

These Blarsted Concrete Cow-Paths

DAILY IOWAN reporter Darold Powers hikes along with two British Army sergeants, Mervyn Evans and Patrick Maloney, a few miles west of Ladora on Highway 6. When the DI heard that the men, who are walking across the United States, would be coming toward Iowa City Tuesday, it was decided to interview them even if it meant stationing a reporter by the side of the road equipped with his Boy Scout

Jiffy-Quick Camp Out Kit. However, this idea was given up in favor of having the reporter and a photographer drive down Highway 6 until they ran into the hikers (not literally). After a jaunt of about 40 miles, contact was made; Powers started walking; the sergeants started talking; and now you can start reading.

In Spite of Rain, Reporter, British Sergeants March On

By DAROLD POWERS
Staff Writer

LADORA, IOWA — "When I get home I think my wife will give me a hammer and a box of nails so I can hang up my boots for good."

Mervyn Evans went on to explain that when he and Patrick Maloney finish hiking from San Francisco to New York City, they do not expect to try for any more walking records.

"We will have walked all there is to walk," they declared.

The two British sergeants are trying to hike from San Francisco to New York in 68 days to best a 1926 record of 79 days which was set over the same route.

"Some people climb mountains," Maloney explained. "Hiking is our line."

Evans and Maloney are expected to pass through Iowa City on Highway 6 early this afternoon.

The men kept a smooth but purposeful four to four-and-one-half mph pace as they strode through this small corn-belt town on Highway 6 Tuesday afternoon.

They were still wearing rain suits as they walked through Ladora under still-leadens skies. A rain storm had just moved on after forcing them to walk through the deluge for three hours.

Does walking get monotonous? "We conquered that mental factor in training," declared Evans, "or we wouldn't still be walking now," Maloney mentioned their determination.

"Personal achievement is important," Evans said in explaining their attempt to break the cross-continent walking record. However, they said they expected to gain nothing in fame for their trek.

"But we'll have the satisfaction of having some unique achievement in our lives," Maloney added.

"We'd like to take a year to do this, though," declared Evans, who said he regretted that their pace did not allow them to see more of America's countryside and people.

The men cover from 41 to 53 miles per day, walking single-file on the left side of the highway.

They are just about on schedule now. They plan to be in New

York City on June 18. They will follow Highway 6 into Indiana, then Highway 30 as far as Harrisburg, Pa., and will complete their trip on Highway 22 into New York City. They left San Francisco April 12.

The two marchers seem to attract interest wherever they go. Evans said that in Cheyenne, Wyo., there were so many people out to see them that they could hardly get through the crowd, which was stretched out along the road for six miles. Maloney said people had driven as far as 300 miles to wish them well.

The men trained a year in Britain before attempting their present 3,022-mile hike. They walked the 874-mile length of the British Isles in 18 days and their width of 342 miles in five and one-half days—both times being records.

"Of course my wife is thrilled by our latest attempt," Evans reported, "but I think I owe it to her to stay home after this."

Even though it did keep them away from their families, they reported their training is now proving valuable. "No corns, no bunions," they declared. They said they don't have to soak their feet at night, either. Nor do they expect to wear out any of the four pairs of boots each has along.

Roy Rogers, a friend who is in the same British Army Parachute Regiment as Evans and Maloney, drives along the highway in a Landrover pulling a trailer in which the hikers usually sleep at night.

They sleep soundly," Rogers smiled.

They eat plenty of American steaks and chicken," he reported. "If there's any food around them, it's had its day." Rogers cooks for them in the trailer.

All three sergeants are on special three-month leave for this trek, which was approved by the British War Office. The American Legion is verifying their progress by spot checks at points along the march.

Maloney, 34, is a parachute jumping instructor; Evans, 33, is an army physical education instructor.

The cost of their hike was estimated by Rogers at \$6,000. The hike is sponsored by British manufacturers of socks, boot soles and heels.

Series on Student Apathy

The second article in The Daily Iowan series on student apathy appears on page six of today's paper. Based on a sociological poll taken by the DI to sample student opinion, the story considers various comments on issues at SU.

Nations Rally To U.S. Support

Senate Group Agrees To Bipartisan Probe

From the Wire Services

Five of the 11 members of the U.N. Security Council rallied to the support of the United States Tuesday and thereby doomed to failure the current Soviet attempt to have the United Nations brand the United States as an aggressor for sending a U-2 espionage plane over Soviet territory May 1.

Representatives of France, Britain, Argentina, China and

Italy, speaking on the second day of a Security Council debate on the U-2 incident, rejected Soviet charges that the U-2 flight represented an act of aggression and imperiled world peace.

Soviet Foreign Minister Andrei Gromyko, presenting the Soviet complaint at Monday's opening session, called on the Security Council to adopt a Soviet draft resolution condemning the United States' action.

The United States, as a result of the support announced by five anti-Communist countries, is now certain of at least six votes — more than enough to defeat the Soviet draft resolution.

Russia requires at least seven votes to carry its resolution. It is certain of only one vote, in addition to its own — that of Poland.

Also Tuesday the Senate Foreign Relations Committee agreed without a dissenting voice to "a full and bipartisan inquiry" into all phases of the summit disaster, starting with Secretary of State Christian A. Herter on Friday.

Allen W. Dulles, the director of the Central Intelligence Agency, officials of the National Aeronautics and Space Agency and Secretary of Defense Thomas S. Gates Jr. will also testify.

Sen. William Fulbright, (D-Ark.), announced the inquiry and its terms as chairman of the committee. He met behind closed doors with most of the 17-member committee for 90 minutes Tuesday.

The inquiry, coupled with a new appeal from Sen. Lyndon B. Johnson of Texas, the Senate Democratic leader, seemed temporarily to take some of the sting from the partisan debate that raged in the Senate most of Monday.

"What we need is information about what happened, not suspicions about each other," Sen. Johnson said.

Meanwhile in East Germany, with unusual speed and a mild protest, the Soviets Tuesday released a U.S. Air Force C-47 transport plane and the nine American occupants forced down in there last Friday.

Staff Writer

Political affiliation seems to be an important factor in deciding whether or not to support the Administration on most of the major issues of the day. The recent summit conference appears to be no exception.

On the national level, most Republicans stood behind President Eisenhower's refusal to apologize to Khrushchev for the U-2 flights. On the other hand, Democratic leaders were quick to criticize Ike's actions.

There were some exceptions. Lyndon Johnson (D-Tex.) urged the people of the United States to stand behind Ike. Another leading Democrat, Speaker-of-the-House Sam Rayburn, was present at the warm welcome given Ike when he returned from Europe.

But other Democrats were not so lenient. Adlai Stevenson said, "We cannot sweep this whole sorry mess under the rug in the name of national unity." And a group of House Democrats threatened a Congressional investigation if Ike did not tell the whole story of the U-2 incident.

The Daily Iowan interviewed the president of the Young Democrats, Young Republicans and the Socialist Discussion Club in an effort to get the reactions of student political groups. Their responses were very similar to their national counterparts.

"Eisenhower should have apologized," Chuck Wolf, AB, Elkader, president of the Young Democrats, said. "Eisenhower's actions were those of an entirely confused man. His behavior was childish. It isn't a case of saving America's honor, but rather one of the salvation of mankind."

Wolf said that Ike threw away the chance of gaining a momentary advantage in the cold war. He added that he thought the President had known for a long time that the summit would fail, and that he went to the conference with a "We have nothing to gain ground for" attitude.

"I certainly do support Ike's stand at the conference," Bruce Oakley, LE, Clinton, president of the Young Republicans, said. "Khrushchev's actions were an out-and-out propaganda move. If not the U-2 incident, Khrushchev would have found something else with which to sabotage the conference."

Oakley said he thought Khrushchev wanted to keep Ike from going to Russia because he was afraid of the effect Ike would have on the Russian people. The U-2 gave him a chance to kill two birds with one stone, Oak-

SUI Summit Views

Wolf said that the American people want peace, but that there has been no easing of tensions. "This," he said, "is causing an alienation between the public and the Administration. It will be much easier to attack and blame those who made the policy."

"In contrast, the Democratic leaders are dedicated to the preservation of peace. It is no longer a question of freedom, but of survival. The Democrats with a Secretary of State like Stevenson would try a much more realistic approach and not try to build a wall of our own virtue."

Oakley said that the conference did not hurt Eisenhower personally. "The Democrats" will make political hay out of the failure of the summit and it could hurt them if they overplay their hand," he said.

"You can't say that it is a GOP blunder! The same thing would have happened with the Democrats. I think they will try to make it a major issue in the election, but I don't think the people will buy it."

He added that he thought Nixon's approach would have been the same as Ike's and that Nixon is the best qualified candidate to handle a summit conference after Ike's term ends. "He can handle anything Khrushchev can dish out," Oakley said.

Barrett said he supports Stevenson's criticism of Ike. "The democratic system needs two parties to criticize each other and this is one of the times that such criticism is beneficial," Barrett said.

"I don't think that the summit failure has hurt the Republican Party more than it has already been damaged," he said. "I don't think the Republicans have a chance anyway."

The data from the satellite radio was hand-computed and officials announced later that Midas was in a near-circular orbit that ranged from an apogee of 316 miles and perigee of 300 miles. It circles the earth every 94.34 minutes.

The "spy in the sky" was equipped with an infra-red scanning device capable of instantaneous spotting and reporting of the launching of a hostile ballistic missile.

This first test satellite was not aimed at a course which would take it over the Soviet Union. Its path covers all territory 28 degrees north and south of the equator. Midas' practice mission is to test its equipment of giant sodium flares to be ignited at Edwards Air Force Base, Calif., and on rocket launchings at Cape Canaveral and Vandenberg Air Force Base, Calif.

The first flare will be fired on the ground within a few days.

Approximately 450 seats are still available in the card section. Burge urged all persons to sign up, as those on the alternate list have a good chance of getting seats.

Seats Available For Card Section
Card section seats will be assigned on a first-come, first-served basis, Thursday beginning at 9:30 a.m. at the East Lobby Desk in the Iowa Memorial Union, according to Jack Burge, BJ, Cedar Rapids.

Two badges to the card section may be purchased for \$1. Those signing up Thursday will receive receipts, and badges will be issued next fall, Burge said.

Approximately 450 seats are still available in the card section. Burge urged all persons to sign up, as those on the alternate list have a good chance of getting seats.

'The Play's the Thing'

Cardinal Monticello throws a menacing look at Vittoria and Branchiano in a scene from "The White Devil," the University Theatre production being presented tonight, Thursday, Friday, and Saturday at 8 p.m. Monticello is played by Harry Duncan, assistant professor of journalism; Vittoria

by Nancy Cole, G, Chicago; and Branchiano by Stephen Cole, G, Chicago. Tickets are still available for performances and may be picked up with a student ID at the East Lobby Desk in the Union. General admission is \$1.25.

U.S. Launches Experimental 'Spy' Satellite

CAPE CANAVERAL, Fla. (AP) — The United States launched an experimental Midas "spy" satellite into orbit Tuesday opening a new chapter in the race for space.

The 2½-ton satellite will test the feasibility of using orbiting space stations to provide almost instant warning of a ballistic missile attack.

Summit Broadcast

WASHINGTON (AP) — The White House Tuesday urged the Kremlin to let the Russian people listen to broadcasts of President Eisenhower's report Wednesday evening on collapse of the summit conference.

The satellite, first of its kind in the world, was boosted aloft from this missile test center at 12:37 p.m. (EST) by a powerful 88-foot Atlas-Agena rocket.

Two hours later, shortly after United Nations reconvened to resume the U2 spy debate, the Air Force announced the mammoth Midas was spinning around the earth.

It was unable immediately to give the precise position in orbit because of a malfunction in tracking computers at the satellite test wing at Sunnyvale, Calif.

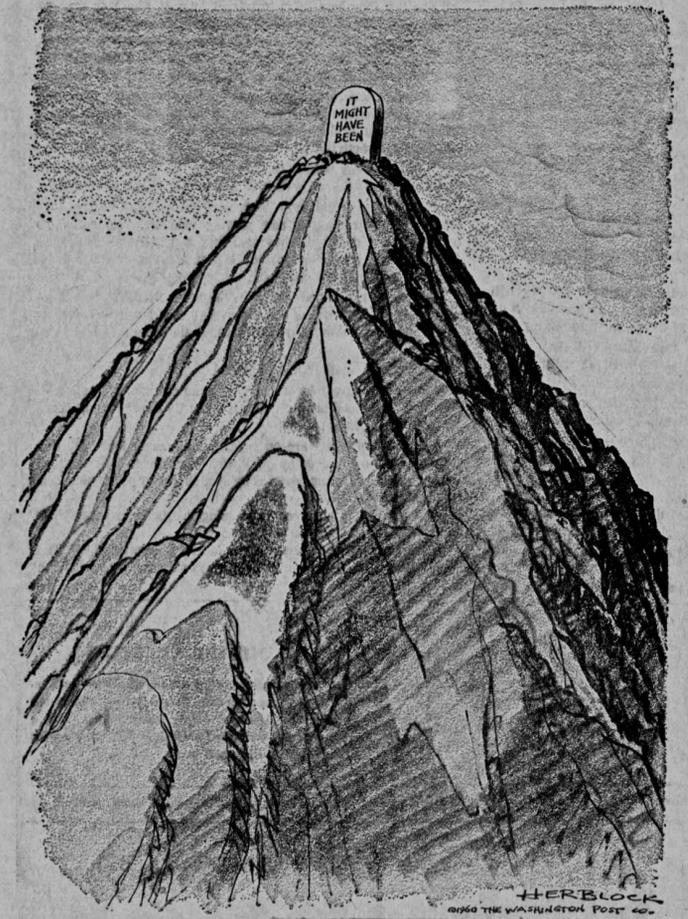

The data from the satellite radio was hand-computed and officials announced later that Midas was in a near-circular orbit that ranged from an apogee of 316 miles and perigee of 300 miles. It circles the earth every 94.34 minutes.

The "spy in the sky" was equipped with an infra-red scanning device capable of instantaneous spotting and reporting of the launching of a hostile ballistic missile.

This first test satellite was not aimed at a course which would take it over the Soviet Union. Its path covers all territory 28 degrees north and south of the equator. Midas' practice mission is to test its equipment of giant sodium flares to be ignited at Edwards Air Force Base, Calif., and on rocket launchings at Cape Canaveral and Vandenberg Air Force Base, Calif.

The first flare will be fired on the ground within a few days.

The Daily Iowan is written and edited by students and is governed by a board of five student trustees elected by the student body and four faculty trustees appointed by the president of the University.

'Mile-Long' Application Blanks Defy Intelligent Answering

By PAUL HENRY LANG Herald Tribune News Service NEW YORK — This is the time of year when hopeful graduates are looking for jobs and scholarships. "Confidential reports" are solicited by all manner of schools and conservatories on all manner of candidates and one is weighted down with the very real responsibility of keeping faith with both the young aspirant and his prospective employer who rely equally on the sponsor's honesty and capacity for observation.

Some of the questionnaires are reasonable and fair, and happily there are quite a few institutions so enlightened or perhaps old-fashioned? as to leave to you the composition of your recommendation. Unfortunately, the majority of them are mile-long blanks with hundreds of boxes to be checked, obviously the work of psychologists afflicted with educational superstitions. The poor candidate suffers because it is impossible to answer these questions intelligently.

I am just struggling with a questionnaire from the school of music of a large Mid-Western university which asks information about a candidate for the position of instructor in musical theory. There is the category entitled, "Dependability," with nine degrees between "indefatigable" and "lazy." There are nine also between "strong influence" and "superficial influence." "Social sensitivity" stamps me altogether with its 10 layers, and it would take a whole day to settle on one of the 13 possibilities between "attractive" and "repulsive."

As I see it, there are two possibilities open: either check the boxes haphazardly, or throw the damn thing away. Why is it necessary to make

LETTERS TO THE EDITOR— Public Law 1000003.251

To the Editor: Public Law 1000003.251, to become effective whenever Robert Mezey and Marlene Fine are appointed to the high courts of this land: 1. Whereas the conjunctural situation may exist wherein the party of the first part, the criminal, may be "put to death for acts which he may or may not have performed," it is deemed necessary to abrogate the decision of 12 men, good and true, peers of the party of the first part, who find the aforesaid party of the first part guilty of the charges advanced by the state acting for the second part, the state acting for the injured party.

Interpreting The News

J. M. ROBERTS AP News Analyst The United Nations debate over U2 comes as an anticlimax. It was not to be expected that the Soviet Union's plodding and matter-of-fact Foreign Minister Andrei A. Gromyko would make any great splash following so closely in the wake of his firecracker boss, Premier Nikita Khrushchev. He merely worked over the points which have been discussed for three weeks. His cause, an attempt to hang an "aggressor" label on the United States was lost before he started.

What's Happening— On Other Campuses

By GARY G. GERLACH Staff Writer COLUMBUS — Governor Lovell's recent statement, "I favor compulsory ROTC," brought to mind several developments at other Big Ten Universities in the long war against mandatory ROTC. Ohio State's Faculty Council overrode the Professor of Air Science's objection and voted to do away with OSU's compulsory ROTC program beginning next fall. Also under the new program students will be able to substitute for basic ROTC requirements other approved courses selected from the University's educational program.

University Bulletin Board

FOREIGN STUDIES CERTIFICATES will be given to students who have fulfilled the requirements of the program by the end of the semester. Students expecting the Certificate should hand in their course grades in Foreign Studies at 106 Schaeffer not later than June 5. ZOOLOGY SEMINAR — Albert D. Carlson and James Race, Jr., both of the SUU Department of Zoology, will speak Friday, May 27, at 4:10 p.m., in 204 Zoology Building. Carlson will speak on "A Comparative Study of the Pseudofish Mechanism in Adult and Larval Fishes, Phoxinus phoxinus and Larval Fishes, Phoxinus phoxinus."

Need Aid for Anti-Red Literature in India

By DAROLD POWERS Staff Writer An Indian anti-Communist has appealed through The Daily Iowan for American assistance in the distribution of anti-Communist literature in India. Ram Swarup Goyle has written that, after five years of "vigorous campaigning," the Society For Defence of Freedom in Asia had to close down in 1957 because of a shortage of funds. Goyle wrote that the Society published a number of periodicals and pamphlets in almost all Indian regional languages and that these were distributed free of charge throughout India.

Discusses Reports Of McGrath Trial

To the Editor: For several weeks many columns have been written making one Bob McGrath out to be some kind of martyr. Just for the record, I think that it should be known that the individual who has been working so very hard pushing the point of view (one Mr. Darold Powers) is also a conscientious objector. To someone not familiar with our student body, but with our paper, it would seem that the majority at SUU are anti-military service. This, I resent wholeheartedly.

Auto Accident Of Death in

By LOUISE SPRAJCAR Staff Writer Every fifteen minutes someone dies in an auto accident. More Americans have been killed in highway crashes in the past 60 years than in all the wars of the United States since 1776, according to the National Safety Council. Surprising? Then did you know that auto accidents are the major cause of death of young people in the 15-24 age group? Few of us realize that perhaps this Memorial Day weekend someone we know will be in a serious auto accident. Other factors to consider, said the SUU professor, are the conditions under which young people drive. For example, no one knows the effects of drinking, speeding and the interior design of cars on auto accidents.

Good Listening— Today On WSUI

THE PRESIDENT OF THE UNITED STATES, just back from a triumphant trip to Portugal, will address the nation tonight at 6 p.m. WSUI, thanks to the cooperation of a nearby commercial radio station (WMT), will carry the talk. If time permits, an abbreviated Evening Concert will begin about 6:30 and include a Beethoven piano sonata and a Mozart string quartet. OUR OWN FACULTY STRING QUARTET, one of the most distinguished to be found on any college or university campus, will be heard in three selections recorded in advance of their last recital (May 1). Haydn's Opus 71, No. 2; Beethoven's Opus 74; and the Prokofiev Opus 50 are included. The program will be simul-

Students Study Satellite Dr

When a U.S. satellite is launched, physicists are immediately concerned about how long the new "moon" will stay in orbit around the Earth. Their prediction of the day and hour when the satellite will re-enter the atmosphere and burn appears on the front page of newspapers around the world. Such a prediction is based on a maze of computations involving a staggering list of variables to be considered — for example, the speed of the satellite when it goes into orbit, weight of the satellite, height of the orbit at its highest and lowest points, and the density of the air at these heights. Although the job of predicting when the satellite will re-enter the Earth's atmosphere is a complicated one even for advanced physicists and mathematicians, 30 students at University High School in Iowa City have undertaken just exactly such a project.

Auto Accident Of Death in

By LOUISE SPRAJCAR Staff Writer Every fifteen minutes someone dies in an auto accident. More Americans have been killed in highway crashes in the past 60 years than in all the wars of the United States since 1776, according to the National Safety Council. Surprising? Then did you know that auto accidents are the major cause of death of young people in the 15-24 age group? Few of us realize that perhaps this Memorial Day weekend someone we know will be in a serious auto accident. Other factors to consider, said the SUU professor, are the conditions under which young people drive. For example, no one knows the effects of drinking, speeding and the interior design of cars on auto accidents. "The causes of the high accident death rate have only been speculated on," Holcomb said. "Few agencies have done research to find any real proof." Insurance companies, however, know that 27 per cent of the drivers involved in accidents are under 25, and therefore charge higher premiums to families which include young people. What can be done to decrease the high auto accident death rate among young people, requiring high school students to take driver education courses is one suggested method. Insurance companies records show that teenagers have 40 to 60 per cent fewer accidents than untrained drivers. Teenage drivers are at a peak as far as most of their sensory, coordinative, and physical functions are concerned. Yet auto accidents are the leading cause of death among young people, said Richard L. Holcomb, as-

Students Study Satellite Drop

When a U.S. satellite is launched, physicists are immediately concerned about how long the new "moon" will stay in orbit around the Earth. Their prediction of the day and hour when the satellite will re-enter the atmosphere and burn appears on the front page of newspapers around the world.

Such a prediction is based on a maze of computations involving a staggering list of variables to be considered — for example, the speed of the satellite when it goes into orbit, weight of the satellite, height of the orbit at its highest and lowest points, and the density of the air at these heights.

Although the job of predicting when the satellite will re-enter the Earth's atmosphere is a complicated one even for advanced physicists and mathematicians, 30 students at University High School in Iowa City have undertaken just exactly such a project.

Under the sponsorship of the SUU Computer Center and College of Education, the high school sophomores, juniors and seniors are using an IBM 650 computer to predict when a U.S. satellite will fall.

David A. Putnam, mathematics teacher at University and a Chicago graduate student at SUU, found that many students in his classes were extremely curious

about computers. With the help of John P. Dolch, director of the SUU Computer Center, a computer seminar was begun in March to give the students a chance to enrich their technical exposure and supplement their formal training in mathematics.

Dolch explained that the seminar attempted to convey an appreciation of the power and application of electronic computers in modern research, engineering, and business.

Dolch said that the students meet for two hours each Saturday morning and that many of them have given up personal activities such as attending sports events to take part in this extra-curricular project.

University High school students who are participating in the computer seminar are David Brisse, Conrad Brown, Edward Byers, Judy Campbell, Robert Deegan, Leslie Dunlap, Susan Evans, William Fisher, David Harris, Peter Hayek, Ruth Hieronymus, Steve Johnson, Margery Knott, Susan Kohn, Richard Lawton, Esther McAdams, Pamela McCrory, William Macy, Terry Maynard, Craig Mosher, Paul Muhly, Steve Osborn, Carlyle Paff, Grace Seiberling, Carla Shagass, Wayne Siders, David Spencer, Mark Tuttle, Curt Zimansky, and Janie Zigel.

Alumni Day To Feature Fine Arts at SUI Forum

The reason fine arts graduate students are attracted to SUI will be explored in a forum to be featured at SUI's annual Alumni Day Saturday, June 11.

As a preliminary to the 22nd annual Fine Arts Festival this summer, three SUI graduate students in various fields of the arts will take part in the alumni program and tell their reasons for coming to SUI and what they have found here during their studies.

Other features of the day will be the Emeritus Club dinner, for all members of the 1909 and earlier classes, on Friday evening, June 10; the Golden Jubilee Dinner for all graduates of 1910, on Saturday evening, and an All-Alumni Luncheon Saturday noon.

The Forum on "Fine Arts at SUI" will be held at 10:30 Saturday morning in Macbride Auditorium and will take the form of a panel discussion by Earl E. Harper, director of the School of Fine Arts, at SUI, and the three graduate students. Edwin W. London, Oakland, Calif., will represent music on the panel; Richard B. Byrne, Independence, Mo., will represent dramatic art, and Margaret R. Polson, Ithaca, N.Y., will represent art.

In the discussion Harper will tell how and why the School of Fine Arts was founded at SUI.

Then each student, none of whom received his bachelor's degree from SUI, will tell why he came to SUI and what he has found here.

In addition to the Emeritus Club members and the 50-year, golden jubilee class, the classes of 1935 and 1950 are also especially invited to their class reunions. Other classes which are planning reunions include the nursing class of 1945, the medicine classes of 1945 and 1925, and the law class of 1915.

Music Camp Dates Set

The annual All State Music Camp will be held at SUI June 19 to July 1.

Registrants for the camp will have an opportunity to participate in the All State band, orchestra, chorus and twirling program. Courses in music theory and appreciation and private lessons will also be given.

All school musicians who have completed the seventh grade or above may apply for the All State Music Camp program. Students must be recommended by their school music teacher. Deadline for registration for the camp is June 5.

Students attending the All State Music Camp will be housed in SUI dormitories under the supervision of university counselors. A fee of \$62 will cover the cost of room, board and camp fees. For students who do not want room and board, the fee will be \$16. Those desiring private lessons for voice or instruments may take four half-hour private lessons from an artist-teacher for an additional \$5.

Further information about the All State Music Camp may be obtained by writing to Frederick C. Ebbs, All State Music Camp Director, SUI.

\$346,666 in Gifts, Grants Accepted for SUI Research

Gifts and grants totalling \$346,666.50 for research and scholarships at SUI were accepted at the May meeting of the State Board of Regents finance committee.

The total includes \$292,599 for research and for purchase of an electron microscope in the College of Medicine. Other research grants were accepted for the Departments of Sanitary Engineering, Zoology, Chemistry, and Speech Pathology.

Also included is \$22,881 for student scholarships and training programs. Sixty-four SUI students

have already been awarded scholarships under the May grants, and several of the scholarships for the 1960-61 academic year are yet to be awarded.

Students may apply for a loan from the National Defense fund with no interest charged until one year after the student ends his college training. If the student teaches in a public school after graduation, 10 per cent of the loan is cancelled for each academic year up to one-half of the total loan.

Continental Airlines Has Openings for AIRLINE HOSTESSES

• Top salary and expenses • Train at Continental's new Hostess Training Base at International Airport in Los Angeles • Paid vacations—superior sick leave benefits • Nationwide air-travel passes for your vacation • Fly only 85 hours per month.

Auto Accidents Chief Cause Of Death in 15-24 Age Group

By LOUISE SPRAJCAR
Staff Writer

Every fifteen minutes someone dies in an auto accident. More Americans have been killed in highway crashes in the past 60 years than in all the wars of the United States since 1776, according to the National Safety Council.

Surprising? Then did you know that auto accidents are the major cause of death of young people in the 15-24 age group? Few of us realize that perhaps this Memorial Day weekend someone we know will be in a serious auto accident.

Other factors to consider, said the SUI professor, are the conditions under which young people drive. For example, no one knows the effects of drinking, speeding and the interior design of cars on auto accidents. "The causes of the high accident death rate have only been speculated on," Holcomb said. "Few agencies have done research to find any real proof."

Insurance companies, however, know that 27 per cent of the drivers involved in accidents are under 25, and therefore charge higher premiums to families which include young people.

What can be done to decrease the high auto accident death rate among young people, requiring high school students to take driver education courses is one suggested method. Insurance company records show that teenagers who have taken such courses have 40 to 60 per cent fewer accidents than untrained drivers.

Teenage drivers are at a peak as far as most of their sensory, coordinative, and physical functions are concerned. Yet auto accidents are the leading cause of death among young people, said Richard L. Holcomb, as-

sociate professor and Chief of the Bureau of Police Science of the Institute of Public Affairs at SUI.

Ross McFarland of Harvard has suggested some reasons for the antithesis between good physical condition and high accident proneness. Young drivers lack experience and maturity in driving and have more inclination to "lose their heads" when a situation arises requiring speedy and correct judgment, he said.

Teenagers certainly seem to spend a great deal of time riding around in cars. For the amount of time on the road perhaps the accident rate is not nearly as astounding as we seem to think," Holcomb said.

According to Holcomb, no one has proven very conclusively whether or not driver education courses really help. He said that the classes may be getting a select group of students who do not have cars available and so enroll to learn to drive. "Since the students have fewer cars at their disposal, they may have fewer accidents. Or those who take the courses do not need them to develop good driving habits. Personally, driver education courses seem like a good idea to me, not so much to teach skills as to encourage good attitudes," said Holcomb.

The National Safety Council has stated that a driver's temperament — aggressive on the road or impatient during a traffic tie-up — is related to his accident proneness. Other related factors are the events in the driver's life immediately before he began to drive that day. "The argument of the office" does affect a man's personality when he is behind the wheel.

Working under the assumption

that good behavior is a matter of education, a judge in the New York City courts organized a program of evening courses in good driving manners to help educate drivers who are careless. The program has been adopted in 150 other cities.

Education in "moral responsibility and consideration for others" can be a step in curbing the sixth cause of death, auto accidents, said a recent editorial in The Saturday Evening Post.

FATHER ACCIDENTALLY SHOT
WEST UNION (AP)—Noel Rose, 49, a West Union plumber, was fatally wounded Tuesday while shooting sparrows with his son, John, 17, in a small shed at their acreage on the edge of West Union.

He died about five hours later in a West Union hospital, where Mrs. Rose is a supervisor of nurses. She was on duty at the time her husband was brought in.

Rose and his son were alternating in the use of a rifle, and Rose apparently stepped into the line of fire as his son discharged the gun, authorities said.

Suggested Books of the Week

A History of Western Philosophy

by Bertrand Russell
Suggested for Reading by JOSEPH E. BAKER, Prof., European Lit. and Thought

Fortunately there is a paperback edition of Bertrand Russell's *A History of Western Philosophy and Its Connections with Political and Social Circumstances from the Earliest Times to the Present Day*. I give the full title to suggest the breadth of treatment accorded this most important subject. Each significant philosopher from the ancient Greeks to John Dewey is given at least one chapter, sometimes more; and other thinkers are treated who would often not be included in a survey more narrowly conceived — e.g. Machiavelli or Byron.

It would be hard to think of a department in any art or science whose better students would not profit by having this book as a constant companion. If it served no other purpose, it would at least be a reminder that depth of thought need not be expressed with the obscurity and pretentiousness of most philosophers who have written since 1800. The ease and clarity of the style, the rapid fire of challenging ideas, stimulate the reader's desire to become better acquainted with the currents of thought treated, and at the same time to form independent, critical judgments.

Russell is not only one of the leading philosophers of the twentieth century, a scientific thinker and a scholar in the best sense, a man of broad humanistic learning. He is also a wit. Hence it is a pleasure to read him, even if you do not always agree with his views. No intelligent reader can agree with any one philosopher all the time. Russell is fair to his rivals. But he does not conceal his own judgment: he sometimes formulates his reply to doctrines that have had great vogue and have seldom been criticized more incisively.

I myself would reject Russell's own characteristic contention that "whatever can be known, can be known by means of science," or, as he says elsewhere "What science cannot discover, mankind cannot know." This book itself — and other books by Russell — are rich in statements which might be known to be valid without "being scientifically demonstrable." For example, "It is not the psychology of the romantics that is at fault; it is their standard of values." And he himself tells us, in the opening of the Part called *From the Renaissance to Humanism*, that in the philosophies inspired by scientific technique, "Ends are no longer considered; only the skillfulness of the process is valued. This also is a form of madness. It is, in our day, the most dangerous form, and the one against which a sane philosophy should provide an antidote." Often the bright, bewildered student can find in this book the antidote he is looking for.

We think you will enjoy this week's suggestions for reading by three of SUI's educational leaders.

Our shelves are stocked with many, many other books of current interest too — BEFORE YOU BUY, SEE IOWA SUPPLY.

Giants Climb Back into 1st On Sad Sam's 4-Hit Shutout

PHILADELPHIA (AP) — Sam Jones Tuesday night pitched the San Francisco Giants into first place in the National League with a 4-0 shutout over the Philadelphia Phillies as he won his first road game in six starts.

The victory, coupled with Pittsburgh's 4-2 loss to Los Angeles, moved the Giants eight percentage points ahead of the Pirates.

Jones gave up only four hits and didn't walk a man. He retired the last 15 men in order to make his record 5-3.

With Jones' shutout, it marked 23½ successive innings that the Phillies haven't been able to score against the Giants. It also was Jones' second shutout against the Phillies.

San Francisco . . . 101 000 020—4 7 0 Philadelphia . . . 000 000 000—0 4 2 Jones and Landrith, Schmidt (8); Owens, Robinson (9) and Dalrymple, W—Jones (3-3), L—Owens (2-5).

Dodgers 4, Pirates 2

PITTSBURGH (AP) — The Los Angeles Dodgers knocked Pittsburgh out of the National League lead with a 4-2 victory over the Pirates Tuesday night. The loss left the Bucs eight percentage points behind the San Francisco Giants, who returned to first place with a 4-0 victory at Philadelphia.

Los Angeles . . . 020 020 000—4 7 0 Pittsburgh . . . 010 010 000—2 8 2 Podres and Pignatano, Gibson, Giel (6), Green (7) and Smith, W—Podres (5-4), L—Gibson (2-2). Home runs — Los Angeles, Hodges (4).

Durable Nellie Fox Plays In 700th Straight Game

CHICAGO (AP) — You can have your flag pole perchers, but for raw endurance, give us Nellie Fox.

The peanut-sized second baseman of the Chicago White Sox played in his 700th straight game Tuesday night against the Baltimore Orioles.

Fox, last season's most valuable player in the American League, has missed only two games since 1951. To say he was benched would not be quite right. Baltimore Manager Paul Richards remembers his benching attempt with Fox when he was piloting the Sox in 1951.

"Nellie needed a rest and I ordered him benched for his own sake," recalled Richards. "The next thing I knew, there was Fox dashing around the outfield under fly balls during pre-game batting practice. Finally, I got him to the dugout. I hid his glove.

"During the game, Nellie was jumping up and down like the bench was a hot seat. One game

of his bench jockey stuff was enough — Fox wasn't getting any rest and he was driving the rest of us crazy. I put him back in the lineup the next day."

Fox was given another rest by then Sox skipper Marty Marion on Aug. 5, 1955. That was the last time an attempt was made to corral him in the dugout—700 games ago. If that hadn't happened the 32-year-old Fox would have a record by a second baseman of 477 games, set by the White Sox' Eddie Collins in 1914-1917.

The all-time record for any player is the 2,130 games by Lou Gehrig. Stan Musial holds the National League mark of 395.

Senate Deadlocks On Baseball Bill

WASHINGTON (AP) — The Senate Antimonopoly subcommittee deadlocked Tuesday over terms of a bill to clamp tough new federal controls on professional baseball.

It checked the issue to its parent body, the Senate Judiciary Committee.

Chairman Estes Kefauver (D-Tenn.) said the subcommittee sent the measure to the full committee without recommendation. He is the bill's author.

He confirmed that the actions were taken at a secret session but gave no reasons for the secrecy.

Kefauver said he had offered an unrestricted draft amendment to the measure, in an effort to settle the dispute over his original proposal to forbid any major league club to own or control the contracts of more than 100 players.

His original version would have required that 60 of the 100 be made available at least once a year for draft by any other club.

Kefauver said the amendment he proposed Tuesday would drop the 100 limit, but would require that all players in excess of 40 "untouchables" be offered annually for unrestricted draft.

The object is to equalize teams' playing strength.

Archie Moore vs. Besmanoff In Non-Title Bout Tonight

INDIANAPOLIS (AP) — Archie Moore, the venerable king of the light heavyweights, will carry about 200 pounds and 2 to 1 favoritism against Germany's transplanted Willie Besmanoff in a 10-round non-title bout tonight.

Moore's manager Jack (Doc) Kearns, says the 175-pound champion is "heavy, but not fat" for the heavyweight match, which will attract an estimated 3,000 into the State Fairgrounds Coliseum and produce a gross of about \$60,000.

The bout is to be televised nationally (9 p.m., EST-ABC-TV) and will be scored under the five-point system. Te referee will be an import from neighboring Illinois, Frank Gilmer, chairman of that state's athletic commission.

Hawkeys Rained Out In Final Home Game

The Iowa-Quincy College baseball game scheduled for Tuesday was cancelled because of rain.

The game was to be the last home contest for the Hawkeys.

Iowa winds up its season this weekend at Minnesota, the Big Ten leader. A single game is set for Friday and a doubleheader is slated for Saturday.

H.S. TENNIS FINAL HERE
The Iowa high school tennis doubles title will be decided here this afternoon in a match beginning at 4:30 on the Iowa Varsity tennis courts.

Marc Mears and Dick Riley of Keokuk were deadlocked with Dick Blott and Arden Stockstad of Cedar Falls Teachers' High at one set apiece when darkness halted their final match Saturday at Cedar Falls. The match will be played from its point of interruption. Mears and Riley won the first set, 6-2, then lost, 7-9.

New Loop Asks Unrestricted Draft

NEW YORK (AP) — The Continental League Tuesday recommended that the Kefauver sports bill substitute an unrestricted player draft for a clause that would have limited each major league team to control of 100 players.

Bill Shea, founder of the proposed third major league, announced the recommendation at a press conference. He claimed that Commissioner Ford Frick and George Trautman, president of the National Assn. of Professional Baseball Leagues (minors), had testified last week before the Senate Antimonopoly subcommittee that an unlimited draft would be acceptable.

Under the unrestricted draft all players, except the 40 men on each major league roster, could be drafted for a set fee.

Shea said the league was "very agreeable" to a proposal to set up an arbitration committee to settle indemnities for territorial disputes between the new league and the minors.

John Liechty Qualifies For U.S. Open Sectional

John Liechty of Iowa City, last year's Hawkeye golf captain, is one of five Iowans who have qualified for the U.S. Open sectional competition.

Liechty shot 73 on the Elmerest course in Cedar Rapids to finish second in the field of 26 behind Joe Brown of Des Moines, who had a 71-69-140.

Jack Jones of Waterloo, Jack Donahue and Floren DiPaglia of Des Moines were the other qualifiers.

The five were among the 400 who qualified for sectional competition which

Only 6 Americans Left In British Amateur Golf

PORTTRUSH, Northern Ireland (AP) — Determined British and Irish stars Tuesday whittled down the American Amateur Golf Championship to a mere six survivors. Nine Americans were eliminated. But Uncle Sam's two big ones — stylish Tim Holland of Rockville Centre, N.Y., and veteran Bob Cochran of St. Louis — did more than stay alive. They played brilliantly, shattering par in their second round triumphs. This kind of form — if maintained — could earn either the ancient title.

Holland, 29, routed T.B.C. Hoey of Ireland, 7 and 6. Cochran, 47, a long time Midwestern star, edged

John Lyons of England, 3 and 1, in a stirring match. Cochran closed it out with birdies on the 16th and 17th holes. Both Holland and Cochran scored front nine 33s on the par 36-72, 6,842-yard layout.

The other American winners were Bill Gibson of Louisville, Ky., by 8 and 7 over L. G. Emmott of England; Donald Dawson of Detroit, by 1-up over Bryan Blake of Ireland, and Ralph Morrow of Oklahoma City by 5 and 3 over Dr. William Meharg of Ireland. Hiram Snowden of Savannah, Ga., gained the third round on two straight scratches.

Seven of the eight seeded aces, headed by former champion Joe Carr of Dublin, advanced. The one exception came in an all-Irish match when Bert Rainey, a husky lad, upset 50-year-old Cecil Ewing, 4 and 3.

The other seeded victors included Tom Craddock, the Irish champion who eliminated John Humm of Baldwin, N.Y., 4 and 3; Jimmy Walker of Scotland, who fired a first nine 32 in beating D. R. Young of Ireland, 7 and 6; Michael Bonallack of England; Guy Wolstenholme of England; Reid Jack of Scotland, the 1957 winner, and David Blair, another Scot. Blair routed Lt. J. J. Hagan of Portland, Ore., 7 and 6.

Refugees from Chile Quakes
Refugees left roofless by earthquakes huddled in makeshift quarters in Concepcion, Chile, Tuesday. Quakes, tidal waves and landslides have hit southern Chile since Saturday. Reports to the Chilean Government indicated that close to two million persons, about 65 per cent of the population of 11 southern provinces, may be homeless. —AP Wirephoto

Local AAUP Chapter Elects Engineering Prof President

Richard Lloyd-Jones, assistant professor of engineering, has been elected president of the SUI chapter of the American Association of University Professors for the 1960-61 academic year.

Other officers elected for the next academic year are Robert Boynton, assistant professor of political science, secretary-treasurer; David Gold, associate professor of sociology, faculty participation; Sam Becker, associate professor and director of TV-radio-film, membership; Ellis Newsome, associate professor of journalism, public relations; George Peck, associate professor and head of general business, economic welfare; Robert Hogg, associate professor

Whoa, Hoss!

**Load Makes Vulnerable
The Truck of Venerable**

DES MOINES (AP) — Ron Venerable of Des Moines drove a truck in a different direction Tuesday — up.

He was turning left on a hill at an outlying intersection on Fleur Drive when the 12-ton truck reared up on its hind wheels.

Venerable looked down at the pavement about 10 feet below him. Then he opened the cab door and jumped. The truck continued to sit in the middle of the street.

Venerable said the truck tipped, partly because it was on a hill and partly because of several tons of steel which had been loaded behind the rear wheels.

It took an hour and a half to shift the steel, and put the truck back on all fours.

"You know, it's kinda embarrassing," Venerable commented.

Hint Former Nazi Seized In South American Country

JERUSALEM, ISRAELI SECRETOR, (HTNS) — The veil of mystery surrounding the dramatic arrest of Adolf Eichmann, reportedly director of the Nazi extermination of millions of Jews, was partially lifted Tuesday.

Israeli officials, which had steadfastly declined to state where Eichmann was apprehended, suddenly relented to the extent of saying that the top Nazi had been seized in a foreign country and brought secretly to Israel. It was learned on good authority that Eichmann was whisked from his home by Israeli secret police working in that country.

The head of the Israeli Security Services told a news conference Tuesday night that the capture of Eichmann was an exclusively Israeli operation. The security head, whose name is kept secret, denied that any bribe or money in any form passed or would pass hands in connection with the operation or that rewards would be given to Eichmann's captors.

Justice Minister Pinhas Rosen has said that Israel did not request any other country to extradite Eichmann. It appeared that the capture of the SS officer, who had been missing for a decade and a half, was a cloak and dagger operation with many implications and complications.

While the general local reaction

to Eichmann's capture was highly favorable, some quarters expressed apprehension over possible international implications. The foreign ministry, however, maintain a no comment attitude.

Eichmann himself is being held in a solitary cell. Police said this was not punitive but was "for obvious reasons." They meant that Eichmann had to be guarded against possible vengeance of prisoners of the Jewish faith.

Eichmann was reportedly brought to Israel from his place of residence under armed guard. Local reports said he had been under scrutiny by Israeli secret police for some time. The country whence he was taken was still wrapped in secrecy as far as Israeli officials were concerned but speculation here, on the basis of foreign reports, centered on a South American country.

Eichmann when brought before a Jaffa magistrate Monday for a detention order, was asked if he wished to make a statement. The former SS officer, described as tanned and healthy but obviously shaken by his arrest, said:

"I have nothing to say at this stage but I hope that during the trial I will be given a chance to defend myself."

Student from India Receives Grant; 1 of 20 Awarded

Subramaniam Shastri, G. Bombay, India, is one of the 20 foreign students in the United States who will receive a grant to study the 1960 elections.

The program of study, called the Contemporary America Seminar, will be held June 13-15 in Washington, D.C.

Under the program, Shastri will study the history and mechanism of American government, political parties, conventions, and primaries.

To augment the program, visits will be taken to Congress and to the national headquarters of the political parties.

Shastri, who is working toward his Ph.D. in pharmacy, has been in charge of the Seminars on American Life held at the SUI International Center.

The Contemporary America Seminar is sponsored by the Foreign Student Service Council, Washington, D.C.

1,000 Dead In Four-Day Chile Disaster

SANTIAGO, Chile (AP) — Volcanic eruptions added to the massive devastation by earthquakes, tidal waves and landslides in southern Chile Tuesday.

The Government said more than 1,000 have died in the four-day disaster and that perhaps two million were homeless.

At least five volcanoes were in eruption, and a new one reported born in the midst of the horror and panic.

Four volcanoes — Osorno, Caulle, Carral and Casablanca — were active in Osorno province about 500 miles south of Santiago, authorities said.

The nearby cities of Llanquihue and Osorno, with a combined population of about 26,000, were ordered evacuated.

A poll reported 7,350-foot Puyehue volcano near Osorno also was spewing smoke and fire. Farther north, in Cautin province, a new volcano started emitting a column of flame and smoke.

A new earthquake Tuesday afternoon shook Quinchao in Chileo province, the Government reported. It had no details because of chaotic communications.

Grandmother, 63, Saves Two of Kin

STRAWBERRY POINT (AP) — A 63-year-old grandmother plunged twice into the Maquoketa River and saved her grandson and daughter from drowning.

Mrs. Mike Miller, her daughter, Mrs. Gary Galloway, and her two children, Glenn, 3, and Steve, 4, went to nearby Backbone State Park Monday afternoon to fish.

The two women and the boys were fishing below a dam when Glenn fell into the water. Mrs. Galloway jumped into the river but couldn't find her son.

Then Mrs. Miller jumped in and got the boy and returned to the water and rescued her daughter.

After the family drove home, Mrs. Miller became ill and was taken to a Manchester hospital.

Although Concerned About Issues—

Respondents Hold Divergent Opinions

By ED HUGHES
Staff Writer

(Editor's Note: This is the second in a series on a Daily Iowan poll dealing with party among students.)

According to the results of the first nine questions in The Daily Iowan's survey presented Tuesday, nearly all our respondents said they were concerned about "issues". However, when we looked at the answers to the last question of the questionnaire, we found that many people held divergent viewpoints about the "issues" we've seen on the SUI campus this year.

In order to draw out opinions, we asked: "As a summary, would you write a few sentences on how you feel about whether this generation is becoming more energetic about getting involved in 'issues'?" Is there any sign of what could be called a "healthy discontent" in yourself and in your friends?"

In addition, we asked the respondents to bear in mind the recent student demonstrations and discussions to see if they thought these were a sign of being able to "do something" about affairs in general.

Of the 84 who returned the questionnaire, 78 answered the last question in some degree, ranging from a terse "I certainly wouldn't know anything about my generation or any other," up to quite long essays.

Thirty-four of the respondents answered in terms best described as negative — they either saw no signs of discontent, or else dismissed the recent events on campus as trivial, "full of sound and fury, signifying nothing."

Twenty-four of the answers fell into the positive category. These thought that there was some sign of active spirit shown in the events, or that there were the beginnings of some kind of action on the part of college students here.

Twenty answers were the result of using the question as a kicking-off point. Consequently, they covered a variety of subjects.

We will present these three

Apply Now—

1960 Pageant Committee Posts Open

Applications are now available for positions on the 1960 Pageant Committee, the Pageant Board announced. The Pageant Board is composed of nine members, three each from Student Council, Union Board and Central Party Committee. It is the policy-formulating body that governs the Pageant and chooses the Pageant Committee. The Pageant Committee is responsible for the actual handling of the Miss SUI festivities.

Persons interested in applying for Pageant Committee positions may pick up applications at the New Information Desk in the Union. Positions open are: Director, Secretary, Board of Experts, Field Campaign and Elections, and Publicity. Applications are due at the New Information Desk by 5 p.m. Friday.

Committee members will be chosen by the Pageant Board on the basis of experience, ability, and available time to carry out the numerous jobs connected with the Pageant.

Those members serving on the Pageant Board are: Central Party Committee — President Jim Krambeck, A2, Clinton; Dick Hall, A2, Cedar Rapids; Jeanette Laughlin, A2, Harlan; Student Council — President Bob Downer, A3, Newton; Treasurer Dennis Edwards, A2, Davenport; Ruth Koebel, A1, Iowa City; Union Board — President John Timmermans, D2, Iowa City; Vice-President Bill Hummer, M2, Des Moines; Secretary Nancy Stokes, A3, Elmhurst, Ill. Downer is Chairman of the Board and Ruth Koebel is serving as Secretary.

This year's Pageant presentation will be held on Saturday, Oct. 15 and the Homecoming Queen, Miss SUI, will be crowned and reign over the Homecoming Week-end Oct. 22 and 23.

groups of answers separately. The first will be the negative side, leaving the others to come later in the week.

In the negative answers generally, three major themes seemed to recur. They were (1) a passive and confused involvement with such problems, but which shied away from any furor set up by these events on campus; (2) the occurrence of these events was the result of small, but vocal groups of "have-nots" which were without any significance to a majority of the people; and, curiously enough, (3) some people thought there could be the real beginnings of student politicking in these groups, but were pessimistic because they could see no real leaders among the agitators.

As to the passive involvement, one observer wrote this: "Because of the Anglo-American democratic tradition, tyranny in any form arouses intensive discontent and yet, this same tradition recognizes that some individuality must be sacrificed for the good of the whole. Thus, there is no great concern when a few wild-eyed young poets cry out against materialism, conformity, etc. Our people simply don't wish for a set of discontents to rock the boat when the sea is calm."

The problems you mention won't receive more than lingering attention simply because the vocal minority supporting these "causes" is and (if I correctly judge the climate of the times) shall remain a minority."

Writing in the same vein, one law student wrote: "Occasionally we have riots over such trivia as union coffee, lousy dorm food, or football but the vital issues remain buried. The reason is simple. Topics such as the extermination of the human race are just too great, too complex, to discuss intelligently, much less provide answers for."

"Social pressures also limit the amount of activity in fields such as this. Rioting for better food is just good clean collegiate fun. Demonstrate or sign a petition for world peace or the banning of nuclear weapons and you're automatically classified as one of those beatniks' sans beret and goatee."

"And so we sit down, lean back, prop our feet up on desks and watch, waiting to see what will happen. What will happen? That is the question worrying me. If we maintain our passive attitude, something might happen and I have a feeling it won't be nice. What can be done? I've given the question a lot of thought and haven't come up with any answers. I certainly hope someone, somewhere, does — and soon."

In the first part of the survey, most of these people did say that "issues" REALLY bothered

them. Nevertheless, thirty-four indicate they are passive. Maybe this is because they have been forced to become aware — and also confused — against their natural wishes. As one girl student put it, "... this generation is existing in such an atmosphere of tension that it is almost inevitable that [we] should be involved. . . . There is much feeling, though, that we live in a hopeless bureaucracy and students have no real chance to 'break the red tape' and get effective action, either locally or nationally."

Another girl said, "Sure it's nice to get involved with these things, but the main thing I'm down here for is an education." (One wonders how it is possible to get an education in a political vacuum.)

A would-be defeatist said this: "I may read something which gries or bothers me and then after a while my attitude changes to 'I can't do anything about it anyway' and then to a 'so what' or 'who cares' attitude. And so goes my 'heal thy discontent.'"

More comments made on this score were: "I don't really think this generation knows what it wants besides security and conformity." "... on the whole, the students are apathetic unless personally stung."

Several students gave this last reason as the cause of the ROTC discussion. They said so many male students are personally involved in this that they are goaded to say and do something about it.

A second view held by many of the respondents was that if there is any ferment it is confined to small groups, which have little chance of increasing their number. They said these groups do not appeal to any large cross-section of the public mind, or else the groups don't present a real enough issue to most people.

"... just because they are organized . . . is no sign they will be able to fundamentally change the status quo. They must first gain recognition on campus as representing the rights of individuals . . ."

"Those who are interested in doing something" are in a very small minority and will remain so until something shakes the majority out of its shallow state of mind.

"The vast majority is even more uninterested . . . and since it is the majority, it seems to me that the gap between these two groups will continue to grow larger and larger until the small groups will ultimately be pigeonholed as the 'lunatic fringe', a very convenient label for those whose opinions one does not share."

"Yes, we are apathetic," wrote another student. "The last decade has been characterized as an age of organization. Perhaps too many of us are still trying to live in the age of individualization into which our grandfathers were born." Other answers also struck this theme. One said that the attitudes of students here and at other colleges have changed from a feeling of co-operation to a feeling of independence.

These were not joyous affirmations of individualism; they were, in fact, rather plaintively negative in tone. This raises the question whether some students don't think that "committee action" and "organization man" are terms of merit, instead of objects of intellectual scorn.

At the same time, many of these answers also raised a query about leadership. They wondered about the role of leadership in groups. We wrote:

"Why should we feel as if more can be done because of what some of these 'pseudos' have advocated and then forgotten? There seems to be no sense of leadership and responsibility amongst even our . . . (this generation) seems to produce very few capable leaders . . . The leaders who do take the

lead are not satisfactory to the majority and very little is accomplished. "Within every group there is always a certain element which makes it its business to stay in the public eye."

"The 'intellectuals' betray their own confusion and thin-skinnedness by their wealth of letters to the editor. . . . (They don't really think for themselves); they usually only follow the lead of one or two of the more advanced guard."

"We are corrupting our generation by condoning this intellectual upheaval. . . ."

Speaking about people who comprise the active groups, several had pointed comments to make: "I have a feeling that the 'intellectual' factions are revolting against the indifference accorded them, and do not seriously feel any DEEP convictions about socialism, ROTC, or student government."

"They are in favor of changing anything [laws which are necessary to safeguard normal, hard-working, sincere citizens from the wishes of an irresponsible, 'weak,' minority] that puts the slightest restriction on their 'freedom and self-expression', regardless of the consequences to this, and future, generations."

"My first thought would be one of keeping 'them' away from power since I don't understand them and therefore fear them, so to speak."

In summing up the general attitudes of the people who answered in the category, we quote from two answers:

"... an awful lot of students voice discontent about an awful lot of things a lot of the time."

"... college issues taken up by many college students are generally all smoke and no fire. Students should strive for a productive academic life during their formal education and do their . . . hell-raising post campus!"

One may wonder what part of the students this attitude covers (our returns were about three-eighths negative), however, we have considered some of the reasons and opinions for their believing the way they do.

Not all thought this way. Tomorrow we will consider those responses which say just the opposite.

Engineering Frats Initiate

Lory Bridgeford Receives ZTA's Falvey Award

Lory Bridgeford, D2, Cedar Rapids, was presented the Katherine Mull Falvey award at a senior recognition banquet Monday evening at the Zeta Tau Alpha sorority house.

The award, a diamond sorority pin, was donated to the sorority by Mrs. Falvey, Monroe County representative in the Iowa Legislature. It is to be awarded each year to a junior woman in the sorority who is outstanding in scholarship and leadership.

Mrs. Falvey is a Zeta Alpha alumna. She was the first pledge of the sorority when it became a national organization in 1922. She completed her SUI career in three years, and is a member of Phi Beta Kappa scholastic society.

"... college issues taken up by many college students are generally all smoke and no fire. Students should strive for a productive academic life during their formal education and do their . . . hell-raising post campus!"

One may wonder what part of the students this attitude covers (our returns were about three-eighths negative), however, we have considered some of the reasons and opinions for their believing the way they do.

Not all thought this way. Tomorrow we will consider those responses which say just the opposite.

Lory Bridgeford Receives ZTA's Falvey Award

Lory Bridgeford, D2, Cedar Rapids, was presented the Katherine Mull Falvey award at a senior recognition banquet Monday evening at the Zeta Tau Alpha sorority house.

The award, a diamond sorority pin, was donated to the sorority by Mrs. Falvey, Monroe County representative in the Iowa Legislature. It is to be awarded each year to a junior woman in the sorority who is outstanding in scholarship and leadership.

Mrs. Falvey is a Zeta Alpha alumna. She was the first pledge of the sorority when it became a national organization in 1922. She completed her SUI career in three years, and is a member of Phi Beta Kappa scholastic society.

Scholarships Awarded to 64 SUI Students Announced

Sixty-four SUI students have been awarded scholarships under gifts and grants accepted at the May meeting of the State Board of Regents finance committee. In addition, several of the scholarships for the 1960-61 academic year are yet to be awarded. A total of \$22,881 was accepted during May for scholarships by the Regents committee.

John A. Stitzel, E3, Clinton, has been named to receive a Monsanto Chemical Co. scholarship for the 1960-61 academic year. The award was made possible by a \$500 grant from the company.

Five SUI students majoring in chemistry have also been awarded scholarships sponsored by the Monsanto Chemical Co. Recipients under a \$1,950 grant are Ruth Ertz, G, Cassville, Wis.; Billy Culbertson, G, Chicago, Ill.; Charles Goodrich, G, Keokuk; Gerald Rausch, G, Calmar; and William Jensen, G, Minneapolis, Minn.

A Schlegel Drug Store (Davenport) gift of \$110 was accepted for Jack Huzl, P4, Mason City, for the current semester.

James R. Bell, M4, Clear Lake, is the recipient of a \$100 second-semester scholarship from the Iowa Bonus Board.

Louise Noah, A2, Chariton, has received an \$80 Iowa Farm Bureau Federation Scholarship for the second semester.

Merlin G. Rohrsenn, M2, Jessup, has been awarded a \$600 scholarship for the SUI summer session. The scholarship was made possible by a gift from the Iowa Chapter, Arthritis and Rheumatism Foundation.

A \$100 scholarship awarded to Patricia Chilton, N4, Sigourney, was made possible by a gift from the Iowa Association of Plumbing Contractors Women Auxiliary, Cedar Rapids.

Also receiving senior nurse scholarships were Sharlene Feich, Bridgewater; and Dorothy Schmidt, Arlington.

Hermis Snyder, G, Iowa City, has received a second-semester scholarship of \$130 from the Iowa Mental Health Authority.

The Des Moines Register and Tribune Co. gift of \$600 was accepted for a scholarship awarded to Gerald Monk, E4, Iowa City.

A \$780 U.S. Public Health Service Traineeship Award will be divided among four SUI students. They are Alvin H. Miller, G, Manchester; F. Thomas McCarthy, G, Boston, Mass.; Charles L. Swanson, G, Mediapolis; and William J. Idle, G, Creston.

Four SUI students have received scholarships under a \$2,826.44 grant from the Iowa Commission for the Blind. They are Jerry L. Simmons, G, LeMars; Thomas Bickford, Los Angeles, Calif.; Larry Cobb, A1, Corydon; and Harold Vande Haar, A1, Leighton.

A partial scholarship for ROTC

personnel at SUI was accepted from the U.S. Air Force. Recipients are LeRoyce Gander, A1, Coralville; Sanford D. Hale, Ax, Clinton, Ark.; and Clifford P. Warin, A2, Coralville. Department of the Army scholarships were for Peter Hogberg, G, Moline, Ill.; Richard L. Johnson, G, Williamsport, Ind.; and Catherine Fitzpatrick, Iowa City.

Ten students have received Danforth Foundation Scholarships for the second semester under a \$1,275 grant. They are Limone C. Collins, G, Iowa City; Raymond Cyr, G, Franklin, Neb.; Robert Dans, G, Iowa City; Edward Hutton, G, Iowa City; Dan T. Moe, G, Moorhead, Minn.; Robert G. Tucker, G, Portsmouth, N.H.; Don A. Matting, G, Milwaukee, Wis.; L. Allen Pyke, Daytona Beach, Fla.; and Eddie T. Goins, G, Nashville, Tenn.

Three Illinois students have received second semester scholarships under a \$750 grant from the Illinois Department of Public Welfare. They are Martha McKnight, N2, Rockford; Jean Wagner, N2, Prairie City; and Mary Noel Iber, N2, East Peoria.

Stephen M. Miller, A2, Depere, Wis., is the recipient of a \$269.85 scholarship from the Wisconsin State Board of Vocational and Adult Education.

An Eastman Kodak Company grant of \$2,260 was accepted for Donald G. Ries, G, Hastings, Minn. The scholarship in chemistry is for the 1960-61 academic year.

John H. Chadwell, G, Albany, Ga., has received a \$160 Southern Fellowship Fund Scholarship for the second semester.

Six Iraqi students have received second semester scholarships under a \$740 grant from the Iraq Embassy. They are Arabi H. Al-Zoubaeli, G, Aiyah; Raymond Shekousy, G, Baghdad; Ja'afar Hay Ali Abbas, G, Baghdad; Abdul Al-Mahzkoumi, G, Negei; Abdul W. Hassan, G, Baghdad; and Kadhim J. Assad, G, Baghdad.

A \$222 grant from the Royal Thai Embassy provides 1960-61 scholarships for Thailand students Nornumol Karnchanachari, G, Bangkok; Titima Phitaksraiwan, G, Bangkok; Subharnorn Polymun, G, Bangkok; Subin Banhonsupvat, G, Bangkok; and Ravipan Sornpan, G, Bangkok.

A \$400 gift was accepted from E. G. Kettelkamp, Monona, for the Kettelkamp Scholarship in Medicine to be awarded for the 1960-61 academic year.

Also to be awarded is a \$317.80 scholarship in engineering from the American Air Filter Company, Moline, Ill.

Three scholarships in engineering or physical science will be awarded for the 1960-61 academic year under a \$2,875 grant from the Alcoa Foundation.

Also accepted was \$660 from the National Merit Scholarship Corporation to be awarded to SUI students.

National Science Foundation grants of \$4,165 in chemical engineering and \$4,315 in chemistry were accepted for an undergraduate research program at SUI dur-

ing the 1960-61 academic year. Students who will participate in the program have not yet been named.

Hoffa Sues Paar, NBC

DETROIT (AP) — Teamsters President James R. Hoffa Tuesday sued the National Broadcasting Company, Jack Paar and Robert F. Kennedy, for \$2½ million. He charged them with libel and slander.

Hoffa said he had been damaged by statements made on four Jack Paar television shows on which Kennedy was a guest. He listed them as on July 22 and 26, 1959, March 8, 1960, and May 5, 1960.

Kennedy is the former counsel for the McClellan committee which conducted an exhaustive investigation of Hoffa's activities. He also is a brother of Sen. John F. Kennedy of Massachusetts, Democratic presidential nomination candidate.

Hoffa's suit, filed in Federal court in Detroit, charged a conspiracy by the defendants to "ridicule, degrade, defame and humiliate Hoffa as being unworthy of holding office or membership in the Teamsters International. They portrayed him (Hoffa) as a perpetrator of a fraud on the American labor movement, thereby generating and stimulating hatred and creating a public clamor for punishments."

The suit branded the offending statements as "false and untrue" and said that "by reason of the defamation of character," the labor leader had "been injured in good name, fame, and reputation."

Barels Elected President of ALD

Alpha Lambda Delta, national honorary society for freshman women, recently installed its officers for the coming year.

They are Rebecca Barels, A1, Carroll, president; Margaret Nairbert, A1, Cedar Rapids, vice president; Shirley Siefkin, N1, Grundy Center, secretary; Susan Christensen, A1, Burlington, treasurer; and Colleen Brown, A1, Ruthven, historian.

Water Pollution Bill Introduced

WASHINGTON (AP) — Rep. Fred Schwengel (R-Iowa) Tuesday introduced a water pollution bill which he said would meet objections raised by President Eisenhower earlier this year when he vetoed a bill passed by Congress.

Schwengel said his bill would strengthen state and interstate water pollution control programs, would make more effective assistance to municipalities in meeting the problem, would provide for more effective prevention of pollution caused by federal installations and would strengthen the federal role in abating pollution of interstate waters.

Noted Biblical Scholar

Canadian To Join Faculty

STANLEY

A noted Biblical scholar who will join the SUI School of Religion faculty next February has been called the outstanding Roman Catholic writer of the North American continent on the New Testament.

Though work of the school at the graduate level is increasing, the primary aim still is to provide courses for undergraduates who seek not to specialize in religion but to broaden their own general understanding of this field.

S.S.D. there in 1952. Father Stanley is one of three professors selected by the Catholic hierarchy to produce the translation from the Greek of the New Testament in the version of the Confraternity of Christian Doctrine.

Margaret Bourke-White

'No Pain; But a Feeling Of Being Part of Evolution'

They made an eight-inch incision in my head. I couldn't feel any pain, just a succession of impressions. It was a feeling of entering an interior world of my own.

The first woman war correspondent to be accredited by the Air Force, Miss Bourke-White said that at one time she flew over Cassini in Italy during the Second World War in a Piper Cub, with German fighter planes pursuing.

heard that Dr. Cooper had developed the operation, which was still considered somewhat risky. "But I figured, what could be more unpleasant than what I have?" she said.

2 Coeds Assigned To Indian Clinics

The audience at the Ladies of the Press breakfast in Chicago gave her two standing ovations during her speech. Since the story of her fight with the disease appeared in Life Magazine, (June 23, 1959) she said, she has felt an "invisible world of good feelings around her."

Two SUI juniors in dental hygiene have been selected by the U.S. Public Health Service to participate in a summer experimental program at two Indian hospitals.

Five bids were submitted for plumbing, heating, and ventilation: Milford Plumbing and Heating of Iowa City, \$34,800; Conditioned Air Corporation of Des Moines, \$43,600; Darragh and Associates of Cedar Rapids, \$44,000; Kehrer-Wheatland of Cedar Rapids, \$45,500; and Ideal Plumbing and Heating of Davenport, \$47,500.

Aaberg to Zwickel, They're 'In the Book'

Aaberg and Zwickel. Recognize these? They are the first and last names in the SUI student directory. In between these two are the names of all other students on campus.

Crown, Bouquet and Trophy

Laurels Surround Betsye

The dresser mirror reflected Betsye Beatle's happiness as she adjusted the rhinestone crown on her light brown hair.

BEATLE

While getting ready for the judging Betsye said she complained to her roommates that her legs were too fat.

Upon returning to the dorm that night, Betsye said, her roommates greeted her with the question, "Well, fat legs, how did you ever win?"

U.S.S.

Nations Vote Whether U.S. An Aggressor

Eisenhower Address Was Gromyko Excuse To Delay Wednesday

UNITED NATIONS, N.Y. — The Soviet Union, faced with certain defeat, Wednesday delayed a showdown in the U.N. Security Council over condemnation of the United States for spy plane flights.

There was speculation that Gromyko wanted to study President Eisenhower's report to the nation Wednesday night on the Paris summit conference before making a final speech.

U.S. Ambassador Henry Cabot Lodge had hoped for a vote Wednesday. But Gromyko held the key to the timing, since the Council was debating his resolution against the United States.

Lodge was set to reply to Gromyko before a Council vote.

Sir Claude Corea of Ceylon, president of the Council, said Gromyko had asked for a delay in proceedings until Thursday.

Lodge expressed regret the Council did not press for a vote at a night meeting.

He said important international negotiations, such as disarmament and suspension of nuclear weapons tests, are being delayed during the Council's debate.

Corea said the Council would hold two meetings Thursday — at 9:30 a.m. and 2 p.m.

The smaller nations on the Council — Tunisia, Ecuador and Ceylon — took over the spotlight in Wednesday's debate.

Tunisia's Mongi Slim made no direct mention of the resolution expected to be introduced after disposal of the Soviet complaint.

But he pleaded for resumption of big-power negotiations in order to head off a full-scale return of the cold war.

Ambassador Jose A. Correa of Ecuador called upon the Soviet Union not to press its resolution to a vote.

Referring indirectly to the four-nation resolution, Correa expressed hope the Soviet Union would "decide to cooperate by a conciliatory action that will open a new role for collective security."

He said the international situation was such that a mistake could touch off a terrible war.

Hikers Pass Through British Ser

Hundreds of well wishers and curiosity seekers greeted the two hiking British sergeants, Mervyn Evans, 34, and Patrick Moloney, 35, as they passed through Iowa City early Wednesday afternoon on their way to New York City.

The two British soldiers are walking across the United States, from San Francisco to New York, in hopes of setting a new time record for walkers.

Evans said Wednesday that they were now 14 miles ahead of schedule on their 3,032 mile hike.

The pair, and the driver of a trailer that accompanies them, Roy Rogers, also a British sergeant, were invited to dine in Iowa City Wednesday noon with Mayor Ray Thornberry, City Manager Peter Roan, and representatives of the Chamber of Commerce.

They declined, however, because it was an hour and a half before their regular eating time. They did spend 18 minutes at the Hotel Jefferson where they had water, tomato juice, and coffee. The hotel sent three steaks on with them.

The Annex Tavern also donated a six-pack of beer to further alleviate the sergeants' thirst and to keep their spirits up.

All along the route, people asked for autographs, waved, smiled, and marveled at "How British they look." The men were dressed in British Army uniforms which appeared to be very faded from the weather.

A mile east of Tiffin a woman was waiting to hand them two chocolate chip cookies which she had baked.
