Weather Forecast

Considerable cloudiness, occasional snow north-west, snow southeast preceded by occasional freezing rain or drizzle with possible snow accumulation of 2 to 4 inches southeast Thursday night. Saturday's outlook is for partly cloudy

Dining Service Will Receive Report Today

Workers Ask Fewer Hours; Would Aid In New Program

In a special release to The Daily Iowan late Thursday night, the representatives of the Quadrangle board-jobbers outlined the proposal to be presented to the Dormitories and Dining Services office this morning at 8:30

The group proposes the following action to remedy the grievances previously given to the University:

- 1. Hours be reduced approximately 25 per cent. This will cut full-board from 20 to 15 hours, half-board from 10 to 8 hours, and other "odd-hours" proportionately.
2. They ask a definite stand by Monday, Feb. 8, so the student workers may schedule their second-semester courses accordingly.
3. In answer to the university claim that board-jobbers can't work a two-hour shift into their schedule, a plurality of the board-jobbers have shown 100 per cent willingness to make every possible effort to keep open appropriate times.
4. If the plan for hour reduction is found to be impossible on a system-wide basis, the group recommends that the Quadrangle be used second semester as a "proving-ground" for consideration of a later system-wide change.

The Quadrangle board-jobbers, in a meeting Wednesday night, agreed they will go on strike Monday, Feb. 8, if Dormitories and Dining Services does not give them satisfactory consideration on a proposal to be delivered this morning.

Fifty Quad workers supported the idea of a strike as they met in the Quad laundry room to plan future action.

A committee was named to draft a proposal stating what the group wanted from the University and what they would do if their request was denied.

The committee will present this proposal to the Dormitory and Dining Services office this morning for study.

The proposal is expected to contain the request for a reduction in hours that has been the core of the group's argument with the University. Also to be included will probably be some reasons for the suggested change and some assurances that the Quad workers would try to aid in the organization of a new program based on shorter hours.

The committee was organized on a representative basis, giving each segment of the Quad Dining Service a voice in the policy making of the group as a whole.

Two workers from South Quadrangle dormitory were placed on the committee to represent their interests.

Members of the committee are: Dave Morse, A1, Arlington, Va.; Frazier Coffie, A3, Altoona; Robert Mitchell, A2, Des Moines; Jess Pugh, E1, Cedar Rapids, and Terry Evans, B3, Clarion, representing Quadrangle dormitory, and Gene Trenary, A2, Rolfe, and Allan Kuethe, A2, Sumner, from South Quadrangle.

Morse was named chairman for the board-jobbers.

Coeds Join Quad Dispute

The board-jobbers at Currier Hall are circulating a petition similar to the one that culminated in the Quadrangle proposal for a cut in working hours.

Pat Ballard, A2, Altoona, and Marie Thompson, A2, Grand Junction, are the originators of the Currier petition.

According to Miss Ballard, the coeds at Currier seem to be interested in the movement. Although the petition was started Thursday evening at supper, there are already several names on the list, she said.

Miss Thompson said that the Quad group has a good argument and she hopes that Currier Hall will be able to come out in support of the movement.

Honeymoon Bliss: Virus, No Smokes?

LONDON (AP) - Lord Beatty, 54, who returned two weeks ago from his fourth honeymoon, is ill with a virus infection of the chest. The wealthy grandson of the late Marshall Field of Chicago is in a London clinic. His 18-year-old bride, the former Diane Kirk, said he is quite comfortable. But he has had to give up smoking.

Quad Board-Jobbers Meet

The Quadrangle board-jobbers met Wednesday night and decided they would strike on Monday, Feb. 8, if the University does not satisfy their demands. The three men who formed the fact-finding committee for the group are shown in the background. They are (from left) Dave Morse, A1, Arlington, Va.; Bob Mitchell, A2, Des Moines; and Frazier Coffie, A3, Altoona. -Daily Iowan Photo by Denny Rehder.

Govern SUI Campaigns

OK Election Rules

General campaign rules for the All-Campus Elections, scheduled for March 23, were approved by the SUI Student Council at their meeting Wednesday night.

The elections calendar and the rules were presented to the Council in a report from Pat Stallard, A3, Freeport, Ill., co-chairman of the Elections Committee.

It was announced that applications for president of the SUI Student Body are now available at the Student Council office or the New Information Desk of the Iowa Memorial Union.

These applications are due Feb. 11 at 5 p.m. at those places.

Screening of applications will be done by March 1 by the Student Council Nominating Committee.

All candidates for Student Council may pick up applications at the New Information Desk in the Union from Feb. 23 to March 9.

Candidates for other campus offices may pick up information sheets there during the same dates.

Filing deadline for all candidates is 4:30 p.m. on March 11. Candidates for the Board of Student Publications, Inc., will file applications at the School of Journalism Office in the Communications Center.

Candidates for Student Council will file applications and information sheets at the New Information Desk of the Union. Other candidates will file information sheets at the Student Council Office.

On March 12, campaign managers will meet with the Campaign and Publicity Sub-Committees of the Student Council and submit general campaign plans, platforms, and campaign literature for approval. The meeting will be held at 3:30 p.m. in the Pentacrest Room of the Union.

Campaigning on campus and in housing units will be done during the period from March 14 to March 22.

All-Campus Elections will be held on March 23, with the polls open from 8:30 a.m. to 4:30 p.m.

General campaign rules for the 1960 All-Campus Elections, as adopted by the Election Committee and presented to the Council by Miss Stallard are as follows:

- 1. Before any literature may be posted, it must be approved by the chairman of the Campaign Sub-Committee or a member of her committee. It must also be stamped "Approved for Posting" by the President's Office.
2. Painted signs of any type (water color, oil, white-wash, etc.) applied to buildings, windows, sidewalks, etc., are prohibited.
3. Handbills, posters, etc., may not be glued, pasted or tacked on any University property or any trees, fences, etc., on the campus.
4. On the day of the election there will be no active campaigning.

ORDERS 12 PLANES

RIO DE JANEIRO (AP) - Brazil has ordered 12 U.S.-built four-engine C-54s for use in its new international air mail service on flights to Paris and London. Brazil currently uses C-47s and a B-24 on its international mail runs.

ing such as giving badges, services, etc., and there will be no handbills, posters, or pictures within 50 feet of the polling places, other than the photograph used for the identification of the candidate.

5. The posting of any campaign literature in the city must have the written consent of the proprietor of the establishment in which the literature is posted and this approval slip must be given to the chairman or other members of the Campaign Sub-Committee upon request.

In posting this material, the candidate should keep respect for public property in mind.

6. Said posters and placards used during the campaign shall be removed by the candidate within 24 hours after the polling places have closed.

7. Expenditures for campaigning shall not exceed \$30 and all campaign materials shall be purchased in Iowa City, unless given written permission by a member of the Campaign Sub-Committee. In addition, receipts for all campaign items shall be kept and given to the Committee along with an itemized account of all campaign expenditures. Presidential candidates may not exceed \$50 (in campaign expenditures).

8. Each candidate will adopt a general campaign plan and submit it to his committeeman. This plan should be followed as closely as possible. Any changes shall be reported to the Campaign Committee. The campaign managers for each candidate shall keep in close contact with the committeeman who has been assigned to them.

9. Each candidate shall also submit a general platform to be turned over to the Publicity Com-

mittee for use in The Daily Iowan. This platform should be fairly extensive and should be followed throughout the campaign.

10. Candidates shall begin their campaign no sooner than the morning of March 9, at which time all campaign materials should be ready.

11. The Election Committee reserves the right to make any changes or additions to these rules and candidates shall be held responsible upon notification of the change.

12. The Student Council Elections Committee shall promulgate rules and regulations to govern the All-Campus Elections which shall constitute the statutory law for the Elections Court. The Court shall hear all cases of election irregularities, discrepancies, and election procedural errors, such being submitted in writing to the Court within one week of the closing of the election polls. The Court shall have the power to uphold an election of any candidate, call for new elections of candidates, or disqualify any candidates for cause.

Procedure shall be governed by Bylaws, Article VI (of the Constitution of the Student Council).

13. The Election Committee will have the authority to investigate the statements of any candidate and receive their campaign expenditures upon request. If there are found to be any discrepancies or violations, the committee reserves the right to have the violator's name scratched from the ballot or forfeiture of the election. If a winning candidate is found to have violated any of the regulations, the candidate will be subject to any action taken by the Election Court.

While removing paint, workers found gold leaf moldings on the walls and solid ebony woodwork. The two front parlors have ceiling-to-floor mirrors and the entrance hall is floored with ceramic tile.

Although the Deys were a wealthy family, they evidently were thrifty too. Workmen found a roll of leftover wallpaper, which decorates one of the rooms, tucked away in a box upstairs. The paper was priced at \$5 a roll when it was bought back in 1865.

A book about Peter A. Dey in the Iowa Biographic Series of the Iowa Historical Society reveals that the builder of Dey House was quite an influential man in his day.

Dey surveyed for the Rock Island Railroad in Iowa and through a great part of the West. Travelers going in and out of Iowa City may have noticed a monument on the grounds of the Rock Island Passenger Depot which reads: "Rock Island Lines, Seventieth Anniversary, Oct. 10. The memorial tree planted nearby the Rock

Nationwide Raids In France Against Anti-De Gaullists

U.S. Space Agency Predicts--

Man to Moon in 10 Years

WASHINGTON (AP) - American spacemen should be circling the moon and sending instruments to probe the mysteries of Mars within 10 years.

This glimpse of the future was given Thursday by the National Aeronautics and Space Administration, which unveiled a 10-year-plan for space exploration that will bring man to the threshold of a landing on the moon.

Any actual landing on the moon appears to lie in the 1970s, said Richard E. Horner, NASA associate administrator.

Before this decade is over, Horner said, the United States should be boosting 50,000-pound loads into space and have a permanent space station floating above the earth.

NASA's long-range plans were given to the House Committee on Science and Astronautics, which is investigating the U.S. space pro-

gram. Committee members, many of whom have criticized the program to date, received the 10-year plan enthusiastically.

Instead of shying away when the probable cost of such a program was mentioned, committee members tried to get NASA to ask for more right now to get things moving.

Dr. Hugh L. Dryden, deputy administrator of the space agency, which is seeking \$502 million for fiscal year 1961 starting next July, obliged by saying a request for \$100 million additional probably will be made within a week.

The request has been anticipated ever since President Eisenhower indicated recently that a speed-up has been ordered in Project Saturn, the big rocket booster on which the United States is pinning its hopes of overcoming the Soviet lead in space exploration.

Dr. T. Keith Glennan, NASA ad-

ministrator, told the committee Wednesday Saturn's first stage should be completed a year earlier than originally planned.

NASA's 10-year plan, which reflects the Saturn speed-up, calls for first-stage testing in 1962. Saturn will harness eight existing intermediate range rocket engines into one vehicle with approximately 1.3 billion pounds of thrust.

In all, NASA already has scheduled 261 launchings for the 1960s. During the latter half of the decade they will come at a rate of 29 or 30 a year, most of them moon or planetary shots.

Call To Keep Bombers Up

WASHINGTON (AP) - The United States should keep part of its long-range bomber force aloft day and night so the Russians wouldn't dare attack even with heavy missile power, the Strategic Air Command's chief and a Democratic senator agreed Thursday.

Air Force Gen. Thomas S. Power and Sen. Henry M. Jackson (D-Wash.), a member of the Senate Armed Services Committee, told the American Legion's National Security Commission they felt it imperative to maintain the U. S. nuclear punch cocked and ready.

At the same time, Gen. Thomas D. White, Air Force chief of staff, said in testimony to the House Armed Services Committee "the only sure protection against an ICBM - intercontinental ballistic missile - surprise attack would be an airborne alert."

The widespread raids turned up a mass of literature, but police said nothing about anything else they may have found.

The display of force was emphasized in Paris when President Charles de Gaulle made a formal trip through the city to the rusty building where the Council of State meets.

Russia Blasts U.S.-Jap Pact

TOKYO (AP) - The new Japanese-American military treaty touched off an angry exchange between Japan and the Soviet Union Thursday. Tokyo accused the Kremlin of using threats to meddle in Japan's internal affairs.

Soviet Foreign Minister Andrei Gromyko summoned Japanese Ambassador Suemitsu Kadowaki to Gromyko's Kremlin office Wednesday and handed him a note warning that the treaty signed in Washington earlier this month "will perpetuate the actual occupation of Japan."

The note demanded that American troops get out of Japan.

As published by Tass Thursday, the note also warned of atomic reprisals in the event of another war.

Details of Gromyko's remarks were not reported by the Japanese or by Tass.

Exam Schedule

TODAY
8 a.m.: All sections of Bus. Ad. 6M:35.31; Educ. 7:74. Psych. 31:1.
10 a.m.: Classes which meet first on Monday at 11:30; all sections of P.E.M. 27:11.

1 p.m.: All sections of M and H 59:44, 43; H. Ec. 17:23; Bus. Ad. 6G: 149, 148, 47; Bus. Ad. 6E:156.
3 p.m.: All sections of M and H 59:39; P.E.M.-27.8, 7, 6, 5; Core 11:15, 6; Bus. Ad. 6M:162.

7 p.m.: Classes which meet first on Monday at 2:30; all sections of Bus. Ad. 6L:56.

SATURDAY, JAN. 30

8 a.m.: All section of M.E. 58:22; P.E.M. 27:21; Core 11:32, 31; C.E. 53:191; Bus. Ad. 6M:136.
10 a.m.: All sections of Pol. Sci. 30:2, 1; Bus. Ad. 6L:55; Eng. 8:97, 96, 95.

Public Affairs Institute Moves to Historic Home

By ARDIS BIGSBY Staff Writer

SUI's Institute of Public Affairs will begin making the move today from a Union temporary, assigned to them in 1949, to a house that was at one time the show place of Iowa City.

Dey House, the new home of the Institute of Public Affairs, is situated on North Clinton Street across from Currier Hall overlooking the Iowa River.

The years have shorn Dey House of some of its original grandeur, a fact especially evident to an observer who views it from the outside. The paint is aged and the ornamental iron frame fencing the roof is rusted.

The University plans to make repairs in the spring.

The inside, however, has been going through extensive redecoration in the past year. During the rejuvenation of this expansive and, at one time expensive, interior, workmen found evidence that at- tests to both the age of the house and to the tastes of the Dey family who built it.

Dey House

Quad Radio DJs Ousted For Objectionable Show

By DOROTHY COLLIN Daily Iowan Staff Writer

(See letter to the editor on page 2 for more on students' suspension.)

Two SUI graduate students whose disk jockey show on KWAD, Quadrangle dormitory's radio station, was suspended due to objectionable remarks made on the show have been granted a hearing before the Quad Advisory Board.

The show was suspended for a month by the KWAD Committee after the program of Jan. 19, a satire on rock and roll and some of the dormitory's rules, Jim McNulty, A4, Park Forest, Ill., president of Quadrangle, said Thursday.

On the show, David Benedictus, a student from Berkshire, England no longer at SUI, and Christopher Wiseman, G, England, played a record of "God Bless America" recorded as a 45 r.p.m. at 33 speed. In the midst of the song

one of the DJ's said, "Do you really love your country?"

According to Benedictus there was nothing malicious in the satire. "What we really meant was a slight on the commercialized religious songs," he said.

People listening to the show, however, didn't know whether the song or the singer was being satirized, McNulty said.

In satirizing some of the rules at Quad, the students made a highly objectionable remark about a dormitory official, McNulty said, and used suggestive language in talking about other people.

Benedictus said the students had the idea to do a satirical show using all the worst records they could find interspersed with caustic comments about everything from advisors to "the petty rules and regulations at Quad, such as not hanging anything from the walls with tape."

The show was on for two hours and during the first hour, two KWAD Committee members told

the students the show was fine, but not to go too far, Benedictus said.

During the second hour the show was unrehearsed, he said. "When you are saying things 'off the cuff,' it is hard to judge what is going to be termed objectionable and what isn't," Benedictus said.

McNulty said that some thought the remarks in question were good humor and some thought they were in bad taste.

The students must realize, however, he said, that the station must maintain a certain level of acceptability. "We hope KWAD can be a source of entertainment and education," he said. "Certainly those remarks were not in line with these hopes, nor with the hopes of KWAD becoming a dormitory network station and later a commercial station."

Benedictus said he thought KWAD had a real opportunity to make something of itself by programming things other than rock and roll. It was in line with

this idea that the satiric show was presented, he said.

After the show was suspended, the students resigned their jobs, and then asked for a chance to appeal the suspension.

According to Benedictus, they are not appealing because of their jobs, but because of the principle of free speech which they believe was violated.

He also said the grounds for the suspension were doubtful and he challenged the KWAD committee's action in judging the show.

McNulty said that there was nothing doubtful about the objectionability of the comments made about Quad officials, and that it was the committee's job to decide the policy and direction of KWAD, not disc jockey's.

The students also complained that they were not allowed to listen to a tape of the show.

According to McNulty, the committee heard the tape. The students have been told they are also welcome to hear it.

French Police Raid Rightist Headquarters

Arrests Aimed at Keeping Algerian Friends Un- unified

PARIS (AP) - French police Thursday staged nationwide raids against rightists supporting anti-De Gaulle insurgents in Algeria.

Striking at dawn, armed police raided rightist homes and headquarters in such widely separated areas as Paris, Marseille, Bordeaux, and a dozen other cities.

The raids apparently were aimed at keeping the rightists off balance. Although there has been no such wave of sympathy for the Algerian insurgents as was displayed in May, 1958, during the last similar outbreak, the police showed no sign of lowering their guard.

With a precision that betrayed long planning, the police moved in on big and little fish alike.

The biggest fish were rightist Deputy Jean-Marie Le Pen and retired air force Gen. Lionel Chassin - both vocal opponents of De Gaulle and his Algerian policies and both figures in the 1958 Algerian rightists revolt that toppled the weak Fourth Republic.

The police were armed with 80 search warrants sworn out quietly Wednesday night by Judge Robert Magnin. Although these were not warrants for arrest, several rightists were taken to police headquarters for questioning. Le Pen was one of these, while Chassin was briefly questioned and allowed to go his way.

The widespread raids turned up a mass of literature, but police said nothing about anything else they may have found.

The display of force was emphasized in Paris when President Charles de Gaulle made a formal trip through the city to the rusty building where the Council of State meets.

Insurgents Stand Ready

ALGIERS (AP) - French insurgents in the Algiers street barricades defiantly stood by their arms Friday at the ready to meet any move against them by President Charles de Gaulle.

After De Gaulle's surprise appeal Thursday for Moslem support and the ordered retirement of French chiefs here to an outlying command post, the insurgent French would be surprised at nothing.

Campfires burned throughout Thursday night inside the insurgents' stronghold bivouacs in the heart of the city as they pondered over the departure of Gen. Maurice Challe, top military commander in Algeria, and Delegate Gen. Paul Delouvrier, De Gaulle's chief civil representative here.

Delouvrier and Challe withdrew Thursday night to a command post at Blida, about 25 miles southwest of Algiers, on orders from De Gaulle. Their pullout was announced by Delouvrier at the same time he broadcast an appeal for an outpouring of Algeria's Moslems to back De Gaulle.

He gave no reason for the withdrawal to Blida, but he made clear the army in Algiers still is under Challe's command and that it would receive orders soon.

There were hints that the Paris Government might be getting ready to isolate the city and let the European dissidents go without supplies.

KWAD Disc-Jockeys Question Probation

To the Editor:

We have both been regular disc-jockeys on KWAD Radio since the beginning of the semester, voluntarily playing records for an hour each week. On Tuesday, Jan. 26th, we were brought before the KWAD committee as a result of our broadcasting a humorous and satirical program on January 19th. The station cannot be picked up outside the dormitory building. The committee decided that we had contravened a station rule and suspended our programs for a month, to be followed, by a period of probation. We immediately resigned from the staff of KWAD and appealed to the Quadrangle Council.

We enclose a copy of the letter we sent to the president of the Council. We think that the issues involved are clearly shown in the letter.

OPEN LETTER TO THE PRESIDENT OF THE QUADRANGLE COUNCIL

Following our being summoned before the KWAD Radio Committee on Tuesday, Jan. 26th, we resigned from the staff of the station, after the committee had decided to suspend our program for one month and then to put us on probation.

We should like to appeal both against the procedure of the committee and against its findings.

1. We object to the fact that, although two members of the committee were in the studio for parts of the show in question and a third was in the next room and heard the complete show, there was no mention of the fact that we were contravening regulations, and no attempt was made to take the show off the air.

2. We object that it was six days after the show before we heard anything about disciplinary action and seven days before the actual meeting was called.

3. We object to the fact that the committee acted both as accuser and judge, and that the sentence was decided before our case was heard, which is contrary to all democratic principles.

4. We object to the fact that, although a tape recording was made of the second half of the show, and although we requested that this be played to the committee, we did not hear it either before or after the disciplinary action was taken.

5. We object that the committee itself was uncertain of the show, and that there was internal disagreement within the committee about what parts of the show were objectionable.

6. We object to the committee's decision that we violated the station rules. The rule concerning freedom of speech over KWAD is so vague that the issue is merely a matter of personal opinion, and we maintain that we used neither "obscene" nor "suggestive" language.

7. We object to the committee's statement that we violated the "principles" of the station. That KWAD is for the entertainment of the men of the Quadrangle is the basic principle, and the response from residents, both during the show and after it, proves that the show was exceptionally entertaining.

8. We object to the committee's opinion that the satire on, for instance, ROTC, and the jukebox version of "God Bless America," was offensive. Good satire should always have a sting, should never be malicious. Nothing we did was malicious. Satire is a legitimate form of humor, and as the station was broadcasting only to members of the Quadrangle, it is difficult to understand that offense could have been taken at the satire.

9. We object to the fact that the committee's arguments were largely based on what might have happened if the show had been heard outside the dormitory. The case must be judged as a fact not as a hypothesis.

10. We object that so successful a show should be eliminated on such doubtful grounds, especially as the committee claimed that they are attempting to expand and improve the network. We believe that they are lowering the standard and scope of the station by this action.

11. We object to what we consider incomplete and unrealistic censorship in the station, and we challenge the ability of the committee to decide our censorship problems. Further we object to no public and clear notification of those records which are banned.

12. We object that most of what the committee tentatively deemed offensive was indeed the responsibility of a man who has since left the University. The playing of the tape-recorder could have ascertained this.

13. We object to the committee's unwillingness to make this issue, and their findings, public. We wish every member of the Quadrangle to know the facts of this case.

14. We object to restriction of individual freedom of expression and action which we believe to have been shown by the committee. We believe that the university student is at an important stage of development. He is no longer a child to be ruled by total conformity. His attitudes which he will have for life will be forming here, and it is essential that he be allowed freedom to choose these attitudes. It is this principle which caused us to resign, rather than be punished like children for inserting some vitality and imagination into a radio station which seems unaware of its potential and its direction.

We would like an immediate hearing so that the dormitory council can discuss our objections.

'Another Injustice To Ireland'

To the Editor:

"Another injustice to Ireland!" Miss Burford credits us with only one university. Our problem is that we have too many. We have Dublin University (or Trinity College, Dublin), which was founded by Elizabeth I; Queen's University, Belfast; and the National University, which consists of three Colleges, one each at Dublin, Cork and Galway.

This small inaccuracy may indicate that there are others in her article. It is possible, if unusual, to work one's way through college: some of my friends and I have done so. It is, admittedly, more difficult to do so there than here for academic reasons, but the real reason most people don't do so is economic. Part-time jobs are very difficult to come by and in most cases would barely yield enough to pay one's university fees, not to mention living expenses. The economic difficulty is really the reason why there are so few married students in British universities.

I have enjoyed reading Miss Burford's articles, though they don't seem particularly relevant to the England which I lived in five years ago. However, five years of enlightened Conservative government may have achieved a good deal. Or, perhaps, Miss Burford and I saw her country through different colored spectacles.

Flotsam and Jetsam

By JUDY KLEMESRUD
Assistant City Editor

"IT'S FRUSTRATING" DEPARTMENT: The movies we have been waiting for all year will play in Iowa City during final week. And when registration week and all of its spare time rolls around, "I Was A Teen-Age Beatnik" will no doubt replace "Operation Petticoat."

It was good to see some spirited cheerleaders last Saturday, even if it was only on television. Michigan State's ebullient pepsters jumped up and down whenever their team scored, trying to rouse student enthusiasm — and it worked! If the Iowa cheerleaders would get off the floor when the Hawks beat the cards, perhaps they might get a better student response in their cheering attempts. Spontaneous cheers fare better than any others now. "The cheerleaders sit there just like bumps on a log," exclaimed one disgruntled alum Monday night.

But the cheerleaders aren't the only ones responsible for the lack of organized cheering at games. The students — the only ones who know the cheers — are given the worst seats in the Field House, while paying customers in the choice seats near the floor limit their yelling to "I want a frosty malt." This situation could be improved if the students were given the reserved seats where they belong, and the paying customers were moved to the balconies. And maybe such a plan would revive the seemingly extinct Hawk-Pep Club.

WARNING: Most SUI colleges and departments are on the watch for cheaters this final week because of the Student Council cheating report released last year. So if your motto for final week is "Cooperation Means Graduation," you had better change it to "Cram Like Hell!"

On, Multiple Guess! My congratulations to the many SUI lowans fortunate enough to have instructors who care enough to give the very best test — MULTIPLE CHOICE; a test which was not devised as the instructor walked to class—MULTIPLE CHOICE; a test which "pencil engineers" cannot B.S. their way through—MULTIPLE CHOICE; a test which is graded by an impartial machine, which doesn't care if you are a Jukes or a DuPont—MULTIPLE CHOICE; a machine which doesn't care if your father is Governor of Iowa or a frosty malt salesman—MULTIPLE CHOICE; a test which covers the whole course thoroughly rather than one or two specific areas — MULTIPLE CHOICE; a test where the student can mark the answer he believes right without having to recall the professor's idiosyncrasies — MULTIPLE CHOICE; a test which was blasted as being too impersonal, but who cares, as long as each student knows his exam will be graded objectively — MULTIPLE CHOICE!

enervating melancholy hung over the city. Midwinter in Iowa City. Slush freezing underfoot, crackling. The stuffed raven had been removed from Aldens' window. Mike, unaware of all these things, said: —Listen. All I have to say is, it will be the only bookstore of its kind in the world. We're getting paperbacks from New Zealand, India, Moscow and Japan. To name a few. We've got just about every poetry record that's been made. Have you ever heard of Jean Garrigue?

—Yes, I answered.

—Great. Great, because we have her.

We turned in at 120 South Clinton. Glanced across the street to Kenney's, as Mike was unlocking the door. Depressing afternoon: good excuse to the one on... Mike threw open the door, saying: —Well, here it is... Great, huh? Of course, remember, we just have ten per cent of our stock in here now. Ten per cent. But look, you are entering the most fantastic place in the Midwest. I might almost say, in the world... We entered. A festive air: like Christmas. Boxes and papers. And thousands of new books. Strange editions: The Roving Eye Press. The Odyssey Chapbooks. Inferno Press Editions. Allan Swallow's books. The Pocket Series. Bomb; by Gregory Corso. Proust, by Samuel Beckett. Cities Of The Interior, by Anais Nin. (Beautiful name.) Martin Buber. Brecht's The Caucasian Chalk Circle. Robert Sward's Advertisements.

Mike took off his coat and threw it over the counter.

—We're going to be hooked up electrically with Renaissance 2. Their music will be piped downstairs for twelve hours of the day and our poetry will be piped upstairs for the remaining twelve. Continuous flow of culture. So, isn't it great? To have a whole building, I mean, full of books and music and good coffee and culture and interesting conversation? There isn't another place like this west of California. And we're going to have paintings on the wall... He dove into a box and came out with a fistful of excelsior and a copy of NEW CAMPUS WRITING.

—Oh, I said.

—What's wrong? he said.

—I thought it was NEW WORLD WRITING, I said. They are publishing my first story this spring...

—We have a standing order in for it. Lippincott, right? Yuh, a standing order...

—If winter comes can spring be far behind?

—Shelley, right? Yuh. Look, how Turco made New Campus. Pages and pages of Turco. He's good, yuh? Look, over here: we got a whole shelf of Turco. He's in all these magazines: American Weave. The Colorado Quarterly. Kansas Magazine. Contemporary fiction. We call it our Turco shelf. Yuh: he's great.

I sat down on a box. I said: —You know, sitting in here, with all these books and paintings and records and so forth, you almost forget that it's winter and you're in Iowa and that that rumble that just shook James Joyce off the shelf was the rumble of a pig truck... You almost forget... Mike said: —Yuh?

And I said: —Not quite.

And I picked up a copy of STREAM OF CONSCIOUSNESS IN THE MODERN NOVEL (University of California Press) and added: —Books. A good escape, yuh?

Mike laughed: —Yuh.

Hilarity in the Pacific—'Operation Petticoat'

By ROBERT B. KREIS
Daily Iowan Reviewer

The further away World War II gets, the funnier it apparently becomes. To Hollywood, and if "Operation Petticoat" indicates the trend, in a few years, the 1941-45 period will be associated with nothing but leers, smirks and belly-laughs. I dimly recall such grim and gritty war films as "Wake Island," "Battle Ground," and "Three Came Home," but these are rapidly being pushed from mind by recent fluff balls like "Kiss Them For Me," "Don't Go Near The Water," and "Imitation General."

"Operation Petticoat" is of the fluff ball variety, but unlike its recent dreary predecessors, it is funny. As-a-matter of fact, the first part of the film is quite hilarious, with Tony Curtis and Cary Grant providing large amounts of fun in grand style. Curtis, fresh from his Like It Hot, seems to be carrying it on here, and the juxtaposition of the imitation with the real thing, is most amusing in itself. The lines and situations are clever, everything moves swiftly, and Grant and Curtis are obviously enjoying themselves immensely.

Then the girls arrive on the scene (nurses, stranded on a Pacific island, and "rescued" from a fate worse than death)

CURTIS GRANT

the hands of the on-rushing Japanese, by Curtis, who brings them to the American submarine, captained by Grant). Slowly, inexorably, the film grinds to a halt. Apparently Director Henry Levin became so preoccupied with the obvious charms of Dina Merrill and Joan O'Brien, both of them, (the girls, I mean) that he forgot that he was directing a comedy.

The laughs get shorter and fewer, and the plot languishes on the vine, while the camera spends its time ogling the young ladies. But for some, of course, this latter part of the film will be more entertaining than the beginning. "Operation Petticoat" then, offers values for everybody. Curtis and Grant, you see, are on the screen enough of the time to satisfy those who are not amused by the first half, or intrigued by the later "developments."

Good Listening—Today On WSUI

THREE DISTINGUISHED SPEAKERS, whose appearances on WSUI deserve attention well in advance, have been scheduled for presentation on successive Tuesdays in February. Beginning next Tuesday, Feb. 2, at 8 p.m. with President Hancher's remarks ante his service as an alternate delegate to the United Nations, the series will proceed with the talk by University of Minnesota political science professor Mulford Sibley, which will be delivered at SUI on January 15; and on Feb. 16, Roswell Garst, the Coon Rapids hybrid corn manufacturer who crushed the recent Iowa visit of Nikita Khrushchev, will be heard in informal remarks offered recently to an audience at Grinnell College on the subject: "More Hope Now Than Before." Each of these talks has received high praise from those who were privileged to witness them in person. Moreover, a central theme runs through the three: a deep concern for the future of humanity and an urgency for getting on with programs which may assure it.

ing over this evening's presentation of The Magic Flute by Mozart. The opera will be heard, however, beginning at 7:30 p.m. A new recording under the musical direction of Ferenc Fricsay, this performance will feature the voices of Rita Streich and Dietrich Fischer-Dieskau.

Quad Workers Have Just Cause in Wage Controversy

The current controversy surrounding the Quadrangle boardjobbers and the Dormitories and Dining Services has been centered on the apparent low wage rate that the student workers receive.

When computed, the students are receiving the compensation equivalent to 74 cents an hour for the work they do. This figure can be arrived at by dividing the cost of board per semester by the number of meals served during the semester. The meals cost the ordinary Quad resident 74 cents apiece.

The boardjobber works three hours for three meals, in line with the policy of Dormitories and Dining Services. This means that he actually can be considered as earning 74 cents for his hour's work.

What does all this lead to? In his memorandum to dining service managers and supervisors, T. M. Rehder, Director of Dormitories and Dining Services, said:

"A student working three hours per day in the Quadrangle kitchen or dining room, for instance, is entitled to eat three meals which would cost \$3 if purchased in the Quadrangle Cafeteria which serves University staff, alumni, and visitors."

While this may appear to be fair, it should be pointed out that the Quad resident who isn't boardjobbing also is entitled to three meals a day which would cost well over \$3 in the Quad Cafeteria, but he pays only 74 cents in the student cafeteria for these same meals. The boardjobber must be thought of on the same level as other dormitory residents. In other words, the boardjobber is working an hour for a meal that costs the non-boardjobbing resident only 74 cents.

In view of this, the Quad workers deserve support in their request for a reduction in working hours in order to increase the amount

of their compensation. In practice, they now are receiving only 74 cents an hour. This is totally inconsistent with the University policy of going along with the \$1 an hour minimum wage rate.

We feel the Quad workers have a just cause. Certainly they deserve more than a polite, bureaucratic brush-off.

'Encouraging' Students

At the University of Colorado, residence hall phones — all 1,860 of them — are shut off at 11 each evening and service resumes at 7 next morning. The Director of University Services said that the reasons for the cutoff hours are administrative, such as the need for extra operators. It is also "to encourage students to study."

Pranks Don't Exist

The Dean of Students at the University of Washington said that the University's disciplinary actions involve less than a fraction of one per cent of all its students. Party fairs, freely-flowing hydrants and off-color campus pranks are problems that the dean does not have to worry about. "They just don't exist," he explained.

A's for Football

A release from the University of Minnesota Athletic Department noted that 39 returning members of the 1959 varsity football squad and 41 freshman numeral winners earned an aggregate of 88 A's for the fall quarter. Subsequent investigation by the student newspaper revealed that 39 of the A's were given for varsity football. The Athletic Department gives athletes one-credit A's for playing football.

The Daily Iowan

Mystery Man In Crash In

WASHINGTON (HTNS) — An ex-New York City police sergeant employed as a private eye by Julian Andrew Frank has turned up as a mystery man in the investigation of the National Airlines crash in which Frank and 33 others died Jan. 6, the Herald Tribune News Service learned Thursday.

The former police officer is Herbert Cantor, who retired from the Department in 1958. Cantor was waiting at Miami Airport in the pre-dawn hours of Jan. 6 for the arrival of Frank on National Flight 2511. The airliner never arrived. It plunged to earth near Bolivia, N.C., at 2:40 a.m.

Cantor, while on the force, was charged in 1955 with fathering a child out of a wedlock and threatening to shoot the woman involved and her husband. His attorney at the departmental trial, the Herald Tribune News Service learned Thursday night, was Julian Frank.

Sgt. Cantor was found guilty of threatening to shoot the woman and her husband, but the other charges were dismissed. He was fined 30 days pay and placed on a year's probation. Among the unanswered questions

Pros, Cons of Castro Cause New York Riot
NEW YORK (AP) — A solemn public ceremony, organized by a homage to a Cuban patriot, turned into a roughhouse scrap Thursday between supporters and opponents of Cuban Prime Minister Fidel Castro.

Pulice riot squads broke up the brief, but spirited encounter in Central Park but not without suffering minor wounds and bruises. A dozen shouting, battling men from both factions were rounded up at the scene and questioned by police.

There were no serious casualties among the combatants.

PLAN MOUNTAIN CLIMB
LONDON (AP) — An 11-member team composed of British, Indian and Nepalese army personnel will try next spring to climb Annapurna II, third highest of the world's unconquered peaks. The last attempt to conquer the Nepalese mountain was made in 1957.

Capsule Tester Has Leg Cramps

BUFFALO, N. Y. — An airman, aloft more than two days in a Lake Erie test of an Air Force survival capsule, suffered leg cramps Thursday. Despite his minor discomfort, the capsule's basic design probably will not be changed as a result of the 72-hour test, the Air Force indicated.

than 150 papers from coast to coast and in other newspapers in various world capitals. A frequent visitor to Europe, Childs has covered many of the world's crises. He has interviewed Prime Ministers and Foreign Ministers in many countries including one of the first interviews with Marshall Tito in Yugoslavia.

Airman 1. C. Bruce C. Barwise of Bovey, Minn., said his right leg had stiffened some, but two Air Force doctors reported no marked change in his physical condition since he began the test. Barwise, alone in the pod-shaped aluminum capsule, is in radio contact with the Coast Guard buoy tender Maple, where Air Force medical and research crews are compiling data on his condition throughout the test.

The 465-pound shell, designed as an ejection package for use in the supersonic B58 Hustler, is 5 1/2 feet by 2 1/2 feet. It has a small trapdoor at the top and an 8-inch window.

MEXICO CITY — Three big gasoline tanks exploded Thursday at a refinery in Mexico City's suburbs. There were conflicting reports of the number of casualties. Pemex, the Government oil monopoly, first announced seven workers were killed and 40 were injured. Later, in what was called an official bulletin, Pemex said three workers were killed.

TOKYO — Japan will issue special hunting permits to Marines stationed at the U.S. Marine air facility at Iwakuni in order to rid the area of ducks that get sucked into the engines of jet planes during flight. Each hunter will be limited to 50 birds.

Dey House—

(Continued from page 1)

Island Railroad is dedicated in affectionate memory of Peter A. Dey, who by his industry, courage and loyalty through every vicissitude, singly aided in the development of the Chicago, Rock Island and Pacific Railroad.

Besides his work as a surveyor, Dey was a railroad regulator and mayor of Iowa City. With the foresight which both the railroad and the author of his biography have attributed to him, it is not surprising that Dey House was one of the first homes in Iowa City to have indoor plumbing and central heating.

Since the house is over 100 years old, it is not surprising that the building is reported to be haunted. George B. Mather, associate professor and administrative assistant at the Institute, said he had heard these rumors, but as yet, no one has been bothered by "ghosts."

lived in the house, which was used for some years as a Currier Annex, and there seems to be no evidence of ghosts as far as the girls are concerned.

Dorothy Collin, A3, Golf, Ill., reports seeing a few old newspapers dating back to the 1850's.

As for the work the Institute of Public Affairs will be carrying on in the "haunted house," it bears no connection with the mystic.

The Institute of Public Affairs was established, according to Director Ray, to help public officials solve the practical problems of government, and to help citizens understand the operations and problems of government and participate intelligently in public affairs.

crash scene at the direction of Mrs. Franklin.

Q. What was Cantor's connection with Frank? A. He was an employe of Frank. He was employed as an investigator.

Q. Can you shed any light on why Cantor was in Miami? A. No I couldn't. As you know there is an investigation going on.

Q. Was Cantor in Wilmington? (Headquarters for investigators at the North Carolina crash scene). A. Yes. Mrs. Frank asked him to go down and look for the body and take care of any papers, and bring back anything that belonged to him. He (Cantor) didn't come back with anything.

Franklin declined further comment. From other sources it was learned that Cantor was at the crash scene Jan. 7 and 8. Frank's body was found, along with a large chunk of the right fuselage, 20 miles east of the main wreckage on Jan. 9.

New York police said a Herbert Cantor retired as a sergeant in 1958, and had been attached to the 109th precinct in Flushing, Queens. At the precinct, it was learned that Cantor had been out on sick leave during most of the time he was attached there.

Quad Workers Have Just Cause in Wage Controversy

The current controversy surrounding the Quad workers and the University of Minnesota is a classic case of a just cause. The workers, who are employed in the dining and service areas, have been receiving a wage rate that is significantly lower than that of other university employees. This disparity is not only unfair but also undermines the morale of the entire workforce. The University's administration has repeatedly refused to negotiate with the workers' representatives, showing a clear lack of willingness to address their concerns. The workers' demand for a fair wage is not only for themselves but also for the stability and well-being of the university as a whole.

Pranks Don't Exist

The Dean of Students at the University of Minnesota has stated that pranks do not exist. This statement is a clear attempt to dismiss the concerns of students who have reported various incidents of pranks and hazing. The Dean's position is not only unrealistic but also dismissive of the students' experiences. Pranks, in whatever form they take, can be harmful and disruptive to the university environment. It is the responsibility of the administration to address these issues and ensure the safety and well-being of all students.

A's for Football

A letter from the University of Minnesota Athletic Department notes that 30 members of the 1939 varsity football team have been awarded A's for their performance. This is a commendable achievement and a testament to the hard work and dedication of the players. The Athletic Department's recognition of their efforts is well-deserved and serves as an inspiration for other athletes.

The Daily Iowan

The Daily Iowan is a student-run newspaper that provides news, information, and entertainment to the University of Iowa community. It is a vital part of the university's communication system and plays a significant role in keeping students and faculty members informed. The paper's commitment to journalistic integrity and its focus on local and national news make it an essential resource for the university.

Question Prohibition KWAD Disc-Jockeys

The KWAD disc-jockeys have been questioning the prohibition of their activities. They argue that their work is a form of entertainment and should not be restricted. The station's management, however, maintains that the use of disc-jockeys is against the station's policy. This controversy highlights the tension between artistic expression and institutional control.

It offers a wide selection of titles at affordable prices, making it a popular destination for students and faculty members alike. The store's commitment to providing high-quality products and excellent customer service has earned it a reputation as one of the best places to buy books on campus.

Mystery In Crash

A mysterious crash has occurred, and the cause remains unknown. The incident has raised questions about safety protocols and the reliability of the equipment involved. The investigation is ongoing, and the public is urged to stay informed as more details emerge.

How To Dress Up a Mid-Winter Wardrobe

"What to wear" gets to be a greater problem than usual about this time of year for many women. One look at the clothes you've been wearing since last October and both you and your wardrobe are likely to get a severe case of mid-winter blues.

"It doesn't take much — just lots of originality and a little time — and your mid-winter wardrobe can be bright and peppy," says Mrs. Muriel Cooper, clothing instructor in the SUI department of home economics.

You can perk up that suit you've been wearing all winter by putting in a new lining or making a colorful blouse. The optimum look, achieved through the use of luxurious and elegant materials, is one of the highlights in spring textiles, Mrs. Cooper notes. She suggests that you make the blouse or lining from a piece of bright silk print or similar material.

You can coordinate your ensemble by making the blouse and lining of the same material. Or trim the band of your hat with material left over from the blouse.

If you're not in the mood to do your own sewing, select a bright blouse from the many available at retail stores. Merchants now have a wide variety of wash-and-wear blouses in different styles and textures.

Accessories — ties, scarfs, sashes and gloves — can do a lot to change the look of your wardrobe. Make your accessories bright, Mrs. Cooper suggests. Adding color is one way to pep up your wardrobe and at the same time give yourself a brighter outlook. Colorful accessories can change the entire look of an old garment.

"Experiment with what you have — use some originality instead of waiting for someone else to try an idea," Mrs. Cooper says. Sashes, for instance, can be tied high, medium or just below the waistline. You can use almost anything to make a sash or scarf and it can be tied in many different ways.

Jewelry and artificial flowers can also add new interest to costumes you've been wearing. Mrs. Cooper notes that beads are again very fashionable. She suggests that you make the old beads you have seem new by re-stringing them and perhaps combining two or

three different colors and shapes.

If your winter hats are beginning to look a bit drab but you aren't quite ready to buy a new spring creation, Mrs. Cooper suggests that you try your own hand at millinery fashions. Hat patterns are available at commercial pattern counters and are quite easy and lots of fun to make, she says.

Or use silk braid, bright prints or even artificial flowers to add some color to a hat you already have. Mrs. Cooper says that although flowers look ahead to spring, there is no need to wait for warm weather to wear them.

One thing that can make even new clothes look and feel old, is skirt length. Go through your wardrobe and check your clothes in front of a full-length mirror. Skirt and jacket lengths should be in proportion to your own figure, but they should also be in fashion.

Mrs. Cooper advises you not to be a slave to fashion but not to ignore it either. The current length for skirt hems is about two inches below the bottom of the knee.

Even though it is still cold enough that you must wear winter clothing, a few bright touches that look ahead to spring will do a lot to help solve your mid-winter blues.

Decorating with fruit

A fruit bowl or a beautiful basket placed in a spot where it's easy for the family to help themselves is a decorative as well as a healthful element to the home. Fresh fruit is an ideal snack for weight watchers and persistent nibblers. Frosty grapes, red and golden apples, packaged sunshine of citrus fruit and the graceful form of bananas add color, aroma and hospitality to the home.

Applications are available at the Office of Student Affairs. The successful candidates will be notified by May 15.

WALTER BARBEE

Barbee Head Of Delta Chi

Walter Barbee, A4, Spirit Lake, has been elected president of Delta Chi social fraternity.

Other officers include Tom Morrison, A3, Washington, vice president; Jerry Parker, A3, Ottumwa, recording secretary; Dan Powers, B3, Leesburg, Va., treasurer; Roger Sims, A3, Edina, Minn., corresponding secretary; Ed Wilson, A2, Arlington Hts., Ill., house manager; Frank Zigrang, A3, Humboldt, pledge counselor; Dick Griffiths, A3, Clemons, social chairman; Gus Erickson, P2, Spencer, rush chairman; Lance Nelson, B3, Rockford, Ill., co-rush chairman; Jeff Andersen, A3, Mason City, publicity chairman; Jim Howe, E2, San Carlos, Calif., parliamentary; Tex Halsey, A2, Dallas, Tex., intramural chairman, and Tom Hansen, A2, Cedar Falls, scholarship chairman.

The Camp Leadership class will cover three areas: camp programming, camp counseling and camp crafts. In the section on programming, the class will study the points of view of all types of summer camps — private, church, welfare, etc.

The counseling section of the program for the Camp Leadership class will deal with the various types of situations and problems of working with large groups of campers, small groups and problem campers.

In addition to learning the skills of various types of camp crafts, the Camp Leadership course will provide an opportunity for students to obtain American Camp Association Campercraft Certification. The campercraft certification program is designed to help camp counselors acquire basic campercraft skills, leadership techniques and enjoyment of outdoor living.

Students in the Camp Leadership class will have a chance to practice what they have learned when the class goes on a three-day camping trip at the end of the semester. The students will set up their own camp site and do their own cooking while they are on the trip.

The Camp Administration course is designed for students who have had considerable camp experience. The class will study programming, the layout of camps, business management of camps, including financing; the training of camp staffs; and publicity and promotion for camps.

Students interested in waterfront work will have an opportunity to obtain both their Senior Red Cross Life Saving Certificate and their Water Safety Instructors (WSI) Certificate.

The Department of Physical Education for Women will offer Senior Life Saving the first eight weeks of the second semester and the WSI course the second eight weeks.

Two semester-hours of credit will be given for the two courses.

The Department of Physical Education for Men will not offer the two courses for semester credit, but will give special non-credit classes in both Senior Life Saving and WSI certification.

SUI students looking for help in finding summer employment may contact Dr. van der Smissen or Howard Moffitt, student employment manager.

Dr. van der Smissen has a national directory of camps for handicapped children and a directory of all types of camps in the United States approved by the American Camping Association, as well as brochures on private and agency camps.

WHAT CAUSES FATIGUE? Medical experts say that much of a homemaker's fatigue is caused by constant noises and vibrations in the home. As our homes become more mechanized it is important to check on noise and vibration factors when you shop for appliances. One appliance manufacturer has just announced a washer-dryer combination with absolutely no vibration. Even an unbalanced load will spin dry without interruption. That's a severe test for a laundry appliance.

Camp Courses Offered Here 2nd Semester

Thinking about a job for next summer? Now is the time to put your thoughts in action and make some definite plans.

SUI will offer several courses during the second semester which will give students background and experience which may be used for summer employment. Under the recreation leadership program of the SUI Departments of Physical Education for Women and Physical Education for Men, two camping courses will be offered next semester.

Janet Atwood, SUI instructor in the Department of Physical Education for Women, will teach a class titled Camp Leadership. Betty van der Smissen, assistant professor in the department, will teach Camp Administration. Each course is open to both men and women.

The Camp Leadership class will cover three areas: camp programming, camp counseling and camp crafts. In the section on programming, the class will study the points of view of all types of summer camps — private, church, welfare, etc.

The counseling section of the program for the Camp Leadership class will deal with the various types of situations and problems of working with large groups of campers, small groups and problem campers.

In addition to learning the skills of various types of camp crafts, the Camp Leadership course will provide an opportunity for students to obtain American Camp Association Campercraft Certification. SUI Hydraulics Graduates Found 'Round the World'

A tall slim brick building near the center of the SUI campus is probably better known to engineers in Pakistan and Venezuela than it is to many SUI students who pass it daily on their way to class.

Top engineers from around the world have come to SUI to do research and graduate study at the Institute of Hydraulic Research, located on the west bank of the Iowa River.

Fourteen names have been added during the past year to the list of 343 students who have received advanced degrees in mechanics and hydraulics at SUI since 1922.

About half of these 343 are citizens of the United States; the rest are from some 30 other countries. Homes of the past year's graduates include China, Brazil, India, Pakistan and the U.S.

Many of the students from other countries who study mechanics and hydraulics at SUI are selected by their Governments to attend the University because of their outstanding engineering ability, and their Governments pay expenses while the students are enrolled here. Many others are employed by the Institute of Hydraulic Research.

The Institute is operated essentially without state tax funds. Its research projects are supported by U.S. Government organizations such as the Office of Naval Research, by state agencies like the Highway Commission, by non-profit foundations and by private business grants. Its research projects in hydraulics and mechanics are usually conducted by graduate students as work on their master's

or doctor's degrees.

The Institute operates in conjunction with the Department of Mechanics and Hydraulics in the SUI College of Engineering. This department is headed by Professor Joseph W. Howe.

SUI mechanics and hydraulics graduates of the past 30 years include 70 Chinese, 20 students from India, 12 Canadians, 8 Filipinos, 7 Turks, 6 Egyptians and 5 Colombians. The list also includes graduates from Argentina, Australia, Brazil, Burma, Ceylon, England, France, Germany, Iceland, Hungary, Iraq, Israel, Japan, Pakistan, Peru, Spain, Uruguay, Venezuela and Yugoslavia.

After receiving their degrees at SUI, most of these men returned to their countries, many of which are under-developed, where they are helping to raise the standards of living through teaching, engineering, or continued research.

More than 55 graduates who have gone to positions in universities throughout the world include two college presidents and three deans of engineering, according to Professor Hunter Rouse, director of the SUI Institute of Hydraulic Research. SUI is now represented by professors at universities in Japan, the Philippines, India, Egypt and four South American countries, to name a few.

Chen-Hsing Yen, who received his master's degree in 1938 and his doctor's degree in 1941 at SUI, is now president of Cheng Kung University, Taipei, Formosa. He visited Rouse this month in Iowa City while in the United States.

Jamil Malaika, who received his doctorate at SUI in 1949, is now head of the Civil Engineering Department at the University of Baghdad, Iraq.

Another holder of the SUI doctorate in hydraulics and mechanics, Michael Hug, has just been named to the teaching staff of the Ecole Polytechnique in Paris. This university is considered the top scientific school in France, Rouse explained.

Two SUI graduates are now professors in Egyptian universities. Mohamed Hassan received his Ph.D. in 1948 and is now at Ain Shams University in Cairo. Abul-Petouh, a Ph.D. of 1949, is a professor at Alexandria, Egypt.

In the Southern Hemisphere, Rupert Vallentine, a 1953 master's graduate, is on the engineering

faculty at the University of New South Wales, Kensington, Australia. Also, SUI graduates are teaching or researching in six South American countries.

A citizen of the United States, M. L. Albertson has been instrumental in developing engineering education at Bangkok, Thailand, Rouse said. Albertson, who received his master's degree in 1942 and doctorate in 1948 at SUI, is director of research at Colorado State University. The Colorado University has been assigned by the U.S. Government to assist in developing engineering education in Thailand.

Also teaching at Bangkok is Robert Carstens, who received his master's degree at SUI in 1947 and doctor's degree in 1950. He is now on leave from a post at Georgia Tech.

Five SUI mechanics and hydraulics graduates staff the National Hydraulics Laboratory operated by the Government of China at Peiping, Pin-Nam Lin, H. C. Hsu, Mr. and Mrs. T. Siao, and Ning Chien all received master's or doctor's degrees at SUI between 1947 and 1951, before returning to staff the largest laboratory in China.

B. V. Bhoota, who received his Ph.D. in 1942, is now head of the Dorr Company of India, a sanitary engineering company in Bombay. T. R. Krishna Rao, M.S., 1958, is a recent addition to his staff.

Now working for a San Francisco aircraft company, En-Yun Hsu received his master's degree in 1947 and doctorate in 1950. He has also been a researcher for the U.S. Navy at the Taylor Model Basin.

A classmate at SUI, Dr. Chia Shun Yih, is now in Cambridge, England, on a National Science Foundation Senior Post-Doctoral Fellowship. He is on leave from his faculty post at the University of Michigan.

Railway Fire Causes \$300,000

OELWEIN — Fire which started in the cook's car of a wrecking train destroyed the main car shops of the Chicago and Great Western Railway here Thursday, causing damage estimated at more than \$300,000.

A small force of workmen escaped without injury but one Jack Fraser, had to roll in the snow outside to extinguish flames in his clothing.

Also destroyed were the cook's car, a fancy private coach kept for the use of the railway's vice president, a tool car for the wrecker train, two other coaches, a bulldozer and two new trucks — one a pickup, the other described

Railway Fire in Oelwein Causes \$300,000 Damage

OELWEIN — Fire which started in the cook's car of a wrecker train destroyed the main car shops of the Chicago and Great Western Railway here Thursday, causing damage estimated at more than \$300,000. A small force of workmen escaped without injury but one, Jack Fraser, had to roll in the snow outside to extinguish flames in his clothing. A spokesman for the railway said the building, a 90 by 300 feet sheet metal structure built in 1953, was valued at \$275,000. He said it was a total loss. Also destroyed were the cook's car, a fancy private coach kept for the use of the railway's vice president, a tool car for the wrecker train, two other coaches, a bulldozer and two new trucks — one a pickup, the other described

Divers Probe Gulf of Mexico Looking for Missing Plane

NEW ORLEANS, La. — Navy divers probed along the floor of the Gulf of Mexico some 250 feet under water Thursday for a possible clue to why a commercial airliner crashed two months ago, carrying 42 persons to death. Two Navy ships, the Penguin and the Vigor, stood by about 50 miles east of the mouth of the Mississippi River while the divers worked. Only 13 bodies and small bits of floating debris have been recovered from the National Airlines DC7B which disappeared Nov. 16 on a flight from Miami to New Orleans. Divers were called for after sonar underwater detecting equipment contacted something in the area which authorities hoped would be the plane. An FBI investigation has indicated that an explosion, tied in with a weird insurance plot, may have a connection with the crash. This came to light with the arrest last week in Phoenix, Ariz., of

Wilson Strikers Plan Mass Meeting

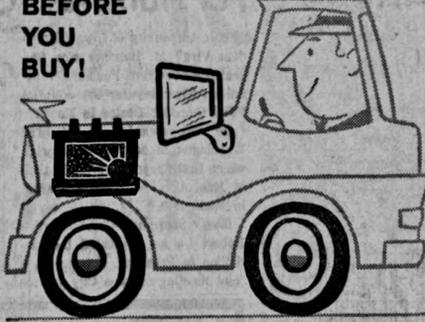

ALBERT LEA, Minn. — Packinghouse workers from Minnesota and Iowa are planning a mass meeting Saturday morning in a display of union solidarity behind the strike against Wilson and Company, a union leader said Thursday. "There will be no demonstrations or violence," said Charles Lee, president of Local 6 of the United Packinghouse Workers of America. Lee said he expects hundreds of UPWA members from South St. Paul, Austin, Mason City, Iowa, and other cities to be in the auto caravans converging here. More than 1,000 members of Local 6 have been on strike against Wilson and Company here since Nov. 3. The plant now is operating with non-union workers.

Iowa Newlyweds, Aged 89 and 86

OSAGE — Herbert P. Ketchum of Rowan and Minnie Boyington of Clarion were married in the Methodist Church here this week. The ceremony was much like many other couples have observed except that Ketchum is 86 years old and his bride is 80. They have known each other most of their lives. Both were married and have children, grandchildren and great-grandchildren. After the death of their mates they would like to share their remaining days together. The Ketchums had observed their 60th wedding anniversary before Mrs. Ketchum died. Mr. and Mrs. Boyington had celebrated their 43rd anniversary before his death.

DONATES \$1,400 BRUSSELS — The International Confederation of Free Trade Unions has made an emergency contribution of \$1,400 to victims of the Coalbrook mine disaster in South Africa.

4 — Above average in aggressiveness.
Starting salary will be \$100.00 per week. For a personal interview call Mr. Wright at Davenport 3-2937 between 9 a.m. and 2 p.m.

SUI President Virgil M. Hancher (right) was presented with a Freedom's Foundation Medal Thursday by Iowa Supreme Court Justice Robert Larson. The presentation of the George Washington Medal was made at a joint meeting at Iowa City service clubs at the Iowa Memorial Union.

Hancher: Students' Problem Is Upsurge of Nationalism

By SANDRA LEHMAN
Staff Writer

An important and real problem — especially for students of university age — is apparent with the tremendous upsurge of nationalism, SUI's President Virgil M. Hancher said Thursday.

There will be 10 or 15 new African nations by the year 2000, and some even are predicting 45 or 50, Hancher told Iowa City service club members at a joint luncheon meeting at the Iowa Memorial Union.

If this tremendous upsurge in Africa happens, he said, it will have serious implications for the United States and the United Nations, giving Africa a tremendously increased voice in U.N. affairs, he said.

However, Hancher also expressed his belief that the United Nations may be forced to reorganize within the next few years because it is becoming too big to be effective.

Explaining this, Hancher noted that the General Assembly has grown from 50 original member nations to 82 at the present time. But, he warned, "Don't be too critical if the United Nations fails to reorganize. After all, we in this country can't even reorganize our country governments."

Hancher explained that the 50 nations which formed the United Nations in 1945 intended the majority of power to lie within the 11 member Security Council. But, he said, because of the veto power by Russia — one of the five permanent members of the Council — the Security Council has lost much of its intended effectiveness.

He said the major issues are now thrashed out in the General Assembly, and this often is too cumbersome a body to get much resolved.

He also pointed out that the United States could be an isolated victim of concerted attack in the event of war because of new methods of war since World War II. Iowa stands on a northern frontier which could be attacked

without disturbing Canada or any other ally, he said. Hancher returned last month after serving as a United States alternate delegate to the United Nations for three months last fall.

and for generations yet unborn.

Hancher concluded, "If the U.N. succeeds, there is hope for us Nations for three months last fall.

Edit Medal For Hancher

State University of Iowa's President Virgil M. Hancher was presented a Freedom's Foundation Medal Thursday for his editorial "The Questing Desire to Know."

He was awarded the George Washington Medal for the editorial, which first appeared in the National Education Association Journal in April, 1958.

Iowa Supreme Court Justice Robert Larson presented the medal to President Hancher at a joint meeting of Iowa City service

clubs held at the Iowa Memorial Union.

The closing paragraph of President Hancher's award-winning editorial said, "Man, alone of all creation, possesses the restless and questing desire to know, and it is

this desire which today's schools and colleges are seeking to stimulate and guide and direct into creative channels."

President Hancher pointed out in the editorial that today's schools can not be blamed for inadequa-

ties of our adult generation. If any schools or colleges are responsible for today's problems, it is those of 20 to 40 years ago—"the very schools so often cited as models of what we should return to today," he said.

Estimate Strength

WASHINGTON (AP) — U. S. Intelligence has boosted its estimates of Russian long range missile power since Secretary of Defense Thomas S. Gates Jr. told Congress specialists had downgraded probable Soviet superiority in this field, a Democratic senator said Friday.

Sen. Henry M. Jackson (D-Wash.) gave this word to newsmen after day-long secret testimony by Central Intelligence Agency Director Allen W. Dulles before the Senate Space Committee and Preparedness subcommittee.

Jackson, long a critic of Administration defense policy, declined to give details on what he said was a new change in U.S. Intelligence evaluation during the past week. "I can't say exactly what it is," he said.

However, the Senator declared that "some of the rosy color that Mr. Gates had in his presentation has been taken out."

Senate Democratic Leader Lyndon B. Johnson of Texas agreed with Jackson that Dulles' report on Russian military rocketry was a grim one from the American standpoint.

"Everything I have heard today reinforces my conviction that we have got to go farther and faster," Johnson said to interviewers.

At an earlier break in Dulles' testimony, Johnson had said that what he had heard to that point makes it clear Russia will have an enormous advantage in missile striking power in the near future.

On the Senate floor, meantime, Senate Republican Leader Everett M. Dirksen of Illinois glibed at

FCC's Role in Top Executive

WASHINGTON (AP) — Two top broadcasting executives gave conflicting advice to the Federal Communications Commission Friday on what the government's role should be in radio and TV programming.

President Frank Stanton of Columbia Broadcasting System said that if FCC is to intrude on program content, as he put it, "then we turn our backs on democracy."

But President Robert F. Hurleigh of Mutual Broadcasting System, operating exclusively in radio, said the commission should fix program standards for radio stations so as to reach what he termed insensitive operations in that field.

Hurleigh, who submitted a written statement in lieu of a personal appearance, said that if FCC has doubts about its authority to do this, it should go to Congress and ask for precise enabling legislation.

Mutual's position differed sharply from that of most industry spokesmen, who have been telling FCC's hearings on possible program controls that it has no powers of program censorship and should not seek them.

Stanton, whose testimony was
