Humphrey, Reuther Confer

SEN. HUBERT HUMPHREY (D-Minn.) looks speculative as he leans over to speak to United Auto Workers President Walter Reuther during the UAW convention in Atlantic City, N.J. Humphrey later addressed the convention.

CR Finance Manager Found Stabbed To Death Thursday

CEDAR RAPIDS — The manager of a finance company was found stabbed to death in his office here Thursday under mysterious circumstances.

Frederick Leonard Coste, 47, sole employee of the Cedar Rapids branch of the Family Finance Corp., was found lying on his back in a pool of blood in the interview room of the second floor office on Second Avenue in the downtown district.

He had been stabbed six times by an unknown assailant. Police said they had no clues as to the identity of the slayer or the motive.

Officers said robbery was a possible motive, but the killing also might have been done by someone who had been refused a loan or someone who was delinquent in loan installments and faced demand for payment.

Police Chief Carl Badger said there was no immediate trace of the weapon used.

Entrance to the office, in which Coste was alone, was at the top of a stairs leading from a door on Second Avenue, one of the city's busiest streets.

Anyone could have entered or left the stairway without being observed, officers said.

The slaying was discovered about noon by two Cedar Rapids customers, Thomas McMurrin and Donald McSpadden.

They told police they had gone to the office to conduct some business and on finding the body went out and contacted Patrolman Donald Hollister.

The police chief said there was no way to determine whether any money was missing from the office without a check of the books and records and that would require time.

The finance company also has a branch office at Davenport. Chief Badger said the Davenport office was asked to send a representative to check the books.

Coste and his wife have a daughter, 7, and his mother, Mrs. Louise Coste, lives here.

Dr. Percy Harris, deputy Linn County coroner, estimated that Coste had been dead about two hours before the body was found.

He said there was a bruise on the left eye and six stab wounds in the chest, three of them penetrating the vital organs and one piercing the heart.

Chief Badger said Coste formerly had an office girl but she resigned sometime ago.

FTC Chairman Raps Executives On Quiz Scandal

WASHINGTON — Chairman Earl W. Kintner of the Federal Trade Commission Thursday waved the big stick of possible stricter government regulation over radio and TV broadcasting.

He brought up the threat as a result of disclosures that some popular TV quiz programs of a couple of years ago were rigged and the public accordingly was deceived.

In a speech to an eastern regional conference of the National Association of Broadcasters, Kintner said: "It is my hope this regulation will not be necessary."

"I have become increasingly angry with this industry. I wanted to lecture the industry," he said in explaining how it came about that he had canceled the previous engagement and asked for time before the NAB conference.

The congressional inquiry into the rigging of once-popular quiz shows is now in recess until November.

Top NAB officials had no immediate comment on Kintner's talk.

Kintner stressed a theme of industry self-regulation to avoid a repetition of the quiz show scandals. But he added: "If self-regulation becomes ineffective, then it becomes mandatory that the government should provide whatever policing is required by the public interest."

Major Bush Fires Still Raging Out Of Control In California

Recognized For Heredity Research—

Award Americans 1959 Nobel Prize

STOCKHOLM, Sweden — The 1959 Nobel Prize in medicine was awarded Thursday to two American scientists who have synthesized two basic chemicals of life in research on heredity.

Dr. Severo Ochoa, 54, of New York University's College of Medicine, and Dr. Arthur Kornberg, 41, of Stanford University, Stanford, Calif., will share \$42,606 in cash.

In Stanford, Dr. Kornberg received the news with a cheerful "O.K." and said he planned to go to Stockholm in December to accept.

"It's one of those things — it shouldn't change anything," he said.

In New York, Dr. Ochoa, a naturalized American born in Lueca, Spain, smiled happily at congratulations of a host of colleagues, students and friends.

Sipping champagne from a paper cup, he said: "It is a very great honor, something very good to happen to a scientist."

Physicians who chose to work

in biochemistry, the two created the nucleic acids DNA and RNA. Nucleic acids derive their name from the cell nucleus, the basic component of living things.

DNA is the scientific nickname for Deoxyribonucleic Acid, a substance which holds the secrets of such inherited characteristics as race, height, the color of eyes. Dr. Kornberg has specialized in this field.

RNA stands for Ribonucleic Acid, which takes part in the production of proteins. That has claimed the attention of Dr. Ochoa.

They worked together for a year in 1946; otherwise have pursued their research independently.

Their experiments have helped clarify the workings of heredity. It may in the future become possible to alter the heredity of human beings, animals, plants.

This could mean longer life, freedom from presently inherited dis-

eases, perhaps control over cancer.

The two Americans were selected by the Swedish Royal Caroline Institute of Medicine and Physiology for the professional and monetary honors awarded since 1901 under the will of Alfred Nobel, the Swedish inventor of dynamite.

Study Shows New Findings

NEW YORK — The experiments by Nobel Prize winners Dr. Arthur Kornberg and Dr. Severo Ochoa clarify heredity workings, and hold vast portents for the future.

In time, it may become possible to alter human or animal heredity. This could mean longer life for humans, freedom from presently inherited diseases or weaknesses, perhaps control over cancers, the breeding of animals and plants which are far more efficient producers of food.

One big step is that Dr. Kornberg and associates in their laboratory apparently have manufactured genes, the basic controlling units of heredity.

In simplest outline, this is the story: It is heredity which determines whether your child will have blue eyes or brown, inherit certain diseases or the boon of sound health, how tall he can grow, and much about his nature.

All of this is determined by chromosomes and genes in the living cells which started this new life — in the mother's egg cell and the father's sperm cell.

Chromosomes are thread-like bodies, in the nucleus of each cell, containing thousands of genes, the individual units of heredity.

A few years ago scientists determined that all this marvelous machinery stemmed from two basic chemicals or acids of life, nicknamed DNA — Deoxyribonucleic Acid.

In the latest great forward step, Drs. Kornberg and Ochoa have succeeded in making synthetic DNA and RNA.

They started with the basic materials and added an enzyme which performed the miracle of putting them in the proper order and number.

Each scientist had to add some RNA or DNA to the mixture as a primer. The RNA or DNA made this way was exactly like the priming RNA or DNA.

Multiplied thousands of times in individual variations from the simple alphabet of a few chemicals, this apparently is what happens in life and heredity.

Athletic Problems Not Personal: Board

The highly publicized "problems" in the SUI athletic program remained a mystery early Friday morning following a meeting of the Board in Control of Athletics that lasted for over five hours.

Football Coach Forest Evashevski, whose announcement that he would resign following the termination of his contract touched off a volley of rumors concerning the athletic department, was a guest of the Board in the session which got underway at 7:10 Thursday night and lasted till 12:30 this morning.

Iowa Athletic Director Paul Brechler, who Friday morning had announced that he wished to be excused from the meeting, arrived at the session at 9:10 p.m., apparently summoned by the board.

The Board issued the following statement at the conclusion of the session:

Mr. Evashevski, Mr. Brechler, and the Board in Control of Athletics tonight concurred in the following statement:

Any problems which exist in the football situation are not personal.

The Board inquired concerning the widespread press reference to "intolerable working conditions." Mr. Evashevski declared the words are not intended to cast any reflection on Mr. Brechler or the University generally.

In the discussion that followed it was agreed that one or two conditions which Mr. Evashevski regarded as very important might well have prompted the use of the term. All agreed that these will be corrected in detail and within the family.

On its part, the Board expressed its confidence in both Mr. Brechler and Mr. Evashevski, and its pleasure in Mr. Evashevski's announced intention of serving out his contract.

Neither Evashevski nor Brechler would elaborate on the text of the statement following the meeting as they posed together for pictures.

Brechler's decision to absent himself from the meeting was "based upon the feeling that if my presence would in any manner

inhibit anyone from contributing fully to a fair and complete hearing with Forest Evashevski and a full discussion of any matters presented, then it is best that I absent myself from the meeting."

The security of the session, held in the office of Dean Mason Ladd of the College of Law, was punctuated only on three occasions. The first, a request by the Board for coffee at 9 p.m.; the second, Brechler's arrival shortly afterward; and the third, the emergence of a board member to discourage a cameraman who was shooting pictures from a stepladder outside the office.

Signals from Explorer VII are being received about twice a day on SUI's new receiving station.

These are the first signals received "live" at SUI from a satellite passing over the SUI data reduction center. All previous data has been received on magnetic tape from other receiving stations around the nation and the world.

The automatic receiving station was installed at the reduction center during the summer of 1959. It was designed by George Ludwig, graduate research assistant from Tiffin, who designed the radiation instrumentation in the Explorer satellites. The receiver was built for the most part by Gene Colter, A4, Waterloo, and John Davies, A2, Iowa City.

The equipment was built to start automatically when the satellite is far enough over the horizon so the signals are intelligible, operate while it is passing over the area, and shut off when the signals become weak. These signals are taped as at other receiving stations but, unlike other stations, they are "translated" directly onto paper rolls at the same time they are magnetically recorded.

Explorer VII makes four passes a day over the Midwest but only two or three of the eight-minute passes are strong enough to be recorded each day at SUI. The first signals were received about 6:20 p.m. Tuesday, nine hours after the satellite was launched.

The constitution of the Fifth Republic does not require Parliament to pass on the President's actions. The massive endorsement of his policy gave him added strength to end the five-year nationalist rebellion.

Although De Gaulle has declared for the principle of self-determination by the Algerians he has made clear that he favors local autonomy for the country, not independence. Opponents of his plan feared, however, that autonomy would only be a stepping stone to independence.

They favor the third choice offered by De Gaulle — complete integration of Algeria with France.

But the main drama was played outside the Assembly. Most Frenchmen were more interested in just what might already be in the works to get a cease-fire in Algeria.

Despite repeated reports of secret diplomatic contacts in Tunis, Rabat, Madrid and elsewhere, there was still no official confirmation that the two sides were really getting together. But there was a growing feeling both inside Parliament and out that they were groping for contact.

Large Forest Area Burning In California

Flames Kept Away From Houses Near Altadena

LOS ANGELES — Two major fires blazed out of control Thursday in Los Angeles County.

One, a three-day-old, 4,500-acre blaze, is in foothills north of the suburbs of Altadena, Pasadena and La Canada.

A second fire erupted Thursday afternoon in Topanga Canyon, near the sea at Santa Monica, and quickly roared out of control across steep hillsides. There were no homes in its immediate path.

A smoke pall dimmed the sun across much of the county. The temperature was over 90 amid what the Weather Bureau termed "extreme fire hazard conditions."

Ventura County equipment rushed to help city and county crews in the rugged slopes of Topanga Canyon, an area swept just last year by a 5,000-acre blaze which destroyed 66 homes.

Thursday's blaze was burning along the east side of the winding, canyon road, 1½ miles north of the ocean and 15 miles west of Los Angeles.

The 4,500-acre fire — started at noon Tuesday apparently by a carelessly thrown cigarette — is in Angeles National Forest 15 miles north of downtown Los Angeles.

Wednesday, it damaged three homes in suburban La Canada. Thursday it burned to the edge of a subdivision in neighboring Altadena.

The big threat was to a cluster of about 100 homes on a knoll above Altadena. Residents spent the night hosing down roofs and gardens. Firemen lined up scores of pumper trucks and saturated the knoll's brushy slopes. Despite the flood of watering, the flames leaped up the knoll's sides to the edges of the yards before they were checked.

Fifteen hundred men, 18 water-bombing planes and countless pieces of equipment battled the blaze.

Ask Ban For Military Use Of Antarctic

WASHINGTON — The Soviet Union joined free world countries Thursday in calling for a ban on military use of the antarctic and a guarantee for unhampered scientific inquiries there.

The cordial atmosphere at the opening of a U.S.-sponsored, 12-nation conference was warm enough to melt some of the ice at the South Pole.

Delegates openly voiced hope that the conference would produce in a few weeks a treaty outlawing any military use of the vast, unsettled subcontinent where scientists of the 12 countries have been cooperating under the International Geophysical Year program.

Russian Deputy Foreign Minister Vasily Kuznetsov put the Soviet position this way: "The Soviet government considers that there should be established in Antarctica an international regime that would contribute to the strengthening of peace and would exclude the possibility of this region being turned into a cause of fractions and tensions in the relations between states."

"It is important, therefore, first of all, to come to an agreement providing for the use of Antarctica for peaceful purposes only."

"It means that in Antarctica the carrying out of any measures of military nature, including the construction of military bases and installations, the conducting of military, naval and air exercises and the testing of any types of weapons, should be prohibited."

Kuznetsov did not suggest how the military ban would be enforced. The United States is pushing for control to prevent violations.

Air Collision Flash Seen Statewide

HARDINSBURG, Ky. — A B-52 Stratofortress and a KC-135 refueling plane collided in midair Thursday night, causing a flash described by one witness as four huge balls of fire and streaks of light.

State police reported they found three bodies burned in the still-flaming wreckage of one of the planes.

There were two known survivors and unconfirmed reports that two other men escaped safely.

The collision occurred during a practice refueling. The flash of flame was seen over most of Kentucky.

One of the planes crashed 20 miles south of here, in rugged hill country about 80 miles southwest of Louisville. The second went down four miles southwest of the first.

The B-52 was reportedly carrying atomic equipment, but the report was unconfirmed.

It was not known how many men were on board the two planes.

The aircraft were based at Columbus Air Force Base, Columbus, Miss.

The Defense Department in Washington said disaster teams were en route from Barkdale Air Force Base, La., and the Strategic Air Command at Omaha, Neb.

Ft. Knox officials said they also sent a rescue team to the crash scene.

Air officials would not say whether there was atomic equipment on board, but the B-52 is equipped to carry it.

The crash apparently occurred about 7:50 p.m., in clear weather, with a visibility of seven miles.

Newspapers across the state were deluged with calls from people reporting meteors, comets and explosions. The flaming light was seen as far north as Cincinnati, Ohio, in Owensboro to the west and Bowling Green to the south. Southern Indiana residents reported seeing it near Louisville.

Wreckage was reported strewn over a wide area. Rescue officials had a hard time finding the planes in the dark, tree-covered hills. They were unable to fly even by helicopter from Ft. Knox because there was no place to land.

Launch Rockets In Observance Of IGC Program

WASHINGTON — The United States will mark International Rocket Week next month by shooting aloft 10 research rockets intended to explore the earth's upper atmosphere.

This was announced Thursday by the National Academy of Sciences in discussing the U.S. program for International Geophysical Cooperation - 1959.

IGY-59 is a continuation of the International Geophysical Year program which was conducted in 1957-1958. The IGY, like its successor, was an international cooperative effort to find out more about the earth and its surroundings.

Nov. 16-22 has been designated International Rocket Week, and during that period the 10 U.S. research rockets will be launched from as far apart as Ft. Churchill in Canada and Eglin Air Force Base in Florida.

In the latest great forward step, Drs. Kornberg and Ochoa have succeeded in making synthetic DNA and RNA.

They started with the basic materials and added an enzyme which performed the miracle of putting them in the proper order and number.

Each scientist had to add some RNA or DNA to the mixture as a primer. The RNA or DNA made this way was exactly like the priming RNA or DNA.

Steel Talks Resume After U.S. Urging

WASHINGTON — Government fact-finders prodded the steel industry back into direct negotiations Thursday, advising both sides to give some ground.

The union and the industry agreed to sit down together here Friday.

President Eisenhower's inquiry board wound up four days of hearings on issues behind the 93-day strike by saying the nation sorely wants a settlement.

George Taylor, panel chairman, suggested that the industry and the striking United Steelworkers of America consider submitting their dispute to arbitration — the decision of an outside neutral — if they couldn't settle it on their own.

Both sides said they don't want arbitration, and prefer negotiations.

As the hearings ended, with the industry's presentation, Steelworkers President David J. McDonald went into a huddle with his union's executive board. The industry's coordinating committee also met.

Late in the day it was announced that R. Conrad Cooper, the steel industry's top negotiator, had called McDonald and arranged the meeting for this morning in McDonald's room in the Hotel Carlton here.

There was no apparent solid basis for expecting a settlement before Monday, when Taylor's panel must submit a report to Eisenhower. With this report in hand, Eisenhower would be free to seek a federal court injunction halting the strike for 80 days.

Secretary of Labor James P. Mitchell was reported working behind the scenes with industry and union bigwigs, seeking to spur a settlement.

Rockefeller Says He'll Visit Nixon's Home State Soon

ALBANY, N.Y. — Gov. Nelson A. Rockefeller, looking more and more like a candidate for the Republican nomination for president, will make a thrust next month into the home state of Vice President Richard M. Nixon.

Rockefeller's surprise announcement that he plans to visit three politically strategic points on the West Coast next month strengthened belief that he would contest Nixon for the party's nomination.

Indians Join Fight Against Brush Fire

A COLUMN of Santo Domingo Indians, flown to Los Angeles Thursday from Santa Fe, N.M., trudges up a mountainside to join the battle against a brush fire which has swept over 4,500 acres in the San Gabriel mountains northeast of there. Fifteen hundred men are trying to bring the fire under control.

The Daily Iowan is written and edited by students and is governed by a board of five student trustees elected by the student body and four faculty trustees appointed by the president of the University. The Daily Iowan's editorial policy, therefore, is not an expression of SUI administration policy or opinion, in any particular.

Editor And Friend?

To The Editor:

Why keep the Evashevski-Brechler thing stirred up? By October 14th, 1960 it will be all but forgotten. Meanwhile don't intimate that Evi's grievances are minor ones until you know what they are. He hasn't appeared before the Board to air them, yet.

If you're trying to rib Iowa's Old Grads into seeing spots before their eyes and into dismal liver complaints you're succeeding. What I object to is your solemn air of paternal omniscience. (A kind of bush-league E. B. White) Your editorial 'we' is, of course, permissible but didn't Mark Twain say of an irate and immature editor, "When he speaks of 'we' he speaks for himself and his tapeworm?"

H. P. Hoffman G., 119 South Linn Street Iowa City, Iowa

No Cutting?

To The Editor:

Re: Editorial 'Letters' in the October 13th issue.

Admitted catharsis, admitted your space is limited, there remains the danger that if you print PART of a letter you often distort its meaning.

Remember that shot of Hitler dancing before his generals after the fall of France? It was the best propaganda shot of the war and it was put together by cutting and snipping and then pasting to show motion where none existed.

I'd suggest that if the letter is too long that it be returned to the writer with the advice that he cut it down to usable length or if he's had his satisfaction to forget it.

Dan Gorf, G 119 South Linn Street Iowa City, Iowa

Three Cheers! Candid Coed Tells The Truth

To The Editor:

Perhaps you have sensitive ears or a suggestive mind to be provoked to an editorial about the "Boisterous Barristers". Of course I in no way condone vulgar or obscene remarks, but in my travels past the law school I have yet to hear such remarks.

Although we girls would be reluctant to admit to anyone our feelings, there is perhaps some subconscious satisfaction in being the recipient of a sincere "ogle." Personally, I hope that the law students continue to occupy the steps between classes.

Karen Swanson, A4, 815 E. Washington

Production Of Russian Refrigerators Rates Rise

Moscow (U) — The Soviet Communist party leadership took note Thursday of public demand for increased consumer goods and announced an order calling for increased production in this field.

The official news agency Tass said the party's Central Committee ordered production of refrigerators increased from the 1958 figure of 359,600 to 769,000 in 1961. The television set production, it said, is scheduled to rise from 979,300 to 1,926,000 in 1961.

In the United States, with a population about 30 million below the Soviet Union's, there were almost 6 million television sets produced in 1958, and more than 38 1/2 million sets in use.

Chapter and Verse: You Name It

(Ed. Note: Who is the author of the following quotation, and where does it appear? The answer will be in tomorrow's paper.)

"It is known more than enough that I am neither niggard nor cynic to the due bravery of the true gentry; if any man mistakes a bullingom drasscock more than I, let him take her for his labor; I honor the woman that can honor herself with her attire; a good text always deserves a fair margin; I am not much offended if I see a trim far trimmer than she that wears it; in a word, whatever Christianity or civility will allow, I can afford with London measure. But when I hear a nupigerous gentildame inquire what dress the Queen is in this week, what the nudistertian fashion of the court, with edge to be in it in all haste, whatever it be; I look at her as the very gizzard of a trifle, the product of a quarter of a cipher, the epitome of nothing, fitter to be kicked, if she were of a kickable substance, than either honored or humored."

(Yesterday's selection was the first paragraph in Alexis D'Toqueville's "Democracy in America.")

Epigram

Sir, I admit your general rule, That every poet is a fool, But you yourself may serve to show it, That every fool is not a poet.

Samuel Taylor Coleridge

Cinema: 'But Not For Me'

By ROBERT B. KREIS Staff Reviewer

"But Not For Me" — (Friday-Wednesday). The era of the sophisticated comedy has returned. The movies' escapist remedy for the depression '30's was a succession of fast paced, drawing-room farces ("Awful Truth," "Nothing Sacred," "Theodore Goes Wild") that was peculiarly "Hollywood," and as such, proved enormously successful. But with the War, the style died, and only in the last year does it seem to be convincingly reincarnated.

The present effort, played in the same vein as 1938's "Teacher's Pet" is very slim on plot and character. Motivation (Thank goodness, for a change) but pacing is fast and furious, dialogue bright, chucking, occasionally hilarious, and decor and clothes are smart and tasteful.

The story is about a middle-aged Broadway producer (Clark Gable) and his efforts producing a play written by an alcoholic playwright (Lee J. Cobb). Gable is divorced from an attractive, mature, droll, chic creature who still loves him (Lili Palmer) and is chased by his 22 year old secretary who also loves him (Carol Baker). How it all comes out is quite irrelevant, though the last "who-gets-who" frames are eminently satisfying.

The performances of Baker, Palmer and Cobb are slick, relaxed, and efficient under the deft direction of Walter Lang, but Clark Gable tops them all with a splendid portrayal that has depth and quality, and is, in addition, a razor-edged satire on the type of male-screen-star prototype which Gable himself has represented for thirty years. His performance is an unqualified joy, both to the eye and the ear.

Carol Baker has always been a personal favorite (both to the eye and the ear) so it pains me to say that the few mawkish moments are her responsibility, and Barry Coe, as a young actor, seems to be in the wrong profession. These are but minor blemishes, however, in an otherwise delightful motion picture. "But Not For Me" is a Gershwin song, sung under the credits with great aplomb by Ella Fitzgerald.

Flotsam and Jetsam

By JUDY KLEMERUD Assistant City Editor

After another intolerable week, we again present to you this intolerable column of Friday farce.

Cheery Thought of the Week

Some 59,300 people attended the Homecoming game Saturday. Think of what one well-placed missile could do—the "cream of the Iowa crop" in one shot.

Politics were in the air last weekend as the Regents and legislators made the big Homecoming migration to Iowa City.

As the legislators stood gladdening in the lobby of the Jefferson Hotel, the main topic of conversation was the 1960 gubernatorial race. Most frequently heard in G.O.P. corners was "The Smut is Curbed, Vote for Erbe." But on the other side of the political fence, it was "McMANUS is the MAN."

CAMPUS LANDMARK NO. 3

College Hill Park. Location: Five blocks east of Whetstone's bounded by Washington, Dodge, College and Johnson streets. Best known for the short cut to classes it affords SUI'owans. Also known as a place of terror at night to many SUI coeds. Weapons — fingernail files, tommy guns, tear gas—are needed to ward off frequent masher. Moral: Don't walk, ride!

Ads we never see in the Classified Section: Found-contact lens at football stadium.

The "gentlemen prefer blondes" and "sophomore slump" theories were disproved Saturday, as all five finalists for Miss SUI were sophomores, and the queen was the only brunette.

The surprising football team at the "Udder" University at Ames may be the answer to ISU's lagging enrollment.

Prospective students may come to the conclusion ISU has something besides cows. Enrollment is down 275 at SUI's sister school, making a total of 9,225 as compared to SUI's 10,450. And only a few years ago we were neck and neck!

The home-made words mouthed by the Iowa cheerleaders when Iowa songs are played make some of us think that the spectators are not the only ones who would benefit if free page 41's of the football program were passed out at the ticket distributions.

NEW YORK (U) — Renewed hope that the steel strike might be settled without recourse to a Taft-Hartley injunction was enough to give the market a good rebound Thursday under the leadership of steels and rails.

But the recovery was robbed of emphasis as volume slipped to 2,190,000 shares from 2,320,000 traded in Wednesday's sharp setback. Pivotal stocks ended the day with gains running from fractions to 2 or more points. Losers were sprinkled liberally throughout the list.

The market was mixed in early trading but responded promptly to the encouraging news from the steel labor front. The Big Three Motors, chemicals, coppers, airlines and tobacco also advanced. Aircrafts were lower.

Aluminums backed away sharply on reports in trade circles of lower prices at the fabricating level.

The Dow Jones industrial average rose 3.21 to 637.48. The Associated Press average of 60 stocks rose \$1.20 to \$22.80 with the industrials up \$2.00, the rails up \$1.70 and the utilities down 20 cents.

Stocks Gain With Hope Of Strike Ending

NEW YORK (U) — Renewed hope that the steel strike might be settled without recourse to a Taft-Hartley injunction was enough to give the market a good rebound Thursday under the leadership of steels and rails.

University Bulletin Board

University Bulletin Board notices must be received at The Daily Iowan office, Room 201 Communications Center, by noon of the day before publication. They must be typed and signed by an advisor or officer of the organization being publicized. Purely social functions are not eligible for this section.

APPLICATIONS for positions on the 1960 Orientation Council are due Tuesday, Oct. 20, 10 a.m. Applications will be available in housing units and the Office of Student Affairs.

DELTA PHI ALPHA, German honorary fraternity, will meet in 7 Schaeffer Hall at 8:00 p.m. on Thursday, Oct. 22. Mr. James Sandrock will speak on "A Summer of Study and Travel in Germany." The public is invited.

LIBRARY HOURS: Monday-Friday, 7:30 a.m.-2 a.m.; Saturday, 7:30 a.m.-5 p.m.; Sunday, 1:30 p.m.-2 a.m. Service desks: Monday-Thursday, 8 a.m.-10 p.m.; Friday and Saturday, 8 a.m.-5 p.m.; Sunday, 2 p.m.-5 p.m. Reserve Desk: Regular hours plus Friday and Sunday, 7 p.m.-10 p.m.

RHODES SCHOLARSHIPS for study at Oxford are offered to unmarried men students with junior, senior or graduate standing. All fields of study are eligible. Nominations will be made in mid-October, and prospective candidates should consult at once with Professor Dunlap, 109 Schaeffer Hall, 32165.

UNIVERSITY COOPERATIVE BABY SITTING LEAGUE BOOK will be in the charge of Mrs. Haworth from Oct. 8-20. Telephone her at 8-2208 or a sitter or information about joining the group is desired.

RECREATIONAL SWIMMING for all women students will be on Monday, Wednesday, Thursday, and Friday, from 4:15 to 5:15 at the Women's Gym.

NORTH GYMNASIUM of the Field-house will be opened for student use from 1:30 p.m. to 5 p.m. on all Saturdays on which there are no home games. Students must present their I.D. cards at the cage door in order to gain admittance. The North Gym will be opened for student use each Friday from 1:30-3:30 p.m.

New Typesetter For Chinese Printing

By RALPH CHAPMAN Herald Tribune News Service

NEW YORK—Something called a "Chinese photo composer" was shipped from Washington to Taipei, capital of Formosa, last week. If it lives up to its advance billing, it will revolutionize typesetting in the Chinese language.

Its inventor, C. S. Kwei, an ebullient little man of 63, will also leave for Formosa before long at the invitation of the National Chinese government.

Briefly, the "composer" is based on an optical system which permits photographs on tape of Chinese characters in any desired sequence. The tape is cut into strips, pasted on a blank page, and a photographic negative is made. This can be made into positive newspaper, magazine or book pages of any size. The advantage is that pages can be "set" at comparatively high speed as compared with the present system of hand-setting.

The machine is capable of handling 7,500 characters, each of which is a Chinese word. It is 40 inches long, 20 inches deep, 26 inches high, and weighs only 80 pounds. Mr. Kwei says that it can be mass-produced for about \$2,000.

So much for the machine. Even more interesting is the man who thought it up.

Mr. Kwei was born in China on Sept. 8, 1897. He was educated widely and is believed to be the first Chinese ever graduated from the University of Wisconsin journalism school. That was in 1921. Then he went home to get a law degree.

During the years which followed, he worked for newspapers in Shanghai and other parts of the country. At the same time he built up a law practice, acting as legal adviser to a number of British and American firms doing business in China.

By 1948, it became plain that the Communists were going to take over the mainland. He knew that he would be killed if the Reds caught him; so, like many other Chinese intellectuals, he gathered his family and fled to Hong Kong. So precipitous was the flight that all personal and household belongings were left behind.

Salvaged, however, were the papers and books upon which Mr. Kwei had worked for years in an effort to simplify and codify his native tongue. It was these which formed the basis for his invention and other projects he is still working on.

He resumed the practice of law for a while but returned to newspaper work when the Korean war broke out. For two years he was chief editorial writer of the Hong Kong Standard. The State Department, under one of its special programs, invited him to come to this country in 1952 and he has been here ever since.

Now his story takes a fairy tale turn. One of his clients in Shanghai was American International Insurance, an organization which acts as managing agent abroad for 30 American insurance companies. This firm was headed formerly by Cornelius V. Starr, who knew Mr. Kwei in China.

When the latter came here in 1952, he had a grant for two years at Yale where he continued his language work. After the grant ran out, Mr. Kwei was without financial resources. Mr. Starr learned of this and arranged that the C. V. Starr Foundation should pay him a salary and furnish him with an office. Mr. Kwei could work on anything he pleased.

It was then that he went seriously to work on his "composer."

Good Listening—Today On WSUI

VERDI'S NATAL MONTH is celebrated this evening with a presentation, at 7:30 p.m., of Il Trovatore, "The Troubadour." Jusi Bjoerling, Zinka Milanov and Leonard Warren are among the principals, and the R.C.A. Victor Orchestra and Robert Shaw Chorale are under the baton of Renato Cellini. More than two hours in length, Il Trovatore will be presented in its entirety with appropriate notes and comment.

ANOTHER MUSIC FESTIVAL, the Vienna, will be heard for the first time from WSUI today at 1 p.m. Necessarily divided, because of previously scheduled School of the Air programs, Josef Haydn's "The Seasons" will be offered in two segments: Spring and Summer from 1 p.m. to 2; Fall and Winter from 2:30 p.m. to 3:20. Henceforth, selections from the Vienna Festival will be aired on Wednesday at 2:30 p.m.

EVENING EDITION of Editorial Page, at 12:45 p.m., continues as one of WSUI's most provocative news background presentations. An entirely different resume of U.S. press opinion is heard every Monday evening at 5:45 p.m.

THE END of "The Bulwark" is in sight on The Bookshelf. It will conclude on Monday; and on Tuesday at 9:30 a.m. a new book, "Stride Toward Freedom" by Martin Luther King, will be begun. The author, known primarily for his leadership in the Negro boycott of the Montgomery, Alabama, bus system, has been re-

No engineer, he could only submit rough sketches and his ideas to machine shops. The model finally assembled and operated was made up of parts from shops "all over the country," according to Mr. Kwei.

"It was wonderful how Mr. Starr and many other Americans worked with me," he said at the conclusion of the interview. "As soon as they learned that I was trying to help my people and not just myself, they were attracted to my ideas. I think of it all as real Sino-American cooperation."

Council Comments

By PHIL BURKS Council Member

With all due respect to the folks who give us the space for this column, some of us were a little unhappy with the headline in yesterday's Daily Iowan. We feel that of the three resolutions which came before us Wednesday evening, even the sponsors of the "bad coffee" resolution would admit it was the least significant.

The newspaper report on our resolution of concern about the cheating problem was necessarily sketchy. Because of the nature of the report on this problem turned in last spring by our Committee on Student Responsibility, we felt it necessary to go into executive session to discuss the resolution on it.

In one sense, it was unfortunate that reporters could not be present for the discussion on this matter. I think they would have been impressed with the responsible attitude of the Council toward the problem.

Dean Huit, our adviser, remarked that he felt the resolution — and the report which led up to it — were one of the most significant pieces of work the Council has done recently.

The third resolution taken up at Wednesday night's Council meeting was of necessity left for final action at the next meeting. This was a proposed amendment to the Student Council Constitution, and amendments may not be passed at the same meeting at which they are introduced.

The intent of the proposed amendment is to establish each of the four "houses" into which Burge Hall is divided for administrative purposes as a separate constituency under the Student Council Constitution. This would mean that each house would receive one representative on the Council.

The Council Constitution presently specifies that Burge Hall be considered one electorate. There are now three Burge Hall representatives on the Council.

The proponents of the amendment contend that the present setup in effect deprives one of the Burge houses — currently, Clara Daley house — of any representation. Opposition to the amendment apparently based largely on the fact that the Constitution states that each constituency shall receive a basic vote on the Council, and one additional vote for each six per cent of the student body living in that constituency. Under this formula, Burge Hall — IF considered as a single unit — is entitled to only three representatives.

Perspective

What Is A Journalist?

Between the cruel reality of impending bankruptcy and the dubious promise of better days ahead, we find a frustrated creature called a journalist. Journalists come in assorted sizes, weights, and degrees of insanity, but all journalists have the same creed: to distort the truth every minute of every hour of every day, and to protest with profanity (their only weapon) when they miss the deadline and the editor tells them where to go.

Journalists are found everywhere — on the river bank, at the Annex, holding up lamp posts. Mothers love them, the faculty curses them, the journalism school tolerates them, and the fifth commandment protects them.

A journalist is ambition the morning after, interpidity the night before, inspiration plagiarizing, and the hopes of the world with empty pockets.

A journalist is a composite. He has the innocence of a lipstick advertisement, the generosity of Midas, the frugality of Farouk, the vitality of a turtle, the fortune of Androcles, and the optimism of a convicted murderer.

He likes sports, chorus lines, vacation, alcohol, and conventions. He is not much for the WCTU, 7:30 a.m. classes, demanding instructors, deadlines and curfews at the girl's dorm.

No one else is so late to class or so early to leave. No one else can get so much fun out of Freud, rubber cement, or women. No one else can cram into one pocket a pica pole, three erasers, a used typewriter ribbon, a bottle opener, the beauty queen's picture, last year's annual, a desk blotter, a cigarette lighter, sans fluid, and a three-month old, half finished letter to Mother.

A journalist is a magical creature — you can keep him out of your hair, but you can't keep him out of your liquor. You can get him off your mind, but not off your desk. Might as well give up. He is your captor, your master and your curse — a good-for-

nothing, bloodshot eyed, female-pursuing bundle of pessimism. But when you meet him one night with the wild-eyed ecstasy, you can nearly forgive his transgressions as he madly clutches a diploma and gurgles hysterically, "I PASSED."

Miso Brailo

We talked briefly to Miso Brailo yesterday afternoon as he was visiting the School of Journalism. Brailo is the director of the Government Information Bureau for the State of Montenegro in Yugoslavia. Montenegro, one of Yugoslavia's six states, has frontage on the Adriatic opposite the heel of the boot of Italy.

We expected that a man in Brailo's position might tell all the good and none of the evil about his country, because that is what an official American publicity director would probably do. But if Mr. Brailo had any such intention, it didn't show. It struck us that he is a man who would find waving the flag a bit of a bore; but then waving the flag might not occur to a man of his evident sincerity.

While we talked to him we were trying to puncture a fallacy. Not the fallacy of socialism, or Titoism, but that of the picture of Yugoslavia given us by American newspapers. We are certain that eastern and western newspapers are always printing lies about one another's countries—exaggerations might be a better word—and we wanted to find out the truth, if we could get it.

And in fact we did feel, after talking to Brailo, that Tito and his people were not Red Monsters, but instead a people under many of the same pressures as ourselves. They have, of course, many more hardships, having suffered immensely from the war.

Today we shall talk to him again, and extend again our welcome to this country. Perhaps our mistaken illusions about one another can be dispelled, and we can help our countries to communicate with one another candidly and fairly.

Rep. Griffin Tells SUI Audience —

Reform Act Is Clean-Up Device For Labor Unions

The Labor Reform Act has given the rank-and-file members of labor unions the tools with which they can clean up the unions, Rep. Robert P. Griffin (R-Mich.), co-author of the Landrum-Griffin labor bill, said here Thursday.

Griffin and two other leading congressmen, Rep. Melvin H. Laird (R-Wis.) and Rep. Albert H. Quie (R-Minn.), were guests of the SUI Young Republicans as part of their "Operation Sound America" tour of midwestern colleges and universities.

Speaking in a public question-and-answer session, Griffin cautioned that the recently enacted labor reform bill would not have an overnight effect. "Racketeers and gangsters aren't suddenly going to disappear. It will take time, and we may find that this bill isn't enough," he said.

Griffin emphasized that the law now requires union officials handling funds to be personally bonded by a reputable surety company. "Some people won't be able to get a bond," he said. He also pointed out that union members can now sue in a federal court for an accounting of funds.

Union leaders have sometimes been able to control local law, Griffin said. The labor law now makes it a federal crime to use or to coerce union members.

Griffin also cited the secret ballot provision as an insurance of the rights of union members. "The rank-and-file members have the ultimate responsibility for cleaning up the unions," he said. "We have to count on them to elect good officers."

The primary target of the law is the racketeering and corruption in a segment of the labor movement, Griffin said. "Some union leaders are conscientiously concerned that the bill will put undue restrictions on them and I don't condemn them for being concerned," he said.

"I think they are mistaken if they assume unions cannot thrive and continue to grow under this bill. No one likes to be regulated but collectively we know it's a good thing. As time goes on, I don't think union leaders will be opposed to this bill. Its underlying principles are sound and fair."

Griffin said that there are some imperfections in the bill which may need to be amended. "It doesn't go far enough in some areas," he said.

There may be some loopholes

American Bar Plans To Aid Justice Court

The American Bar Association (ABA) is sponsoring a program devoted to strengthening the International Court of Justice, judicial body of the United Nations, Willard L. Boyd, Jr., associate professor of law, said Thursday.

Boyd explained the ABA program at the Rotary Club luncheon.

First, he said, the ABA is encouraging law colleges in the United States to study and evolve a basis for international law acceptable to all nations. Nations are not taking cases to the Court because they often do not agree on the same points of international law, he said.

Second, conferences are being held to determine whether the Court should be moved from The Hague, Netherlands. Boyd said many Asian nations are suspicious because they consider the Court "European."

Third, a study is being made to solve the problem of compulsory jurisdiction. Nations involved in international disputes can not be forced to take their cases to the Court, the speaker said. Neither the United States nor the Soviet Union has ever accepted the theory of compulsory jurisdiction, he said.

Only 10 international disputes have been brought before the International Court during its 13 year existence, Boyd said. "From this record, the Court hardly merits existence," he remarked.

The Court is made up of 15 judges who decide international disputes brought voluntarily before the Court by the involved nations.

develop in the controls on secondary boycotts and organization picketing which will depend upon court interpretation, Griffin said. The unions have lawyers working at figuring out how to comply with or evade the provisions of the bill, he added.

"I don't believe there is much likelihood that any amendments will be made in the next session of Congress," Griffin said. "It will be a short session — some national conventions are coming up."

Griffin commented that he personally is interested in an amendment restricting the use of union members' dues for partisan political activities. Compulsory unionism shouldn't be permitted to turn into compulsory political activity, he said.

The three congressmen were also asked questions concerning other legislative measures. In reply to an inquiry about government appropriations, Laird, a ranking member of the House Appropriations Committee, said he felt that the Government is to blame for the inflation problem.

Too many people blame labor for inflationary wage hikes or business for rising prices, he said. "The problem is the Government and that is made up of all of us," he said.

"We spend more money than we

collect in taxes because we demand more services. If we are going to have more services, we should be willing to pay for them," he commented.

Quie, a member of the House Agriculture Committee, blamed farm organizations for the problems in farm legislation. Farmers are working through their own organizations rather than through the political parties, he said.

"Farm organization leaders can't agree on a united program. They are more intent upon building their membership than working out a sound approach for agriculture," Quie said.

Before the discussion session, the three congressmen appeared on a stage east of Old Capitol to give brief speeches and explain their tour. With them were U.S. Sen. Thomas E. Martin of Iowa City and First District Rep. Fred Schwengel of Davenport.

In addition to their appearance at SUI, the three congressmen were guests of Young Republicans at Grinnell College, Iowa State University and Drake University. The tour, sponsored by the Midwest Federation of College Young Republicans, also includes colleges and universities in Wisconsin, Kansas and Oklahoma.

Several former Iowans, all professional writers, praise the help with grammar given by their Latin teachers, rather than their English teachers, as they learned to write. Their comments appear in an article "Can Superior Writing Be Taught?" by SUI Professor Richard Braddock in the 1959 issue of the Iowa English Yearbook.

Braddock, editor of the yearbook, asked several writers how they learned to write and included replies from Marquis Childs, Washington, D.C., and Richard Bissell, Rowayton, Conn., both native Iowans, and Wallace Stegner, Los Altos, Calif., an SUI graduate.

Professor Braddock explains that one reason for attributing grounding in grammar to Latin teachers is that traditionally they concentrate on grammatical matters and have been more exacting with their students, who elect this subject.

Bissell says that creative writing cannot be taught, that to be a good writer you have to have ideas and a natural inborn feeling for our language.

Childs, who earned a masters degree from SUI in 1925, comments that the most important asset a young person can be given in becoming a skilled writer is a really thorough understanding of the structure of the English sentence.

Stegner says his teachers and university companions were the only people in his youth who made him understand that a literary career was possible. He adds that when one is as dry a sponge as he was, he should be able to absorb intellectual moisture from anyone. One of his contemporaries while studying at SUI was Professor Paul Engle, now director of creative writing at SUI.

Professor Braddock offers several generalizations from what the contributors had written in answer to his inquiry about learning to write. He suggests that if students could be sectioned in English classes according to ability and if teachers could be more systematic and exacting with the grammar of students in superior sections, perhaps these students could understand more thoroughly the struc-

ture of the English sentence.

Second, although we cannot give the mediocre writer the ideas and sensitivity to be a superior writer, we can offer an atmosphere in which he is encouraged to develop certain characteristics which would be valuable. Finally, English teachers can teach promising writers to work over their writing, through revision and constructive criticism.

Latin Teachers Praised For Grammar Foundation

He adds that when one is as dry a sponge as he was, he should be able to absorb intellectual moisture from anyone. One of his contemporaries while studying at SUI was Professor Paul Engle, now director of creative writing at SUI.

Professor Braddock offers several generalizations from what the contributors had written in answer to his inquiry about learning to write. He suggests that if students could be sectioned in English classes according to ability and if teachers could be more systematic and exacting with the grammar of students in superior sections, perhaps these students could understand more thoroughly the struc-

ture of the English sentence.

Second, although we cannot give the mediocre writer the ideas and sensitivity to be a superior writer, we can offer an atmosphere in which he is encouraged to develop certain characteristics which would be valuable. Finally, English teachers can teach promising writers to work over their writing, through revision and constructive criticism.

develop in the controls on secondary boycotts and organization picketing which will depend upon court interpretation, Griffin said. The unions have lawyers working at figuring out how to comply with or evade the provisions of the bill, he added.

"I don't believe there is much likelihood that any amendments will be made in the next session of Congress," Griffin said. "It will be a short session — some national conventions are coming up."

Griffin commented that he personally is interested in an amendment restricting the use of union members' dues for partisan political activities. Compulsory unionism shouldn't be permitted to turn into compulsory political activity, he said.

The three congressmen were also asked questions concerning other legislative measures. In reply to an inquiry about government appropriations, Laird, a ranking member of the House Appropriations Committee, said he felt that the Government is to blame for the inflation problem.

Too many people blame labor for inflationary wage hikes or business for rising prices, he said. "The problem is the Government and that is made up of all of us," he said.

"We spend more money than we

collect in taxes because we demand more services. If we are going to have more services, we should be willing to pay for them," he commented.

Quie, a member of the House Agriculture Committee, blamed farm organizations for the problems in farm legislation. Farmers are working through their own organizations rather than through the political parties, he said.

"Farm organization leaders can't agree on a united program. They are more intent upon building their membership than working out a sound approach for agriculture," Quie said.

Before the discussion session, the three congressmen appeared on a stage east of Old Capitol to give brief speeches and explain their tour. With them were U.S. Sen. Thomas E. Martin of Iowa City and First District Rep. Fred Schwengel of Davenport.

In addition to their appearance at SUI, the three congressmen were guests of Young Republicans at Grinnell College, Iowa State University and Drake University. The tour, sponsored by the Midwest Federation of College Young Republicans, also includes colleges and universities in Wisconsin, Kansas and Oklahoma.

Several former Iowans, all professional writers, praise the help with grammar given by their Latin teachers, rather than their English teachers, as they learned to write. Their comments appear in an article "Can Superior Writing Be Taught?" by SUI Professor Richard Braddock in the 1959 issue of the Iowa English Yearbook.

Braddock, editor of the yearbook, asked several writers how they learned to write and included replies from Marquis Childs, Washington, D.C., and Richard Bissell, Rowayton, Conn., both native Iowans, and Wallace Stegner, Los Altos, Calif., an SUI graduate.

Professor Braddock explains that one reason for attributing grounding in grammar to Latin teachers is that traditionally they concentrate on grammatical matters and have been more exacting with their students, who elect this subject.

Bissell says that creative writing cannot be taught, that to be a good writer you have to have ideas and a natural inborn feeling for our language.

Childs, who earned a masters degree from SUI in 1925, comments that the most important asset a young person can be given in becoming a skilled writer is a really thorough understanding of the structure of the English sentence.

Stegner says his teachers and university companions were the only people in his youth who made him understand that a literary career was possible. He adds that when one is as dry a sponge as he was, he should be able to absorb intellectual moisture from anyone. One of his contemporaries while studying at SUI was Professor Paul Engle, now director of creative writing at SUI.

Headed Toward Madison? Here's Some Good Advice

The Student Trip Committee has announced a suggested route for SUI students traveling to the Iowa-Wisconsin game at Madison Saturday.

Phil Burks, G. Iowa City, publicity chairman for the Student Council, said students are advised to take Iowa Highway 261 out of Iowa City to Anamosa. U.S. Highway 151 at Anamosa leads directly to Madison, entering the city on Nakoma Road.

Nakoma Road feeds into Monroe Street, Burks said, which should be followed to the intersection of Monroe and Randall Streets. At this intersection, turn left on Randall. This street leads directly to the stadium.

The Student Council annually sponsors a student trip to one of the out of town football games. In past years, trips have been made by bus or train. For this year's trip no arrangements were made for group transportation.

The Council secured 500 tickets for the game, Burks said, and all have been sold. There are no planned activities at Madison following the game.

X-Ray Lecture Set For Monday

F. Alan Hofmann, director of technical research, Lancaster Cleft Palate clinic, Lancaster, Penn., will speak on "Cineradiography in Diagnosis and Research" Monday at 7:30 p.m. in the medical amphitheater of SUI hospitals. The meeting is open to all interested persons.

Cineradiography is the technique by which X-ray motion pictures are made.

Prior to accepting his present position, Hofmann worked as a service engineer for several manufacturers of X-ray equipment. He was a member of the team that designed the first cineradiographic unit with image intensifier that was sold commercially in the United States.

SUI now has such a unit. It is used in connection with the cleft palate research program being carried on under the direction of Professor D. C. Spriestersbach of the department of otolaryngology and the department of speech pathology and audiology.

WARSAW IN DROUGHT

WARSAW (AP) — Lowering of the Vistula River by drought has exposed timbers of a long-forgotten Napoleonic bridge off the end of Warsaw's Bednarska Street. The only blessing of the drought, authorities say, is the chance to clear away obstructions at the lowest level the river has reached in nearly a century.

4 Youths Escape Training School, Back In Custody

ELDORA (AP) — Four youths were back in custody Thursday at the Eldora Training Schools for Boys, just a few hours after they fled from the institution.

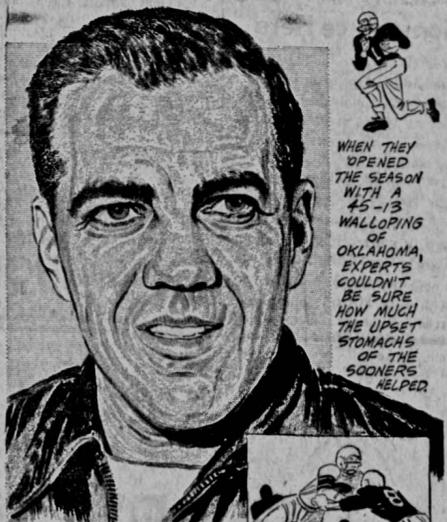

The boys, who broke from a line on the way to the dental office, were identified by Supt. Hollis Miles as Gary Jeffords, 14, Springfield; and Thomas Bowden of Des Moines, Phillip Hawbaker of Boone and Samuel Romans of Newton, all 17.

Jeffords was caught by two training school employees while walking along railroad tracks near Hubbard, Miles said.

The other three walked up to a farmhouse and told the farm occupants they were tired, hungry and wanted to return to the institution, Miles said.

A fifth unidentified youth who was thought to have escaped was found on the school grounds.

BEST YET? ———— By Alan Maver

ARA PARSEGHIAN, IN HIS 4TH SEASON AS NORTHWESTERN COACH, MAY HAVE COME UP WITH HIS BEST TEAM YET—AND ONE OF THE COUNTRY'S BEST, TOO.

WHEN THEY OPENED THE SEASON WITH A 45-13 WALLOWING OF OKLAHOMA, EXPERTS COULDN'T BE SURE HOW MUCH THE UPSET STOMACHS OF THE SOONERS HELPED.

HOWEVER, THEY FOLLOWED THAT UP WITH A 14-10 TRIUMPH OVER IOWA, DESPITE LOSING THEIR STAR QUARTERBACK ON THE OPENING PLAY. HAVING DICK THORNTON OUT FOR THE SEASON WILL MAKE THINGS A LOT ROUGHER, THOUGH.

Harriers Open '59 Season At Wisconsin Saturday

The Hawkeyes cross country team leaves today for Madison where it will face the Wisconsin Badgers in its first meet of the season Saturday morning.

Iowa coach Francis Cretzmeyer is taking an eight man team on the trip. On the traveling squad are captain Jack Hill, Don Greenlee, Bruce Trimble, Rich and Ray Hermeier, Denny Rehder, Jim Tucker and Ken Fearing. The latter two have been on the sick list this week, Tucker with a bad cold and Fearing with leg trouble.

"We had good trials both last Friday and Tuesday," said Cretzmeyer. "Friday, everyone came in together with a time of about 21:26. Hill had the best time during the

City High In Only Home Game On Local Prep Scene Tonight

By GEORGE KAMPLING Staff Writer

Tonight is a busy night for the local preps, as all three Iowa City high schools are in action. Regina and University High are on the road, while City High is at home in their annual Homecoming fray.

Regina travels to Fort Dodge where they will face a tough St. Edmonds outfit at 8 p.m. St. Edmonds is a big team both in the line and in the backfield. They have a season record of three wins against two defeats, compared to the Regals 3-1.

"We are looking for another tight, close game," said Regina coach Herman Miskowicz. The two teams have had one common opponent, St. Mary's Marshalltown. Regina defeated St. Mary's 33-6, and St. Edmonds downed them 37-14.

Last week's 14-12 Regina win over Regis of Cedar Rapids might have been pretty costly to the Regals. Star fullback Bill Dostal came up with a severely bruised knee, and it is very doubtful whether he will be ready for tonight's game.

Filling in on offense this week for the injured Dostal has been Bob Parizek. The defensive assignment has been given to Dwayne Lacinia, Lacinia, senior right halfback, has been appointed captain for tonight's game.

U-High travels to Columbus Junction where they will face the Columbus Community School. Game time for this Eastern Iowa Hawkeye Conference affair is 7:30 p.m.

Bob Hoff's Blues, though not plagued by an injury list, still have two doubtful starters who have been on the sick list this week. They are left guard Bill Alley, and right tackle Dick Brender.

The Blues will face a tough fullback in Columbus' Ron Murray. Murray weighs about 200 pounds, and is averaging about 170 rushing yards per game. The U-High team will be outweighed about 12 pounds per man.

Captains for the Blues tonight will be Doug Freeman on offense, and Fred Cooper, defense.

The Little Hawks of City High have Thomas Jefferson of Cedar Rapids as their homecoming foe. Coach Frank Bates' crew will be hoping to make it four in a row since their opening game loss to Davenport.

The City High team is 2-1 in Mississippi Valley play, and 3-1 for the season after taking a 51-0 non-conference win over Kueper High of Carroll.

"They weren't much competition," said Bates of the Carroll team. "Our defense played pretty well after a few adjustments."

Dodgers, ChiSox Get Series Cuts

NEW YORK (AP)— The world champion Los Angeles Dodgers and the losing Chicago White Sox will receive record shares for the 1959 World Series.

Each Dodger player voted a full share will get \$11,231.18 while each White Sox full share is worth \$7,275.17, baseball Commissioner Ford Frick announced Thursday.

The series set a record of \$893,301.40 for the largest players' share ever distributed. Los Angeles' team share was \$375,186.59 and Chicago's total share amounted to \$250,124.39.

The Dodgers voted 29 full shares

Luther's Hustad Leads Small College Rushers

NEW YORK (AP)— Fullback Brad Hustad of Luther College, Decorah, Iowa, is the top rusher among the nations small college football leaders, the NCAA Service Bureau reported Thursday.

Hustad has 666 yards on 134 rushes in five games.

He also ranks eighth among the total offense leaders with 666 yards on 134 plays. The leader in this department is Vince Tesone of Colorado Mines, with 866 yards on 138 plays in five games.

NHL Won't Expand To West: Campbell

NEW YORK (AP)— Clarence Campbell, president of the National Hockey League, Thursday threw a damper on speculation that his six-man circuit would expand to the West Coast in 1960 or 1961.

"I realize that Los Angeles and San Francisco would present a natural rivalry," said Campbell. "But so far no responsible persons in those cities have indicated any interest."

Rumors of westward expansion of the NHL arose last month following the first appearance of a big league hockey club in Los Angeles by the New York Rangers. In two exhibition games against Vancouver of the Western League in LA's new 16,000-seat Sports Arena, the Rangers played before a half-full house each time.

"Sad" Sam Jones Cops ERA Crown; Edges Teammate

NEW YORK (AP)— Sam Jones, 21-game winner for the San Francisco Giants, captured the 1959 National League earned run championship with a 2.82 average.

The toothpick-chewing right-hander shaded teammate Stu Miller, the defending titlist. Miller posted a 2.84 ERA mark, figures compiled by The Associated Press disclosed Thursday.

Jones, who pitched a seven-inning no-hitter against St. Louis in his final start, gave up 85 earned runs in 271 innings. The slowball-throwing Miller allowed 53 earned runs in 168 frames. He led a year ago with 2.47.

Sad Sam appeared in 50 games, starting and relieving, and had four shutouts. Miller, used mainly in relief, had an 8-7 won-lost record in 59 games.

Milwaukee's Bob Buhl ranked third in the listings with a 2.86 average, yielding 63 earned runs in 198 innings. Teammate Warren Spahn, the ERA winner in 1947 and 1953, followed with 2.96. Then came Vernon Law of Pittsburgh and Gene Conley of Philadelphia, tied at 3.00.

Intramural Scoreboard

Intramural managers are reminded that entries for Saturday's intramural golf tournament are due at the intramural office at noon today. Starting times for Saturday's play will be announced at 1 p.m.

Five men may be entered from any unit with the low four scores counting toward the team score. Awards will be made on both the team and individual basis for first, second and third place finishers in each league.

LUCKY STRIKE presents Dear Dr. Frood:

DR. FROOD'S MORAL OF THE MONTH

Most college students today do not know the meaning of the word "adversity." Those who do are just a handful of English majors.

Dear Dr. Frood: How can I leave my husband without making him happy?
Prof's Spouse

Dear Prof's Spouse: Leave a note saying you'll be back.

DR. FROOD TELLS WHO HOLDS HIS CIGARETTE HOW

I have noticed that the solid, conservative type carries his cigarette between his first two fingers. The nonconformist carries it locked in the bend of his arm. The self-conscious type holds his lighted cigarette in his pocket. The most intelligent species of all carry Lucky Strike (usually between their lips).

Dear Dr. Frood: When raccoon coats swept the campus, I wore a polo coat. When the English bobby cape came in, I wore a raccoon coat. I'm always in last year's style. How come?
Dated

Dear Dated: This is an anxiety complex arising out of being a "late-diaper" baby.

Dear Dr. Frood: I am irrationally, incalculably, irrevocably in love with a girl on campus. How can I tell her?
Lovesick

Dear Lovesick: Use small words.

Dear Dr. Frood: When I listen to stupid people or read anything boring, I fall asleep. What can I do?
Superior

Dear Superior: Yours is an extremely difficult prob mth zzz zzz zzz

DR. FROOD TELLS WHO HOLDS HIS CIGARETTE HOW

Dear Dr. Frood: Our library is full of "no smoking" signs. When I want a Lucky, I have to go outside. Is this right?
Furious

Dear Furious: It's monstrous. But think of the poor souls who go outside only to smoke brand X or Y or Z.

Dear Dr. Frood: Boys are always whistling at me. Do you think my clothes are too snug?
Prudence

Dear Prudence: It's impossible to tell without a picture. Send one. Please.

COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco:

TOBACCO AND TASTE TOO FINE TO FILTER!

Product of The American Tobacco Company—Tobacco is our middle name

Hawkeyes Off To Wisconsin For Make-Or-Break Contest

The Iowa Hawkeyes depart for Madison, Wis., today where they hope to further their quest for a second straight Big Ten title. The Hawkeyes, 1-1 in conference play, and the Badgers, 0-1 in the loop, are both primed for the game which may eliminate one from the title chase.

Curt Merz, all-American end last year, is listed on the traveling squad and will probably see some game action against the Badgers. Jeff Langston is slated to get the starting call at left end, however, Langston filled in with a very respectable performance last week as Merz missed the Michigan State contest.

One lineup change has been made by Coach Forest Evashevski. Bob Hain, left tackle who had a great day against Michigan State last Saturday, has been moved up to the first unit replacing Charlie Lee. The 227 pound Hain's presence in the starting lineup will boost the weight of the Hawkeye line. In Thursday's session the Haw-

Curt Merz May See Action

eyes moved from the practice field into Iowa Stadium where they drilled in sweat clothes. Most of the

efforts were placed on polishing the offensive plays which are to be used against Wisconsin.

The traveling squad:
Ends: Richard Clauson, Jeff Langston, Curtis Merz, Allan Miller, Don Norton, David Watkins and William Whisler.

Tackles: Robert Hain, Alfred Hinton, Charles Lee, Ernest Mielke, Robert Moerke, Emery Pudder and John Sawin.

Guards: William DeCindio, Mark Manders, Gerald Novack, Don Shipanik, Sherwyn Thorson and Jerry Williams.

Centers: Lloyd Humphreys, Bill Lapham, Don Zinn and Robert Yauk.

Quarterbacks: Fred Erhardt, Wilburn Hollis, Tom Moore, and Olen Treadway.

Halfbacks: John Brown, Ray Jauch, Bob Jeter, Gerald Mauren, Donald Tucker, Virgil Williams and Bernard Wyatt.

Fullbacks: Larry Ferguson, Don Horn and Eugene Mosley.

And May The Best Man Win

Spider Webb (left), Chicago, and middleweight champion Gene Fullmer wear sober expressions as they look over the contract which they signed Thursday scheduling them to meet in a 15-round title bout Dec. 4 at Logan, Utah. The fight will be Fullmer's first defense of the NBC crown he won last August from Carmen Basilio. Fullmer has met Webb once before in the ring with the champion scoring a 10-round decision. — AP Wirephoto.

Continental Loop Needs Help, Says Rep. Celler

NEW YORK (AP) — Rep. Emanuel Celler (D-N.Y.), chairman of the House Judiciary Committee, Thursday criticized National and American League owners in their attitude toward a third major baseball league and said he planned to push anti-trust legislation in the next session of Congress.

Cells said "this new Continental League is going to die aborning unless they get some help from Frick and his outfit."

The congressman referred to Ford Frick, baseball commissioner, and executives of the National and American Leagues.

"They say they want to help, and then don't," Celler declared.

The Continental League was organized recently with five founding cities — New York, Houston, Denver, Toronto and Minneapolis-St. Paul. Three other cities are to be selected.

Cells said he wanted to protest baseball as a sport, and that proposed legislation would recognize the reserve clause, the draft and the farm systems.

"But, as to its business aspects, the legislation would put baseball under the anti-trust laws. It would take in television and radio, and would not permit any exclusive territorial rights."

In this connection, Celler brought up the larger minor league cities such as members of the International League and American Assn.

"The new third league is trying to get hold of some minor league cities, and they suddenly find the prices have gone sky high. The baseball men in the

Kansas City Completes Player Personnel Shift
KANSAS CITY (AP) — The Kansas City Athletics Thursday completed a wholesale shift of player personnel. It involved mostly transfers from farm clubs.

The changes left the club with 38 players on its roster, just two short of the maximum.

Six players, three of them pitchers, were brought up from the farm clubs. They include hurler Ray Blemker, 22, who won 8 and lost 2 with Sioux City, Iowa.

Parke Carroll, general manager, also announced the following player assignments, all now eligible for the draft:

Georgia over Mississippi State — Best Wally Butts team in several years.

Louisiana State over Kentucky — Chinese Bandits still at large.

Wake Forest over North Carolina State — The Deacons better be relaxed.

Texas over Arkansas — Razorbacks must wait until next year.

Southern Methodist over Rice — We decided to pick SMU once without mentioning Don Meredith.

Florida over Vanderbilt — The "Gators" chomp at the braid of the Commodores.

major who control these minors have placed the price way out of reach."

Turning to a proposal by Calvin Griffith of the Washington Senators to move that team from the nation's capitol to Minneapolis, he said:

"That invites action by Congress for a strong baseball anti-trust bill."

He said that if the Senators were moved, it would prove without doubt that baseball was not a sport but a business that required such legislation.

"Griffith wants to move to Minneapolis because he believes there's more money there."

Wisconsin Polishes Up Plays For Hawkeyes
MADISON, Wis. (AP) — Coach Milt Bruhn tapered off hard work for the Wisconsin football squad Thursday, concentrating on polishing plays lined up for the Iowa game Saturday.

Left halfback Ron Steiner's bruised knee hasn't responded to treatment, indicating he'll be unavailable for action against the Hawkeyes. Another first stringer, quarterback Dale Hackbart, still favors a knee injured earlier this fall.

Sophomore Bill Hess has been getting a lot of work on pass defense this week and is expected to see action at quarterback.

READY FOR COLORADO
AMES (AP) — Iowa State's football forces spent most of a short 40-minute workout Thursday looking at Colorado offensive formations and working on defense.

The Cyclones also reviewed all phases of their kicking game — punts, kickoffs and points after touchdown.

Coach Clay Stapleton said the Big Eight Conference tilt Saturday is "a must game for us. If we win, we can have a good year. If we lose, it will pretty well wash us out."

RED BLAIK ... on football

Picks Iowa, Illinois Purdue To Win

Last week I maintained my amateur standing as a selector. (So, for that matter, did those mysterious and presumably informed folk known as the line-makers.) For the moment, I have come to the conclusion that an ex-coach knows less about picking games than the boy who delivers the morning paper.

I have rationalized last week's mistakes with the view that I selected on the basis of what should have been instead of what was to be. I returned to the chore this week, chastened by the experience, yet secure in the thought I have fully prepared next week's alibi: Iowa over Wisconsin — The Hawkeyes in a close one.

Navy over Miami — The sailors recover from the Syracuse tidal wave.

Penn State over Boston U — "Roll out" Richie Lucas keeps 'em rolling.

Pennsylvania over Brown — The Ivy League crown room may be redone in Red and Blue.

North Carolina over Maryland — The Tar Heels are much improved.

Harvard over Columbia — Cornell's James boys got across the Charles with the swag at the last minute. Columbia won't make it.

Notre Dame over Michigan State — The Spartans' pass defense not tight enough to stop Izo.

Illinois over Minnesota — The underrated Illini have a big line, swift backs and an interesting offense. But they'll have trouble with Warmath's aggressive Gophers.

Northwestern over Michigan — The Wildcats even without Thornon are too experienced for the maize and blue.

Princeton over Colgate — One chorus of the cannon song.

Syracuse over Holy Cross — The Crusaders have been a pleasant surprise, but are overmatched.

Pittsburgh over West Virginia — Panthers are the Monongahela champions.

Yale over Cornell — Eli quarterback Singleton will be the winning trick.

Purdue over Ohio State — The atmosphere is getting sullen at

BOWLING

There will be an organizational meeting for the faculty women's league Monday, Oct. 19 at 6:45 p.m. There is a possibility that the league will bowl on two different evenings. Those unable to attend the meeting are requested to call x-2273.

10 Members Enter Football Hall Of Fame Coach Says One Day Wilt Will Rule Pro Basketball

NEW BRUNSWICK, N. J. (AP) — Ten new members, three of them deceased, were added to the Football Hall of Fame Thursday.

The additions include Herman Hickman (deceased), guard at Yale; James (Stan) Keck (deceased); Princeton tackle and a coach at Norwich, Princeton and Waynesburg (Pa.); and Henry Disbrow Phillips (deceased), guard at the University of the South (Seawane) 1902-3-4.

The seven surviving inductees will be greeted by Gen. Douglas MacArthur at the second annual award dinner of the foundation and Hall of Fame Dec. 1 in New York.

MINNEAPOLIS (AP) — Seven-foot Wilt Chamberlain one day will rule professional basketball with greater authority than George Mikan in his golden years, the Still's coach predicted Thursday.

"He needs only the time it takes to get accustomed to the playing habits of his teammates and opponents to become a truly great pro basketball player," said Coach Neil Johnston of the Philadelphia Warriors.

The guessing around the National Basketball Assn. is that Wilt is a good bet to develop into the strongest offensive force in league history.

The former Kansas All-American scored 26 points Wednesday night as his team lost a 103-98 exhibition game to Boston.

"Chamberlain has just about the greatest equipment in a basketball player I've ever seen," Johnston said. "He has that enormous size, nearly 7-foot-2. He has fine spring and good reflexes. "Once he gets to know the players in the league I think he can dominate it even more than George Mikan did at Minneapolis."

Dr. Scott Urges Relaxation, Correct Posture At Work

You can get enough "exercise" of the wrong kind just sitting behind a desk eight hours a day to make you stiff and sore all over. Resulting from muscles tightening in many parts of your body, this "exercise" can make office work twice as tiring as it should be.

Professor M. Gladys Scott, chairman of the SUI department of physical education for women, suggests that relaxation and a few basic rules of good posture will eliminate some of the end-of-the-day weariness for people with office jobs.

You need to "make" yourself relax if you show signs of tension, Dr. Scott explains. If you can't sit still in a chair, but must continually squirm about in it, jiggle a foot or tap your fingers on the chair arm, you need to relax. Facial "tics," continual throat-clearing and hunched shoulders are other signs of tension, she says. Incessant smoking and continual talking may also result from nervous tension.

What causes tension? Pain in the eyes, feet, back joints or any other part of the body can make you tense all over, Dr. Scott explains. This can work the other way, too, she says. Constant irritations such as street noises and banging office machinery are also offenders. Emotions can be the culprit. Worry, boredom, resentment, continued excitement — all are reflected in tightening of muscles which sap your energy and leaves you feeling exhausted.

The first remedial step to take, Dr. Scott advises, is to find out what is making you tense and do your best to remove the cause. Sources of irritation you can't avoid you may be able to ignore.

First step in the physical process of relaxing is to recognize the feeling of tension in muscles, Dr. Scott says. You can do this by stretching your arm then letting it go limp at your side, feeling the tension go out of it. Then try to sense this feeling in other parts of your body.

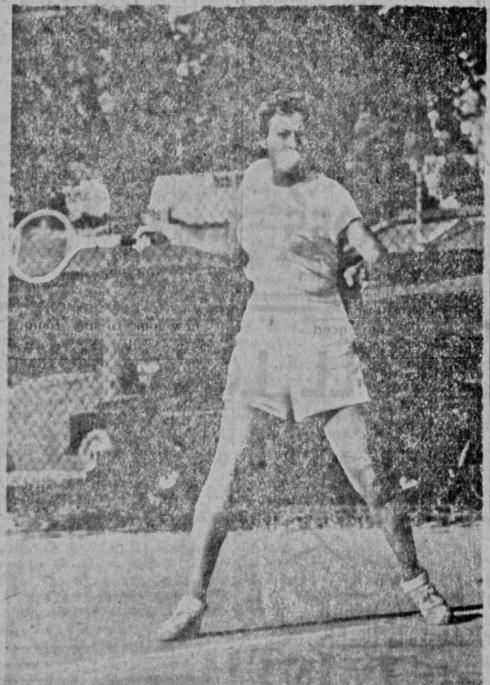

Learning to relax muscles of your face is particularly helpful, Dr. Scott advises, because facial relaxation seems to ease tension out of other parts of your body.

Rhythmic movements are more restful than jerky ones. Typing, for instance, is less tiring when done at a steady, even pace, rather than an erratic, choppy one.

If your hands, arms or shoulders become tired and cramped from some task such as typing, let your arms dangle limply at your sides a few minutes, Dr. Scott suggests. Shrug your shoulders and then let them drop uncontrolled for a few minutes as your arms hang limp. Next pull your shoulder blades together and stretch tall. Then drop your head and shoulders forward, relaxing for a bit.

Dr. Scott urges everyone to make time to relax. If possible, lie down and put your feet up during your "break" period. Knowing how to relax is more important than drinking coffee during your break, she advises. Part of what you interpret as hunger during the middle of the morning or afternoon is fatigue.

Following the basic rules of good posture — sitting up straight rather than slouching, and working at a desk that is the correct height so that you can rest your hand on the desk or typewriter keyboard without noticeably raising or lowering your shoulders — is also important to good desk work, Dr. Scott says.

No trick photography here — these are honest-to-goodness photo "bloopers" from the picture files of Edward F. Mason, associate professor emeritus in journalism. One in a million describes the amazing illusion shot on the left. The timing was perfect to give the illusion of the woman's holding the tennis ball in her mouth. On the right, a fashion picture obviously taken several years ago. Little does the woman in the striped blouse realize that she is supporting a birdhouse on her head! Note the amply padded shoulders, coeds.

ISU Paper Conducts Poll On SUI Stir

It's interesting to note that our neighbors at Iowa State University are also feeling the effects of the Evy-Brechler dispute — but they, like many SUIIowans, are quite undecided as to how the difficulties should be ironed out.

In a column called "Quote 'Em Poll" which appeared in the Iowa State Daily student newspaper Tuesday, several students were asked the following question:

"If you were in charge of solving the present athletic problems at the State University of Iowa, how would you do it?"

Two coeds took the most idealistic approach when they suggested "I'd get the two men together and settle on peaceful terms" and "I would suggest that they talk it over."

An Evy promoter said: "I'd keep Evy at all costs, even to the point of firing Brechler."

Another coed felt that an arbitrator could solve the problem, and, speaking of arbitrators, a student said: "It looks to me like they could solve it through the athletic council. If they can't get along, one of them will have to go."

"I don't think it's up to the Board of Regents," said another student. "I'd leave it to the coaching staff and the athletic director to work it out."

Thinking along different lines, one ISU student said: "That's a pretty tough question. I think they should work harder on keeping players eligible. They should give the underclassmen more experience by playing in more games."

Another student reinforced the idea of setting up an arbitration committee, but added in conclusion: "Also, I'd look for two new men."

SOCIETY

Anne Warner, Society Editor • Linda Morrison, Assistant

Pledge Officers

Sally Utley, A1, Dixon, Ill., is pledge president of **Kappa Alpha Theta** social sorority. Secretary is Nancy Harban, A1, Des Moines, and social chairman is Cathy Halpin, A1, Cedar Rapids.

Phi Kappa Theta social fraternity pledges have elected Karlos Melendez, A3, Mason City, president of their pledge class. Denny Bengfort, A2, Calmer, is vice president; Gary Labounty, A2, Charles City, is secretary-treasurer, and Nick Shannon, A1, Fort Dodge, is social chairman.

The pledges of **Alpha Delta Pi** social sorority have elected Pat Anne Brown, A1, LaGrange, Ill., president of their pledge class. Vice president is Jean Smith, A1, Des Plaines, Ill.; secretary-treasurer is Kathy Jedlicka, A1, Cedar Rapids, and social chairman is Robin Bolter, A1, Greene.

Acacia social fraternity pledge officers include: Gary Anderson, L1, Creston, president; Jim Young, A3, Irion, Ill., vice president; and Jerry Kracht, A1, Paullina, secretary-treasurer.

Karen Sandell, A1, Park Ridge, Ill., is the new pledge president of **Alpha Chi Omega** social sorority. Vice president is Jerri Tauber, A1, Iowa City; secretary is Sue Powell, A1, Perry, and social chairman is Janis Nitzke, A1, Des Moines.

Alpha Xi Delta To Donate Books

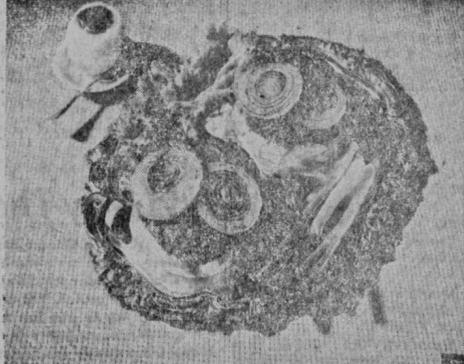

One hundred new books will be received in December by the library at the Iowa State Sanatorium for Tuberculosis at Oakdale.

The books, to be presented by the National Council of Alpha Xi Delta, social sorority, will be given

as a memorial to Grace Ferris, an outstanding Alpha Xi Delta from Northwestern University who fought a battle against tuberculosis.

Voluntary contributions from 70 college chapters and 141 alumnae chapters of the sorority have made possible donations of over 1600 volumes in tuberculosis hospitals in 14 states.

All American Favorite

Open Face Hamburg Imperial, for spectacular easy-to-serve flavor supreme version of America's favorite: hamburger with onion. Quick, one-dish meal for after-the-game parties that will thrill the family, too!

Pound hamburger, or ground round steak
2 large white or yellow onions, peeled and sliced 3/8 inch thick
Onion salt
Salt and pepper
King size hamburger buns, only 3.
Makes 6

Cook under the oven broiler, rotisserie or over charcoal grill. Season hamburger with onion salt, salt and pepper. Mould by hand into thick, bun-size patties. Broil or grill to "rare" or "well done" as desired. Warm or lightly toast buttered bun halves. Cut peeled large onions in thick 3/8-inch slices and broil or grill on one side until golden brown. While piping hot, place cooked hamburger on bun half; top with two slices grilled onion. Serve open-top. Garnish with green onions. For hearty appetites serve in pairs on individual small platters or large dinner plates.

Increase recipe as required for number served. If you go for catsup, hollow-out a large peeled onion, fill with catsup for a "conversational" serving dish.

Social Notes

THE CATALYST CLUB will meet this evening at 7 at the home of Mrs. Ralph Shriner. All wives of students majoring in chemistry, chemical engineering, or biochemistry are cordially invited to attend this first meeting. Mrs. Grace Orr will speak on handicapped children.

THE IOWA CITY Jewish Community Council will hold an open house Sunday from 7:30 to 10 p.m. at Agudas Achim synagogue, 602 E. Washington. The congregation, B'nai B'rith, Hadassah and Sisterhood, the four organizations representing the council, will welcome new residents, members and all interested.

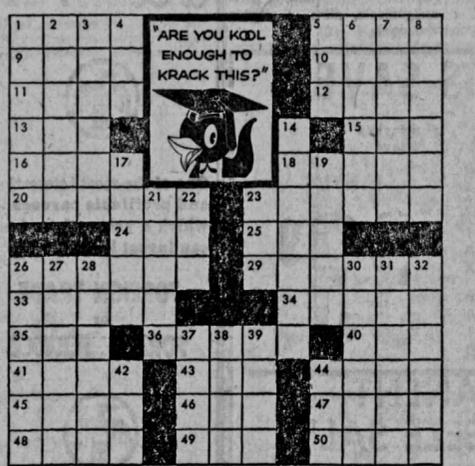

THE CHILD STUDY CLUB of Iowa City will discuss "The Changing Disciplinary Needs of Children at Home and School" at a luncheon Saturday at 12:30 p.m. in the River Room of Iowa Memorial Union. Reservations for the luncheon must be made with Mrs. William E. Connor at 8-3558 before noon today.

IOWA MOUNTAINEERS will leave for a three-day hiking trip at Devil's Lake, Wis., at 5:30 p.m. to night. Members and those interested are asked to meet at the clubhouse at 5:15 p.m. with food, cooking kit, sleeping bag, warm clothing, tennis shoes for climbing, and a tent, if possible. Cost for transportation and camping fee is \$4.75.

THE SPEECH PATHOLOGY and audiology student-faculty coffee hour will be held at Wesley House Tuesday from 3:30 to 5 p.m. Any-one interested is invited to attend.

Balloon Lands At Wellsburg

MINNEAPOLIS (AP)—An unmanned balloon flight to test equipment and trajectory for a manned stratosphere flight was described by Navy spokesmen Thursday as successful.

A plastic balloon was sent aloft Tuesday near Rapid City, S.D. About 30 hours later, a timing device cut the balloon loose from its payload and the equipment came down by parachute at 2:10 p.m. Wednesday.

The equipment landed near Wellsburg, Iowa, and was recovered by a tracking crew. Wellsburg is in north central Iowa, about 45 miles east of Webster City and some 450 miles from the launching site.

The flight was a forerunner to one which will take Navy Cmdr. M. D. Ross and Charles B. Moore Jr., an atmospheric physicist from Cambridge, Mass., to 80,000 feet. There the two will study the atmosphere of Venus.

A spokesman for the Office of Naval Research said the southeasterly direction taken by the balloon would be ideal for the manned flight.

Flynn's Widow Weeps

PATRICIA WYMORE, widow of actor Errol Flynn who died Wednesday in Vancouver, B.C., breaks into tears on the shoulder of her lifelong friend and publicity man, Ken Carter, upon her arrival at International Airport at Los Angeles from Washington, D.C. today. Miss Wymore, who had been separated from Flynn, told newsmen she would make funeral arrangements. She said the funeral would be in Hollywood but she couldn't say when.

Matinee Idol Will Be Buried In Jamaican Soil 'He Loved'

VANCOUVER, B.C. (AP) — Hard-living, hard-loving Errol Flynn died as he lived — gay, convivial and in the company of a beautiful young girl.

A heart attack took his life Wednesday night at the age of 50. Just before he died he confided to a doctor that he had suffered two previous heart seizures — something he had kept secret from his closest friends. He did not say where or when they occurred.

But it made no difference to the aging matinee idol. He had continued to live life to the full, pursuing his two admitted hobbies — women and liquor.

Thrice-wed, Flynn was here with his shapely, blonde, 17-year-old girl friend, Beverly Aadland, on a combination business and pleasure trip. He had flown from Hollywood six days ago principally to arrange the sale of his beloved \$100,000 yacht "Zaca."

Miss Aadland, who was with Flynn when he died in a penthouse apartment during a small farewell party, was prostrate Thursday and under heavy sedation.

The cold, factual autopsy report was issued at midday. The coroner's office said Flynn suffered a coronary thrombosis — blood clot in the heart — and also had "a fatty degeneration of the liver."

Flynn's secretary, Ronnie Shadow, who flew here Thursday from Los Angeles, said the actor will be buried in land he loved — on his ranch in Jamaica.

Flynn and Miss Aadland were on their way to the airport for a return flight to Hollywood when they stopped off with friends for a drink at the swank apartment of Dr.

Grant Gould.

For two hours Flynn kept them spellbound with stories of movie greats — imitating them, acting out incidents as he was relating and displaying the same charm which fascinated men and women alike for more than two decades. Suddenly he stopped, looked around and smiled. He said, "I think I might lie down." Then he stepped toward the bedroom.

He turned as he reached the door and said smilingly: "But I shall return."

These were his last words.

Dancing Classes Are Still Open For IC Children

Registration is still open for participation in children's dancing classes to be held at the SUI women's gymnasium Saturday mornings beginning Oct. 17.

The classes are designed to improve rhythmic development and coordination as well as develop dramatic expression in children between the ages of five and twelve. Children are registered in one of

three sections geared to their particular age level.

The class for six and seven-year-olds will meet at 9 a.m. each Saturday; five-year-olds, at 10 a.m.; and the section for children from eight to twelve years of age

will meet at 11 a.m.

Parents may register children at the SUI Women's Gymnasium today from 9 a.m. to 4 p.m., or by attending the first class session Saturday morning. The cost of the lessons is \$7.50.

SAME DAY SATURDAY SERVICE

Garments for quick service brought in any time Friday and before 10 a.m. Saturday will be ready Saturday afternoon.

Northwestern Prof Believes \$64,000 Quiz Was 'Honest'

NEW YORK (AP) — The professor who composed the brain-teasing questions for "The \$64,000 Question" television show said Thursday he believed the program was "as honest as it could be."

Dr. Bergen Evans of Northwestern University told a newsmen: "The show's producers had to screen or test contestants to find out the limit of their knowledge. They couldn't take their word that they were experts on certain subjects."

Evans indicated that knowledge of the contestants' weakness on certain subjects benefitted the producers. They could sometimes eliminate contestants with questions in these weak fields. But he added: "Sometimes when the ratings were down and they wanted to get rid of certain contestants, they couldn't. The contestants kept coming up with the right answers."

Iowa Math Instructors Open Conference Today

More than 150 Iowa college and high school mathematics teachers are attending the 29th annual Conference of Teachers of Mathematics today at SUI.

"Modern Developments in Secondary School Mathematics and Their Evaluation" is the theme of the conference, one of the oldest annual teachers' meetings held at SUI.

The conference is sponsored by the SUI Mathematics Department, the Extension Division, and the College of Education, in cooperation with the Iowa Section of the Mathematical Association of America.

"And sometimes when they wanted them to stay they didn't." He said the producers of "Question" spent thousands of dollars to get Randolph Churchill, son of Sir Winston Churchill, on the program as an expert on the English language.

"He lasted exactly 35 seconds. I knew the producers were very disappointed."

Dr. Evans, here on a visit, said he had no knowledge that "The \$64,000 Question" or its sister show, "The \$84,000 Challenge," were fixed.

IC Man To Head State Organization

DES MOINES (AP) — Byron D. Beeler, Iowa City, Thursday was elected president of the Iowa Real Estate Association at the group's 41st annual convention here.

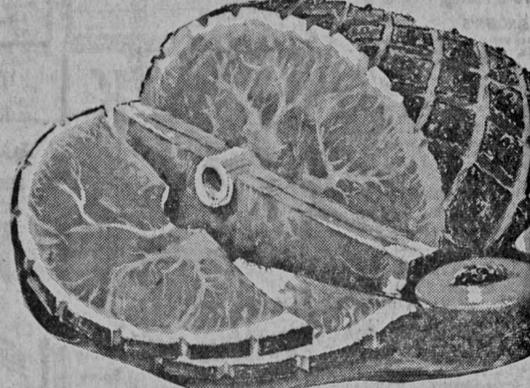

Named one of the new directors was Stephen Darling, Iowa City.
