'Never Start War,' Khrushchev Pledges

Speaks Before Polish Crowd On Capitalism

Says U.S. Wanted War When Stronger

SOSNOWIEC, Poland (AP) — Soviet Premier Nikita Khrushchev gave his pledge to a cheering crowd Thursday that "never, never, never shall we launch any war against any country anywhere at any time."

"We want coexistence," he told a meeting of miners unions. "We don't want war. We don't need war. Neither do the capitalist countries."

Boasting of the rocket might of the Soviet Union, Khrushchev said capitalist nations wanted war when they thought they would win, "but I believe they have become wiser."

He left little doubt that he had the United States mainly in mind.

"We are stronger than you are. You have no intercontinental ballistic missiles. You send up rockets containing oranges. We send up rockets which can carry several tons," he said he had told American visitors.

"Imagine the size of the bomb that could be contained in our missiles compared with the size which could be contained in yours. You cannot equal us."

This remark brought a roar of cheers from the delegates, assembled from many countries for the Communist-sponsored conference.

"We have much better equipment than the United States, which will never be able to catch up with us technically," Khrushchev went on after the cheering subsided. "We are first technically, but second to the United States in all economic fields."

Khrushchev has said before that the Soviet Union would not start a war. Shortly before precipitating the Berlin crisis last November, he told Soviet Military Academy graduates in Moscow: "We declare once again, as we have declared in the past, that our armed forces will not be used anywhere or at any time for predatory purposes. We shall never settle disputes in relations between countries by means of war."

Khrushchev spoke vigorously and without notes. Refreshed by a night's sleep, the 66-year-old Soviet leader showed none of the signs of weariness that appeared on the first two days of his visit to Poland.

Predicting that world victory for Communism was inevitable, Khrushchev said it would be achieved without war, for "the next war will mean calamity for all humanity."

He said he had been criticized for once declaring that Communism would dig the grave of capitalism.

"All right, I did say it," Khrushchev continued. "But I didn't mean we would take shovels and dig their graves; only that voluntarily. We must struggle."

Khrushchev said some day "capitalists are going to be kept in archives like old newspapers or newsreels. We will look at them as today we look at the remains of prehistoric monsters and say: 'Look, that was a capitalist.'"

Senate Passes Federal Land Bank Revision Bill

WASHINGTON (AP) — The Senate Thursday night passed and sent to the House a bill designed to give the Federal land banks more freedom of action and make them more useful to farmers.

Approval was by voice vote, with no senator speaking in opposition.

The Senate Agriculture Committee said the bill's main objective is to transfer from the Farm Credit Administration to the Federal land banks responsibility for appraising farm properties put up as security for land bank loans.

It also would repeal the five per cent interest rate ceiling on farm loan bonds; repeal the \$200,000 maximum limit now fixed for land bank loans, and allow the land banks to make loans without an amortization plan, requiring a fixed number of annual or semi-annual payments.

Reds May Lower Price In Berlin Deal

GENEVA (AP) — Andrei Gromyko told the West Thursday night that the Soviet Union may lower its price for a stopgap Berlin deal.

The Soviet Foreign Minister made his statement in the Big Four conferences after Christian A. Herter had warned that new crises and tensions in disputed West Berlin could imperil world peace more gravely than ever before.

The U.S. Secretary of State called for a final solution for Berlin pending the reunion of East

Ol' Earl Roars Through Texas

EL PASO, Tex. (AP) — Louisiana's Gov. Earl K. Long — apparently as fit as a highly strung fiddle — roared across west Texas Thursday for a weekend in El Paso and possibly Mexico.

Long came out of Big Springs, Tex., at 90 m.p.h. Thursday morning and clipped through Midland, Odessa and Jecos, Tex., at high speed.

Aids arriving in El Paso by plane before the governor said, "He's in real good shape. He's looking better and feeling better and he's in real good spirits."

At Big Springs, the governor expressed some negative thoughts on marriage and his nephew, Sen. Russell B. Long (D-La.) in an interview with Mabel Gouley of the Fort Worth Star-Telegram.

Of his estranged wife, Blanche, he said: "I will never make up with her."

"We've fought for 25 years. It's a wonder we haven't killed each other. I've just give in. I've always give in. I'm tired giving in. "When the money gets low the love gets low."

The governor predicted Sen. Long would come in fourth in a race for governor but added: "I'd like to have a tryout with him."

Beauty Defies Church

Sue Simone Ingersoll is fitted into her swimsuit Thursday in Long Beach, Calif., by Virginia Fry in preparation for her participation as Miss New Mexico in the 1959 Miss Universe contest. Miss Ingersoll, a Catholic, was told by Archbishop Edwin V. Byrne of Albuquerque that her appearance in the contest while wearing a swimsuit would cause her and her family to be deprived of the sacraments of the church for an indefinite period.—AP Wirephoto.

McDonald Touring Key Steel Producing Areas

AEC To Build Test Reactor At Ames Lab

WASHINGTON (AP) — The Atomic Energy Commission (AEC) plans to build a \$3 million research reactor at a government laboratory in Ames.

A recent executive session of a House Appropriations Subcommittee, considering AEC funds for the current fiscal year, was told of the proposed project on the campus of Iowa State University, Ames.

The testimony, made public Thursday, shows that \$3.7 million is included in the AEC's physical research program for construction of the reactor, plus building and partially equipping a related building at the laboratory.

The proposed reactor would use highly enriched fuel, cooled and moderated with heavy water.

"The acquisition of a reactor by the Ames Laboratory will round out the basic research programs now in progress in chemistry, physics, metallurgy and engineering and will assist the laboratory to produce pure metals and other materials for use throughout the atomic energy program," an AEC explanation said.

"At the present time, the pure metal program is expanding rapidly. Analytical control, however, is essential for the production of these materials. A reactor is a part of the laboratory's facilities will permit the development of a program an activation analysis which in turn will improve the quality of the materials being produced."

The explanation given the subcommittee said these are areas of engineering where fundamental research must be done in order to keep ahead of applications of the results of such research in actual practice.

"A laboratory like Ames which is not completely concerned with application and development," it said, "is the ideal place for such research."

The reactor, AEC continued, also would benefit the nation's atomic energy program as a training facility.

"For the past four years," it said, "Iowa State University has had a nuclear engineering curriculum for graduate students leading to a master's degree. This would expand and become more effective if a reactor were available to the faculty and students."

Robber Handcuffs Policeman, Teller In Cruiser, Flees

NILES, Ohio (AP) — A neatly dressed robber left a policeman handcuffed in his cruiser Thursday and made off with \$41,000 which he took from a woman bank teller the policeman was escorting.

Patrolman Anthony Marsico, 33, told FBI agents he was backing up his cruiser in front of the Niles Bank when the man jumped in the right rear door, behind him and Miss Judy Whitney, 21, the teller. Miss Whitney had just left the bank with the canvas pouch of cash. The money was for the McKinley Federal Savings and Loan Company where she works. Marsico was with her as a guard.

The robber ordered Miss Whitney to lie down on the front seat and made Marsico drive about two miles to Stevens Park, the patrolman said. The holdup man threatened to shoot him unless he obeyed orders, Marsico said. During the ride, the patrolman added, the gunman reached over to turn up the rear view mirror so Marsico couldn't see behind.

This move aroused police and the FBI to speculate later that a confederate of the holdup was following in another car.

By the time the cruiser reached Stevens Park its radio was shut off. The robber took Marsico's gun and carried it away with him. He threw the cruiser ignition keys in some bushes where they were found later. The patrolman's handcuffs were used to link him and Miss Whitney together and to the cruiser steering wheel. Their eyes and mouths were covered with adhesive tape, Marsico said.

Joseph F. Finnegan, director of the Federal Mediation and Conciliation Service, shakes hands with R. Conrad Cooper, left, outside a meeting room in New York City Thursday. Finnegan and aides arrived from Washington, on orders from President Eisenhower, to hold separate conferences with industry and union negotiators to seek a quick solution to the steel strike which began early Wednesday.—AP Wirephoto.

Nebraska Nuclear Power Plant Set To Open In 1962

WASHINGTON (AP) — Nebraska's nuclear power plant is scheduled to be in full operation by the summer of 1962.

Chairman John A. McCone of the Atomic Energy Commission (AEC) gave this target date for full power operation of the Hallam plant at a recent closed-door meeting of a House appropriations subcommittee.

The testimony, made public Thursday, shows that research and development emphasis will be reduced in the current fiscal year to a level of \$4.2 million as compared with \$5.5 million in the year which ended June 30.

"It is planned that the nuclear portion of the facility will be under cover by December, 1960," an AEC statement on the Nebraska plant said.

Arrangements under the project, being built in cooperation with the Consumers Public Power District, call for an estimated \$18 million in pre-operational research and development assistance by the AEC and \$8 million in post-operational aid.

Steel Cost After Strike Could Effect SUI-Horner

The future cost of steel could be the most important effect of the steel strike on SUI construction, George L. Horner, superintendent of the Division of Planning and Construction, said Thursday.

Higher prices may affect future capital improvements he said, but there are no plans for a major letting until contracts for the addition to the Chemistry Building is let this fall.

Horner repeated that he did not think the steel strike would have any effect on the construction underway. He said structural steel has already been obtained or committed for these jobs.

The strike's effect on construction of the Law Annex, to be added to the Law Commons, would depend on the length of the steel strike, he said.

He added that steel prices would not have any effect on this construction as bids for the project have already been taken.

The contract for the Law Annex has not been awarded, and Horner estimated it would be about two weeks before such action would be taken.

GROMYKO HOSTING
GENEVA (AP) — Secretary of State Christian A. Herter and his wife accepted an invitation to be guests of Soviet Foreign Minister Andrei Gromyko at luncheon Saturday.

Partly Cloudy

New Mexico Paper Gives Details—

'Man In Space' Plans Told

ALAMOGORDO, N.M. (AP) — The Alamogordo Daily News published Thursday a detailed breakdown of the means and timing the United States will use to put man into space and on the moon.

The News, in a copyrighted story by Reporter Hal Wills, outlined the U.S. space program. The next step, the paper said, will be the firing of one or more chimpanzees into orbit this fall.

The program, as outlined by the paper, called for the firing of the first moon rocket, the Saturn, in 1962 or 1963.

If that firing is successful, the United States, in 1965 or 1966, will fire the Nova — a seven-stage space ship designed to land on the moon for surface exploration, and return.

The News is published on the fringe of some of the nation's leading missile testing bases — Holloman Air Force Base, Holloman Missile Development Center, McGregor firing range and the big Ft. Bliss, Tex., range where

the country's missile crews are trained.

The copyrighted story said one or possibly more, of eight chimpanzees now training at the University of Kentucky and Holloman Air Force Base will be fired this fall aboard a satellite rocket. "If all goes well, they will return alive."

The News story, attributed to unnamed missile sources, continued: "Next step in the drive to place man on another planet will be the long-heralded flight of the X15 rocket-powered plane, now undergoing a series of tests in California. This step is but a sideline to the actual program, and has as its only significance the fact that man, for the first time, will leave the earth's atmosphere under rocket power."

"Prespace flights at suborbital altitudes will constitute part of the training to be given America's present seven space candidates, who will initiate partial space exploration."

"On these suborbital flights, the candidates will be fired on short

missions aboard a modified Redstone rocket. These preliminary flights, at altitudes of 20 to 25 miles, will depart from Cape Canaveral, Fla., and will be around 100 miles in length.

"On the scientists' drawing boards, and scheduled to be flown some time in 1962 is the Centaur. The Centaur is the first planned space vehicle to use new, high-energy fuels, now in the development stages."

"Centaur, to weigh in excess of 300 tons and standing several hundred feet tall, will be able to carry 2,500 pounds of equipment or a crew of men to a point 22,000 miles from earth."

"Successor to the Centaur is the most powerful spaceship now planned of those using present missiles, and is the last of the present series of 'conventional' rockets."

"To be fired in late 1962 or early in 1963, the gigantic Saturn will utilize eight Jupiter rockets as its first stage, blasting away from the earth with a thrust of 1.5 million pounds."

Greeted With Applause By Rank-And-File

Further Talks Set For Early Next Week

PITTSBURGH (AP) — David J. McDonald, president of the striking United Steelworkers Union, and his two top aides began a tour of major steel centers Thursday to tell their story to the rank-and-file members. The chief negotiator for the idle basic steel industry took a rest.

With no further talks scheduled until next week, McDonald kicked off a series of weekend personal appearances in Bethlehem, Pa., Trenton, N.J.; Philadelphia, and other Eastern steel points.

He dispatched Vice President Howard R. Hague to the Midwest for membership rallies in Chicago and Calumet, Ill.; and sent Secretary-Treasurer I. W. Able to Pittsburgh to report to members there.

McDonald was greeted by applause, cheers and shouts of, "That's a boy, Dave," by strikers at the Bethlehem Steel Co. plant in Bethlehem, Pa.

"We meet with the government on Monday," McDonald told the union members, "but I don't know whether it will do any good. Up to this point, we have been meeting nothing but messenger boys."

In mentioning the government meeting, McDonald was referring to the plans of Joseph Finnegan, director of the Federal Mediation and Conciliation Service, to meet separately with industry and union representatives in New York on Monday.

R. Conrad Cooper, the industry's chief negotiator, returned to Pittsburgh Wednesday night for what he said was a rest. But an industry spokesman said Cooper spent all day Thursday in his office at the U.S. Steel building.

Finnegan returned to Washington to report to Labor Secretary James P. Mitchell after conferring in New York with top industry and union negotiators Wednesday. He said he doesn't think the strike is susceptible to easy or early solution.

Pressure mounted on the White House to take action in the strike.

Democratic Gov. Foster Furcolo of Massachusetts telegraphed President Eisenhower to appoint a three-member fact-finding board to make recommendations for a settlement of the strike.

Sen. Stuart Symington (D-Mo.), also called on the President to create a fact-finding board.

The steel industry rejected a union proposal to submit the strike issues to a fact-finding board comprised of one union and one industry member and a third neutral.

The steel shutdown has caused reverberations of unemployment in allied industries.

Some 25,000 workers in rail, coal, truck, inland water shipping, iron ore mining, and processing industries have been idled. The number of layoffs is expected to increase daily.

STEEL STRIKE AT A GLANCE

IDLE — An estimated 500,000 Steelworkers with 25,000 in allied fields such as rail, coal, truck, inland water shipping, iron ore mining, and processing industries. Layoffs mounting.

Negotiations — No further talks scheduled until Monday in New York when Federal Mediation Chief Joseph Finnegan meets with industry and union negotiators.

Developments — Steelworkers Union President David J. McDonald and top aides begin tour of major steel centers to tell their story to rank-and-file. Industry's chief negotiator, R. Conrad Cooper, leaves New York City for rest. Pressure put on White House to take action in strike.

Production and wage losses — An estimated 300,000 tons of steel daily, with wages losses running \$70 million weekly. Strike has cut off nearly 90 per cent of nation's steel-making capacity.

Issues — Union seeks increased wages and improved fringe benefits. Industry claims it would be inflationary to grant demands, that it must hold line on production costs and also have more leeway in management operations.

The Daily Iowan is written and edited by students and is governed by a board of five student trustees elected by the student body and four faculty trustees appointed by the president of the University.

Hand-To-Mouth Foreign Aid

The so-called foreign aid bill, more accurately entitled the mutual security program, has gone through the two houses of Congress at a level of around 3.5 billion dollars as compared with 3.9 billion dollars requested by the administration.

If the full amount authorized should actually be appropriated, the cuts would not be unbearable but would leave a reasonable workable overseas program, except possibly for hurrful delay in arms modernization among allies.

But the second stage of the fight over the adequacy of a mutual assistance or "foreign aid" program is sometimes the more serious one, though less publicized than the first.

Unfortunately, certain events have taken place in the maneuvering of the bill through the Senate which may leave a reduced enthusiasm in some quarters for the tests that are yet to come.

Aside from the actual amounts involved in the bill, an important question was whether a greater continuity of planning would be introduced into the aid program by authorizations which would extend for as much as five years.

Senator Fulbright, chairman of the Foreign Relations Committee, urged this particularly as to the Development Loan Fund in the economic side of the program. The

Draper Commission marshaled important reasons why it should apply also to military programing. It is seriously needed in both fields.

In his concern to protect economy in government President Eisenhower allowed the weight of the administration to be thrown against provisions he had earlier supported for a lending agency with authority to borrow from the Treasury over a five-year period.

The activity, furthermore, is one which the country very much needs to strengthen its diplomacy at a crucial time. Much if not all of the military portion should really be figured as part of the defense budget of the nation.

These are things the country can afford and should support, even at the cost of uncomfortable taxes and of economies on other areas. It is gratifying that the nearly 180 million dollars requested by the White House for technical cooperation or sharing of skills with other countries, one of the smaller items of the bill, was approved without change by both houses of Congress.

We hope the House and Senate in coming weeks will decide to appropriate for mutual security the full amount permitted under the authorizations on which they very nearly agreed even before conference committees went to work - The Christian Science Monitor.

The Jazz Scene

Apparently sensing that the climate for harsh criticism is not favorable, the gentleman ordinarily in charge of this column has requested that I "say some nice things" about contemporary jazz music. This dictum may presage a short column indeed, for the things that come most frequently to my attention are hardly appropriate for a sanguine outlook.

The Chicago Stadium seats something in the neighborhood of 20,000 spectators. It is the site of double-header basketball programs, some dandy, head-splitting hockey games, and has, on frequent occasions in the past, played to half-million-dollar gates in professional boxing. Just the place, one should think for the Sonny Rollins Trio (tenor saxophone, bass and drums) to be playing on the afternoon of Sunday, August 9.

Good Listening - Today On WSUI

AN EVENING AT THE OPERA at 7:30 means another hearing (albeit a fresh one) of one of the most durable folk operas, Bedrich Smetana's "The Bartered Bride."

In the Prague National Theatre version to be heard tonight Jan Vogel, who conducts, and all the soloists are in fine rural merry-making form.

BEFORE THE BRIDE IS BARTERED, there will be non-vocal music (all in English) on Evening Concert, from 6 p.m. to 7:30: Variations on a Nursery Song by Dohnanyi, Quintet No. 2 by Brahms and the Beethoven Piano Concerto No. 2.

THE SOUND OF SONNY (ROLLINS), if you would like to check it against the "Jazz Scene" article elsewhere in this edition, may very well audible at 4 p.m. today on tea time. If not there will be other items by many of the more distinguished members of the modern music

one of the important figures in contemporary jazz. He, like Mulligan, has discarded the piano as an accompanying instrument, without, however, drawing attention to the fact in the obvious Mulligan way. More than that, he has undertaken on one of his recordings, perhaps more by accident than premeditation, a complete performance of "It Could Happen to You" (lasting more than three and one-half minutes) without benefit of accompaniment of any kind.

In that curious melange the playboys have planned, there are few enough bright spots. In addition to Rollins whose mention has been at length because readers will have had an opportunity to hear him, live but distant, on the campus during the past year, the others include the Oscar Peterson Trio, The Kai Winding Septet; Don Elliott, The Count Basie Band, Coleman Hawkins and ol' Diz. I fear, however, they may be no match, through that horrendous week-end, for Louie Armstrong's All-Stars, Red Nichols and His Five Pennies, the Four Freshmen, Stan Kenton and Band, the Dave Brubeck Quartet, Bobby Darin, Jimmy Rushing, Joe Williams, June Christy, David Allen, Dakota Staton, Chris Connor and Mort Sahl; not to mention, Earl Bostic's Sextet, the Austin High Gang, Ahmad Jamal and the Dukes of Dixieland. ALL of whom are scheduled to appear. Good luck, and cancel by subscription!

Coexistence Of Poland - Forced, Free?

By J. M. ROBERTS

Associated Press News Analyst When Soviet Premier Nikita Khrushchev last visited Poland, in 1956, bearing the threat of armed invasion similar to the one he carried out in Hungary about the same time, even the Communists didn't welcome him with flowers.

He was fighting then to prevent Poland from turning down the Yugoslav road of independent Communism.

The flowers with which he was greeted on his current visit are a symbol of the enigma which Poland politics now presents to the world.

From independent Communism the Warsaw regime has now been converted to a coexistence which sometimes seems rather warm, though Western estimates of true Polish feelings are such as to keep their relations warmer than with any other Communist-bloc nation, too.

There is no question that Poles have more freedom than in 1955, in religion, in speech, and in the literary fields.

There is no question, either, that the government is carefully watching to see that no one goes too far.

One reason for Poland's posture of coexistence, willing or forced, is a fear which has been heightened as West Germany has re-armed and during the talk about German reunification. Poland is constantly worried about her territory, which formerly belonged to Germany, which the Soviet Union surrendered in return for taking eastern Poland.

Another great fear in Poland is among the peasants. They are less changed in their ways than those of other satellites. But greater production is needed, and farm production is one of Khrushchev's preoccupations. Loss of peasant independence may be just around the corner.

It is a medical fact that babbling of the type described sometimes follows a slight stroke. Thursday Khrushchev was reported back in normal form.

Abuse Of Free Enterprise

EDITOR'S NOTE: The following article is written by Stephen Tudor, graduate student in American Civilization. Mr. Tudor's opinion and analysis regarding current domestic and foreign issues will appear regularly in The Daily Iowan during the next several weeks.

BY STEPHEN TUDOR

Will the U.S. assist in the overthrow of Fidel Castro? The answer could be yes, if American sugar interests have their way. Castro, in his agrarian reform program, plans to have the enormous U.S. owned sugar plantations divided up among the Cuban farmers. Opposing him are the American owners, and the Cuban upper and middle classes, i.e., lawyers, middlemen, suppliers and shippers, who deal with the Americans. They say that Castro will wreck the Cuban economy permanently.

The Americans have several potent weapons to protect their holdings. Economic: they can move their plantations to America, and they can lobby to get a tariff slapped on Cuban sugar, to protect the higher cost of American production. Political: they can climb on the bandwagon of Cuban ex-air force chief Pedro Luis Diaz Lanz, and use the red smear on Fidel, a "despicable tactic."

On the American side, profit is the motivation. The sugar companies have exploited the Cubans and now they are willing to exploit U.S. consumers, if they cannot smash the Cuban bid for freedom.

On the Cuban side, Castro is unrealistic about land reform, and probably desperate. Certainly he is determined not to become an American satellite; his extreme inveighing against America indicates that. But he ought not to be misunderstood by Americans; his political position in Cuba necessitates a given quantity of defiant loud talk.

The administration has made an admirable effort to halt American military interference on either Cuban side. It remains now to restrain the abuse of free enterprise by the sugar industry. In time, Castro will probably be forced by the sheer impossibility of it to moderate his agrarian reform.

Stilwell Announces Retirement As VA Hospital Manager

Dr. Leland E. Stilwell, manager of the Iowa City Veterans Administration Hospital, has announced his retirement from the VA, effective Aug. 8. Stilwell, who has been manager of the hospital since November, 1951, has also been clinical professor of obstetrics and gynecology at SU.

Can Britisher Park Himself At A Meter?

LONDON (AP) - British traffic authorities are trying to decide if a man can legally park himself at a parking meter for automobiles.

The son of the late H. G. Wells is one of the principals involved in this neat little issue of English ethics.

What happened was this: Prof. George Philip Wells, who will be 58 Friday, is professor of zoology at London University. Driving to the Saville Club for lunch, the professor sighted a parking space. Just as he was about to back his car into it, he saw a man standing in the street in front of a ticking meter.

"Excuse me," Wells called out from the driver's seat. "But I'd like to park where you are standing."

"Sorry," said the man, "but I'm parked here."

"You can't park there," replied the professor with considerable logic. "You're a man, not an automobile."

"I'm well aware of that," rejoined the man, "but I'm parked here until my brother arrives in his car."

"Nonsense," muttered the professor to himself as he slowly, but firmly, backed his vehicle into the space.

"Sir," said the man, "that's unethical." Unethical or ethical, the professor parked.

Who was right? "The man was right," said the official Automobile Assn. "We can see no reason why a man should not reserve a space for a reasonable time. But it would not do for everyone to do it."

"The man was wrong," said the Westminster City Council. "The parking meters are our responsibility and we say that no one has the right to reserve a parking space by this method."

"We don't honestly know," said the Ministry of Transport. "There does not appear to be any provision in the Road Traffic Act to cover reservation of parking spaces."

There hangs the issue. Quite incidentally, Prof. Wells' novelist father once wrote a story called "The Time Machine."

Treasury To Offer Notes At Highest Interest Since '29

WASHINGTON (AP) - The Treasury announced Thursday that it will offer \$14 billion of securities in two issues, each carrying 4 1/2 per cent interest.

The rate is the highest the Government has paid since 1929. The new issues will not be offered publicly, but only to holders of maturing issues.

They will have their choice of either 12 1/2 month Treasury notes, to be dated Aug. 1, or notes running 4 years and 8 months, to be dated July 20.

Negotiators Try To End Sea Strike

ST. LOUIS (AP) - Negotiators for the nation's four largest riverboat lines and the National Maritime Union, (N.M.U.), met Thursday for the second time in an effort to settle one facet of a dispute that has halted an estimated 80 per cent of inland waterways traffic.

A federal conciliator attended the meeting. The two sides met alone last week.

The barge lines involved are Federal, Mississippi Valley, American Commercial and Union. They tied up their boats June 30 when three unions declined to grant a four-month contract extension. The unions said they were willing to work temporarily without a contract.

Even Elizabeth Couldn't Save Footman's Love

SUNDERLAND, England (AP) - Not even Queen Elizabeth could save Bill Robson's romance.

Robson, a 28-year-old royal footman, is with the Queen's party touring Canada. He was to have married a rich man's daughter, Patricia Evans, 24, here next month.

Queen Elizabeth made special arrangements for him to fly home Aug. 1 instead of returning aboard the royal yacht Britannia. But all in vain.

At her father's mansion home, Patricia Wednesday night announced: "I have decided to call it off. I have nothing more to say."

She had been engaged for seven months to the strapping ex-soldier.

Thief Planning Fancy Picnic?

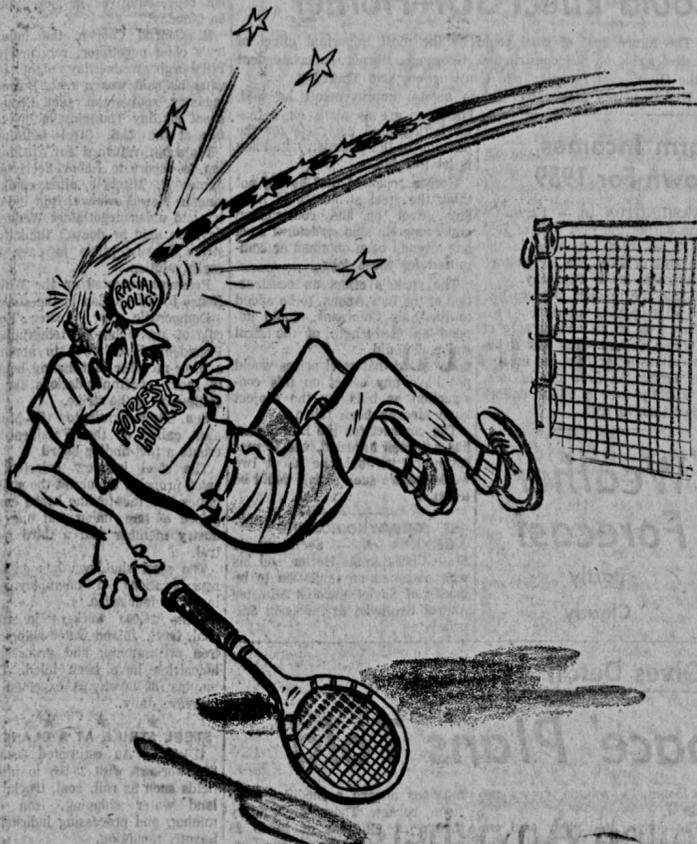

DES MOINES (AP) - Maybe he was planning on going to his own picnic, well dressed and with money in his pocket.

Anyway, a thief entered the Ivan Sams home two and one half miles southeast of nearby Altoona Wednesday and took:

Twelve frozen, dressed chickens, some beef, butter and buns, from a freezer.

Fifteen dollars from a bedroom dresser; two men's suits; another \$15 from a billfold, and a table radio.

Sheriff's deputies, to whom Sams reported the thefts, estimated the loss at \$150.

Rocket Veers Off Course, Blown Up

CAPE CANAVERAL, Fla. (AP) — A thundering Juno II rocket was exploded 10 feet off its launching pad Thursday when it veered toward the heavily populated Florida mainland. No one was injured in the spectacular blowup.

The range safety officer pressed a button that tore the 76-foot, satellite-toting rocket apart before it could rise clear of its own exhaust fire.

Topping over to the west, the rocket crashed in flames 50 yards from the thick-walled blockhouse from which scientists witnessed the blastoff.

Each of the four stages of the Juno II exploded. The 91½-pound satellite plopped out of the nose a mass of blackened wreckage.

The 55 observers in the blockhouse were detained inside the structure for an hour until the raging fire was extinguished.

Among those inside were Brig. Gen. John Barclay, commander of the Army Ballistic Missile Agency, and Dr. Kurt Debus, director of flight operations for the project.

Juno II was supposed to take off on a northeast course that would have hurled its satellite into an elliptical orbit over the Soviet Union.

Three hours after the explosion,

Missile Exploding

Debus told newsmen the malfunction was caused by failure of an inverter generator which converts DC power to AC and feeds it into the guidance "brain" of the rocket.

With its power cut off, the "brain" did not function and the missile headed off aimlessly in the wrong direction.

Photographers shooting the blastoff from only a quarter of a mile away got a serious fright.

"It looked for a minute like it was coming right at us," said James P. Kerlin of The Associated Press. "Actually, it was tumbling off to the right of us. But it was too close for comfort."

Miss Universe Contest's 60 Entrants Arrive

LONG BEACH, Calif. (AP) — A bumper crop of beauties arrived Thursday for the Miss Universe contest, amid the usual mishaps and a touch of mystery.

The municipal band played "California Here I Come" and a crowd of several hundred cheered at Municipal Airport as an airliner landed with its curvaceous cargo of domestic and foreign contestants.

Oscar Meinhardt, the contest promoter, said approximately 60 were aboard the plane — Scandinavian blondes, Latin brunettes and redheads and brownettes from elsewhere.

Contest officials were slightly upset because three girls, the Misses Italy, Belgium and Turkey, became exhausted and were detained by their doctor in their New York hotel. But Meinhardt said he believed they would be along soon, in time for the contest competition which starts next Tuesday night and ends Friday night, July 24.

There was a slight air of foreign intrigue about Miss United Arab Republic Egypt and Syria. Meinhardt said he can't find her.

Humphrey Addresses NAACP

Sen. Hubert Humphrey, (D-Minn.), is greeted by Arthur B. Spingarn, left, and Roy Wilkins, right, on his arrival to speak at the 50th annual convention of the National Association for the Advancement of Colored People, (NAACP), in New York City Thursday. Humphrey, introduced to the convention as the "John the Baptist of the civil rights movement," said he would refuse any "political success" which depends on changing his beliefs on civil rights. Humphrey has announced that he plans to seek the Democratic presidential nomination next year. Spingarn is NAACP president; Wilkins is the organization's executive secretary.—AP Wirephoto.

County Red Cross Asks For 10 Polio Duty Nurses

An urgent appeal for 10 nurses for polio duty at the Methodist Hospital, Des Moines, was made Thursday by the Johnson County Chapter of the American Red Cross.

The appeal was made following a message from Kathryn Fitzpatrick, Red Cross Midwestern Area Nursing Director, St. Louis, Mo.

"The Methodist Hospital is now handling about 50 polio cases and Iowa Health Department officials say the peak will not be reached for at least two weeks. Most of the cases are children," Miss Fitzpatrick said.

"To assure that these cases receive adequate care, nurses must be recruited at once. With the rising incidence of polio this summer, additional nurses undoubtedly will be needed in the next few weeks," Miss Fitzpatrick added.

Miss Fitzpatrick reported that the request for the Red Cross to recruit nurses was made by the Methodist Hospital in Des Moines and the National Foundation. The Foundation will pay the cost of transportation to Des Moines and will provide maintenance, in addition to salary, while the nurse is serving in polio work.

All nurses available for polio duty are requested to contact the Johnson County Chapter of American Red Cross, 309 E. Washington St. Phone 6933 for details.

Not All Houston Schools Should Integrate—Head

HOUSTON, Tex. (AP) — Some Houston schools should remain segregated in the event that the South's largest school system is integrated, Dr. John W. McFarland, superintendent of schools, said Wednesday.

"Many believe every effort should be made to insure that there would remain some schools where white students attend school solely with other white students and other schools where Negro students can attend school solely with Negro students," McFarland said. "It is extremely important that, if and when desegregation occurs, it should occur gradually," he said.

U.S. Dist. Judge Ben C. Conally ordered the Houston School Board to submit a desegregation plan to him by Aug. 17. The district has been under a federal court order for two years calling for integration "with all deliberate speed."

City Officials Can Give Objections

AMES (AP) — Iowa City officials are to be invited to present to the Iowa Highway Commission the objections to an interchange on old Highway 218 near Iowa City.

The commission directed Chief Engineer John Butter Thursday to issue an invitation to City Manager Peter Roan of Iowa City to bring a delegation to Ames to make the presentation.

Commission Chairman Robert Brice said that considerable opposition to the proposed interchange has developed and the commission probably should have an explanation.

Butter said that while the delegation is in Ames, Carl Schach, traffic engineer, can explain the position of the commission regarding the proposed construction.

Water Project Bill Including Iowa Passed By House

WASHINGTON (AP) — The House Thursday passed and sent to the Senate a bill to authorize construction of water projects which would cost \$657 million.

Passage came on a voice vote after brief debate. No one spoke in opposition.

Rep. Clifford Davis, (D-Tenn.), told the House that the House Public Works Committee had unanimously recommended the bill and that there was no opposition from the Budget Bureau or the Army Engineers.

In the past three years similar bills have twice been vetoed by President Eisenhower because of projects to which he objected.

A compromise version finally was passed last year and was accepted by the President.

Projects in the bill cannot be constructed until Congress appropriates the money to pay for them. Among the projects were \$38,000 for the Dubuque harbor and \$132 million for the Missouri River Basin.

Scandinavian Charmers

Lis Stolberg, right, of Denmark, is helped by Marie Louise Ekstrom, Sweden, after a cinder lodged in her eye upon the arrival of the Miss Universe contestants in Long Beach, Calif., Thursday. At left is the third Scandinavian entrant, Jorunn Kristiansen of Norway.—AP Wirephoto.

CHURCH FAVORS CASTRO

HAVANA (AP) — The Cuban Council of the Evangelical Protestant Churches Thursday announced support for Prime Minister Fidel Castro's regime, calling it democratic and "repudiating totalitarianism of either left or right." The statement said the council was pleased about the religious liberty enjoyed by the quarter-million Protestants in this predominantly Roman Catholic country.

Typhoon Billie Moves Into Red China Leaving Many Dead

TOKYO (AP) — Typhoon Billie, now reduced to a heavy storm, moved slowly into Communist China Thursday. Cleanup and relief operations began in Japan, Formosa and the Philippines, where a total of 58 persons were believed dead. Thousands were homeless.

The Japanese Weather Bureau reported Billie's winds were blowing well below typhoon force at 60 miles an hour as the storm headed into Chekiang province on the coast of central China.

But Peiping radio reported millions of Chinese were mobilized. A million were sent into the fields to harvest early rice menaced in coastal counties. The Reds already are facing food troubles because of floods in south China earlier this month.

Japan counted 45 dead, 75 injured, 16 missing and 1,000 homeless. Police estimated a total of more than \$3 million damage.

In the Philippines, Billie claimed one dead. More than 100 persons were homeless and property damage was estimated at \$500,000.

In Formosa, a third of the capital city of Taipei was flooded.

A U.S. District Court jury took only 16 minutes Wednesday to find the local and Rutledge guilty.

The injunction, issued June 4, prohibited four trucking firms from discriminating against Overnite Transportation Company, a non-union firm whose employees the Teamsters are seeking to organize. Overnight operates in the Carolinas, Virginia and Georgia.

Several terminal managers of the unionized trucking companies testified that Rutledge told them to ignore the judge's order.

Parents Of Iowa Air Crash Victim File Federal Suit

DES MOINES (AP) — The parents of a Des Moines woman killed in an air crash last year began suit Thursday in the U.S. District Court for \$150,000 from the government.

The victim was Mary A. Mackay, 36, an employe of United Air Lines, who was killed along with 48 others when a United plane and an Air Force jet fighter collided near Las Vegas, Nev., April 21, 1958.

The suit was filed by the victim's parents, Mr. and Mrs. Alexander MacKay, and the administrator of the estate.

The petition said the commercial plane was struck by the jet on a simulated instrument flight from Nellis Air Force Base at Las Vegas. The petition alleged that the deaths were caused by negligence and carelessness on the part of the persons connected with the Air Force.

Announcing

Two new arrivals from the house of Gorham

Baby's off to a good start... and you're mighty popular with baby's proud parents when you give either of these two new Gorham Sterling fork-and-spoon sets. Just received at our store. Come in, or phone.

"Strasbourg" Baby Fork and Spoon Sets, each set, \$4.00

"Camellia" Baby Fork and Spoon Sets, each set, \$4.00

Better yet—if you haven't time to browse in our baby goods department, send your order in by mail. We have facilities for shipping anywhere.

STY CLASS WEATHER RESISTANT VELVET SHOE

Twin Loss To Yanks Drops Tribe To 2nd

NEW YORK (AP) — The New York Yankees jolted Cleveland loose from a month-long hold on the American League lead Thursday by sweeping a doubleheader from the Indians.

The champs hit two home runs in each game, winning the opener 7-5 in 10 innings on Mickey Mantle's 19th homer, and taking the second game 4-0 as little Bobby Shantz pitched his first shutout in more than two years.

The double victory, giving the fourth place Yankees a sweep of the three-game series, tumbled the Indians a game behind the Chicago White Sox.

New York twice blew leads in the opener. The Yanks squared it at 5-1 when Yogi Berra, 5-for-7 for the day, hit his 11th home run leading off the ninth.

Mantle then put it away with two out after Bobby Richardson singled in the 10th, hitting his first home run since June 23 and getting his first runs-batted-in since June 25. Both homers were off losing reliever Gary Bell and gave the decision to Duke Maas, also working in relief.

Enos Slaughter backed Shantz' five-hitter with a two-run homer in the second off loser Bob (Riverboat) Smith, a lefty. Hank Bauer added a base-emph drive off reliever Jim (Mudcat) Grant in the seventh.

Home runs — New York, Slaughter (4), Bauer (6).

1st Game
Cleveland 000 020 020 0-5 9 1
New York 020 010 000 4 8 0

2nd Game
Cleveland 000 000 000-0 5 9
New York 020 010 000 4 8 0

Home runs — New York, Slaughter (4), Bauer (6).

ChiSox 4-4, BoSox 3-5

BOSTON — Chicago's "go-go" White Sox hustled past Cleveland Thursday though they were forced to settle for a doubleheader split with Boston.

After the White Sox took the first game 4-3, the home forces won the nightcap 5-4 on a Vic Vertz single and Mike Fornieles' relief pitching.

Wertz drove in the deciding run off Ray Moore with a smash to right which sent home Marty Keough who had doubled.

When starter Jerry Casale was yanked for a pinchhitter, Fornieles threw shutout, three-hit ball at Chicago over the final three innings.

Veteran White Sox catcher Sherm Lollar broke a 3-2 tie with a double to right center in the seventh inning of the opener. The blow scored the fleet Jim Landis from first base.

1st Game
Chicago 020 100 100-4 9 1
Boston 000 021 000-3 4 1

2nd Game
Chicago 010 111 100-5 12 0

A's 4, Orioles 3

BALTIMORE — Three innings of shutout relief pitching by Tom Sturdivant saved the Kansas City Athletics a 4-3 victory over the Baltimore Orioles Thursday night.

The Orioles threatened to pull the game out of the fire against Bud Daley with a home run outburst, but the former New York Yankee put out the fire.

Kansas City reaped seven of its nine hits off Jerry Walker in the first three innings to jump off to a 4-0 lead while Daley was handcuffing the Orioles with only a second inning single by Billy Gardner.

The Orioles shelved Daley in the sixth on consecutive homers by

NEW YORK YANKEE OUTFIELDER Tony Kubek, left, collides with shortstop Gil McDougald in the first game of the Yankee-Indian doubleheader at New York Thursday. Kubek was taken to a hospital for x-rays of the left side of his head, neck and shoulder which showed he suffered a slight concussion. The Yankees took the opener 7-5 in 10 innings then came back in the nightcap to win 4-0.

back of Gene Woodling's single. Walt Drogo and Gus Triandos in Sturdivant came on to save Daley's ninth victory, four of them at the expense of the Orioles, against six defectors. Sturdivant didn't allow the Orioles a hit and fanned four to shut the door in their face.

Kansas City 112 000 000-4 9 3
Baltimore 000 003 000-3 4 0

Home runs — Baltimore, Drogo (4), Triandos (2).

Senators 5, Tigers 2

WASHINGTON — Washington's sizzling Senators Thursday night completed a three-game series sweep as they whipped Detroit 5-2, behind the nine-hit pitching of Bill Fischer and Dick Hyde.

The hottest team in the American League, winning 18 of their last 28 games for a 543 pace since last June 14, the Senators tightened their grip on fifth place. The slumping Tigers dropped their fourth in a row, and 11th in their last 13 games.

1st Game
Washington 000 020 000-2 9 3
Detroit 020 000 000-5 7 2

2nd Game
Washington 010 111 100-5 12 0
Detroit 000 000 000-0 5 9

Home runs — Washington, Throneberry (7).

Cubs 4, Braves 2

CHICAGO — In a game marred by a freak unassisted double play by Al Dark, Ernie Bank's 25th homer and ineptness of the Milwaukee Braves, the Chicago Cubs Thursday swept its series with the one-time league leaders 4-2.

It was the first three-game set dropped by the sagging Braves this season. The consecutive defeats matched Milwaukee's longest losing streak of the campaign.

Lew Burdette, yanked for his 13th victory, was yanked for a pinch hitter in the seventh and absorbed his ninth setback as the Braves dropped their eighth game in the last 12.

Dave Hillman went the route for his fifth triumph against seven losses, yielding nine hits.

The crowd was provided with an oddity in the second inning after the Braves scored on Frank Torre's triple and Stan Lopata's single.

Johnny Logan singled and Lopata stopped at second. Burdette grounded to Dark and when Lopata crashed into the Cub third

Rule, Klontz, Hird Gain Quarterfinals In Amateur

DAVENPORT (AP) — Defending champion Jack Rule of Waterloo and SUI advanced to the quarterfinals of the State Amateur golf tournament Thursday.

Rule downed John Liechty of Iowa City, a captain of the 1959 Iowa golf team, 4 and 3 in the morning round and edged John Kettman of Bettendorf 1 up in a third round match.

Another former champion, Herb Klontz of Iowa City, advanced opposite Rule defeating Clyde McEntire of Marshalltown 3 and 1 in the second round and Lloyd Koehler of Davenport 1 up in the third round.

Bill Hird of Fort Dodge, another SUI golfer, ousted medalist Bob Loufek of Davenport 3 and

Hoosier Bell Shooting For Owens' Mark

PHILADELPHIA (AP) — Greg Bell is old (29), out of condition (too much study) and isn't even sure he can beat the Russians when he broad jumps against them this weekend in the big U.S.-Soviet track meet.

"But with it all," he said Thursday, "I still haven't given up the idea of breaking Jesse Owens' world record."

It was on May 25, 1925 — almost a quarter of a century ago — that Owens got off a 26 foot, 8 1/2 inches jump at the University of Michigan. It has withstood the onslaught of the years and right now stands as the oldest mark in the record book.

"That's really all I have left to conquer in track," said Bell, who just finished his second year at dental school.

"I've won the Olympic championship (25-3 1/4), so there's nothing else to try for but Owens' record."

Bell is going to clash head-to-head with a 21-year-old Russian who is being touted as a potential record breaker behind the Iron Curtain.

His name is Igor Ter-Ovanesyan, and he got off a jump of 26-3 1/2 feet three months ago. That was the first 26-foot-plus jump ever by a non-American. Now the jubilant Russians are talking in terms of 26-10.

"I don't know if I'll be able to beat him in the meet. You know, at 29, I'm an old man in this business. Since being in dental school I've been out of training, and, in fact, I've been working out for only a couple of weeks."

But that will be no good news to the Russians. Since starting practice again, Bell has done 26-1 1/4. He has a dozen jumps over 26 feet, more than any broad jumper in history.

1st Game
San Francisco 000 001 000-1 3 1
Philadelphia 000 000 000-0 3 2

2nd Game
San Francisco 000 000 001-1 3 1
Philadelphia 000 000 000-0 3 2

Home runs — Philadelphia, Conley (7-6).

Reds 7, Cards 5

ST. LOUIS (AP) — Jerry Lynch drove in four runs and Willard Schmidt starred in relief Thursday night as the Cincinnati Reds defeated the St. Louis Cardinals, 7-5.

Lynch batted in two runs with a third-inning single off Ernie Broglio. Facing Broglio again in the fifth, Lynch hit a two-run homer, his eleventh of the season.

Johnny Temple broke a 5-5 tie in the sixth inning, singling home Eddie Kasko, who had doubled. Temple's blow came against Marshall Bridges, the loser.

Schmidt, a former Cardinal took over in the fifth with two men on and two out and pitched shutout ball for 3 1/2 innings. He was credited with his second victory in four decisions. Tom Acker and Joe Nuxhall pitched a scoreless.

Cincinnati 102 021 011-7 13 0
St. Louis 000 230 000-5 10 0

Home runs — Cincinnati, Lynch 11.

Ex-Champ Essig Gains Semifinals In Public Links

DENVER (AP) — Defending champion Dan Sikes Jr. was eliminated but Don Essig III, the 1957 champion, advanced through two rounds of match play Thursday in the National Public Links Golf Tournament.

Leonard Pietras, 25, Toledo, Ohio, upset Sikes, University of Florida law student, 2-up in the third round. Pietras shot a 4-under-par 67 over the 6,617-yard Wellshire course.

Frank Campbell, teammate of Sikes from Jacksonville, Fla., countered by knocking Pietras out of the quarterfinals 3 and 1.

Quarterfinal winners along with Essig and Campbell were Bill McCool, San Francisco and Bill Wright, 23, Seattle.

McCool plays Campbell and Wright meets Essig over 36 holes in today's semifinals. Campbell won the longest match of the third round 1-up in 20 holes from his former caddie, Clifford Brown of Cleveland.

Art Andrews Out In Clay Court Meet

CHICAGO (AP) — Art Andrews of Iowa City, came to the end of the trail Thursday in the National Clay Court Tennis Tournament.

The former Big Ten champion was defeated in the quarterfinals by Whitney Reed of Alameda, Calif., 6-4, 6-1, 4-6, 6-2. Andrews had pulled a major upset in beating fourth seeded Earl Buchholz Jr., St. Louis, Wednesday.

Reed has proved to be the major obstacle in Andrews' bid for national prominence this year. He ousted Art in the quarterfinals of the National Collegiate Meet in June then went on to win the NCAA crown.

Another United States Davis Cupper, Alex Olmedo, tasted defeat Thursday, joining Buchholz

and Barry MacKay on the sidelines.

A shocked, angry crowd booed Olmedo off the courts after he blew a humiliating quarter-finals match.

Abe Segal of South Africa, a steady 28-year-old tournament veteran who never has reached international tennis prominence, blated the new Wimbledon champion 6-2, 6-1, 6-0.

Segal played smoothly, but Alex beat himself.

Tournament officials promptly disqualified Olmedo and his doubles partner, Earl Buchholz Jr., of St. Louis from further competition in the tournament.

Tournament Chairman C. P. Hennessy issued a statement saying:

"Olmedo has been defaulted by us in interest of better tennis for the spectators and players. Dr. James Beatty, official referee, has okayed this. An official protest will be filed as soon as possible to the U.S. Lawn Tennis Association."

Dr. Perry Jones, captain of the U.S. Davis Cup team, attributed Olmedo's actions to "accumulated mental fatigue" resulting from his long trip here from Europe and the recent acclaim he has received for his tennis successes.

Renee Schuurman of South Africa pulled an unexpected but nowhere near as spectacular upset, eliminating defending three-time women's champion, Mrs. Dorothy Head Knode of Forest Hill, N.Y., in the quarter-finals, 7-5, 8-6.

Olmedo's performance was unbelievably ironic.

The Los Angeles and Peru star won three singles matches and a doubles contest Wednesday after arriving two days late at the tournament in suburban River Forest.

Thursday he punched at the ball, served listlessly with numerous double faults, plodded slowly after sideline shots and refused to come to the net.

The crowd yelled, "Come on, Alex, play tennis. Win a game." As it became increasingly apparent the tournament's star attraction would never be in the match, the crowd began to boo after each point and when it was over, they loosed an angry barrage of booms and whistling at the top-seeded star.

Olmedo told newsmen, "Don't talk to me now."

Segal, the third-seeded foreign player in the tournament stalked off the court and slumped before his locker. Someone consoled him. "Don't feel bad. It's not your fault."

Later Segal declared, "I don't like to play like that. I went out there to play tennis. I don't know what was the matter."

Rosensohn Sees \$3.5 Million Gate In Heavyweight Rematch

NEW YORK (AP) — Promoter Bill Rosensohn, who took a \$40,000 loss on the first fight, Thursday figured the Ingemar Johansson-Floyd Patterson heavyweight title encore would gross an overall \$3,500,000 in September.

He said Sept. 22 at Yankee Stadium was the likely time and place for the return meeting that could bring each fighter over a million dollars if the rosy dreams materialize.

Just back from a vacation in Los Angeles, the 39-year-old New Yorker said he intended to run the entire promotion himself and that included theater-television.

"I'll have to see what Ingemar has to say and I'll see him in Sweden soon," said Rosensohn. "I'm going over there July 24 to talk to him. He's easy to get along with and wants to fight where there's the most money. I'll announce the site about Aug. 3. "Almost certainly that has to be

New York. I think it's the only city where you can get a \$100 top price for seats. I think we can draw 60,000 spectators and \$2,000,000 at the gate although I'll scale the stadium for 80,000 and \$3,000,000.

"I intend to handle the theater-television myself. I feel strongly that we can draw upwards of \$2,000,000 in the theaters. The promotion's end of this would be half a million dollars. Radio and movies should add at least \$500,000. That would make upwards of \$3,500,000 for the fighters to share in."

Each fighter has contracted to receive 30 per cent of everything for the return fight. If he receipts hit the boy promoter's rosy forecast, the fighters could earn a record \$1,050,000 each.

Heavyweight champion Gene Tunney earned boxing's record fee of \$990,445 for his second fight with Jack Dempsey at Soldiers Field in Chicago.

Rugged Road For Kimball In Iowa Women's Meet

MASON CITY (AP) — Judy Kimball of Sioux City has a big job cut out for her if she is to repeat as Iowa Women's Amateur Golf champion next week.

The Kansas University student is one of four highly regarded players in the meet which gets underway Tuesday on the Mason City Country Club course.

The others are Northwestern University student Andy Cohn of Waterloo, Sharon Fladoos of Dubuque and Mrs. Ann Casey Johnson of Mason City.

All four qualified for the championship flight of the Women's Western Amateur tournament in Chicago last week.

Mrs. Johnstone, bidding for her sixth Iowa Women's crown, is the early favorite because she will be playing on her home course.

The tournament has been held here three previous times and Mrs. Johnstone won it on two of those occasions.

A former Curtis Cup team member, Mrs. Johnstone reached the second round of the Women's Western last week.

Miss Cohn made the biggest impression of the Iowa contingent in the Women's Western. The lanky 19-year-old coed reached the semifinals before she was ousted.

Miss Fladoos, 16-year-old high school student, and Miss Kimball were eliminated in the first round of the Chicago tournament.

This year's tournament marks the third time that the championship will be decided on a medal play basis over a 72-hole route.

Riverbanking Custom May Be As Old As The University

City Editor
By MARLENE JORGENSEN

"Riverbanking" as a word has probably only existed on the SUI campus for about 20 years, but the practice is much older.

No one knows when the practice began, but it's a pretty safe guess that students began doing it in 1847 when the University was founded.

Perhaps the Indians who made their homes near what is now Iowa City had their own rituals similar to our "riverbanking." As the covered wagons rolled west, perhaps the young people sneaked off to get in a few minutes of "riverbanking" when the wagons paused here for the night.

Anyway "riverbanking" today is as popular a term as it is a practice. According to a recent Daily Iowan survey, the word came into use in the later 1930's. An SUI graduate of 1934 couldn't remember the term being used in his day, but a 1938 graduate said it was used when he attended SUI.

Graduates after the turn of the century said they remembered taking their sweethearts to sit in the moonlight on the banks of the Iowa River when they were students, but they didn't call it "riverbanking." It was just "sittin' by the river."

A graduate of the later '20's said students in her time had "blanket parties," but they had never heard of "riverbanking." She also said there was no activity on the river banks in the daytime as there is now. "Bums used to stretch out on the campus, but certainly not the students," she said.

At one time "the island" was a popular place for students and sitting in the moonlight. "The island" was a chunk of land in the middle of the river just north of City Park where the river curves west. It was reached by

boat and was "just big enough for 12 couples and a bonfire."

The island was removed in the late '30's by filling in the river channel on the north side of the island, thus making the island part of the north riverbank.

Other graduates, all after 1938, said they remembered going "riverbanking" in their college days. The more recent the date of graduation, the more familiar they were with the term.

The meaning of the word? Well, everyone has his own. The appropriate time and place? That's up to the individual, too.

Regardless of how the game is played, "riverbanking" is a familiar word in the vocabulary of each SUI student and is a common practice each spring, summer, and fall.

Non-Union Wives Taunt Picket Line Near Iron Mine

ELY, Minn. (AP) — Pickets paraded in force before the non-union Zenith underground iron ore mine here Thursday and were met by taunts from workers' wives.

"Go home and leave our men alone," the women said. They told the pickets they should be ashamed of themselves and accused them of trying to put men out of work who returned to the mine only four months ago after nearly a year's layoff.

Supt. R. L. Mitchell said the mine, which provides a \$30,000 weekly payroll in this one-industry community, will continue to operate as long as the miners report for work.

"Our workers have a perfect right to cross the picket lines," Mitchell said, "because they are not unionized."

He said absenteeism on the 3 a.m. shift was about normal and most miners went through the picket lines thrown up by United Steelworkers Union Local 1664 of the Pioneer mine, the community's other mine, which employs about 400.

Zenith workers have not been formally organized into a union since a changeover in management.

Some 250 men are employed at the mine.

Officials Nix Deere Idea For Signpost

AMES (AP) — A request by John Deere Co. and Marshalltown Chamber of Commerce officials to erect a sign in the road right of way at the intersection of Highways 14 and 30 was rejected by the Iowa Highway Commission Thursday.

The sign was proposed to direct motorists to the site of the John Deere Field Day next Sept. 15 and 16.

R. C. Boyd, maintenance engineer, told the commission he had gone over the area with John Bailey, general manager of the Marshalltown Chamber of Commerce, and they had noted several billboard frames near the intersection not now carrying any advertising.

But he said a John Deere representative had said the firm still would like to erect a sign on the highway right-of-way at the intersection.

Boyd said state law prohibits erection of any commercial billboards on any highway right-of-way.

Commissioner Joe S. Strong said the annual field day is a big event and good for Iowa. But in view of the wording of the state law, he said, he felt he must move "with regret" that the John Deere request be denied.

Williams Named To Atomic Energy Commission

WASHINGTON (AP) — John H. Williams, a nuclear physicist, was nominated by President Eisenhower Thursday to be a member of the Atomic Energy Commission.

Williams, now director of the Atomic Energy Commission's research division, was named to succeed Willard F. Libby, who resigned recently. The nomination is subject to Senate confirmation.

Williams has been in his present post since 1958. He came into government service from the University of Minnesota where he was a professor of physics for 12 years, starting in 1946.

From 1943 to 1953 Williams also served part-time as a technical consultant at the Los Alamos, N.M., atomic energy laboratory.

Drama Workshop Students To Present Play Today

A feature of SUI's Summer Workshop in Dramatic Arts for high school students is a production of Horton Foote's "Young Lady of Property," to be presented today at 2:30 p.m. in the SUI Studio Theatre. The play is open to the public free of charge. Tickets are not required for admission.

"A Young Lady of Property," the action of which takes place in

a small Iowa town in the year 1922, was originally presented six years ago on the Philco TV Playhouse and later adapted by the author for stage presentation. Since the first scene of the play takes place in the local Post Office, and the rest of the production alternates between a kitchen set and a backyard, this SUI presentation is in the form of "area staging" (the action shifting from place to place on the same stage), which makes possible the swift scene changes necessary in a TV script adaptation.

The Foote play is directed by Andrew E. Doe, G. Iowa City.

Gas Tax Favored By Roads Group

DES MOINES (AP) — The Iowa Good Roads Association was on record Thursday in favor of a federal gasoline tax increase to provide additional funds for interstate highway construction.

The association's board of directors acted at a meeting Wednesday night to support a higher gas tax.

The U.S. Senate recently turned down a proposed one and one-half cent a gallon federal gasoline tax increase which would have made it possible for the Bureau of Public Roads to make an allocation to the states of interstate funds next year.

Iowans Pay About \$42 Million More U.S. Tax In '59

DES MOINES (AP) — Iowans paid close to \$42 million more in federal taxes during the first six months of 1959 than in the same period of 1958, V. Lee Phillips, Iowa director of the U.S. Bureau of Internal Revenue, said Thursday.

The total for the first half of this year was about \$447 million, Phillips said that although corporation income tax collections have dropped off in some parts of the nation, they have gained in Iowa. Collections of this revenue in Iowa for the fiscal year which ended June 30 were a bit more than \$146.5 million, a gain of about \$9.5 million over the previous year.

Tennis Toddler

Eleven month old Sharon Hopkins proves that tennis is a sport for all ages—and what she lacks in size and age she makes up for in enthusiasm. Sharon began coming to the tennis court with her parents, Mr. and Mrs. Charles Hopkins, when she was only 8 months old—but then she was only a stroller-spectator. Sharon, who has blue eyes and red hair (like her father's), found that all she needed to join the sport was her own miniature size tennis racket and ball and a firm grip. Sharon's father is a senior in commerce and her mother a liberal arts senior. They play on the SUI courts once or twice weekly and always take Sharon along because baby sitters are too expensive. Daily Iowan Photo by Jo Moore.

MOOSE THRIVING
TORONTO, Ont. (AP) — Ontario's moose are thriving. The Lands and Forests Department reports that, on the basis of a survey by airman and trappers, the moose population last winter probably numbered about 125,000. That's almost three times the 42,000 of a 1953 survey.

Liquor Group Hears Protest Of Closing

DES MOINES — The Iowa Liquor Control Commission heard opposition Thursday to its plans to close several state liquor stores on grounds they are not making much profit.

Postville Mayor Lloyd Schroeder and Republican State Rep. Elmer Hoth, who lives in the town, appeared before the commission to protest the closing of the Postville store. The closing of that and another at Elgin was decided on at the last commission meeting.

The store at Manilla also is scheduled to be closed Aug. 15 and a protesting delegation from Manilla is expected to appear before the commission today.

Commission Member Gerald W. Smith said the Postville and Elgin stores show a small amount of sales compared with eight other stores in a 50-mile area around the towns.

But Hoth argued that the Postville store still makes a profit. He said the Federal Government hasn't closed the Postville post office and it makes no profit at all.

Smith said the commission aim is to limit the number of state liquor stores to 180 and there is one over that number now.

Swisher—New Trend Toward Iowa Colleges

"A new trend in the Legislature's attitude toward higher education was seen during the recent session in the way the members of the general assembly handled capital improvements funds," State Rep. Scott Swisher, (D-Iowa City) said Thursday noon in a speech at the Rotary Club luncheon here.

Swisher said that the general assembly provided the State Board of Regents with funds for capital improvements without passing on individual projects the Regents suggested.

He contrasted this action to the previous session of the legislature where he pointed out that each

Scott Swisher

project was taken up and passed separately and in some cases construction costs limited.

"The legislators' attitude constituted an emancipation for the Board of Regents," Swisher continued.

He added that, in general, the recent session of the legislature recognized education and particularly higher education, to a fuller extent than in the past.

Progress was made on the state scholarship plan, the honors system suggested by the Board of Regents, and additional funds were provided for salary and operating expenses for the state-supported schools, he said.

Swisher pointed out that obstacles in reorganization of public schools were removed. He concluded that a solid basis for state aid to districts was established under an incentive plan, and special programs of the schools were recognized by the legislators.

Dispute Between Pastor, Church Settled In Court

DES MOINES — A proposed settlement of a legal dispute between the congregation of the Fellowship Tabernacle and its former minister, calling for the church to pay the Rev. H. H. Caswell \$22,500, has been approved by District Judge Dring Needham.

The congregation had accused the Rev. Mr. Caswell and his wife of approving the sale of the church to themselves for \$100 in May of 1955 and then reselling it to the congregation and its new board of directors two days later for \$50,475.

The Rev. Mr. Caswell and his wife claimed they sought only to recover the amounts they had spent on the church.

Judge Needham's decree approving the proposed agreement indicated that the church congregation approved it by a unanimous vote.

One Free, Other Jailed

Edward Langley, 27, jobless former truckdriver, and Katharine Dowsett, 20, shipbuilding heiress, are shown as they arrived in London's Holloway Prison. It ended their long attempt to get married in defiance of her father and a court order. In a London court Thursday, Langley was sent to prison for contempt of court by Justice Harry Vaisey, who indicated that it wouldn't be for a short time. Katharine, after a closed hearing a few hours later, was freed from jail.—AP Wirephoto.

House Group Plans Bill To Enlarge, Revise NLRB

WASHINGTON — The House Labor Committee Thursday tentatively voted to enlarge the National Labor Relations Board, (NLRB), and revise some of its practices.

Nearing the completion of a union regulation bill, the committee wrote into the Senate-passed version an assertion that the board must assume jurisdiction over all labor cases.

As things now stand, the board refuses to take jurisdiction in some smaller cases and state agencies are prevented by the Taft-Hartley Act from stepping in to settle them.

In dealing with its enlarged business, the NLRB would be enlarged from five to seven members under the House committee bill.

And in another action, the committee voted to eliminate from the Taft-Hartley Act the present requirement that union officials file non-Communist affidavits.

Other sections of the bill, however, would prohibit Communists from holding union office or Communists from representing management at the bargaining table, if they are to use NLRB facilities.

Waverly Men Deny Owing Added Gift Tax

WASHINGTON — The Schield brothers of Waverly deny government claims that they owe additional gift taxes for 1955.

The Government contends that Wilbur Schield and his wife, Eileen, each owe \$2,520 and that Vern L. Schield and his wife, Marjorie, each owe \$630.

The Iowans say the Government erred in not allowing them annual exclusions on gifts to their children from trust funds and that the Government also erred in holding that the stock of the Schield Bantam Company was worth \$11.10 a share in that year.

The company makes heavy machinery. The Government, in another case which is still pending, is seeking an additional \$70,000 in income taxes from the two families for the same year.

Our Busy Professors

Leslie G. Moeller, professor and director of the School of Journalism, has been named to appear on a panel on the recruiting of students for the study of journalism at the convention of the Association for Education in Journalism at the University of Oregon, Eugene, Aug. 26.

Panel members will discuss trends in enrollment, which has been declining at a time when demands for graduates have been rising steadily and have been in excess of supply. Methods of improving recruitment procedures to meet the demands for students will also be considered.

Moeller is a member of the AEJ committee on recruitment, and is also a member of the committee on Journalism Education, Personal Recruiting and Training of the Inland Daily Press Association.

Ellis H. Newsome, associate professor and head of the advertising department in the School of Journalism, is studying the advertising operations and problems of the Iowa-Illinois Gas and Electric Company, Davenport, under a fellowship granted through the Founda-

tion for Economic Education, Incorporated.

Under its College-Business Exchange Program the Foundation places college faculty members in summer positions with business.

This six-week fellowship will firms participating in the program, continue until Aug. 21.

Three members of the political science faculty will participate in panel discussions at the fourth Institute on State and Local Government being held during the next three weeks at Drake University.

Donald E. Boles, associate professor of political science, will take part in a panel to explore the facets of county government, July 30.

Donald B. Johnson, associate professor of political science, will discuss "The Political Process: Decision Making in Iowa," Aug. 5.

Russell Ross, associate professor of political science, will participate in a discussion on "Constitutional Reform: A Convention in 1961," Aug. 6.

All panels will begin at 9 a. m. and will be in the lounge of Old Main on the Drake campus.

Soldier Refuses Polio Shots—

Army Orders Fitness Test

WASHINGTON — The Army has ordered a hearing to determine the fitness of a soldier who has refused to take polio shots.

The soldier, Pvt. James B. Merritt, 24, Maynardville, Tenn., was inducted May 28, 1958. He is assigned to the Brooke Army Medical Center at San Antonio, Tex.

A decision announced Thursday said Merritt would "not be forced" to take the inoculations, but will face a board to determine his fitness for service because of "allegations of serious personal misconduct" uncovered in an investigation of his claims for exemption from the shots on religious grounds.

Records show that Merritt claimed membership in the Baptist Church when he was inducted. Later, Merritt said he was a member of the Church of God.

Part Of Highway To Open Saturday

AMES — The Iowa Highway Commission said Thursday that a 12-mile segment of U.S. Highway 59 from the Missouri border north to Shenandoah will be opened to traffic Saturday.

Pavement and erosion control work on U.S. 59 from Shenandoah north to Iowa Highway 184 is tentatively scheduled for letting in October. This eight-mile stretch is expected to be ready for traffic sometime in 1960, completing the paving of U.S. 59 in Iowa, the commission said.

'Living Apart For Several Weeks' Niven, Wife Separated

HOLLYWOOD — Actor David Niven said Thursday that he and his wife, Hjordis, have separated.

Niven said in a statement: "We have been living apart for the past several weeks. No divorce is contemplated. We are trying to work out our very personal problem as quietly and privately as possible."

He did not indicate the nature of the problem.

They were married in March 1948 in London. It was her first and his second. He is British, she Swedish.

Niven said his wife left their home two weeks ago to stay with

friends. She could not be reached immediately for comment.

Niven's first wife, Primula Rola, was killed in 1946 in an accident at a party. She opened a door at the late Tyrone Power's home, thinking it led into a closet, and fell into the basement.

UNDERSEA CABLE

OTTAWA — A submarine telephone cable is to be laid between Newfoundland and Greenland and Iceland. It is scheduled for completion by 1962, the Canadian Overseas Telecommunication Corporation says. Ultimately it will be extended to Britain.
