The Republicans have been able to pass a number of important pieces of legislation, and these have been popular with the voters. The Democrats have been trying to counteract this by introducing their own legislation, but they have been unable to gain the support of the voters.

The Republicans have been successful in winning the support of the business community, and this has been a major factor in their success. The business community has been concerned about the state of the economy, and they have been supporters of the Republicans. The Democrats have been unable to provide a convincing alternative to the Republicans, and this has been a major factor in their failure.
