

37 Killed as Airliner Explodes in Jamaica

5 of Crew,
4 Passengers
Survive Blast

Colombian Plane
Had Repairs Made
In Miami Stopover

MONTEGO BAY, Jamaica — A Columbian airliner, running behind schedule on a flight south from New York, turned over on its back, exploded and caught fire in landing at this Caribbean resort early Thursday. Thirty-seven persons were killed.

Nine survived, but every one of 17 Americans aboard perished.

The crash threw the plane, a two-million-dollar Super Constellation, onto its back in a shallow creek of swamp water north of the runway. With passengers and crewmen caught upside down in their safety belts, blasts and flames followed. Gasoline fed the fire.

"I could hear them screaming up front," said one survivor.

Prominent among the victims were Mr. and Mrs. Thomas C. Capehart, both 36, of Indianapolis — a son and daughter-in-law of Sen. Homer E. Capehart (R-Ind.) — and John H. Marhoefer, 56, of Muncie, Ind., president of the Marhoefer Packing Co. They were en route to Bogota, Colombia, to consider investing in a cattle-feeding and slaughtering operation there.

Business people and vacationers made up much of the rest of the passenger list. It was the fourth fatal airline accident of 1960, boosting the death toll of such crashes in the first three weeks of the new year to 163.

Four passengers and five of the seven-member crew escaped from the flaming wreckage of the plane, the Avianca Colombian National Airline's Flight 671. Rescuers found them wet and beat-up but apparently not seriously hurt.

The surviving passengers were two Dutchmen employed by the World Bank in Washington, Hendrik C. Wytzes, 36, and R. A. D. Loven, 54, and an Australian couple, Mr. and Mrs. Ian Kelton, en route to their home in Ecuador.

Stewardess M. Abad directed them out through a rear emergency door, then fell silent in shock.

A forward escape hatch saved four others of the crew — Capt. J. Duque, Copilot H. Arango, Flight Engineer Armando Espanos, and Purser P. Riano.

The plane, which left New York's Idlewild Airport at 10 a.m. Wednesday, was due here at 4:20 p.m., but had to lay over in Miami for repairs to a faltering engine. Five Americans boarded the plane at the Florida city to go to Bogota.

It was about 2:35 a.m. — 10 hours behind schedule — as the big plane headed in through the drizzle for a landing at the airport of Montego Bay, on Jamaica's north coast 550 miles south of Miami. Witnesses reported the left landing gear had collapsed.

Neil Williams, an American who lives near the airport, said a terrific explosion rocked the area after the plane had touched down, and then came two smaller blasts.

"A big fire started, and I could see some people running from the plane," Williams said. "The rest didn't have a chance."

Remains of a Disaster

N.Y. This is the burned out middle section of the fuselage in which 37 persons died when Colombian airliner, southbound from New York, crashed and burned at the Montego Bay, Ja-

Monkey Rockets Nine Miles

Wife Knew of Survival 11 Days Ago—

Find Dynamite in Building Near Desert Home of Spears

PHOENIX, Ariz. (AP) — A case of dynamite was found hidden in a small building near the desert home where Dr. Robert Vernon Spears lived during the two months after his reported death in the crash of an airliner.

Dr. William A. Turska, who was Spears' host in the isolated region, said he discovered the dynamite shortly after Spears had moved to a Phoenix resort motel.

Turska also said he understood that dynamite fuses were found in Spears' luggage after his arrest by FBI agents Wednesday.

The FBI would neither confirm nor deny the report.

The case took another strange twist Thursday night when Spears' 36-year-old wife, Francis, revealed that she learned 11 days ago her husband was alive rather than on the ill-fated National Airlines plane which fell into the Gulf of Mexico Nov. 16, killing 42 persons.

She said Spears told her a fellow ex-con, William Allen Taylor of Tampa, Fla., took Spears' seat on the plane.

Mrs. Spears told her story in a transcribed radio and television interview with Eddie Barker, news director of Dallas stations KRLD and KRLD-TV.

Spears, 65, was nabbed by FBI agents Wednesday night in Phoenix, Ariz.

"He sent a note to me by Dr. (William A.) Turska," Mrs. Spears related. Turska is the man with whom the FBI said Spears lived

in a desert cabin 40 miles north of Phoenix after going there Nov. 20. She said Spears came here Jan. 10 for a four-day visit and they met at the Lakewood Hotel.

Mrs. Spears said she told FBI agents prior to the broadcast that her husband was alive and it was Taylor, a former prison mate of Spears, who took his seat on the plane.

Several FBI men questioned Mrs. Spears for about an hour and a half at her comfortable East

Dallas home late Thursday, and about a dozen agents searched the premises — with her permission — Thursday night.

Baker asked Mrs. Spears' reaction to the note from Turska.

"I thought it was a trick, but then I saw him (Spears) at the Lakewood Hotel," she said. "I don't remember our first words. It was an extremely emotional meeting, of course."

"To think your husband was dead, and then see him . . ."

matic basis of the American ambassador's sudden recall to Washington.

Bonsal's summons to Washington caused little surprise here because of Castro's rejection of the latest U.S. note on seizures of U.S.-owned property and his anti-U.S. propaganda.

Diplomats said Castro's actions point to the necessity of Washington finding some new way to deal with the Prime Minister's revolutionary regime.

Bonsal returned here 11 days ago from a month-long U.S. visit, but those acquainted with him said the recent weeks have convinced him that a new route for bettering U.S.-Cuban relations must be found.

Tudor, Coleman Quit—

ID Has New Staff

The Iowa Defender, formerly headed by Steven Tudor, G, Iowa City, and James Coleman, G, Iowa City, will be owned and published by Gerald Stevenson beginning with the issue of January 29. Jerry Lutz, A3, Conesville, will replace Coleman as editor of the paper, and will have Becky Carnes, A3, Clinton, as co-editor.

Tudor, previous owner and publisher, said that he stopped working on the Defender because he needs to devote all the attention

he can to his studies. "I have every confidence in Jerry Lutz and Becky Carnes, and their associates. Perhaps this change is a good means of perpetuating the paper when Coleman and myself are gone."

Commenting on the change in management, Coleman said, "Personally I feel that this can mean nothing but an improvement in this student paper. Lutz and Miss Carnes will be able to give the paper that energy and attention

which is impossible under its present editor. Readers will be able to see the improvement brought about by more active editors. The results of better management will also, I'm sure, be evident. And readers should see an improvement in the physical presentation of the paper."

Responsible, intelligent management is very important for an enterprise such as the Iowa Defender, Coleman said. Lutz and Miss Carnes should provide such management which is needed both for the success of each issue and for the paper's continuing existence.

However, he said, their success will still be largely determined by

\$75,000 Lawsuit Filed by Student

Jerry W. Kolda, A4, 21, of Cedar Rapids filed a \$75,000 lawsuit against Ronald E. Cowan, A4, 21, of Laurens, in connection with a car accident north of Iowa City last Dec. 12.

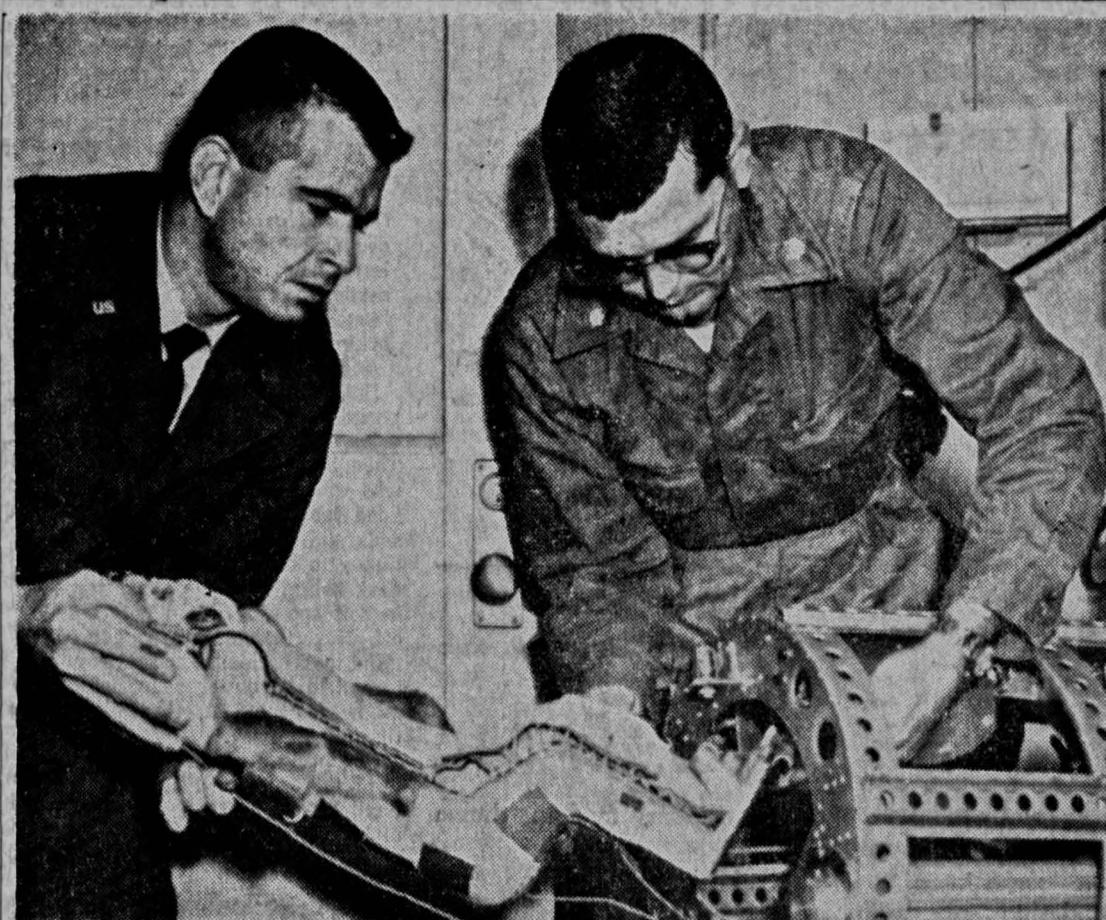

Kolda alleges in his petition filed in Johnson County District Court that he suffered extensive injuries and will be permanently disfigured because of facial lacerations and broken bones in the face and jaw.

Kolda's petition said he was driving north and Cowan was headed south but came into the east lane of traffic. The vehicles collided head-on. Leonard J. Cowan, owner of the car, also was named a defendant. Kolda's attorneys demanded a jury trial of the case.

The accident occurred on old Highway 218 four miles north of Iowa City. Both drivers and three passengers were injured.

Sahara Snowstorm

ALGIERS (AP) — A snowstorm caused a traffic jam deep in the Sahara Desert Thursday. Heavy snows in the high Atlas Mountains cut the road leading across the desert to Algiers from Chad in French Equatorial Africa.

'Miss Sam' Returns from Space

"Miss Sam," a rhesus monkey shot 48,900 feet into space in a Mercury capsule at the nose of a Little Joe rocket fired from the Wallops Island NASA testing ground Thursday, is removed from

biopack after her recovery 12 miles at sea. Maj. Cloete Green, right, of USAF School of Aerospace Medicine, Brooks Air Force Base, Texas, supervises the operation. — AP Wirephoto.

Radio-Control Escape Device Returns Her

'Miss Sam's' Success Watched by Two Men; They Might Be Next

WALLOPS ISLAND, Va. (AP) — A six-pound girl monkey took a rocket ride more than nine miles up Thursday in a new test that advanced the chances of successfully launching men into space.

A one-ton space capsule, with "Miss Sam" inside, successfully underwent a simulated emergency escape from the rocket which propelled it 48,900 feet high.

The test was designed primarily to check the radio-controlled mechanism by which it is hoped the lives of human astronauts will be saved if they run into trouble during future rocket launches.

It was the second such test. On Dec. 4 a male monkey survived a rocket trip 35 miles high.

Watching Thursday from a radar control tower about 400 feet from the rocket launching pad were two of seven Mercury Astronauts who may be the first Americans launched into space.

They were Navy Lt. Cmdr. Alan B. Shepard of East Derry, N. H., and Marine Corps Lt. Col. John H. Glenn Jr. of Cambridge, Ohio, and Arlington, Va.

After the capsule's separation from the launching rocket, it parachuted to the surface of a somewhat choppy sea 12 miles from this island, which is off Virginia's eastern shore.

The capsule was retrieved by a Marine Corps helicopter.

Officials of the National Aeronautics and Space Administration said doctors who took the monkey from the capsule reported she was "more frisky than before the launching."

Shortly afterward, "Miss Sam" — a three-year, four-month-old, Texas-born rhesus monkey — ate with apparent gusto a lunch of crackers, apples and water.

She was then whisked away from the island for a flight to Brooks Air Force Base, San Antonio, Tex., where scientists will analyze results of the test.

Reds Report Rocket Landed Only 1.24 Miles Off Target

MOSCOW (AP) — A Soviet test rocket fired from a third of the way around the world missed its target in mid-Pacific by only a little over a mile, the Russians announced Thursday.

The shot into a normally American-controlled bull's-eye area about 1,000 miles southwest of Hawaii was fired from a distance of about 7,760 miles, said Tass, the official Soviet news agency.

Washington military officials said Thursday their later information indicated the Soviet missile did fall within the target area, a zone of 34,800 square miles.

The burning of the next to the last stage, as described by Moscow, apparently accounted for the report of Capt. R. A. Gray, an Australian airline pilot, who said a "huge bright orange flash bulb going off" at the time given by the Russians. He said he plotted the position and believed the rocket had exploded prematurely at least 200 miles from the target zone.

Tass said the dummy nose cone had hit the water only 1.24 miles from the "predetermined point" at 12:05 p.m. EST Wednesday after

the next to last stage had disintegrated and burned in the atmosphere about 50 miles up.

The claim was a dramatic counter to the disclosure by President Eisenhower in his State of the Union message that 14 U.S. Atlas missiles had scored hits less than two miles from their targets at a range of 5,000 miles.

Washington military officials said Thursday their later information indicated the Soviet missile did fall within the target area, a zone of 34,800 square miles.

The burning of the next to the last stage, as described by Moscow, apparently accounted for the report of Capt. R. A. Gray, an Australian airline pilot, who said a "huge bright orange flash bulb going off" at the time given by the Russians. He said he plotted the position and believed the rocket had exploded prematurely at least 200 miles from the target zone.

He said he was flying at 20,000 feet and "we actually looked down

Demos Attack Ike's Budget For Defense as 'Complacent'

WASHINGTON (HTNS) — Democrats attacked President Eisenhower's defense budget as "too complacent" Thursday and rejected his optimistic view of America's defense posture.

Speaker of the House Sam Rayburn, (D-Tex.), told a news conference:

"I think people in the executive branch are just too complacent. I see that the Russians just yesterday shot a missile more than 7,000 miles into the Pacific. They hit within 1.2 miles of their target."

However, he said, their success will still be largely determined by

the next to last stage had disintegrated and burned in the atmosphere about 50 miles up.

The Secretary insisted this provides a logical basis for the Administration's judgement that "there is no deterrent gap." This is a more optimistic finding than last year's, when the intelligence estimate was pegged to Soviet capability regardless of Soviet intent.

Gates said the 7,700-mile Soviet missile shot Thursday was no surprise. He told newsmen as he left the closed-door session with the House committee:

"It seems to be an ordinary ICBM test. The accuracy they claim would be damn good — but our Atlas is damn good, too."

The Secretary said the achievement will cause no change in America's military planning.

The Soviet announcement, without saying so, indicated the rocket was fired from Tyura Tam near the Caspian Sea. An arc 7,700 miles long swung from Tyura Tam would include virtually every point in the continental United States.

If the Soviet claim of accuracy within 1.2 miles is correct, this means prime targets like cities, Strategic Air Command (SAC) bases and missile launching sites are well within range of Soviet intercontinental ballistic missiles.

Awful Lot of Coffee

Come on now, it can't be that bad! Jim Tate, A3, Burlington, grimaces at the flavor of the coffee, in the Iowa Memorial Union. Although many complain about the quality of the coffee, it is sold in great quantity. Hopes of a change from the present coffee machine are slight as long as the students continue to buy.

LETTERS —

An Odyssey Through Dissent Land

To The Editor:
A FABLE FOR JOURNALISTS
OR, THE ODYSSEY
OF TWO-FOUR

In the fall of the year, when the leaves of the trees made a sound as of pages being turned, burned and forgotten, there came into the land of Dissent a young warrior clad in mail, stamped with disillusion and marked post-haste by the Furies as the prophet of Utility.

Untutored he was, but capable of great learning. At his birth his mind, like yours and mine, had been a blank slate waiting for the runes of experience to be chalked upon its surface by the hand of Life, greatest of teachers. But what set him apart from us, O Reader; what made this dark knight capable of unfathomable depths of wisdom, was the fact that, at his nativity, by fortune or design, the slate of his mind had been covered with the oil of the olive, for his native land was Greece.

The chalk of life had made no mark on his intellect. It remained primitive and uncluttered. His brain needed only dry-cleaning to be made ready for large accomplishment.

And so, intuitively realizing this, and coming upon the hidden Oriental valley of Dissent in the course of his Odyssey, he made straightway for a Chin the laundry, there offering his brain to be washed.

And it was done.

But, in the land of Dissent, especially in Chinese hand laundries, there were no detergents. Though the old and wizened guy who washed brains for his livelihood labored like Hercules with suds and sand, the olive oil continued to cling adamantly to the dark knight's slate brain. Except in soft spots, it would not come off. Nevertheless, the laundered mind looked clean, and it was returned to its owner who sneezed as he accepted it, thus paying through the nose.

Unconscious of his swindle, the dark knight passed out into the daylight and proceeded to dream of becoming a fakir, a holy man in the land of Dissent. He sought a teacher.

Changing to stumble across one lying on a bed of spikes at

To The Editor:
AN OPEN LETTER FOR STEPHEN TUDOR

Mr. Tudor:

I answer in behalf of Lou Turco, not that he is unable to answer for himself, which he probably will, but because I am angered by your reply.

I had thought that a letter of criticism would be answered with point by point refutation of the letter's facts or fictions, or at least an incriminating silence; instead, you attacked Mr. Turco's character and physique and lied about your not knowing him.

It is self-evident that a person's physical characteristics should have no bearing on verbal argument. Furthermore, I have been present on several occasions when you were quite friendly with, and sought advice from, Mr. Turco.

In your position as journalist and fomerer of public opinion you should be rather hesitant before blundering so badly before the public. And for one who seemingly does not know or care to know Mr. Turco, you have grasped a great many unimportant details, most of them false, concerning him. Is it your sight or your memory that's to blame? Or is it both?

But why am I speaking — I know my words are ineffectual as far as your understanding them is concerned. I am speaking because I want the people reading this paper to know why I am angry, more so because this is an old anger, a cool anger that has been burning me away for years — I am angry at stupidity. No, I'm not calling you stupid, Mr. Tudor, for in your reply you have done that yourself.

Barracks Life A 'Unique Experience'

SPLISH, SPLASH, he's takin' a bath — in the kitchen sink. Tim Peterson, age one, tries to prove that everything but the kitchen sink is not fun for bathing. His mother, Ginny, says his favorite bathtub toy is the bar of soap — "and he's been known to chew it," she said. With these words, tiny Tim put the soap to his mouth, and the photographer caught him on the rare occasion.

— Daily Iowan photo by A. Q. Smith

TIM'S BATH is usually a family occasion because he seems to take over the kitchen — splashing water, throwing soap, and having a pile of fun. "It takes one of us to bathe him, and one to clean him," says Ginny. University barracks

are not furnished with bathtubs, so many of the mothers bathe their children in the sink. Here, Ginny and Ockie stand by while Tim, as usual, tries to give them a rough time.

Herald Tribune News Service
A NEW HAT IN JANUARY
THE YOUNG OFF-THE-FACE
BERET

Every woman wants a new hat in January — I think she actually needs one, too. It should be young and gay to give her a lift and to pep up her winter clothes as well.

The hat fashion that fills the bill perfectly this year is the jaunty off-the-face beret, the one-and-only hat that the one-and-only Chanel showed with her last collection. It has taken until now for it to really catch on, but it now looks as if the Chanel off-the-face beret would become the hat counterpart of the Chanel cardigan suit!

These berets are all on bands, a little over an inch wide or so, are moderate in size, and are worn pushed back a little on the head. Sometimes they have a ribbon cocarde at the side. I particularly like them for January in pale felts — and in soft straw for later on.

MEET BURNELL RICHARDSON AND DICK MASLOWSKI

They're transmission engineers with Michigan Bell Telephone Company in Detroit. Burnell graduated from Western Michigan in 1951 with a B.S. in Physics, spent four years in the Navy, then joined the telephone company. His present work is with carrier systems, as they relate to Direct Distance Dialing facilities.

Dick got his B.S.E.E. degree from Michigan in 1956 and came straight to Michigan Bell. He is currently engineering and administering a program to utilize new, transistorized repeater (amplifier) equipment.

Both men are well qualified to answer a question you might be asking yourself: "What's in telephone company engineering for me?"

SAYS DICK:

"There's an interesting day's work for you every day. You really have to use your engineering training and you're always working with new developments. Every time Bell Laboratories designs a new and more efficient piece of equipment, you are challenged to incorporate it in our system effectively and economically. For example, I have been working on projects utilizing a newly developed voice frequency amplifier. It's a plug-in type — transistorized — and consumes only two watts, so it has lots of advantages. But I have to figure out where and how it can be used in our sprawling network to provide new and improved service. Technological developments like this really put spice in the job."

SAYS BURNELL:

"Training helps, too—and you get the best. Through an interdepartmental training program, you learn how company-wide operations dovetail. You also get a broad background by rotation of assignments. I'm now working with carrier systems, but previously worked on repeater (amplifier) projects as Dick is doing now. Most important, I think you always learn 'practical engineering.' You constantly search for the solution that will be most economical in the long run."

There's more, of course—but you can get the whole story from the Bell interviewer. He'll be visiting your campus before long. Be sure to sit down and talk with him.

Meet Ball State, OSU, West Virginia—

Gymnasts Seek 3 Dual Wins

By GARY HICKOK
Staff Writer

Iowa's gymnastics team will attempt to fatten its 2-0 mark today and Saturday with a three-meet slate which includes Ball State of Muncie, Ind., Ohio State and West Virginia.

The Hawkeyes will face Ball State today at 2 p.m. before heading on to Columbus for two dual meets against the Buckeyes and West Virginia Saturday at 2 p.m.

With performances comparable to the Hawkeyes' 67-55 win over highly-regarded Southern Illinois, Coach Dick Holzapfel's squad could come

NOVAK SNYDER

home with a 5-0 record. Iowa's other win was against Minnesota, 60-52.

Holzapfel has taken nine men on the 3-day jaunt. Three of the men, Steve Banjak, Harlan Bensley and Ed Wilson did not compete in the two earlier meets. Banjak will work on the high bar with Bensley and Wilson competing in the parallel bars event.

The remaining six Hawkeyes include Roger Gedney, Bill Buck, Tom Novak, Larry Snyder, Marshall Claus and Phil Levi. Buck and Claus are currently leading the squad in points; Buck with 41 and Claus with 28.

Gedney is slated to see considerably more action than in the two previous meets. He has been

competing only in tumbling but Holzapfel will enter him in free exercise, trampoline and high bar this weekend.

Ball State Coach Clair Jennett, SUI graduate who became mentor of the Cardinals last year, has had nothing but trouble this year. Earlier this season he lost his top gymnast in Charlie Fritz with a slipped disc and Monday night lost the squad's leading scorer, Ron Weiss. Weiss broke his ankle.

The Cardinals' strength is built around Ken Conner in the high bar and parallel bar events. Don Kassen on the side horse, Otto Griebling on the trampoline and Mark Stump on the still rings. Other gymnasts slated for work against Iowa are Bill Breton, Tom Moore, William Rowden and Tom Wilson.

Ohio State is not a powerhouse this year, evidenced in an earlier 38-27 loss to Michigan State. Holzapfel says its strongest events are tumbling and trampoline, the latter an event in which Iowa usually excels. Little is known about the West Virginia team.

Judy Eller, Women's National Collegiate golf champion, engages in some body gymnastics on the 15th hole in the first round of the Doherty Women's Golf tourney at Fort Lauderdale, Fla. Judy found that the kicking didn't help as she was upset 2 and 1 by Pat Tieran. — AP Wirephoto.

These are the silver wings of a U.S. Air Force Navigator. As a flying officer on the Aerospace team, he has chosen a career of leadership, a career that has meaning, rewards and executive opportunity.

The Aviation Cadet Program is the gateway to this career. To qualify for this rigorous and professional training, a high school diploma is required; however, two or more years of college are highly desirable. Upon completion of the program the Air Force encourages the new officer to earn his degree so he can better handle the responsibilities of his position. This includes full pay and allowances while taking off-duty courses under the Bootstrap education program. The Air Force will pay a substantial part of all tuition costs. After having attained enough credits so that he can complete course work and residence requirements for a college degree in 6 months or less, he is eligible to apply for temporary duty at the school of his choice.

If you think you have what it takes to earn the silver wings of an Air Force Navigator, ask your local Air Force Recruiter. Ask him about Aviation Cadet Navigator training and the benefits which are available to a flying officer in the Air Force. Or fill in and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

Sugar Ray Back in Action; Defends His Title Tonight

BOSTON (AP) — Sugar Ray Robinson, still scrambling for gold and glory at the age of 39, will defend his limited version of the world middleweight title Friday night against Paul Pender, an ex-freeman from Brookline, Mass.

Robinson is heavily favored to dispose of his 29-year-old opponent, probably by a knockout. Although Robinson will be starting his 21st year as a pro, the odds are all against any collapse Friday night.

Massachusetts and New York still recognize Robinson as king of the 160-pound class. The National Boxing Association stripped him of his title last May after waiting more than a year for a defense. The NBA crowned Gene Fullmer after he knocked out Carmen Basilio in August.

Robinson expects a hefty chunk of gold for this effort as he reportedly is getting 42½ per cent of the gate and 75 per cent of the \$75,000 TV money. He won't get much glory, even if he flattens Pender. Ahead are possibilities with Fullmer and Archie Moore, the light heavyweight champ.

Two judges and a referee will score the 15-round match, scheduled for 9 p.m. (CST).

Sugar Ray's last major fight was his rematch with Basilio, 92.

RAY ROBINSON

March 25, 1958 in Chicago, almost 21 months ago. There was much talk of a third bout with Basilio and a contract for a Philadelphia bout — that never came off — was produced to save his recognition in New York.

Pender's record for 42 fights is 35-5-2 as compared to Robinson's total of 151 with a 142-6-2 plus one no decision battle record. Pender has stopped 19, Robinson 92.

Two judges and a referee will score the 15-round match, scheduled for 9 p.m. (CST).

Sugar Ray's last major fight was his rematch with Basilio, 92.

NBA Owners Kill Chances Of Franchise Additions

PHILADELPHIA (AP) — National Basketball Association club owners Thursday virtually killed any chance of adding new franchises for the 1960-61 season.

President Maurice Podoloff said that nothing about new franchises was broached in the annual meet-

ing and "we don't expect to meet with anyone seeking the franchise unless it's on an informal basis."

Standing near Podoloff at the time was Los Angeles sports film executive Len Corbosiero making his annual trip to the league meeting in the hope of landing an NBA team for that Pacific Coast city. Corbosiero said he'd keep trying and was ready to field a team whenever the league owners were ready to admit him to membership.

Thursday's meeting did see these developments:

1. Delayed televising of NBA games via video tape to the Hawaiian Islands approved.

2. Formal selection of Syracuse as the site for the 1961 All-Star game. No date was chosen.

3. Scheduling of a meeting with the League Players' Association for Friday to discuss the pension program sought by the players.

The league failed to act on a schedule for next year and failed to set playoff dates.

There was no action on the Chicago franchise, admitted to the league in September, because of the absence of Chicago spokesman Max Winter.

Spokesmen for the sponsors of the televised Friday night fights said Thursday the company intends to continue the program, even if on another network.

Wilt, Cousy Give East Edge

NBA All-Star Game Tonight

PHILADELPHIA (AP) — The East rules a slight favorite tonight in the All-Star game of the National Basketball Association.

Veteran Bob Cousy, of the world champion Boston Celtics, gives the East a stronger backcourt because of his smooth ball handling and tricky passing. He is a good scorer, too, but his shooting ability is sometimes overshadowed by his ball handling.

Wilt Chamberlain, the 7-1 rookie giant of the Philadelphia Warriors, will be an excellent target for Cousy's passes in the keyhole. He shows promise of smashing virtually all records.

For outside shooting strength, the East can rely on Dolph Twyman of Cincinnati, Bob Pettit and Cliff Hagan of St. Louis and Elgin Baylor of Minneapolis.

Walt Dukes of Detroit will start at center for the West. His job will be to stop Chamberlain but he'll have help from three others

since the West is expected to use a sagging defense.

Spelling Dukes at center will be Clyde Lovellette of St. Louis who has had good success in defending against Chamberlain.

Starting guards for the West will be Gene Shue of Detroit and Dick Garmaker of Minneapolis.

The weekly N.C.A.A. statistics released Thursday showed that the Big O continues to lead the 1959-60 scoring race with 531 points and a 37.8 average for 14 games.

Robertson, in three seasons, has piled up 2,493 points.

Cousy has 2,538 in his three years at Furman. It also appears only a matter of weeks until Robertson shatters the all-time mark held by Dickie Hemric, who scored 2,587 points in four years at Wake Forest.

Tom Stith of St. Bonaventure has scored 266 points and averaged 33.3 points in his last eight games to move to within 7.7 points of Robertson in this year's competition.

Overall, Stith has 362 points and a 30.2 average.

Larry Willey, another Cincinnati stalwart, is the leader in field goal accuracy with a .671 mark followed by Jerry Lucas, Ohio State's safety sophomore, with .611. Bob Parker retains his lead in free throw marksmanship with .930, resulting from 40 of 43 foul shots.

Defending rebound champion Leroy Wright of College of the Pacific again is setting the pace in his specialty with 23.6 per cent.

Ohio State is the team offense leader with a 92.8 average while California is the defense pacemaker with 47.7. The figures include games of Saturday, Jan. 17.

NFL Owners Deadlocked In Commissioner Voting

MIAMI BEACH, Fla. (AP) — National Football League owners Thursday night failed again to elect a new commissioner and adjourned until Friday efforts to find a successor to the late Bert Bell.

The final tabulation Thursday night was seven votes for Marshall Leahy, San Francisco attorney; four for Don Kellett, Baltimore general manager; and one abstention.

Through 13 rounds of balloting, 8 Wednesday and 5 more Thursday, no candidate could poll the 9 of 12 votes necessary for election to the \$50,000 a year job.

The situation appeared so hopeless that Joe Donoghue, vice president of the Philadelphia Eagles and chairman of the election ses-

Littler, Knight Lead Crosby Meet

PEBBLE BEACH, Calif. (AP) — A pair of San Diego golfers, Gene Littler and Dick Knight, braved rain and winds up to 45 m.p.h. Thursday to share the first round lead in the \$50,000 Bing Crosby Golf Tournament with scores of 67, five under par.

With the high winds sending many scores soaring into the 80's Littler and Knight solved the Monterey Peninsula Country Club course, the easiest of the three in use.

Their sub-par shooting in stormy weather gave the two a three-stroke lead going into Friday second round of the 72-hole tournament when they play the tougher Pebble Beach course.

Knight shot a 32-35 and Littler 34-33.

Tied in second place at 70 were Paul O'Leary, Bellflower, Calif., 34-36; Tommy Jacobs, Arcadia, 35-35; and Ken Venturi, Palo Alto, Calif., 33-37.

They also played Monterey Peninsula where trees lining the fairways afford protection from the winds that whipped ocean spray onto a fairway at Cypress Point and dogged the golfers at Pebble Beach.

Ohio State Seeks Big 10 Rule Changes

COLUMBUS, Ohio (AP) — Disputed by what it considers a threat to faculty control of Western Conference athletics, Ohio State has called for the Big Ten presidents to reconsider recent rule changes.

The appeal came after a vague threat to pull Ohio State out of the Big Ten if the rule changes of Nov. 1 are accepted by the conference.

A resolution, unanimously

adopted Tuesday by the OSU faculty council, called for:

1. A review of the changes.

2. Dr. Novice G. Fawcett, Ohio State president, to recommend to the council of 10 presidents of the Big Ten schools that a convention be held to draft a formal constitution governing Western Conference athletics.

The matter will probably rest for a couple of weeks until the return of Dr. Fawcett from a trip to India.

The amendment was reworded

and softened somewhat to recommend that conference rules as of Oct. 31 be in effect until a constitution could be drafted and ratified by all Big Ten faculties.

Chief faculty opposition to the Nov. 1 revision centers about two points:

1. The original rule vests control of athletics entirely in the faculties of the member schools.

The reworded version vests control in an "institutional agency" which is composed entirely of faculty feels that athletics should

be under control of the entire faculty or an agency representing the entire faculty.

2. Power to veto or accept important conference legislation under the revised Big Ten rules, would be vested in an "institutional vote." This is the OSU faculty people say, means the vote could be cast not only by the small group, like the athletic council, but by the athletic director, rather than the faculties or faculty representatives who are instructed by the faculties.

Husbands Veto Wife 'Like Mom'

Marrying a girl just like the girl that married "dear ole dad" apparently is not a requirement for a satisfactory marriage, according to a research study completed at the SUI Child Welfare Research Station by Professor Eleanore B. Luckey.

Both Freudians and social psychologists have generally believed that adult sexual adjustment depends considerably on personality similarities of one's spouse and the parent of the opposite sex. However, the SUI study does not support this belief with regard to women.

Satisfactorily married women are not seen by their husbands to be more similar to their mothers-in-law than less satisfactorily married women, Mrs. Luckey said.

However, the data with regard to men agrees with popular beliefs. Husbands in satisfactory

marriages are seen by their wives to be like the wife's father.

"The findings suggest that men who see themselves fulfilling the husband role as they saw their fathers fulfilling it are more satisfied in their own marriages," Mrs. Luckey reported.

"Satisfaction in marriage for the male may be associated with his own feelings of masculinity which have been learned from the father," she suggests.

The reason that wife-mother similarities do not affect marriage adjustment may lie in the changing role of women, Mrs. Luckey suggested.

"Doing things the way mother did, seeing herself as a female of mother's cut, apparently is not a factor closely associated with the satisfaction a modern wife finds in marriage," she said.

Mrs. Luckey noted, for instance, that more women now work outside the home, having less time for cooking or child care.

Modern women who have an equal share in saying when and where and how a house is to be bought, insurance chosen and vacations taken may well have been reared by mothers who left such decisions entirely in the hands of the man of the family.

Mrs. Luckey surveyed 594 former students who had been enrolled in Family Life classes at the University of Minnesota between 1948 and 1950. Persons in the final section of the survey were asked to rate spouse and parents, using a check list. Items on the survey included such descriptive phrases as "well thought of," "apologetic," "somewhat snobbish," "clinging vine," "outspoken," "will confide in anyone," "often gloomy" and "encourages others."

Senate Probes Drug Profits

WASHINGTON (AP) — Senate investigators set out amid some heat and agitation Thursday on a probe of profits in tranquilizer drugs.

Right off they developed testimony that Smith Kline & French Laboratories of Philadelphia made about three times the 11 per cent average annual profit rate for all U.S. manufacturers in 1958.

"How can you justify that?" demanded Sen. Estes Kefauver (D-Tenn.). "Don't you think you ought to have a little compassion on these tranquilizer users?"

Walter A. Munns, president of Smith Kline & French, insisted from the witness stand that the prices charged by his firm are reasonable.

He said the drugmaking business is "not a bed of roses." He said the company has spent almost \$70 million dollars since 1950 on research, and has a research budget for this year exceeding \$13 million.

Munns was the first witness at a new series of hearings by the Senate Antitrust and Monopoly subcommittee, which investigated the cost of arthritis drugs last month.

Kefauver, chairman of the subcommittee, said the sale of tranquilizers is now running at a rate of between \$75 and \$200 million dollars a year at the manufacturers' level. He did not estimate the retail sales figure, but said the hearings would seek to determine whether the buying public is being adequately protected by the forces of competition.

Companies Hope Permanent Patent Is Impermanent

NORFOLK, Va. (AP) — A federal judge Thursday entered an order which could make virtually every beauty parlor and home permanent wave subject to patent rights of a Yonkers, N.Y. inventor.

U.S. District Court Judge Walter A. Hoffman, carrying out a mandate of the U.S. 4th Circuit Court of Appeals, dismissed a suit aimed at throwing out a patent originally awarded Dr. Everett G. McDonough, a Yonkers chemist.

The defendants have said dismissal of the suit could lead to annual royalty payments totaling more than four million dollars from the permanent wave industry, previously unhampered by patent rights.

Miss Burford has a series of articles on life in Great Britain being published in this week's Daily Iowans.

More Swastikas Here Than Abroad

UNITED NATIONS, N.Y. (HTNS) — The largest number of anti-semitic defacements in the recent worldwide outbreak occurred in the United States, according to a compilation submitted to the United Nations by the American Jewish Congress.

Of a total of 163 defacements in 25 countries, 63 were registered in the United States, more than twice the 24 listed for West Germany, which was second on the world list.

The survey covered the three week period between Dec. 25, when the smearing of a swastika on a synagogue in Cologne, Germany, touched off anti-semitic incidents around the world, and Jan. 14, when swastikas were painted on the Jewish fraternity house and sorority house at the University of Colorado in Boulder.

The 63 incidents in the United States occurred in 46 cities of 18 states.

Herbert Chosen Head Of Engineers Fraternity

Gene Herbert, E3, Milan, Ill., was elected president of Tau Beta Pi, honorary engineering fraternity, at a recent meeting.

Other officers named were: William Kelley, E4, Iowa City, vice president; Herbert Huff, E4, Luverne, recording secretary; James McCall, S4, Iowa City, treasurer; George Ashton, E3, Davenport, corresponding secretary; and Robert Fry, E4, Silvis, Ill., cataloguer.

The Gillette Co., makers of the Toni home permanent, had continued to fight the claim for McDonough's patent, even though Gillette made a deal some time ago with the present owner of the McDonough patent freeing Gillette from past and future charges of patent infringement.

The suit was the latest in a long series of court actions involving major cosmetic firms and two patent companies. It stemmed from the invention of the cold wave formula which made possible the mass use of home permanent.

Iowan's Widow Given Medal For Heroic Rescue of Worker

PITTSBURGH (AP) — A sewer construction worker's heroic action in rescuing a fellow worker from a ditch cave-in which he died himself, won for his widow Thursday night a bronze medal and a \$50 monthly pension.

The award to the widow of Lawrence Lowell Waters, of Washington, Iowa, was one of several announced here by the Carnegie Hero Fund Commission.

Five other persons also were awarded bronze medals for their part in the rescue, which occurred at Epworth, Iowa, May 16, 1953.

Dr. A. K. Ruebel, Spirit Lake veterinarian, also was awarded a bronze medal for pulling six teenagers from a burning car near Orleans, Iowa, Oct. 2, 1958.

Waters, 37, died when he was buried in a sewer ditch cave-in from which he previously had helped rescue Earl Wiemerslage, 33, a sewer pipe layer.

Wiemerslage and John R. McLaren were working at the bottom of the sewer ditch, which was 17 feet deep and 8 feet wide.

A cave-in occurred, covering Wiemerslage to the waist and McLaren to the knees. Waters, Clifford Fritz and Rex Barber immediately jumped into the ditch. While Waters and Fritz dug Wiemerslage free with shovels, Barber aided McLaren.

As Wiemerslage climbed from the ditch another cave-in occurred, covering McLaren to the waist and almost completely covering Waters. Barber and Fritz

dug Waters out to the chest, while McLaren dug to free himself.

A volunteer emergency squad of three men — Daniel McDermott, William Mausser and Clarence Urbain — then entered the ditch, administered oxygen to Waters and helped to free him.

A third cave-in completely buried Waters and covered one leg of McDermott. Both men were dug free and taken from the ditch, but Waters could not be revived.

The award to the widow of

Plane Lands Safely Despite Fire

YOUNGSTOWN, Ohio (UPI) — A Trans World Airlines Constellation with 27 persons aboard made a safe emergency landing at the Youngstown Municipal Airport Thursday when a small electrical fire broke out.

Capt. Al Clay, pilot of Flight 546 from Chicago to New York, with final destination at Boston, said the plane was 15,000 feet over the Youngstown airport when the trouble was noted.

The 22 passengers were placed aboard a United Airlines flight to New York about one hour later.

He said the crew members spotted smoke coming from the cockpit and the safety instruments also indicated an electrical fire.

Clay said he immediately radioed to the federal airway traffic control center at Indianapolis and came down rapidly.

The 22 passengers were placed

aboard a United Airlines flight to New York about one hour later.

He said the crew members spotted smoke coming from the cockpit and the safety instruments also indicated an electrical fire.

Clay said he immediately radioed to the federal airway traffic control center at Indianapolis and came down rapidly.

De Gaulle's Critic May Be Transferred

By B. J. CUTLER
Herald Tribune News Service

PARIS — The incident of Gen. Jacques Massu's public attack on President De Gaulle's policy toward rebellion-torn Algeria is not closed," Government sources disclosed Thursday.

This statement indicated that at a time of Gen. De Gaulle's choosing, Gen. Massu, a hero of Algeria's anti-Gaulist European rightists, will be transferred out of his key post as military and civilian commander of the Algiers region.

Massu told a German newspaperman that if De Gaulle had an Algerian policy, it was not the army's, and that the army was disappointed that it had returned De Gaulle to power in 1958 because he had become "a man of the left."

Massu was summoned to Paris where he issued a tepid denial of the remarks and pointedly pledged his loyalty to Gen. Maurice Challe, Commander-in-Chief in Algeria, and not to De Gaulle.

It has been learned that Government officials are convinced that Massu in fact made some of the anti-De Gaulle remarks attributed to him and that De Gaulle is far from satisfied with the situation.

SUI Taking Bids For Underground Chemical Storage

Bids for construction of an underground volatile storage structure at SUI will be received until Feb. 17.

Bids will be accepted until 1:30 p.m. on that date at the SUI Office of Planning and Construction and will be opened and read at 2 p.m. the same day.

The 40-by-60-foot concrete structure will be built south of the Medical Laboratories. A tunnel will connect the structure with the new SUI Pharmacy Building, to be constructed between the Fieldhouse and Medical Research Building.

South Grand Avenue will be relocated on top of the underground building. The relocation will be immediately east of the present street.

Facing a ravine, the east wall of the building will be constructed with a safety "blow-out" wall.

The 58th General Assembly voted funds for the SUI project, which will be used to store chemicals, such as acids, explosive liquids and gases.

Market Makes Slight Advance

NEW YORK (AP) — The stock market managed to nudge ahead Thursday in light trading. It was only the third time in 1960 that more stocks rose than fell.

Volume slipped to 2,700,000 shares from Wednesday's 2,720,000, making this the second day of the lowest turnover since Dec. 24 when 2,320,000 shares were traded.

The Dow Jones industrial average rose 1.74 to 645.43.

Bank of England Ups Discount Rate

LONDON (HTNS) — The Bank of England abruptly increased the British bank discount rate from 4 to 5 per cent Thursday in a move officially said to be aimed at internal rather than external protection of the external position was really behind the move.

The results was an immediate fall in stock exchange prices, with Government securities taking the hardest knocks. But at the same time, Sterling strengthened on the foreign exchange markets — lead-

Paris Considers Tickling Pigeons

PARIS, (HTNS) — Tickling the feet of pigeons is being considered by the Paris Municipal Council as a method to prevent defacement of the city's historic monuments and buildings.

According to reports, buildings and monuments would be sprayed with a chemical, inoffensive in other respects, but reported to create a tickling sensation in

Kennedy To Enter Nebraska Primary

OMAHA, Neb. (AP) — Sen. John F. Kennedy (D-Mass.), announced Thursday he will enter Nebraska's presidential preference primary.

He flew here to make the announcement only a few hours after disclosing in Milwaukee his decision to take on Minnesota's Sen. Hubert Humphrey in the Wisconsin Democratic primary.

The Nebraska primary, unlike the April 5 test in Wisconsin, is a popularity contest only. The results are not binding on Nebraska's 16 Democratic convention delegates.

Humphrey has visited Nebraska twice in recent months but remained undecided about entering the primary. The Minnesotan expressed doubts he will have the financial or physical resources to compete both in Wisconsin and Nebraska.

NFO Meets in Des Moines Saturday

CORNING (AP) — National Farmers Organization President Oren Lee Staley said Thursday more than 1,000 Iowans will attend a statewide meeting of the

Eisenhower May Visit Hawaii in June

WASHINGTON (AP) — Hawaii may be added to President Eisenhower's stopping places on his way home from the Soviet Union next June.

Eisenhower plans to be in Japan about June 20, and then to fly to the mainland United States. A stopover in Hawaii would be his first visit there since late 1952 when he stopped briefly, going and coming, on his trip to Korea.

SUI Students To Present Recitals On Trumpet, Piano This Weekend

Two students from the SUI Department of Music will present recitals this weekend in the North Music Hall.

Morgan Jones, A4, Muscatine, will present a trumpet recital Saturday at 4 p.m. He will be accompanied by Ann Heiserman, A2, Anamosa.

For his recital, Jones will play "Oriente," by Barat; "Aria," "Suite Modern," Fitzgerald, and "Morceau de Concert," Goevens.

His program will be presented in partial fulfillment of the requirements for the bachelor of music degree.

Deanna Augspurger, A4, Bloom-

DON'T SAY "HELLO!"
BANGKOK, Thailand (AP) — Interior Minister Gen. Prupart Charusathien was quoted by the Bangkok Post as saying a new bill for controlling prostitution makes any woman liable to arrest for calling "Hello, Hello" to men.
