, but with reservations,' I say 'we'll forget about the reservations.'"

When asked to explain the meaning of his poem "The Directive," Frost said he was glad someone was concerned about it, but he would do no expatiating of his poetry. He said he would be pleased to hear someone else's version, however, but he did not see what was bothersome.

He asked what kind of explanations one could want, "one in other and worse English?" He defined what he called "duplicitry," a double meaning when poets say one thing and mean another. He said it was like a parable.

He also mentioned "ulteriority," which is meaning a little more than one says. "I don't mind what anyone sees in my poetry beyond the surface, as long as it is not degraded. I don't mind interpretations of my poetry as long as some of the poetic quality is retained. I am annoyed at degrading of poetry," he said.

Frost said that people get too worried about what things mean, and it is because they are too naive. "People have been interpreting things with duplicity for hundreds of years," he said, and gave examples of the "double crosses" of Odysseus and the Greeks.

"I know what I'm saying in my poems, but there is a certain looseness for everyone. It's nice when something I say can be used another way, but I don't try to keep up with all of them." Frost said that if someone writes to him for permission to use a part of his poems in an essay and asks if the publisher has to be consulted, he answers, "No, let's take a chance on that."

"Poets who write too much about poetry, leak in too many words which should stay in prose," he said. He defined poetry as that which is lost in prose and verse after translation. He said it could

Frost - (Continued on Page 8)

Stage Set To Catch Cone Of Satellite

May Save Equipment By Parachute Attempt

VANDEMBERG AIR FORCE BASE, Calif. (AP) - America's second Discoverer satellite roared southward into polar orbit Monday, setting the stage for a gigantic game of aerial catch in which planes may try to snatch its parachuting nose cone from the air.

Two hours after the launch an Advance Research Projects Agency spokesman said tracking stations in Alaska, Hawaii and at this West Coast missile base had established that Discoverer II is in orbit.

The 1,600 pound satellite is whirling around the earth in a nearly north-south orbit every 94 minutes. At its high point it is 445 miles from earth, at its closest 158.

William H. Godel, director of planning for ARPA, said "We are exultant over the second success in the Discoverer series."

The orbit would allow the satellite a life expectancy of about 30 days, he said.

Within 12 hours, he said, they will be able to determine if the orbit meets requirements for an attempt to recover the satellite's instrumented nose cone.

If all goes well, the nose cone will be ejected, Tuesday or later, over the Pacific near Hawaii.

There C-16 Flying Boxcars, trailing trapeze-like devices, hope to snag the capsule's parachute in the air.

Before the launch one expert guessed the chance of recovery at 1 in 1,000.

Such capsules, in future shots of the Discoverer satellite series, will contain mice and monkeys. They will be used to determine the effects of such perils as radiation, heat and gravity stress so that man may follow them into space.

"What we really hope to achieve is stabilization of the satellite in orbit," Godel said. "This will be necessary before we can kick off the nose cone containing the instrumented capsule. Stabilization in itself will be a tremendous first. If we get a bonus of recovering the capsule as well, we shall be doubly elated."

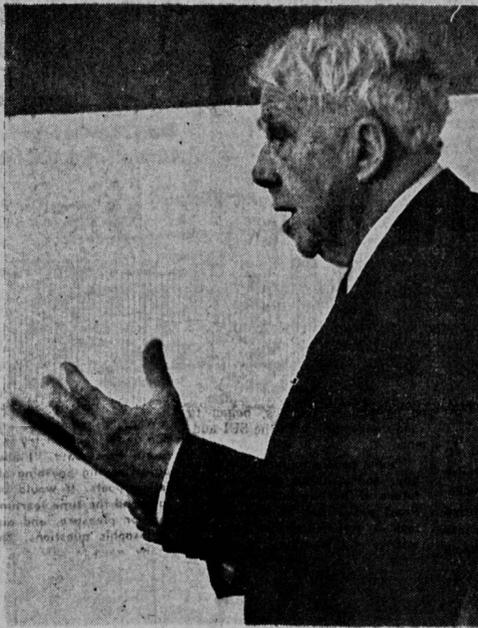

Godel said the entire second stage probably will orbit for about 30 days. Radio signals will be received from the second-stage satellite regardless of whether the nose cone is kicked off.

Fog delayed the launching for 3 hours and 18 minutes. There was patchy fog as the 78-foot rocket roared skyward, but upper altitudes were clear. The engine of the first-stage rocket, a Thor, apparently functioned perfectly for its 2 1/2-minute life.

After its ejection, the eight Hawaii-based C119s, which reportedly have been training for weeks will play their aerial game of catch with the capsule. Each plane is equipped with two telescoping 15-foot poles, which trail down from each side of the fuselage. The pole tips are 30 feet apart and between them is a nylon harness designed to snag the capsule's parachute as the plane flies over it. Once snagged, the capsule can be reeled in.

The planes will have about 10 minutes to make their passes. If they fail, destroyers will try to fish the buoyant capsule from the sea.

Aim of the discoverer series of a dozen or more shots is to chart the hazards of space travel.

Robert Frost When He Talks, Everyone Listens

Gold And Fizdale, Piano Duo, To Appear At SUI Wednesday

Arthur Gold and Robert Fizdale-duo-piano team, will present the final concert of the SUI concert series Wednesday, April 15, at 8 p. m. in the Main Lounge of the Iowa Memorial Union.

Performing on two concert-grand pianos, the two will play Bach's "Sonata in F Major," "Grand Duo, Opus 140," by Franz Schubert; the Poulence "Sonata for Two Pianos," which was dedicated to Gold and Fizdale; "Souvenirs," by Samuel Barber; Rachmaninoff's "Romance, Opus 17;" and "Brasileira," from Darius Milhaud's "Scaramouche."

Free student tickets and tickets for sale to University staff and to the public (at \$1.50 each) will be available at the East Lobby Reservation Desk of the Union from 9 a. m. to 5:30 p. m. today and from 9 a. m. to 8 p. m. Wednesday.

Gold and Fizdale have made a hobby of searching libraries throughout Europe for manuscripts

of 18th and 19th century masters. Aside from classical music, the two are interested in contemporary music for duo-pianism and many composers have written works especially for them.

The two have appeared as soloists with orchestras in Cincinnati, Pittsburgh, Dallas and Houston. They met at New York's Juilliard School of Music where they decided to give up their solo careers and dedicate themselves to duo-pianism.

One of the highlights of their career of concert presentations throughout the United States and Europe was the premiere of Darius Milhaud's "Suite for Two Pianos" in New York under the baton of Leonard Bernstein.

In 1954, Gold and Fizdale, the only duo-piano team on Columbia Records' roster, received the American Record Guide Award for their rendition of the Bowles "Piano Concerto," described as the "Best Concerto" recording of the year.

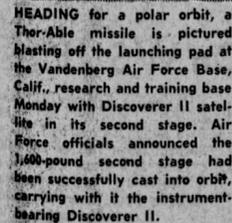

Arthur Gold was born in Toronto, Canada, of Russian parents. At three he was accompanying his sister, a gifted soprano, playing completely by ear. When he was six, he started extended piano study and later worked under Josef and Rosina Lhevinne.

Robert Fizdale was born in Chicago, also of Russian descent, and comes from a musical family which included a flutist in the Czar's private orchestra. He also started piano studies at the age of six.

Satellites At A Glance

By United Press International

Six man-made satellites - five American and one Russian - are spinning around the Earth.

The U.S. satellites:  
Explorer I: Launched Jan. 31, 1958. Weight 30.8 pounds; tube shaped; 80 inches in diameter; speed 18,000 mph; maximum height 13,000 miles; minimum height, 2,453 miles; expected to stay in orbit 3 to 5 years.

Vanguard I: Launched March 17, 1958. Weight 2.25 pounds; sphere-shaped; 8 1/2 inches in diameter; orbit time, 124.3 minutes; speed 18,365 mph; maximum height, 445 miles; minimum height, 158 miles; orbiting time, 94.2 minutes.

Explorer IV: Launched July 26, 1958. Weight, 38 pounds; bullet-shaped; 80 inches long. Expected to stay in orbit 3 to 10 years.

Vanguard II: Launched Feb. 16, 1959. Weight 440 pounds; spherical shaped; 2,025.33 pounds; cone-shaped; 11 1/2 feet long; orbit time, 105.2 minutes; speed 14,746 mph; maximum height, 1120 miles; minimum height 128 miles. Expected to stay in orbit for one more year.

Russian:  
Sputnik III: Launched May 15, 1958. Weight 2,025.33 pounds; cone-shaped; 11 1/2 feet long; orbit time, 105.2 minutes; speed 14,746 mph; maximum height, 1120 miles; minimum height 128 miles. Expected to stay in orbit for one more year.

Dog Sleds Or Bicycles?

Spring in Iowa is at best a time of sharp contrasts and striking incongruities.

In keeping with this, spring tradition, the pages of The Daily Iowan heralded recently the proposed lease of a 600 acre tract of ground in the Coralville Reservoir area which would be set aside for the use of the University.

Should the Board of Regents decide sometime in the future that student automobiles do indeed have an adverse effect upon grades and should be banned, we could see an incongruity that would make the weather man look like a piker.

In order to travel the several miles to "our" new recreation area, SUI students would have no real problem during the summer and winter, and a canoe or a bicycle would do tolerably well in the summer months.

But what about those springtime yearnings for fresh air and recreation? Who but the most exuberant students would dare to set out for the park on foot even when bathed in bright April sunshine? The area would be rendered virtually useless during the spring and fall due to unpredictable weather.

What will be the fate of those foolhardy few who might happen to be stranded without an automobile when the weather does an abrupt about-face? Would there be any hope for them? Probably not. Due to the present Iowa laws not even St. Bernards could be counted upon for much effective help.

Even these few superficial speculations lead us to the opinion that automobiles will continue to be a necessary evil on the SUI scene. If they are to be done away with, it will be at the risk of dire consequences.

Honest Arrogance

Frank Lloyd Wright, who admitted he was the "greatest living architect," died Thursday and with his passing America lost one of its greatest thinking non-conformists.

His unquestioned brilliance in the field will undoubtedly make him a figure that will continually influence modern architecture.

But his persistent desire to stand up for schemes often regarded by conservatives as crackpot or outlandish may prove to be his most important gift to American society.

In his long career, Wright expended a great deal of effort rebelling against facets of American life that he disliked. The United States' lust for ugliness and the murderous

custom of retirement at 60' were two of the complaints that he loudly lodged.

His continual questioning of people's attitudes and willingness to stir up controversy show an admirable effort to avoid submerging himself in the mediocre same-thinking groups. Wright stood among the leaders of a vanishing breed of men who speak their mind.

Far-reaching innovations which will have a permanent effect on the American architectural scene are the tangible results of his originality. But even more important, his efforts make him an example of an individual successfully retaining his personal identity while so many rushed to lose theirs—their Michigan Daily.

University Bulletin Board

University Bulletin Board notices must be received at The Daily Iowan office, Room 201 Communications Center, by noon of the day before publication.

INTER-VARSITY CHRISTIAN FELLOWSHIP will meet today at 7:30 p.m. in the East Lobby Conference Room of the Union.

UNIVERSITY COOPERATIVE BABY-SITTING LEAGUE book will be in charge of Ann Power from April 14 to April 26. Telephone her at 8-5723 if a sitter or information about joining the group is desired.

ALL SOPHOMORE MUSIC MAJORS who plan to elect a teacher education program in music are requested to attend a meeting Monday, April 20 at 7 p.m. in Room 332 of the University High School.

STUDENT TEACHING IN MUSIC. All students planning to do student teaching in the area of music during the school year 1959-60, are notified of a group meeting on Monday, April 27 at 7 p.m. in Room 332 of University High School.

THETA TAU PLEDGE meeting today. All pledges are reminded to bring suggestions for pledge project and party.

FRESHMAN ORIENTATION COUNCIL meetings: East Lobby Conference Room April 13, 4:30 p.m.; Recreation Area Conference Room April 14, 4:30, 7:30 p.m.; East Lobby Conference Room, April 15, 4:30, 7:30 p.m.; East Lobby Conference Room, April 16, 4:30, 7:30 p.m.; Recreation Area Conference Room, April 21, 4:30 p.m.

SKEPTICS will meet Thursday at 7 p.m. in the YWCA office in the Union. Professor Sam Hays will lead the discussion.

CHEMICAL SOCIETY presents lecture by Dr. Ernest Grenwald April 22 at 7:30 p.m. in 321 Chemistry Building. Open to the public.

PHYSICS COLLOQUIUM today in 301 Physics Building. Dr. Lee Lidofsky of Columbia University will speak on "Level Structure in the Sodium Isotopes."

INTERNATIONAL CENTER'S "Seminar on American Life" will meet Sunday at 7:30 p.m. Lloyd L. Smith, assistant professor of education will discuss "Patterns of Public Education in the United States."

BAND AND STUDENT TRIP COMMITTEE will meet Tuesday, April 21 at 11 a.m. in the Board Room of Old Capitol.

ODDS OF ARTS will meet April 14 at noon in the Union Middle Alcove for announcements to the Daily Iowan. Editorial offices are in the Communications Center.

'Do You Have To Bring Up Technicalities?'

West Anxious For Statement On Red Suppression In Tibet

Dalai Lama's Statement Expected To Clinch Diminishment Of Red Influence In Far East

By J. M. ROBERTS Associated Press News Analyst

As the days of the Dalai Lama's escape into India stretch into weeks, Western impatience grows over the Indian government's repression of his story of Red Chinese imperialism in Tibet.

The West has hoped that developments in Tibet would put the "skids" under the regime of the Asiatic neutralists that Red China, after all, is a member of their community, and not to be compared with the imperialists of the West with whom they have had so much experience.

The Lama's story was expected to be the clincher. News leaking out of the Himalayan fastnesses has by now, however, largely previewed and discounted whatever the Dalai Lama might be expected to say.

Fragmentary news of diplomatic passages occurring in many parts of South and Southeast Asia suggest very strongly that the lessons of the latest Communist action have by no means been lost. India's very fear that the Dalai Lama would say something to anger Peiping stresses the true relationship between communism with its aggression and the revolutionary nationalism in Asia upon which the Reds have sought to seize as a weapon.

Hope for peaceful coexistence as a way of Asian life as expressed at the Bandung Conference has taken an awful beating. Burma, Nepal, and India's border protectorates such as Bhutan, are beginning to take thought for their borders, where China's claims go back before the Red regime.

Red China's adoption of all of ancient China's territorial claims and her display of willingness to put them into effect through force, may well be felt in the center as well as the Southeast of the great Eurasian continent.

It may have had something to do with the Soviet Union's recent purge of what the Reds call unstable elements in Outer Mongolia where the Bolsheviks staged the first of their post-revolutionary conquests.

Some students of Soviet tactics have always wondered if Boris Premier Nikita Khrushchev might not have been killed two birds with one stone by getting V. M. Molotov out of Moscow and applying his talents in Mongolia at a time when there was rising talk of disaffection between Moscow and Peiping.

Montgomery's Russian Visit Subject Of British Concern

By J. M. ROBERTS Associated Press News Analyst

Harold Macmillan, prime minister of Britain, not only has his involvements with such people as President Eisenhower, French President Charles de Gaulle, West German Chancellor Konrad Adenauer and the rebels in Nyasaland.

He also has Field Marshal Vis-

back with publication of his memoirs, which devoted considerable space to how Gen. Dwight D. Eisenhower had made the mistake of winning the war in non-Montgomery fashion.

During his debate-by-memorandum with the Allied Commander in Europe, Montgomery once was prevented by business at the front from taking his complaints to headquarters. He got around that by asking Eisenhower to come to him to listen.

This is by way of background for Montgomery's latest dissatisfaction with things he isn't handling personally.

He recently announced plans for a visit to Soviet Premier Nikita Khrushchev on the heels of Macmillan, "to clear my mind on the Russian viewpoint."

The British press got its wind up. He was even called an ass in politics, and a potential troublemaker of serious proportions.

Macmillan already is in trouble for a somewhat hazy suggestion that a "thinning" of foreign troops in Germany might be made a talking point in negotiations with Moscow.

Montgomery hasn't been hazy. He is a former deputy commander of NATO, whose military officers constantly struggle for more, bigger, and better defense measures.

But he said Allied troops should be withdrawn from Germany, with only two American and one British division to be kept in France.

SIC.

SIC.

SIC.

By JAY TOD

An old man spoke with the wisdom of years to an enraptured class yesterday afternoon. Eighty-three students had jammed themselves into a temporary classroom north of the Iowa Memorial Union for the informal session with Robert Frost.

When the 85-year-old poet made his appearance Monday afternoon he was forced to pick his way around students from other classes who had brought their own chairs or were seated on the floor.

The class, Poetry Workshop, was under the supervision of Paul Engle. Frost admires from as far away as Dubuque were among those gathered for the occasion. Some had brought cameras.

Frost opened his appearance by asking for questions from the group. When no one volunteered, like any other class on campus, he started speaking in a positive classroom manner reflecting his years as a teacher. He has faced classes such as this at several colleges including the University of Michigan.

Although he was offered a seat, Frost, a big man, stood during his hour of give and take with the class. The overcrowding gave the place a stuffy atmosphere. He neglected to remove his jacket even though Engle was down to his shirtsleeves before the session was half over.

Most of the students showed up on a strictly speculation basis. There was no guarantee that the elderly poet would feel up to a class-time ordeal during a time of day which should have been devoted to rest.

A press conference request was turned down for just that reason. When a photographer pleaded for the traditional "just one more" Frost attempted to beg off. "Spare me," he told the lensman, "This is killing me." The pictures were made anyway, with him sitting down.

The time for picnics and other out-door-type activities except snow shovelling is close at hand. This brings to mind some rather definite remarks made by a fireman we know who spent most of a recent Sunday afternoon sweating at a grass fire along Tower Court. What he said can't be published but it amounted to a blanket condemnation of folks who aren't careful with flame out of doors.

Relatively few residents of the area really pitched in to help confine the flames. "We might have worked harder if the wind had been blowing toward our homes," was the frank admission of one bystander.

A rural small town becomes a big city when a fire ceases to be a social event with everybody pitching in and becomes just a job for the firemen, win or lose.

A BIRD IN HAND MIAMI (UPI) — Kindness pays. Three youngsters really learned the lesson. They found a crippled dove Sunday and set about building the bird a nest. Poking in the brush for twigs and sticks, they found \$400 in cash.

Letter To The Editor— Brotherly Union Not Exclusive To Fraternities, Says Writer

To the Editor: I very much enjoyed your editorial of April 10 titled: "Every-one A Leader."

I am sure, create "coffee hour conversation" among the Iowa student body. Nonetheless, your efforts did make an interesting piece of reading material. In fact, I will agree with you in regard to the claim that the development of the individual is hindered by anything other than the fraternal way of life is ludicrous. However, I am at a loss to find in the material presented, such a statement issued by any segment of the fraternity system. There is not a fraternity system on any campus which will contend that the advantages of fraternity living cannot be found in other places than the chapter house.

The term "fraternal living," by definition, does not imply that an individual must belong to a Greek Letter group to enjoy fraternal living. The term does mean, "a group of men associated in brotherly union, as for mutual aid or benefit." This, of course, could as easily be found in a dormitory or a boarding house.

Your statement that it is for the individual to judge and to decide whether his development as an individual must, of sheer necessity, emanate from a self-conscious emphasis on "group interaction" is somewhat inaccurate. "Group interaction" is not a decision always left up to the individual. It is for all practical purposes impossible for a man to go through life without belonging to a group.

This is well pointed out in the book published by the National Interfraternity Conference titled "College Fraternities," from which I quote: "Human beings naturally seek the companionship of others. When students find themselves on a campus, participating in a common experience with others of their own age, it is but natural that they should seek the friendship of those they find to be particularly congenial."

Dr. Charles Wesley Flint, when Chancellor of Syracuse University, expressed this thought when he said, "There is a law which brings men together in groups; it acts like the law of gravity, and regardless of what is done to divert it, it holds true. Thus, we have the college fraternity." Here again you will note that

if any statements or questions should be labeled ludicrous, they appear to be yours.

Gene Johnson

'December' In April

"Don't trust the weather. DECEMBER will fall in April this year." These were the words of a high-ranking official of the staff of December Magazine in an exclusive interview with the Daily Iowan.

"For four months," he continued, "the editors have been debating whether to print the page numbers at the top or bottom of every page. We have finally decided to print them dead-center in the middle. This may interfere with readability somewhat, but we feel it's in keeping with the democratic spirit."

December Magazine, he went on to say, is now in its second theoretical year of publication, and the April-issue will soon be

available to frenzied devotees for 75c in cold cash at Iowa Book and Supply, Hawkeye Bookstore, Lind's Art Supply, University Bookstore, and Mott's Drugstore. At this point our informant grew serious—he put down his pool cue—and said: "We wanted to hire a sound truck to go through the streets shouting the title of our lead article, 'The Great Silence in Iowa City.' But we couldn't afford it. We also have art work, short stories and poetry in this issue, and what's more, we plan to have another issue shortly."

When asked how much it would cost to subscribe to both issues, he chuckled and said, "One dollar. Mail it to DECEMBER, P.O. Box 583, Iowa City, and we'll mail you the issues."

OPINIONS FROM GRINELLI College, expressed in a Phi Beta Kappa address by Professor Sheldon Zitner, will be aired this evening at 8 p.m. "Delusions of a University" are given short shrift by Prof. Zitner who treats his subject with urbanity, incisiveness and brass knuckles.

Previously aired on Saturday Supplement, "Delusions of a University" has been found sufficiently penetrating and stimulating for a re-run.

MUSIC FROM AMPLITUDE MODULATION (WSUI): An Evening Concert, from 6 p.m. to 8 p.m. to 10 this evening, the compositions by Gliere, Bach, Stravinsky, Paganini and Kodaly.

MUSIC FROM FREQUENCY MODULATION (KSUI): from 7 p.m. to 10 this evening, the cream of the record library with a fresh copy of the Tchaikovsky Fourth Symphony featured.

# Dulles Hospitalized For More Therapy

WASHINGTON (UPI) — President Eisenhower disclosed Monday that Secretary of State John Foster Dulles must undergo new cancer treatments and said no action will be taken on Dulles' future government role until the results are evaluated.

But associates of Dulles said it would be a miracle if the ailing 71-year-old secretary could continue long in the key cold war cabinet post he has held since the start of the Eisenhower Administration.

The air of pessimism and gloom that cast a pall over government officials was broken only by Dulles' own unflinching good spirits at Walter Reed Army Medical Center, which he re-entered yesterday after unexpectedly ending his 13-day Florida vacation.

Underlining his concern, the president drove directly to the hospital to see Dulles after he returned here from his vacation re-enters in August, Ga., for a short 24-hour stay.

The two conferred for 45 minutes — for the most part alone — about world affairs and Dulles' physical condition. The president was asked afterwards how he thought the secretary looked.

"Fine," he replied. United States Intelligence Director Allen Dulles, who accompanied the president to the hospital, said his brother was "quite chipper at the moment."

Dulles, who already has undergone a series of massive anti-cancer radiation doses, was expected to begin receiving the new treatments in the next day or so.

Hagerty said the nature of the additional treatment — whether surgery or radiation — will be announced as soon as it is begun.

Asked whether Dulles indicated any intention to resign, Hagerty said, "There has been no resignation submitted . . . as of today."

He was asked specifically if Dulles had submitted his resignation at any time since his malignancy was discovered in February.

"I'm not going to discuss that," Hagerty replied. "This statement is as of today."

Dulles' need for further treatment underscored a report by high government officials that he did not respond satisfactorily to the earlier radiation doses.

Persons who have talked with Dulles at the hospital reported him weaker now than when he left Washington just two weeks ago for a period of "rest and recuperation" in the warm sunshine of Hope

Sound. High officials said it would be miraculous if Dulles realized his hope of returning for a while to his cabinet post, in which he has become one of the chief architects of the free world's strategy in the cold war with Russia.

These officials expected Undersecretary of State Christian A. Herter to succeed Dulles in the event of any resignation.

As recently as last Wednesday, Dulles was reported determined to try to lead the American delegation to the foreign ministers' conference with Soviet Russia in Geneva May 11. He disputed his doctors' advice that he would be too weak to undertake such a rigorous task.

But after an x-ray examination in Florida Thursday, his doctors insisted that he return to Walter Reed as soon as possible.

## Zetas Add 10 Girls As Active Members

Zeta Tau Alpha social sorority activated 10 women recently. The new initiates are: Penny Vanek, A1, Muscatine; Joey Hunter, A2, Blakesburg; Linda Wedekind, A1, Muscatine; Donna Junk, A1, Maquoketa; Barbara Nice, A1, Sterling, Ill.; Nancy Jebens, A1, Davenport; Karen Wienert, A1, Davenport; Betty Ernst, A1, Port Byron, Ill.; Susie Graham, N1, Des Moines; and Sarah Bishop, A1, Stillman Valley, Ill.

An initiation banquet was held at the Carousel following the ceremonies.

## Nixon Urges Hague Court As East-West Umpire

NEW YORK (UPI) — Vice President Nixon urged the United States and Russia Monday night to accept the International Court of Justice as an "impartial umpire" to enforce future East-West agreements.

Nixon also disclosed that the Eisenhower Administration plans to seize the initiative to promote wider use of the Court in an effort to replace the present "balance of terror" with the rule of law.

But he emphasized that his proposal for using the court as an umpire was his own idea and was not official Government policy. He said, however, that it should prevent disputes such as arose over the 1955 Geneva summit meeting with Russia.

Nixon, who addressed the American Academy of Political Science, said the Administration plan is to ask Congress for legislation modifying this country's long-standing requirement that it have the final say on whether disputes affecting it are domestic or international.

Only international disputes are placed before the Hague Court, which was set up under United Nations auspices and is recognized by Russia and other nations.

Nixon said the United States stand had prompted other nations to adopt the same attitude and "this is one of the major reasons for the lack of judicial business before the court."

The Vice President did not say

Sweetheart

Suzanne Raymond, A2, Des Moines, was crowned "Sweetheart of Sigma Chi" at the Sigma Chi Sweetheart Formal held April 10. Suzanne is a member of Kappa Kappa Gamma social sorority.

Attendants were: Arlene Hunt, A4, Des Moines, Kappa Kappa Gamma; and Mary Caldwell, A1, Iowa City, Kappa Alpha Theta.

## Choose Officers For Pledge Class

The pledge class of Theta Tau, professional engineering fraternity, has elected Robert Johannsen, E2, Gladbrook, president; Michael O'Donoghue, E3, Sioux City, vice-president; Charles Kime, E1, Clinton, secretary; James McSwiggan, E3, Wilton Junction, treasurer; and James Howe, E1, San Carlos, Calif., publicity chairman.

what changes the Government will seek in the reservation concerning the court's jurisdiction. But he said the United States hopes "other countries may be persuaded to accept and agree to a wider jurisdiction of the International Court."

Nixon said Mr. Eisenhower and his legal and international advisers believe "the time has now come to take the initiative in the direction of establishment of the rule of law in the world to replace the rule of force."

The Vice President's own suggestion would provide that future East-West agreements include a section specifying "that disputes which may arise as to the interpretation of the agreement should be submitted to the International Court of Justice at the Hague and that the nations signing the agreement should be bound by the decision of the Court in such cases."

Advocates promptly said the study supported their argument that retired workers could not afford rising costs of medical care.

The bill, strongly opposed by the American Medical Association, in effect would give people on Social Security rolls paid-up hospital, surgical and nursing care for life.

Secretary Arthur S. Flemming of the Health, Education and Welfare Department put the price tag on the proposal in a 117-page report to the House Ways & Means Committee on it and various other plans.

Flemming took no position on any of the plans. He said his Department was analyzing "the policy issues involved with a view to developing specific recommendations."

Rep. Aime J. Forand (D-R.I.), the chief House sponsor, said the report confirmed the "tragic situation" of many old people, who had meager resources and were confronted by high medical costs.

AFL-CIO President George Meany said Flemming's report provided "overwhelming statistical evidence" to support labor's claim that retired workers could not afford the rising costs of medical care. He praised the report for "thoroughness and objectivity."

Flemming's report estimated it would cost about \$900 million the first year to make the 16,200,000 Social Security beneficiaries eligible for up to 60 days annually in the hospital — a key part of the Forand bill.

Replies to invitations issued for the 1959 Theta Sigma Phi Matrix Table banquet are due April 20.

Jane Hubly, A4, Cedar Rapids, said Monday. The banquet is to be held April 29.

Miss Hubly, who is president of the organization, said the replies were not due yesterday, as earlier reported.

Marlan Miller, Des Moines Register columnist will speak at the banquet in Iowa Memorial Union. About 500 outstanding women students plus women active in community affairs have been invited to attend the event.

## Billion-A-Year Medical Aid Plan Lauded By Labor

WASHINGTON (UPI) — The Administration said Monday a controversial union-backed proposal to give free medical care to aged persons would cost a billion dollars a year.

Advocates promptly said the study supported their argument that retired workers could not afford rising costs of medical care.

The bill, strongly opposed by the American Medical Association, in effect would give people on Social Security rolls paid-up hospital, surgical and nursing care for life.

Secretary Arthur S. Flemming of the Health, Education and Welfare Department put the price tag on the proposal in a 117-page report to the House Ways & Means Committee on it and various other plans.

Flemming took no position on any of the plans. He said his Department was analyzing "the policy issues involved with a view to developing specific recommendations."

Rep. Aime J. Forand (D-R.I.), the chief House sponsor, said the report confirmed the "tragic situation" of many old people, who had meager resources and were confronted by high medical costs.

AFL-CIO President George Meany said Flemming's report provided "overwhelming statistical evidence" to support labor's claim that retired workers could not afford the rising costs of medical care. He praised the report for "thoroughness and objectivity."

Flemming's report estimated it would cost about \$900 million the first year to make the 16,200,000 Social Security beneficiaries eligible for up to 60 days annually in the hospital — a key part of the Forand bill.

Meet a Young Executive on the Champs Elysees (SHE COULD BE YOU!) Not long ago this young lady was a college senior. Today, she handles the responsibilities and decisions of an executive in one of the world's largest organizations. Today, she's stationed in Paris . . . an officer in the Women's Army Corps. Her professional and social life is busy . . . exciting . . . happily balanced. On duty, this young executive occupies a position requiring education, initiative and intelligence. She commands the high salary and traditional privileges of an Army officer. Off duty, she enjoys her leisure time. (Free evenings and weekends plus 30-day annual paid vacation.) Perhaps she'll attend evening classes at the Sorbonne. Or make a skiing trip to St. Moritz. Or spend a holiday on the French Riviera. Whatever she does, she'll find a world of fun! Of course, her assignment didn't have to be Paris. It might have been Heidelberg, Honolulu, Tokyo . . . even New York or Los Angeles. But wherever this young lady goes, her uniform will be her passport to a wonderful world of opportunity. Because she began her career as an executive . . . an officer in the Women's Army Corps. She could be you . . . this young executive on the Champs Elysees. Special . . . 1959 Summer Program for Juniors: Want a special preview of Army life? Why not see it for yourself this summer! If you qualify for this limited program, you'll receive 4 weeks of orientation training during the summer of 1959—without any commitment. The sole purpose of this program is to help you decide—with confidence—if you want to apply for a commission after you graduate. If you're interested, today is the day to mail the coupon. There's no obligation.

## Kappa Epsilon Adds Pledges

Kappa Epsilon, professional women's pharmacy sorority, recently pledged four women in a ceremony at the Iowa Memorial Union.

The new pledges are: Helen Buikma, P1, Audubon; Linda McKinstry, P1, Washington; Shirley Michaelson, P1, Waterloo; and June Pakozdi, P1, Middlesex, New Jersey.

Following the ceremonies a banquet was held at Curt Yocum's.

## Social Notes

# 23 Vets Among 104 Out For Spring Football Drills

Bright sunshine and brisk winds greeted 104 highly-spirited candidates for the 1959 Iowa football squad, among them 23 veterans of the 1938 Big Ten and Rose Bowl championship team, as spring practice opened Monday afternoon at 3:30 p.m.

Fifteen of the 23 veterans took a light workout in sweatclothes. They were: ends Curt Merz, Don Norton, Allan Miller and Jeff Langston; tackles John Sawin and Bob Hain; guards Don Shipanik, Gerry Novack and Mark Manders; centers Bill Lapham and Lloyd Humphreys; quarterback Olen Treadway; halfbacks Ray Jauch and Bob Jeter and fullback Don Horn.

Most notable among the missing were quarterback Mitch Ogiego and halfback Willie Fleming. In a speech at Cedar Rapids last month Iowa coach Forest Evashevski reported that Ogiego and Fleming along with fullback Don Horn were having scholastic troubles. However, coaches said Monday that both Ogiego and Fleming would take part in drills later in the week.

**Vets Demonstrate**  
Evashevski started the workout with a brief address to the candidates and used a demonstration team made up of the veteran group, to explain the fundamentals of Iowa's Winged-T offense. Dr. Adrian E. Platt, Orthopedic Surgeon of University Hospitals, gave the candidates instructions on the care of the knee joint.

Evy told the squad that anyone who didn't have the desire to keep up their grades didn't have enough desire to play football.

Assisted by Treadway, Evy ran two backfields quarterbacked by freshmen Ed Trancygier and Wilburn Hollis, through a light workout. Others taking part in this drill were halfbacks Bernie Wyatt, Keith Kinderman, Phil Gaines, John McMeekins and Geno Sessi and fullbacks Larry Ferguson and Gene Mosley.

The linemen were run through a mass drill by Bob Flora, which placed the emphasis on timing and charging from the 3-point position. Wind sprints ended the first day of practice.

**Veterans who will not take part in spring practice because of other commitments are John Brown who is on the track squad and baseball players Jerry Maurer, Charlie Lee, Mike Lewis, and Dick Clauson.**

**Graduation Losses**  
Missing from last year's team are Randy Duncan, Kevin Furlong, Bill Gravel, John Nocera, Gary Grouwink, Hugh Drake, John Burroughs, Mac Lewis, Bob Prescott, Bill Scott, Jim Spaan and John Leshyn.

This group of seniors contributed greatly to the success of Iowa teams in the past three years. The Hawkeyes in the past three seasons compiled a 24-3-2 record, including two Rose Bowl victories.

The spring football session will run through till Saturday, May 9, ending with the second annual alumni-varsity game.

## 23-13 Loss For Hawks In Golf Meet At Missouri

Iowa dropped its season-opening golf meet Saturday at Missouri as the Tigers topped the Hawkeyes 23-13.

Frank James paced Iowa with a 36-hole total of 153 on rounds of 81 and 72. James was the only Iowa performer to defeat his opponent.

Russ Schrage gained a split with Missouri's Ira Smith as both shot rounds of 77 and 82.

## Spring Sports Pick Up Tempo This Weekend

The defending Big Ten champion tennis team will open its schedule, the baseball team plays its final non-conference game and golf and track squads are active as Iowa athletes accelerate the spring competition pace this weekend.

The activity occurs from Friday through Monday, opening with the baseball game with Quincy College here Friday at 3:30 p.m. and ending with the Northern Illinois golf meet on the Hawkeye course Monday.

In that period, the track team competes in a relay meet against Illinois, Northwestern and Wisconsin at Champaign, Ill. Saturday, the final preparation for the Drake Relays of the following weekend.

In tennis, a team which might be almost as strong as the 1958 Big Ten champion outfit will meet Eastern Illinois and Southern Illinois at Carbondale Friday and Saturday in the first outdoor 1959 meets.

None of the teams yet has met Big Ten opposition. This starts April 24 when Indiana plays baseball here, followed April 25 by Ohio State, also on the Iowa Diamond in a doubleheader.

**PAN AM BILL TO IKE**  
WASHINGTON (AP) — Senate passage Monday sent to President Eisenhower a bill authorizing \$500,000 in federal funds to help stage the Pan American Games in Chicago Aug. 27-Sept. 7.

The Senate passed the bill on a voice vote. The measure is an authorization bill. The actual money still must be sought in an appropriations bill.

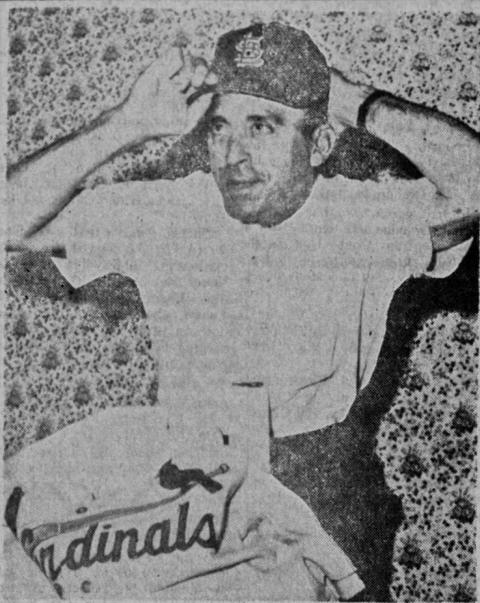

The linemen were run through a mass drill by Bob Flora, which placed the emphasis on timing and charging from the 3-point position. Wind sprints ended the first day of practice.

**Veterans who will not take part in spring practice because of other commitments are John Brown who is on the track squad and baseball players Jerry Maurer, Charlie Lee, Mike Lewis, and Dick Clauson.**

**Graduation Losses**  
Missing from last year's team are Randy Duncan, Kevin Furlong, Bill Gravel, John Nocera, Gary Grouwink, Hugh Drake, John Burroughs, Mac Lewis, Bob Prescott, Bill Scott, Jim Spaan and John Leshyn.

This group of seniors contributed greatly to the success of Iowa teams in the past three years. The Hawkeyes in the past three seasons compiled a 24-3-2 record, including two Rose Bowl victories.

The spring football session will run through till Saturday, May 9, ending with the second annual alumni-varsity game.

## Barber Shaved From Majors

SAL MAGLIE, also known as The Barber, took time out from packing Monday to try on a new hat and uniform after reluctantly bowing out of the major leagues by signing a contract with the St. Louis Cardinals to instruct their minor league pitchers. Maglie, 42, expressed hope in returning to the majors when he said, "Maybe somebody will need help in July or August so I will keep myself in shape."

**ANDREWS 17-1**  
Art Andrews, Iowa's No. 1 tennis player and 1958 Big Ten singles champion, has a dual meet two season mark of 17 victories and one defeat. Andrews was a semifinalist in the National Collegiate singles in 1957 and 1958. He also was a member of the Big Ten champion doubles team last spring.

**Iowa Relay Teams Show Progress In Quantico Meet**  
Iowa's sprint relay teams continued to have misfortunes but nevertheless made encouraging progress in the Quantico Relays held at Quantico, Va., last weekend.

The 880-yard relay team of Bob Dougherty, Bob Warren, Tom Burrows and John Brown finished third with a time of 1:29. The 440-yard team finished fifth as anchor man Brown tripped during the baton exchange. Similar misfortune occurred in the mile relay race as Brown was forced to break stride when a runner cut in front of him.

Hawkeye distance relay teams fared rather poorly in the two days of competition.

Saturday the Hawkeyes will travel to Illinois to compete in a quadrangular meet with Wisconsin, Northwestern and Illinois. Coach Francis Czerny plans to take a full squad and enter teams in all relay events.

## Hawks Drop 4th Straight, 6-5 To Western Michigan

KALAMAZOO, Mich. (AP) — A sacrifice by Joe Gresser broke a tie and enabled Western Michigan to defeat Iowa 6-5 Monday in a baseball game.

The score was knotted at 5-5 in the seventh inning when Western's Larry Belanger slammed a triple. Gresser sacrificed to bring Belanger home with the winning run. It was the fourth straight defeat for the Hawkeyes — the third by one run. Seven of Iowa's last eight games have been decided by one run.

Iowa, .041 000 000—5 6 1  
W. Michigan, .300 200 100—6 11 0  
Barris, Tupp (2) and Belanger, Ericson (2); Rudean and Weatherly.

Bradley's Braves swept past Iowa on the Iowa diamond twice Saturday to sweep the 3-game series with the Hawks. The scores were 4-3 and 6-1.

Iowa's Bob Pearl, the losing pitcher in the opener, allowed only five hits but Bradley bunched three of them along with a walk and error to score all four of its runs in the sixth inning.

Portside Bernie Dwyer, who had pitched one inning in relief in Friday's 5-4 win, held the Hawkeyes at bay although touched for 12 hits. Iowa left nine men on base and had three others picked off for over-anxious base running.

An error, Les Kewney's triple and a wild pitch were good for two Iowa runs in the fifth inning and Mike Lewis singled in Dick Weatherly for the final Hawk tally in the sixth.

Jowa jumped off to a 1-0 lead on an error in the first inning of the 7-inning nightcap, but the Braves wiped that deficit off the books with some lusty hitting in the fourth.

Bradley slammed Iowa starter Al Bachman and Al Klinger for seven hits and five runs to put the ball game out of reach. Bachman gave up five of the hits and was charged with all five runs.

Pat Kelley stopped the Hawks cold with a brilliant 4-hitter and after the first frame was never in trouble.

## First Landing Wins; Derby Shot Likely

NEW YORK (AP) — First Landing, last year's 2-year-old champ, put himself back into the middle of the Kentucky Derby picture Monday with a smashing victory in a 6-furlong race at Jamaica.

C. T. Chenery's colt, a disappointment in Florida during the winter, stepped the fastest three-quarter mile of the meeting as he took charge near the head of the stretch and romped home, a three-length winner.

Eddie Arcaro rode the bay 3-year-old son of Turn-To-Hildene. First landing was timed in 1:10.2 on a track labeled "good".

Second went to Cockfield Stable's Nimmer, who was three quarters of a length ahead of the Green-tree Stable's Hilwan, also a derby nominee.

First Landing returned \$2.70, \$2.20 and \$2.10.

## Surprise Sox Open At Home Against KC

CHICAGO (AP) — With the Chicago White Sox winning their first three games, Bill Veeck looks for a whopping season home opener today against Kansas City.

Sunny weather is forecast and more than 20,000 fans are expected to back in it at Comiskey Park.

where for the first time in American League history a Comiskey is not in full command. Chuck Comiskey still is fighting Veeck's recent purchase of the club's controlling interest in court.

Veeck's flair for crowd-pleasing promotions makes the Sox home start all the more interesting, but so far Bill is keeping mum about his plans.

"I can't tell in advance what we'll do, but something will be popping, you can bet, and there may be a surprise or two," he said.

As for surprises, the Sox are full of them. Who would have thought: That the supposedly puncheon Sox would hit 6 homers at Detroit, one each by Nellie Fox (who didn't hit any last season) and Luis Aparicio (who hit two in 1958)?

That Sharm Lollar would be leading the league in stolen bases? He has filched two, but of more value he already has driven in five runs, two with homers.

As for surprises, the Sox are full of them. Who would have thought: That the supposedly puncheon Sox would hit 6 homers at Detroit, one each by Nellie Fox (who didn't hit any last season) and Luis Aparicio (who hit two in 1958)?

That Sharm Lollar would be leading the league in stolen bases? He has filched two, but of more value he already has driven in five runs, two with homers.

## The Golden Years

Have you ever noticed how athletes improve with age? By age 1 mean after retiring from the competitive ranks and joining the arm-chair assembly.

Using myself as an example (a poor specimen, but a good example) I will illustrate how one improves with age.

### From 12 To 20

I played basketball in high school and in my senior year averaged about 12 points a game. Now, nine years later, my scoring average is getting close to 20 points a game and in another nine years I may have been the greatest high school player the state ever had.

The first time I ever played golf I broke 100 but the part I leave out of that story is that I only played the front nine and quit in a fit of frustration at the halfway mark.

In tennis I had a serve reminiscent to the one used by Jacques Tati in the movie "Mr. Hulot's Holiday"—the difference being that mine was not nearly so effective and I was playing seriously. My chief claim to fame in tennis was scoring a point in a 6-0, 6-1, 6-0 defeat.

But before too many more years, no doubt, I will have been a pretty good tennis player and I will have allowed only one point in winning 6-0, 6-1, 6-0 in some big tournament.

I was also a high school track man and probably the only man in history to never score a point in three years. Now, however, I was a 10-second man in the century and a few other tall stories.

### Came Close Once

The only chance I had to score was in the Ft. Madison Relays in 1949 in the 440-yard relay. Don't laugh, that's the truth, I WAS in the 440 relay. Our No. 2 man was running in the money when he handed the baton to the No. 3 man—yours truly. The No. 3 man was a little slow in taking off and got some spikes in his heel for his slowness. He then lumbered the full 110 yards without a stop, somehow still in second or third place, and then dropped the baton and his team finished last.

Give me a few more years—I'll be that No. 2 man then and one of the high scorers in high school track.

In the Air Force I was on the football team for two reasons. It was a lousy football team and I had a lot of time off for practice. I was an end and if there had been such an award I'm sure that the least valuable moment would have been mine. Terrible on offense, I was equally inept on defense.

My football highlight was in a game against McChord Air Force Base (I think) when the coach sent in a sub and two of us came out. I was rushed back onto the field just before the next play and the opposition didn't notice me. I like to think they didn't see me. More probably they weren't worried where the heck I was.

### An Unguarded Moment

Anyway, I was unguarded so I ran down the field, caught a pass from our quarterback, and scored. It didn't make much difference, we were edged out about 61-13.

The years will make a good football player of me I'm sure. Good coaching, practice and a chance to play didn't.

When I got out of the service most of the Big Ten schools were after me. Michigan wanted me to go to Michigan State, Iowa wanted me to go to Minnesota, Indiana wanted me to go to Purdue, Northwestern wanted me to go to Illinois, Minnesota wanted me to go to Iowa and Ohio State wanted me to go to Minnesota.

So when some elderly gent about my age, or even older, tells me about his prowess in his athletic days, I am more than a little skeptical. And why not, look what a liar I am.

# Callison, Musial Low Men On Early Season Totem Pole

NEW YORK (AP)—There's little doubt that young John Callison and veteran Stan Musial wish the big league baseball season were opening today.

It would have, too, had not the schedule maker been asked to make provisions for an earlier start.

### 5-Days Old

Now, the campaign is five days old and Callison and Musial, plus more than a dozen others, will have to build their batting averages to respectable levels.

Callison, the highly-touted Chicago White Sox rookie outfielder, went hitless in 11 trips in the 3-game series with the Detroit Tigers. Musial collected only one hit in 11 tries as his St. Louis Cards dropped three straight to San Francisco.

Hal Smith of Kansas City and Woody Held of Cleveland also had trouble. Smith failed to hit in 10 attempts and Held was 0-for-9. Hitless in seven times at bat were Bobby Thomson and Dale Long of the Chicago Cubs and Johnny Logan of Milwaukee.

### Skinner At .077

Bill White of the Cardinals and Bill Virdon of Pittsburgh managed only one safety in 12 times at bat for .083 marks while Bob Skinner of the Pirates was 1-for-13 for an .077 percentage.

Andre Rodgers of the Giants had difficulty in the field. He had five errors at shortstop in three games.

Heading the list of those who have surprised with their batting proficiency in the first few games are shortstops George Strickland of Cleveland and Alex Grammas of St. Louis.

### Strickland Over .600

Strickland had 5 hits in 8 tries for a .625 average. Grammas had 5-for-9 and a .556 mark.

Others who got off winging were Sherm Lollar of the White Sox with 8 safe blows in 15 at bats; Nellie Fox of the White Sox, 7-for-16; Jim Davenport of San Francisco, 5-for-11; Rocky Bridges of Detroit, 6-for-12; Hank Aaron of Milwaukee, 5-for-9; Roberto Clemente of Pittsburgh, 5-for-13; Jim Piersall of Cleveland, 4-for-9; and Norm Siebern of New York and George Altman of the Cubs, 3-for-4.

## A Friend In Need

PITTSBURGH PITCHER Bob Friend (right), a 22-game winner last season, loosened up his arm by tossing a few snowballs Monday during a brief workout at Forbes Field. The Pirates spent an hour during snowballs and baseballs—mostly snowballs. Pittsburgh plays at Cincinnati tonight—weather permitting.—AP Wirephoto.

## Pirates Hold Drill After Poor Start

PITTSBURGH (AP)—Danny Murtaugh, disappointed by three straight losses, put his Pittsburgh Pirates through an hour-long drill Monday of tossing baseballs and snowballs—mostly snowballs.

The Pirates' skipper called the loosening up drill after a snowstorm Sunday forced postponement of the final game of a 3-game series against Milwaukee.

Murtaugh said he was disappointed in the Pirates' hitting but felt it was only a temporary deterrent.

"We're not the only team that's going to lose three games in a row this year," said the genial Irishman. "We have a sound ball club and once we start hitting it will be a different story."

The Pirates have scored only four runs in losing 4-1 to Cincinnati in the opener and 8-0 and 4-3 to Milwaukee at Pittsburgh.

Southpaw pitcher Harvey Haddix left Monday to visit a brother critically ill at Columbus, Ohio. Haddix is expected to rejoin the club in Cincinnati on Wednesday.

## Blind Men Near 2nd Half Title In Staff Pin League

The Blind Men maintained their 5-point lead in the University Staff Bowling League last week and have all but wrapped up the second half title. There are two weeks of bowling left before the second half champ tangles with the Wrong Founts in the playoffs. The Wrong Founts took the first half championship.

The Ions kept pace last week and still trail by five points with the Spoilers seven points back. The Pill Rollers are the only other team with a mathematical chance for the title—they trail by 7 1/2 points with four points a week the maximum score possible to attain.

Bill Clark took high series honors last week with 573 pins with Bill Tester second at 554. Al Newton's 224 game was the evening's top with Marv Ross rolling a 212 for second place.

Standings:

Team	W.	L.	Points	Behind
Blind Men	38	14	—	—
Ions	33	19	5	5
Spoilers	31	21	7	7
Pill Rollers	30 1/2	21 1/2	7 1/2	7 1/2
Hi Five	23	28	15	15
Stokers	19	33	19	19
Wrong Founts	18 1/2	32 1/2	19 1/2	19 1/2
Wheels	15	37	23	23

# Better Weather Forecast— 2d Round Openers In Majors

By The Associated Press

They still are busy opening the big league baseball season. The seven clubs that have been on the road bow before their home fans Tuesday in a round of "second openers."

If the weatherman is right in his general forecast of fair, warmer weather, the seven clubs hope to draw 226,000 that would be almost as much as the 231,343 who saw the nine other openers over a 4-day span.

It is doubtful, indeed, if any baseball season ever has as many as seven unbeaten teams after it was five days old. That is the state of affairs going into today's games. The only unbeaten due to meet are the Phillies and Braves at Milwaukee.

Los Angeles counts on 60,000 or more for the Dodgers' night opener against St. Louis.

Johnny Podres is due to throw his lefthanded stuff against the Cardinals, still looking for their first victory under Solly Hemus. The Card's probable is Lindy McDaniel.

San Francisco already is running an early pennant fever after winning its first three games from St. Louis. The Giants expect a sellout crowd of 23,000 when Jack Sanford, the former Phil, makes his first start against Chicago's

Dave Hillman.

Warren Spahn, a shutout winner in the opener at Pittsburgh, will try to keep the Milwaukee Braves going toward a third straight win when he works against the Phillies. Ruben Gomez or Seth Morehead is the probable for the Phils who won their only start from Cincinnati. About 43,000 are expected.

The other National League game doesn't qualify as an opener. Pittsburgh, still without a victory in three starts, will be at Cincinnati at night but the Reds played their special traditional opener last Thursday.

Chicago gets its first look at the White Sox who showed unexpected run-scoring ability in sweeping three from Detroit on the road. The White Sox will send Billy Pierce, who started at Detroit but had no decision, against Kansas City's Ralph Terry. They count on 20,000 fans.

Cleveland, another unbeaten team, hopes to attract 40,000 or more to see Herb Score open for the Indians against Jim Bunning of Detroit.

Baltimore expects 30,000 to greet the Orioles as they take on the New York Yankees. Aronold Portocarrero was named to start for Baltimore. The Yanks plan to start Don Larsen.

Boston's flu-riddled Red Sox count on 20,000 for a game with Washington. Ike Delock was to be the Red Sox pitcher. Camilo Pascual will try to make it two straight for Washington which has been idle since beating Baltimore last Thursday.

**DENY BIAS CHARGE**  
BOSTON (AP)—The Boston Red Sox officially denied Monday that Negro rookie infielder Jerry (Pumie) Green had been optioned to Minneapolis because of bias. The Sox said this in a letter to the Massachusetts Commission against Discrimination. It also declared the Sox will use capable players regardless of color.

# Des Moines Teacher Gets Science Award

Herman H. Kirkpatrick, physics teacher at Theodore Roosevelt High School, Des Moines, has been named winner of the third annual Iowa Science Teachers Award. Kirkpatrick was selected for "his outstanding contributions and excellence in teaching science" from a list of nominees from secondary schools in Iowa.

Established in 1957, the \$200 award will be presented by the Iowa section of the American Chemical Society in behalf of Iowa industry at the state meeting of the Iowa Academy of Science Friday morning at Iowa Wesleyan College, Mount Pleasant.

William Bennett, assistant professor of chemistry at SUI and chairman of the Iowa Science Teachers' Award Committee, said the award is given in recognition of a teacher's competence and resourcefulness in stimulating scientific curiosity in students.

Other SUI staff members on the award committee were J. L. Lach, associate professor, college of pharmacy, and R. E. Buckles, associate professor of chemistry.

Professor Bennett pointed out that the purpose of the award is to encourage young minds, through resourceful teachers, to begin thinking early about entering the field of science as a career.

Kirkpatrick has taught at Roosevelt High School since 1951. He taught at Britt from 1950-51. From 1947 to 1950 he taught physics part time at Clemson Agricultural College, Clemson, S.C., and Iowa State College, Ames.

# Mrs. Nicholas Waits Verdict After Trial

INDIANAPOLIS (UPI) — The defense rested Monday in the murder trial of Mrs. Connie Nicholas after introducing medical testimony that her right arm was hurt by wrenching, an injury she contends she suffered in a fight with Forrest Teel.

The state rested without calling rebuttal witnesses, and Judge Thomas J. Faulconer recessed the trial until Wednesday morning. A jury of 12 men was expected to receive the case around noon that day.

The defense also offered evidence that Mrs. Nicholas tried to kill herself soon after Teel was shot to death with a gun the defendant testified she took along the night of the slaying in case sleeping pills failed to kill her.

Three doctors testified for the defense that they believed Mrs. Nicholas' right arm was wrenched. Mrs. Nicholas testified earlier that she held the gun in her hand, and that she heard the arm "crack."

Mrs. Nicholas testified earlier in one trial that she took a loaded revolver to a rendezvous with Teel with the idea in mind of killing herself. She said she meant no harm to Teel and did not know she had shot him, after the gun went off, until she awakened in a hospital several days later after being revived from a suicide attempt with sleeping pills.

After the evidence was in, the trial was recessed until Wednesday morning when final arguments and instructions will be given the jury.

# Macmillan, French 'Agree' On Berlin

LONDON (UPI) — British Prime Minister Macmillan and French Premier Michel Debre reached "substantial agreement" at a conference Monday on Germany and the Berlin crisis, authoritative sources reported.

Debre conferred with Macmillan and then went into a night session to reconcile opinions on the Western stand. Spokesmen said they had a "useful interchange of views on European questions and on forthcoming negotiations with the Soviet Union."

Sources went further and said there was "substantial agreement," although France was known to oppose the British policy of "flexibility" in dealing with Russia and the Macmillan plan for freezing the East-West forces in Central Europe.

**YWCA Job Opportunity Conferences April 21**  
Senior girls who wish to explore job opportunities with the YWCA can talk with a representative of the YWCA national board, April 21, Miss Ermina E. Busch, director of the Educational Placement Office, said Monday. Individual conference times can be arranged through the Educational Placement Office.

**CANADIAN IMMIGRATION**  
OTTAWA (AP) — Canada's population March 1 was estimated officially at 17,340,000. The current rise has been slightly less than other recent years because of a slow-down on immigration, officials said.

**Wet Seat**  
FINDING HIMSELF sitting in his mother's scrub pail, 19-month-old Ralph Closson burs in o tears. He is the son of Mr. and Mrs. Ralph Closson, Presque Isle, Maine.—AP Wirephoto.

# News Digest

## Castro Announces Delay In Elections; Repeats Claims Of Counter-Revolution

HAVANA (UPI) — Prime Minister Castro said Monday elections in Cuba will be delayed until his revolutionary Government has finished its work.

At the same time, Castro repeated the charge that his enemies are buying arms in Miami, and preparing a campaign against him there. Castro addressed an estimated 100,000 persons in Camaguey at the close of the First Provincial Congress of Field Workers.

Other speakers included President Manuel Urrutia and Argentine-born physician Ernesto (Che) Guevara, one of Castro's chief lieutenants during the revolution.

## Ike To Dedicate Memorial To Taft, Man He Beat For GOP Nomination In 1952

WASHINGTON (UPI) — The winner in a political struggle seven years ago will pay tribute today to the man who lost. President Eisenhower will dedicate a huge marble memorial to the late Sen. Robert A. Taft.

The President, then this country's NATO commander, returned to the United States in 1952 to wrest the Republican Presidential nomination from the Ohio Senator. Mr. Eisenhower won the election. Taft returned to lead Senate Republicans until his death a year later.

Mr. Eisenhower returned to Washington from his Georgia vacation for the dedication and several other engagements.

## First Of New Polaris Submarine Fleet, George Washington, Will Sail June 9

GROTON, Conn. (UPI) — The Polaris submarine George Washington, capable of simultaneously attacking 16 different targets with nuclear missiles from a distance of 1,500 miles, will be launched here June 9.

Described as "one of the nation's prime deterrents to aggression," the George Washington will be the first of nine rocket-firing submarines to get into the water under a stepped-up Navy program.

Built at a cost of \$110 million, the Polaris sub will be operational early next year after it is outfitted by its builder, the Electric Boat Division of General Dynamics Corp.

## Van Beinum, World-Famous Orchestra Leader, Dies On Stand During Long Rehearsal

AMSTERDAM (AP)—Eduard Van Beinum, one of the world's most famous orchestra leaders, died Monday on the conductor's stand.

Van Beinum, 58, who continued the international fame of Amsterdam's Concertgebouw Orchestra after World War II, collapsed at a rehearsal and died of a heart attack.

## Sen. Kennedy Predicts Republicans Will Nominate Rockefeller In 1960

INDIANAPOLIS (UPI) — Sen. John F. Kennedy (D-Mass.) predicted Monday that the 1960 Republican candidate for President would be New York Gov. Nelson Rockefeller "by a landslide."

Kennedy, on a popularity-testing tour of the Midwest to gauge his own chances of capturing the Democratic Presidential nomination, addressed a small group of Indiana party leaders.

Kennedy indicated he thought GOP leaders would prefer Rockefeller over Vice-President Nixon because "the party needs a candidate who is stronger than just a Republican."

# Famous British Neurologist To Speak To Medical College

Sir Francis Walshe, one of Britain's most noted clinical neurologists, will speak at 4:30 p.m. today at the SUI College of Medicine. The physician will deliver the annual Rockwood Lecture in the Medical Amphitheater of University Hospitals.

Walshe has consultation offices on London's Wimpole Street and is consulting neurologist to the Queen's Square National Hospital for Nervous Diseases and to the University College Hospital in London.

The speaker is visiting this country at the invitation of several medical schools, including those at the University of Cincinnati, the University of California, Washington University in St. Louis, and SUI.

Walshe's topic will be "Some Thoughts on Perceptions: The Physiological, the Psychological and the Philosophical Aspects and Their Irreducibility."

The speaker holds both the doctor of medicine and the doctor of science degrees from the University of London. He is past president of the Royal Society of Medicine and the Association of British Neurologists. During World War I, he was consulting neurologist of the British forces in the Middle East.

Walshe is author of a textbook on diseases of the nervous system which is a standard medical text in many countries throughout the world. He is former editor of the journal "Brain."

The Rockwood Lectures are financed by an endowment given to the University by the late Dr. Paul Reed Rockwood, a 1921 SUI medical graduate who died in 1927. Dr. Rockwood requested that upon the death of his father, Dr. E. W. Rockwood, certain funds be used to establish a permanent endowment fund, the income therefrom to be used for an annual lectureship in medical research. The elder Rockwood died in 1935. The endowment was accepted the following year.

# U.S., Britain Propose New Nuclear Ban

GENEVA (AP) — The United States and Britain Monday proposed a prompt termination of atmospheric and underwater nuclear tests, but the initial Soviet reaction to the proposal was cool.

The new move was designed to tackle test suspension on a step-by-step basis and thus salvage something from the 3-power nuclear ban conference here. The Western powers hope agreement can be reached on the easiest part of the problem first, with attempts in later negotiations to widen the ban so as to include outer space and underground blasts.

U.S. Ambassador James J. Wadsworth and British Minister of State David Ormsby-Gore made it clear their Governments preferred a complete cessation of all types of atomic and hydrogen weapons tests.

But in view of the deadlocked state of this conference, the Western powers proposed reaching limited agreement first, with the three powers binding themselves to cease testing weapons from the earth's surface to an altitude of 50 kilometers — 30 miles. Underwater tests also would be banned.

These are the easiest types of explosions to detect, and also the sort which could present a greater health hazard to the world's population since they produce radioactive fallout. Fallout is not such a serious problem with underground and outer space blasts.

If the Soviets finally reject the Western initiative, the conference which has been struggling with the test suspension problem since October 31, probably will break down, high Western informants said. The talks resumed Monday after being in recess since March 19.

Soviet Delegate Semyon Tsarapkin came out of the closed session with this comment: "It is not acceptable. We have got to stop everything."

# Hygiene Lab Gives 6-Month Report

The State Hygienic Laboratory at SUI performed more than 186,000 specimen examinations for Iowa physicians, health officers and sanitation officials during the last six months of 1958. The examinations were conducted on a total of more than 140,000 specimens sent to the laboratory.

The figures are included in the latest semi-annual report made by Dr. I. H. Borts, laboratory director and professor of hygiene and preventive medicine at SUI.

The laboratory consists of three major divisions: bacteriology, serology and water. Each division receives specimens from all parts of the state.

The three divisions, for the entire year of 1958, conducted more than 275,000 examinations. Each division is also engaged in research and teaching in the University's College of Medicine.

# 18 Kinnick Nominees

Eighteen Iowa high school seniors have been chosen as candidates for Nile Kinnick Memorial Scholarships at SUI for the 1959-60 school year, according to Helen Reich, chairman of the University Scholarship Committee.

The 18 candidates have been invited to visit the University April 28 and 29 for personal interviews and tests which will provide a basis for selecting the winners of the awards.

Winners of the Nile Kinnick Scholarship competition will receive a \$1,000 award, \$750 of which will be provided through the Nile Kinnick Scholarship Fund, and \$250 by the Iowa Junior Chamber of Commerce.

# 54 Iowa High Schools To Attend Play Festival At SUI This Week

IOWA CITY — Actors from 54 Iowa high schools are now holding final rehearsals for their performances in the 31st Annual High School Play Production Festival, to be held today through Saturday at SUI.

Designed to develop a more widespread interest in theatre and to give actors, directors and young playwrights an opportunity to share new ideas and learning experiences.

## Yearbook Business Head Named

James W. Clayton, A3, Estherville, has been appointed business manager of the 1960 Hawkeye by the Board of Student Publications. Clayton will be in charge of Hawkeye book sales, page contracts, and distribution of the yearbook. The business staff will be organized this spring, Clayton said.

**James Clayton**  
 Named by SPI Board

All positions are open and application procedures will be announced soon. Staff members will be appointed by Clayton and Larry Day, A3, Grimes, editor of the 1960 Hawkeye.

An advertising major, Clayton is an ad salesman for the Daily Iowan and a member of Alpha Delta Sigma, professional advertising fraternity. He was a copywriter on the 1959 Hawkeye staff. Clayton is vice president of Pi Kappa Alpha, social fraternity, and is a member of the Student Council's public relations subcommittee. Commerce students and economic majors may vote for one member from his department and for two at-large members for the collegiate Chamber of Commerce.

## SUI Student Faced With OMVI Charge

Robert L. Northrup, E1, Wau-pun, Wis., was charged with driving while intoxicated Saturday night after an accident north of Iowa City on old Highway 218.

Northrup was charged by the Highway Patrol after his car left the road north of River Heights. Three companions and Northrup were uninjured in the accident.

A \$500 bond was posted by Northrup for his release, and he was granted a continuance on the charge.

## Two City Officials Submit Resignations

Sylvan Lenz, temporary food environmental sanitarian and health inspector, and Willard M. Irvin, street commissioner and street superintendent, have submitted their resignations to Peter Roan, city manager.

Lenz, who resigned for personal reasons, will leave his post May 15 at 5 p.m.

Irvin will relinquish his duties Thursday at 8 a.m. He gave no reason for his resignation.

## Council OKs Sidewalk Ordinance

By JOHN HANRAHAN  
 Staff Writer

The Iowa City City Council Monday night passed an amended motion for placing sidewalks in certain residential areas of the city. The amended motion eliminated ten sections that were to have been included under the original motion and made changes in two other sections.

The resolution that sidewalks were needed in various parts of the city first came up at the July 23, 1958, Council meeting. The motion was tabled until September 8 and at that meeting residents from the area where new sidewalks were planned asked the Council to postpone action until a thorough study could be made.

At the March 9 meeting residents again appeared and listed their objections regarding the sidewalk program. The problem was then argued again on March 23. It was announced at that time that the final decision would come on April 13.

The amended motion as passed eliminated the following areas from the original sidewalk project: Ridgeway Drive from Seventh Avenue to Ashwood Drive; Lowell Street from Ridgeway Drive to Glendale Road; Hawthorne Street from Ridgeway Drive to Glendale Road; Wilson Street from Morningside Drive to High Street; High Street from Wilson Street to Morningside Drive to Lowell Street from Morningside Drive to Wilson Street; Washington place from William White Boulevard south to end; Fourth Avenue (west side only) from Court Street north to High School property; College Court from Court Street to College Street.

The Morningside Drive project, which originally was to have run from Court Street to Wilson Street, was changed so that it will now run from Court Street to Seventh Avenue.

Another project changed was the one on Fairview Avenue from Court Street to College Street. This one will now include the west side only.

The Council will accept bids for the sidewalk project at their May 11 meeting in the Council chambers. Construction work will then get underway on or before June 15 and will be completed sometime early in September.

In other action, the Council approved a paving project which will cost approximately \$420,000. Of this amount, \$371,000 will be assessed and \$49,000 will come from city funds. The paving will cover an estimated 5.31 miles. Bids will be received at the May 11 meeting also.

The Council also approved unanimously the proposals to increase local gas rates by approximately 7 per cent and gas rates by about 5 per cent.

Commenting on the local gas and electric rate increases Mayor Philip Morgan said, "The City Council has worked hard and earnestly in working out rates that will be fair to electric and gas consumers and that will bring a fair return to the Iowa-Illinois Gas and Electric Company. We believe we have accomplished this."

## GETTING UP NIGHTS

If worried by "Bladder Weakness" (Getting Up Nights or Bed Wetting, too frequent, burning or itching urination), Secondary Bachelors and Nervousness, or Strong Smelling, Cloudy Urine, due to common Kidney and Bladder Irritations, try CYSTEX for quick help. Safe for young and old. Ask druggists for CYSTEX. See how fast you improve.

## 2,500 Cars Stopped In Johnson County For Safety Check

More than 2,500 cars were stopped by the Iowa Highway Patrol in Johnson County during the three days of traffic checks which began Friday, patrol officers estimated.

Nintey-three auto drivers were arrested for speeding as a result of radar checking over the weekend. Faulty equipment warnings were issued to almost 400 drivers while 60 were summoned into court on drivers license and equipment violations.

Patrolmen from this district plus personnel from the West Liberty and Fairfield districts operated the radar machines at points along Highways 218, 261, 1, and 6. One of the units shifted position during the night.

## 105 To Attend Annual Finkbine Dinner

One hundred and five male campus leaders at SUI have been invited to attend the 42nd annual Finkbine dinner Thursday at 6:30 p.m. in the Main Lounge of Iowa Memorial Union, according to Allin W. Dakin, SUI administrative dean.

The dinner, a traditional event at SUI, was inaugurated in 1917 by the late W. O. Finkbine, a former Des Moines businessman and an 1880 graduate of the SUI College of Law, and the late Carl Kuehnle, 1882 graduate of the College of Law from Denison. Finkbine died in 1930, Kuehnle in 1938.

Professor Robert F. Ray, director of the SUI Institute of Public Affairs, will be master of ceremonies for the dinner, the theme will be "The Importance of Leadership in the American Way of Life."

Charles H. Whitmore, Rock Island, Ill., president of the Iowa Illinois Gas and Electric Co., and a 1940 graduate of the SUI College of Law, will represent SUI alumni at the dinner.

Giving the response for the students will be Tom G. Burrows, A4, Belle Plaine, liberal arts senior and captain of the track team. President Virgil M. Hancher will deliver the traditional closing address.

Among students to be honored will be presidents of social, professional and college honor fraternities, captains of athletic teams, officers of senior classes and student organizations, editors of student publications and senior class members of the 1959 Rose Bowl football team. Group singing, a traditional part of the dinner will be led by Professors Clarence M. Updegraff of the College of Law and John C. Simms of the Department of Music.

## Iowa Geologists Plan Field Trip Saturday

The Iowa Geologic Survey will hold a field trip Saturday to a Henry County limestone quarry three miles southwest of Mt. Pleasant. The group is to meet at the quarry at 8 a.m.

The survey group will also visit an underground limestone mine near Douds and a quarry near Selman.

Allen C. Tester, professor of Geology at SUI will discuss various geologic formations that will be seen on the field trip.

## Berlin Air Limit Rejected By U.S.

WASHINGTON (UPI) — The United States rejected Soviet protests Monday and declared that American planes, if need be, will fly at altitudes of more than 10,000 feet in approaching and leaving Red-encircled Berlin.

This country took the stand in a note delivered in Moscow by U.S. Ambassador Llewellyn Thompson. It was the latest in a series of exchanges stemming from a "buzzing" of an American plane by Soviet fighters on March 27.

Each country has accused the other of jeopardizing the success of the forthcoming Foreign Ministers Conference on Berlin. The Soviets contend U.S. planes may not fly higher than 10,000 feet.

The American note insisted, however, when weather or operational characteristics of the equipment dictate such action, American planes serving Berlin will fly at higher altitudes.

It said the buzzing action by the Red fighters in the March 27 incident constituted a serious violation of flight regulations in the Berlin area.

The note said the Red fliers thus "intentionally created the very hazard to flight safety about

which the Soviet representatives have professed concern."

The Soviet Foreign Ministry also was told that flights by U.S. aircraft into Berlin do not require prior agreement from the Reds. The note said the United States "never has recognized and does not recognize any limitation to the right to fly at any altitude in the corridors."

The note pointed out, however, that advance information on the March 27 flight had been submitted to the Soviets.

The United States also disputed a Soviet suggestion that this Government was seeking to "complicate" the Russian-Allied agreement to hold the Foreign Ministers Conference.

The Kremlin claim, the note said, "is not consonant with the facts of the situation." It added: "On the contrary, it is the Soviet Union which is creating doubt as to its intentions by attempting unilaterally to assert a 'right, never recognized by the Western powers, to forbid flights to Allied aircraft at altitudes above 10,000 feet and by permitting Soviet fighter aircraft to harass U.S. aircraft in a way dangerous to their safety and to the lives of their crews."

"The United States expects the Soviet Government promptly to issue instructions to its personnel in Germany to ensure fulfillment of their responsibility for flight safety in the air corridors to Berlin."

The Soviet protest was delivered April 4. The C-130 was on a routine flight in the Frankfurt-Berlin air corridor when the incident took place.

## Soviet Production Quotas Surpassed Under New Plan

MOSCOW (UPI) — The new seven-year industrial program designed to outstrip the United States and make Russia the world's leading producer nation has fulfilled its first goals by 105 per cent, the Government reported Monday.

The Central Statistical Board issued figures on the first three months of operation of the new plan which Premier Khrushchev established with the avowed intent of catching up to U.S. industrial production in 1955 and surpassing it by 1970.

"Soviet industry has fulfilled the state plan for gross production in the first quarter of 1959 by 105 per cent," the Board said in a Tass News Agency statement.

The Russians reported the biggest successes of the plan in the production of construction materials, which the statistics said surpassed the first quarter quota by 25 per cent, and food stuffs — 27 per cent over the quota.

## Income Tax Revision Gets Senate Okay

DES MOINES — The Iowa Senate Monday revised the state income tax structure. It passed 31-14 a bill which is expected to bring in an additional \$1 million a year in state revenue.

Under the bill, taxpayers would figure their state income tax by multiplying their Federal income tax by eight per cent.

For example, a person making \$5,000 a year presently pays \$813 in Federal taxes and \$69.33 to the state. By taking eight per cent of the Federal tax, the taxpayer would pay \$65.04 under the Senate plan.

The eight per cent tax bill was endorsed by Gov. Herschel Loveless. It was passed and sent to the House over a plan offered by Sen. Jack Miller (R-Sioux City). His bill would have used the Federal \$500 exemption structure in figuring state income taxes.

Miller contended his tax measure would bring in \$1,311,422 additional tax money.

He said his bill would not be quite as simple as the eight per cent measure, but it would still be a very simple tax computation.

Miller said it would have given much fairer recognition to economic status, number of dependents, and added it would not benefit the high income group at the expense of the low income group.

Opponents of the eight per cent bill argued that it would hit the lower income brackets by making them pay equal taxes in effect, with those with higher incomes.

The House already has passed a bill which would boost state income taxes by about 4 1/2 per cent.

Iowans now are paying state income tax of .75 of one per cent on the first \$1,000 of taxable income, 1.50 per cent on the second \$1,000 and so on up to 3.75 per cent on all income above \$4,000.

The House approved bill would boost rates to .80 of one per cent on the first \$1,000, 1.06 per cent on the second \$1,000 and on up to four per cent on all over \$4,000.

Miller said it was hoped the House-passed bill could be kept in the Senate committee and that the House would approve the Senate bill instead.

The eight per cent measure, in the form of an amendment drafted by Sen. Lynn Potter (D-Cresco), would knock out about \$253,000 no-pay returns presently filed with the state, backers of the bill said.

## 'Coexistence' Called Gimmick

CEDAR FALLS — The Chinese Nationalist minister to the United States said Monday a co-existence policy is a Communist gimmick.

He is Shao-Chang Hsu, who made his remark in an interview prior to an address which opened the Iowa State Teachers College 3rd annual All-College Conference on International Affairs.

He said there is a general tendency on the part of many in the free world to believe that it is generally possible to live in peaceful co-existence with the Communist world.

"Coexistence is a slogan coined by the Communists for the purpose of carrying on the cold war," he said.

"The recognition of Red China is a position that the United States cannot take without doing mortal harm to the free world."

"If the United States were to do so it would be claimed by the Communists as not only their greatest single victory in the cold war, but as an indication of the righteousness of the Communist cause."

## Loveless Asks Standard Pay For Jobless

WASHINGTON — Gov. Herschel Loveless of Iowa called on Congress Monday to impose Federal unemployment compensation standards on the states, fixing minimum benefits and duration of payments.

Testifying before the House Ways and Means Committee, Loveless said revision of the Federal-state unemployment insurance program would provide "at least a subsistence level of income security to American workers and... a valuable stabilizing force in our economy."

"The adoption of the uniform minimum standards proposed... would also be beneficial to Iowa workers because it would mitigate the harsh disqualification provisions of the Iowa law," he said.

"Typically, Iowa has the highest rate of voluntary quit disqualifications of any of the states, running in most quarters from three to three and a half times the national average rate."

Loveless also testified that adoption of Federal uniform standards would protect most states against what he called "the cut-rate competitive tax policies pursued in a minority of the states."

By fixing a Federal pattern, Loveless said, such standards would require a pattern of employer taxes that would not allow individual states to cut tax levels as an inducement to new industry.

"What proposed standards would do is to set up a perfectly reasonable and necessary safeguard against the use of employee income security as a bargaining device to secure industrial relocations that may or may not be justified in terms of basic economic consideration," he said.

"It must be recognized that the American economy is a national economy, which can not possibly be separated into 49-air-flight compartments."

"Speaking as the governor of Iowa, a state which depends upon national markets for export of its major output, I want to go on record as recognizing that our state cannot maintain high levels of employment and income, except as purchasing power of workers in Detroit, Chicago, Pittsburgh and other production centers is maintained."

## Shot In Foot While Hunting

Joe S. Dixon, G. Walla Walla, Wash., was shot in the toe Saturday by a .38 calibre pistol held by Margaret K. Barto, A1 Cedar Rapids, when it discharged accidentally. The bullet pierced the second toe of the left foot.

The accident occurred while the couple was on a shooting excursion along the Iowa River three miles south of Iowa City with Samuel J. Kozak, G. Danvers, Mass., and Kathryn M. Laughlin, A1 Cedar Rapids.

Dixon was treated at University Hospitals for the wound.

## If Time Stands Still— May Travel Space By 1969

DALLAS, Tex. — The Air Force's top expert on space medicine said Monday trips to other planets may be possible within 10 years if time actually stands still in space.

If time curves in space as the Einstein theory argues, Dr. Hubertus Strughold said, time would stand still in space. The theory that the human body will not age, based on the Einstein time-curve argument, would possibly mean that less food, air and water would be needed for space travelers.

But not just anyone could make a trip to Mars or Venus, Strughold said.

He said it would be necessary to condition a space flier for what may be an ordeal. The human problems of a quick orbital flight around the earth—such as Project Mercury—"are not too difficult because of the short nature of the flight," Strughold, a former German air force colonel, said.

Strughold is adviser for research at the School of Aviation Medicine at Randolph Air Force Base in San Antonio, Tex.

He is here for a space age forum sponsored by the University of Texas.

Strughold said that three methods, or a combination of them, may let man pass safely through

the dangerous radiation belts encircling the earth.

He named the methods as shielding, entering and leaving at the polar regions where radiation is weaker, and greater velocity for the space crafts.

Another space expert, Andrew G. Haley of Washington, said the United States will have a man circling the earth in outer space within 18 months. By 1964 humans will be circling the moon, the International Astronautical Federation president said in an interview preceding the forum.

He also cited estimates by other scientists that 100 million planets have sufficient oxygen, nitrogen and carbon dioxide to sustain life. He said they likely will have life as we know it.

"Once we get adequate scientific devices we should be able to put a man on one of those," he said.

But effective exploration of the planets probably is 25 to 50 years ahead, Haley estimated.
