'Brigadoon' Opens Tonight at 8

By WOODY EARL
Staff Writer

The first performance of the University Theatre production of the famed Lerner and Loewe musical comedy, "Brigadoon," will be presented at 8 tonight.

The two-act play, a 1948 Broadway hit, will run through Feb. 27. There will be no Sunday performances.

"Brigadoon," revolves around the adventures of two American hunters who come upon the small Scottish town of Brigadoon on the one day in each 100 years that it emerges out of the highland mist.

Both Americans become involved in the activity of the small village. One falls in love with a pretty highland lass.

Tickets for the play are available at the Union East Lobby Desk. Student tickets are free upon presentation of an identification card. Others are \$1.50.

If performances are sold out, a waiting list will be available at the theatre at 7 each night. Those on the waiting list will be seated, if regular ticket holders fail to appear.

Lead roles in the approximately 50-member cast are double cast.

On even dates, the male lead, Tommy Albright, is played by Matthew P. Hart, G. Davenport, and on odd dates by Eugene Wilkins, A2, Memphis, Tenn.

On even dates, the female lead, Fiona MacLaren, is played by Eileen R. Barnett, A1, Chicago, and on odd dates by Judith A. Hughes, A3, Elkader, Iowa.

The second male lead, Charlie Dalrymple, is played by Howard F. Hensel, A4, Auburn, Robert D. Boburka, A3, Berwyn, Ill., appears as Jeff Douglas and Cathie D. Chandler, A2, Knoxville, as Meg Brookie.

The three principal dancers in the production are: Michael Sokoloff, A3, North Brunswick, N.J., as Harry Beaton; Kathryn K. Anderson, A1, Carter Lake, as Jean MacLaren; and Elizabeth J. Hawkins, A4, Iowa City, as Maggie Anderson.

A musical such as "Brigadoon" presents unusual problems due to the physical limitations of the theatre, Dr. Clark said.

Because the University Theatre has no orchestra pit, a 20-piece orchestra will perform backstage.

Onstage performers will be able to follow the conductor by watching several closed-circuit television monitors hidden in the scenery.

"Brigadoon" is a combined production of the Department of Dramatic Arts and the School of Music.

Faculty Leave Bill Passed By Iowa House

Bill Passes 118-1,
Aid to Recruiting
For Colleges in State

DES MOINES (AP) — The Iowa House of Representatives completed legislative action Tuesday on a bill to grant leaves with pay to faculty members at state institutions of higher education.

The bill was passed 118-1 and sent to the governor despite a question raised by Rep. Harold Fischer (R-Wellsburg) as to whether staff members taking such leaves for further study or research might not accept other jobs while on leave.

Rep. Gertrude Cohen (D-Waterloo) said it is necessary to allow the Board of Regents to grant such leaves if the University of Iowa, Iowa State and State College of Iowa are to compete successfully for services of top-rank academic staff members.

ANOTHER REASON why there is a growing need for such a leave program, she said, is that technical advances are being made so rapidly that college instructors must get away occasionally for further study to keep up with developments in their fields.

Fischer said there was no assurance people would return to Iowa after a leave. He added this might cost the state considerable money and aggravate the staff recruitment problems the state-supported schools already have.

A SENATE amendment to the original bill would require the faculty member to return to the Iowa school for at least two years after taking a leave or to repay any compensation he received during the leave period.

The senator said this would provide a powerful economic incentive for him to return to Iowa rather than take another job.

Careers Conference To Conclude Today

Nine conference sessions and a luncheon are scheduled for persons attending the last day of the 20th annual Business Careers Conference today.

The sessions, sponsored by students of the College of Business Administration through their Collegiate Chamber of Commerce, will begin at 8:30 a.m. in Old Capitol.

THE HOUSE AND Senate Chamber of Old Capitol were filled to capacity for each of Tuesday's 10 sessions. The seating capacity for each chamber is approximately 200.

LEONARD S. Silk, senior editor of Business Week, spoke on "The Education of Businessmen" at a noon luncheon in the Union attended by 175 persons.

Silk said the controversy between those who advocate a liberal arts education and those who insist that emphasis be given to special

ized business skills must be resolved.

"Both are needed," he said. "The task confronting education today is to eliminate this either/or thinking and to prepare students both for the beginning of their careers and for living in general."

SILK SAID A liberal arts education helps the student develop analytical ability and balanced judgment, vigor of mind and of imagination, an ability to work with others, an understanding of human behavior and of the social, political and economic forces of society.

At the same time, he said, business education should be a significant part of a university's program because character, skills and abilities cannot operate in a vacuum.

"For many young people starting out on a business career, some knowledge of the facts and institutions of business or particular business skills is a definite asset — often a condition of employment," he said.

MURRAY JOSLIN, vice president of the Commonwealth Edison Co. and a former Iowan, will address the luncheon today on "Business and the Young College Graduate."

J. E. Smith's talk on "Your Career in Business" at 3 p.m. today will conclude the annual conference.

SMITH, SALES and staff personnel relations manager of Armstrong Cork Co., will speak on the desirability of approaching a career in a professional manner and of establishing a broad basic goal early in life.

The speech will be followed by a discussion period.

The conference is open to all students. Thirty-six business and industrial leaders from seven Iowa

cities and six states are on campus to answer questions about job opportunities.

TODAY'S SCHEDULE

8:30 a.m. — Data Processing (Senate Chamber, Old Capitol)

8:30 a.m. — Industrial Relations and Personnel (House Chamber, Old Capitol)

9:30 a.m. — Managerial Accounting (House Chamber, Old Capitol)

9:30 a.m. — Business Education and Secretarial Sciences (Senate Chamber, Old Capitol)

10:30 a.m. — Marketing Research (House Chamber, Old Capitol)

10:30 a.m. — Investments (Senate Chamber, Old Capitol)

Noon — Luncheon (Union, Main Lounge)

1:30 p.m. — Sales (Senate Chamber, Old Capitol)

2:30 p.m. — Graduate School (House Chamber, Old Capitol)

3:00 p.m. — Applications and Interviews (Senate Chamber, Old Capitol)

Leikvold Says Renewal Plan Needs Time

Completion of plans for the city university urban renewal project at the center of Iowa City will take almost a year, City Manager Carter Leikvold said Tuesday.

Leikvold said "It just takes a long time to process all the data required for the plans."

Iowa City's application for a Federal grant to finance the survey and planning activities necessary for formulation of redevelopment plans was approved Monday.

The \$171,969 grant was approved by the Housing and Home Finance Agency. The application was filed last fall.

Leikvold said the final plan could be accepted, revised, or rejected. The city is not obligated to undertake the renewal project, even though the Federal Government has approved its application.

Leikvold said life would go on

New Viet Government Takes Office

SAIGON, South Viet Nam (AP) —

A new government and a new legislative advisory body took office Tuesday with the blessing of Lt. Gen. Nguyen Khanh's high command. A facade of civilian rule that had been rent by military purges was retired.

DR. PHAN HUYNH QUAT, 55, a former foreign minister, got the helm as premier. He called for unity in the interests of promoting the U.S.-backed war against the Viet Cong.

A U.S. Embassy spokesman issued a statement saying:

"We welcome the end of this interim period and look forward to very close cooperation with this new government."

The interim period was the three weeks between Khanh's dismissal Jan. 27 of Tran Van Huong as Premier, and the installation of Quat's Cabinet.

Handling the premiership in this period was Deputy Premier Nguyen Xuan Oanh, a Harvard-educated economist who is president of the National Bank. Oanh was omitted from the new Cabinet, but he kept the bank job.

Quat is a former North Vietnamese who headed South when the Communists took over Hanoi.

Leikvold —

(Continued on page 6)

The second reading of the proposed rezoning was approved by the council.

Had the de-annexation plan been passed, Coralville would have re-annexed annexation on much of the land which borders Iowa City on the west.

IN OTHER ACTION the council approved an ordinance rezoning part of Court Hill North of Muscatine Ave. and east of American Legion property from single to multiple unit dwelling.

Attorney Marion Neely appeared before the council to represent homeowners in the area, who he said had bought property with the understanding that it would remain zoned for single family dwellings.

Edward Lucas, attorney for the Court Hill Development Company, said that the land had always been intended for the construction of apartments and pointed out that none of the apartments will be built adjacent to the homes built in that area.

TEMPERS flared briefly when William Maas suggested that councilman William Hubbard had some personal interest in a proposal rezoning of property on Brown St. to permit construction of a retirement home.

Hubbard told Maas that he represented the implications and suggested that Maas better inform himself on issues facing the council.

The second reading of the proposed rezoning was approved by the council.

Sex Furor Stirs Stanford

Women's Dean Quits; Denies Saying
Teachers 'Seduced' Freshman Girls

STANFORD, Calif. (AP) — Stanford University's dean of women has resigned with a firm denial of a complaint by student leaders that she had charged young English teachers with employing "the erotic aspects of literature" to seduce freshman girls.

In a statement, Dean Lucille Allen, 59, said she had asked a terminal leave of absence because "no useful purpose could be served by prolonging the controversy."

She said she wanted "to restate my denial of having made any derogatory statement and to reiterate my regret over the unfortunate misunderstanding of the English Department which followed."

The dean's resignation followed an investigation by three-member faculty committee headed by law professor Gerald

Guenther.

The committee's report will not be made public in order to respect "the private interests of the individuals involved," said President Wallace Sterling.

Sterling joined the Academic Council's Executive Committee in reporting these findings by the inquiry committee:

"No persons charged to the committee that there has been sexual misconduct between teachers in the English Department and students."

"No charge was made that 'the general level of attention to sexual matters in English courses is excessive or inappropriate.'

Sterling added his personal affirmation that no charges of sexual misconduct have been lodged against any teacher in the English Department in his 16 years as president.

Dean Allen said she would report to the English Department chairman if the girl student certified her complaint. But the dean said she heard no more.

PROF. MAURICIO LASANSKY
Joins De Medici, Michelangelo

Prof. Mauricio Lasansky of the University School of Art has been appointed Professor of the Classe di Incisione by the Academy of Design in Florence, Italy.

The title was conferred in connection with the academy's quadricentennial celebration by unanimous vote of the College of Professors of the Academy. The first professors of the school were Cosimo de Medici and Michelangelo. Many other famous Italian artists have also been members of the academy.

Prof. Lasansky received the diploma and papers signifying his honor from the academy through the Italian Consul General, Mario Scialoja, Chicago.

Research Professors Cited

Fifteen faculty members have been named to University research professorships in the Graduate College for one semester next academic year.

The appointments were confirmed last week by the Board of Regents at their monthly meeting in Des Moines. Faculty members receiving the professorships do not have teaching and administrative duties during one semester so that they may concentrate on research.

For the first semester in 1965-66, research appointments will be held by Professors George Brosseau zoology; Charles D. Cuttler, art; Paul Engle, English; Ralph Freedman, English; Arnold Gillette, speech and dramatic art; John S. Harlow, business administration; Marshall Segall, psychology; Thomas Turner, music; and D. W. Wall, mathematics.

IN THE SECOND semester research will be done by Professors Florindo Cerreta, romance languages; Stuart Edie, art; Charles Marberry, business administration; Ira L. Reiss, sociology; Rudolph W. Sherry, psychology; and Irvin S. Snyder, microbiology.

Prof. Brosseau will accelerate his research efforts in genetics. He will study chromosomes of the fruit fly to find out how they are put together and how they work. The study will contribute to the field of basic research.

Prof. Cuttler will spend the fall semester completing research and writing about collections of Flemish primitive painting collections in the Midwest. The research is being done as a contribution to a series which will eventually include the

III. Senate Sends Interest Conflict Proposal to House

SPRINGFIELD, Ill. — The Illinois Senate passed Tuesday and sent to the House the first of numerous conflict of interest proposals under consideration by the legislature.

The measure, by Sen. Arthur Sprague (R-LaGrange) carried a \$10,000 fine and up to 10 years in prison for a lawmaker who takes anything of value for his vote or influence of a bill.

Sprague said that while he knew of no instance requiring passage of the bill, it was necessary because of statements several lawmakers have made regarding possible conflict of interest on the part of legislators.

ADVERTISMENT

Study in

Guadalajara, Mexico

The Guadalajara Summer School, a fully accredited University of Arizona program, conducted in cooperation with professors from Stanford University, University of California, and Guadalajara, will offer June 28 to Aug. 7, art, folklore, geography, history, language and literature courses. Tuition, board and room is \$265. Write Prof. Juan B. Rael, P.O. Box 7227, Stanford, Calif.

publishing of all Flemish primitives in the world. Part of Dr. Cuttler's time will be spent in Brussels, Belgium.

A NEW BOOK of poetry and a European trip are planned by Prof. Engle, director of the Creative Writing Program. He is presently working on a book which will emphasize a rhythm closer to the speaking American voice as compared with the traditional meters of English poetry. He also wants to study new developments of poetry in France and Germany.

The nature of distortion in literature will be investigated by Prof. Freedman. He is particularly interested in literary works which distort to place greater emphasis on reality. Part of his work will include German expressionistic literary figures.

Prof. Gillette, who is director of Prof. HARLOW will investigate the effects of French economic planning on the French legal system. Part of the research will be done in Paris.

Prof. Segall will go to Africa to conduct studies on the psychological aspects of culture change among members of traditional African societies undergoing modernization. He has done this type of research since 1959 and has published several articles. Dr. Segall is presently working on a book.

Prof. Turner is planning to compose an opera in cooperation with Vance Bourjaily, assistant profes-

sor of English. The opera, "4,000 dollars" concerns a poker game among several Georgia construction workers.

Prof. Wall, whose major field is abstract algebra, will do work on the number theory, group theory, and ring theory. Much of the work has already been started and he hopes to complete several projects during his professorship.

THE ITALIAN THEATRE of the Renaissance will be investigated by Prof. Cerreta who will concentrate his research in Siena, Italy. There he will collect materials and compile a critical edition of plays written by members of the Internati Academy.

Prof. Edie will spend the spring semester doing creative work. Part of the semester will be spent in Spain where he will paint landscapes and visit museums.

Prof. Marberry's topic of research will be "The Relative Significance of Investment Considerations in the Performance of the Securities Market." The principal purpose of the project is to examine the stock market performance of common stocks with a view to assessing the relative significance of investment influences.

PROF. REISS WILL use the semester to complete work begun in 1960 under a grant from the National Institute of Mental Health. He will relate attitudes of pre-marital sex standards to such aspects as race, religion, age, and geographical region.

Prof. Schulz will continue his research concerning language behavior and the learning and retention of verbal materials.

Acceptance of the grant is subject to the approval of the finance committee of the Board of Regents.

The foundation's total expenditure has been more than \$200,000 in the past six months. Of this amount, \$100,000 came from the Alfred P. Sloan Foundation, which recently announced an appropriation of \$258,000 to the Deafness Foundation, the largest sum ever given for ear research by a private source.

The foundation's research grants in the seven years total more than \$1 million.

Promotion will be made after confirmation by the Senate and as vacancies occur in the Army.

Colonel McKee, now secretary of the joint staff of the United States European Command, participated in the ROTC training program when he was attending the University. He received his commission as a second lieutenant in the United States Army Reserve. He entered active service in 1940 and served with the 29th Infantry Regiment in Iceland, England, Belgium and Germany during World War II.

Dr. Seebohm, professor of internal medicine at the University of Iowa College of Medicine was named president-elect of the American Academy of Allergy Tuesday during the organization's 21st annual meeting.

Dr. Seebohm, who is director of the Allergy Section at the Iowa Medical Center, will assume the presidency at next year's meeting. He has served as secretary of the 1,378-member academy since 1961.

A native of Cincinnati, Ohio, Dr. Seebohm attended Oberlin College and the University of Cincinnati, where he received B.A. and M.D. degrees. He studied internal medicine at Cincinnati General Hospital from 1946 to 1948 and took additional training in allergy at Roosevelt Hospital in New York. He joined the University faculty at Iowa in 1949 as an associate in internal medicine.

Dr. Seebohm is a member of several professional organizations and is the author of 25 scientific papers on various aspects of allergy and pulmonary physiology.

It All Started With A Want-Ad—**Mike Kinsinger Aims For 2nd Big Ten Fencing Title**By CHUCK WANNINGER
Staff Writer

Wanted: Fencers.

A similar want-ad on the sports page of the Daily Iowan brought the Hawks the best fencer in the history of the sport at Iowa.

Mike Kinsinger was a freshman in 1962 when he answered a call of Coach Achilles Nickles for men to go out for the fencing team. Today, he is a senior with a Big Ten title, a 9th place NCAA finish, and the best mark in Iowa fencing history already under his belt.

Last weekend, Kinsinger won 11 matches and dropped 1 against Wisconsin, Michigan State, Kansas, and the Air Force Academy. This extended his season's record to 19-4.

LAST SEASON, Kinsinger posted an overall record of 62 wins and 17 losses. This is the best fencing record ever compiled at Iowa. This included a Big Ten record of 30-6. He posted a 10-0 record enroute to the championship in the Big Ten last year.

"What I was after last year was the Big Ten crown. It seemed like the Nationals were anti-climactic," Kinsinger said.

Despite being "anti-climactic" Kinsinger is justly proud of his 9th place finish in the NCAA

Championships last year as a junior.

A fierce competitor with a definite aversion to losing, Kinsinger leaves little doubt of his plans for this season. He is again after the Big Ten crown. And, he aims to get it.

KINSINGER fences in the foil event. Fencing includes three events. The foil is a light, flexible weapon with which the fencer scores points by touching the opponents torso area.

The epee is also a touch point weapon, which has a slightly larger target area. The third weapon is the saber, which is a cutting weapon, using the edge of the blade. The target area for the saber is the waist up.

Kinsinger has always participated in the foil event. He posted a winning record as a sophomore as the Hawkeye team posted a losing record. Last year, he won again, and the re-vitalized fencing team finished second in the Big Ten.

THIS YEAR, the fencers have posted a 4-4 record. They have a pretty good chance to place high again in the Big Ten meet, according to Kinsinger.

"Maybe our chances are a little better than last year, because we have more experience," Kinsinger said.

"I've heard that Illinois is not as good as last year, but I guess we'll find out this weekend," he said.

Kinsinger said that Vic Dammers of the Illini was probably the toughest opponent that he will face in the Big Ten.

"FENCING is so unpredictable from an individual viewpoint," he said. "From a team viewpoint, Notre Dame or the Air Force is going to win because of team balance, but you just can't figure fencing."

This is illustrated by Kinsinger's record for this year. He lost 3 matches to the Notre Dame foil fencers who had fallen to the Air Force a week earlier by a score of 9-0. Then last weekend, Kinsinger defeated all three fencers from Air Force.

Kinsinger said his state of mind was almost as important as his physical condition. "Last year I got in a mood in which I just couldn't be beaten," he said. "I was really riding high."

Kinsinger credits his success to Jim White, who was fencing coach last year. "He's the one who taught me everything I know," he said.

COACH of the Hawkeyes this year is Richard Marks, who only last year was fencing in the open event for Notre Dame.

Kinsinger is kept busy when he isn't fencing with his marketing major, and his Air Force ROTC pilot training. He plans to be a transport pilot after graduation.

LOGAN, Utah (AP) — Wayne Estes, the Utah State University basketball star who died in a tragic accident a week ago, was named Tuesday to The Associated Press 1964-65 All America team.

The 6-foot-6 senior thus achieved in death the last of four goals he had set in life for his college career.

The All-America award was presented to the university's basketball coach, LaDell Andersen, in a memorial service before 5,000 students in the field house where Estes played his last game. Robert Myers, chief of The Associated Press Salt Lake City bureau, made the presentation.

"He was an All-American in a hundred ways," said Daryl Chase, Utah State's president, "the kind of gentleman a university president likes to hand a diploma to at graduation time."

Estes was the first posthumous AP All-America and the first to be named before completion of the regular season. Other basketball selections will be made in mid-March.

At the same time, NFL Commissioner Pete Rozelle reiterated that there is no plan under consideration for a common player draft with the rival American Football League.

Club owners officially adopted the rule to keep hands off college players until their varsity careers are over, including post-season bowl games, then voted strict disciplinary action for violations.

Rozelle announced the action after an executive session with the 14 owners at the annual league meeting.

A club guilty of an infraction could lose its entire draft list in the case of an extreme violation. The punishment could vary, for instance, from the loss of one or more first draft choices to a maximum of 20 choices, and the action could be spread out over one or two years if necessary.

The school announced Tuesday it would resume its basketball schedule Thursday against Denver. The remainder of last week's schedule was canceled after Estes' death.

The school announced Tuesday it would resume its basketball schedule Thursday against Denver. The remainder of last week's schedule was canceled after Estes' death.

In his spare time, Jones is an avid golfer, and plans to go out for the team this spring.

He also said he would like to play pro basketball if he had the opportunity and if it fit in with his future plans.

Jones, who was salutatorian of his high school class, is a general science major and plans to go into physical therapy work or medicine.

Jones first became interested in coming to Iowa while in elementary school.

"I saw a Big Ten game on TV that Iowa was playing in. The Hawkeyes weren't too good then,

so I thought I would have a good chance of making the team," he commented.

"I got athletic scholarship offers from Illinois, Northwestern, Wisconsin and some West coast schools, around 20 offers in all," he said. "But by then I was sold on Iowa."

Jones played high school ball at Carver of Chicago. In 1962, with Russell as its star the team was second in the state tournament. In 1963, with Joe Allen now a freshman at Bradley, leading the way Carver won the state title. Both those years Jones was the No. 2 man on the team.

"I played a lot in high school and I thought I could play college ball — I just needed a chance. Coach Miller helped give me the chance, so now it's up to me to prove that I can play," he said.

If his future play turns out to be anything like that which he has shown this season, Iowa fans, and opposition, will agree that Jones has proved himself.

10 Events On Iowa Sports Schedule

Spiced by a gymnastics dual meet which may decide the Big Ten title, the University of Iowa's upcoming sports schedule actually runs from Wednesday, Feb. 17 through Tuesday, Feb. 23 instead of the usual Friday to Monday program.

There are ten events but only two of them are in the Hawkeye field house: Purdue basketball Saturday at 2:30 p.m. and Michigan wrestling at 4:30 p.m.

The dual meet is between Iowa and Michigan in gymnastics at Ann Arbor. Both have perfect dual meet records and since the 1965 championship is decided on dual meet standing, the Saturday affair should be decisive although Iowa yet must meet Illinois and Minnesota. Michigan now stands 5-0 and Iowa has 4-0.

Swimmers open on the schedule Wednesday at Wisconsin, hoping to bring their season's record to 5-2. Iowa has beaten Illinois and Northwestern in succession.

The track team, big winner over Bradley and Northwestern, will shoot for first in a three-way meet at Champaign Saturday against Illinois and Purdue.

Fencers, with a 4-4 record, have Illinois and Wayne State at Detroit Friday and Case and U. of Detroit at Detroit Saturday.

UCLA remained in second place with five first-place votes and 295 points. The Bruins, 18-2, defeated Washington and Washington State.

The major changes involved the advancement of unbeaten Providence to third place Tennessee to eighth and Minnesota to ninth. Tennessee and Minnesota were unranked a week ago.

The Top Ten with won-lost records through Feb. 13 and total points:

1. Michigan 15-2 349

Jones Predicts Hawks Will Regain Timing, Keep WinningBy BILL PIERROT
Assistant Sports Editor

An optimistic Gerry Jones predicts that the Hawkeye baseball team will recover from its recent defeat and two close victories and continue to win.

Riding high after a victory over top ranked UCLA, the Hawks barely defeated Northwestern, 78-72, then fell to Michigan, 81-66, and slipped by Ohio State, 62-51.

"I don't think you can describe this as a letdown," Jones said. "We just weren't working as well together as we had been. Our timing was off, but I definitely believe our timing will come back for the next game."

"We will have to play better than we did against Northwestern, Michigan, and Ohio State if we are to beat Purdue, Minnesota and Illinois," Jones said.

Actually, even if the Hawks don't win all of these games, or win only a few, most Iowa fans will still be pleased with the season. Predicted by many to litter the Big Ten cellar, the Hawks have been proving that they can win, and are currently in the running for the conference title.

A big reason for this sudden rise to prominence has been the play of sophomore Jones. The 6-4 forward has proved his ability to score, rebound and play pressure defense. He has scored 251 points for a 14-point per game average, third best on the team. He leads the team in rebounding with 156 for a nine per game average.

Jones often gets the assignment of guarding the opponent's top scorer. Guarding Michigan's Cazzie Russell, a former high school teammate, he helped limit him to 19 points, while pouring in 26 himself.

"I played a lot in high school and I thought I could play college ball — I just needed a chance. Coach Miller helped give me the chance, so now it's up to me to prove that I can play," he said.

If his future play turns out to be anything like that which he has shown this season, Iowa fans, and opposition, will agree that Jones has proved himself.

GERRY JONES
Hawkeye Forward**Rough Road Ahead For Top-Ranked Michigan**

By THE ASSOCIATED PRESS

The road ahead to a possible national championship still is a long one for Michigan's top-ranked basketball team. Three of the Wolverines' remaining six games are away from home, where they sometimes run into a basketful of trouble.

The Wolverines lost to Nebraska on the Huskers' home court Dec. 12 and were beaten by St. John's of New York in the finals of the Madison Square Garden Holiday Festival tournament in New York Jan. 2. These have been Michigan's only setbacks of the season.

Monday night, the first-place team in The Associated Press' weekly poll just managed to beat seventh-ranked Indiana, 96-95, in double overtime at Bloomington. In the latest poll of 37 regional experts based on games through last Saturday, Michigan collected 23 votes and 349 points for the top spot. Points are awarded on a basis of 10 for a first-place vote, nine for second, etc.

The remainder of the Wolverines' regular season schedule includes road games against Minnesota Feb. 23, Illinois Feb. 27 and Ohio State March 8. The home games are against Ohio State Feb. 20, Wisconsin March 2 and Minnesota March 6.

Michigan is good at rebounding but they weren't as big as Michigan. UCLA relied on their jumping ability, while Michigan used their rebounding strength and height.

Fire Kills Mother; One Child Missing, Four Hospitalized

CLARINET RECITAL
AMERY, Wis. — A mother died and one of her five children was missing in a fire that destroyed their farm home Tuesday. Four children escaped and were hospitalized.

The body of Mrs. Harold Warwick, about 45, was recovered from the ruins. Sheriff's deputies continued to search for her daughter, Brenda, 9.

Hospitalized in Amery were Sharon, 19; Linda, 7; Jan, 6, and Geraldyn, 3. All suffered frostbite from 20 below zero cold, and smoke inhalation. None was reported in serious condition.

Mrs. Warwick's husband was away. He is employed at a Taconite plant at Silver Bay, Minn.

How to spend a weekend in Chicago for \$16

or woman can
stay at
your YMCA Hotel
and enjoy a
weekend for
\$16.00. Here is
how it did."

CAMPUS NOTES

feet dinner at 6:30 Friday at Gloria Dei Lutheran Fellowship Hall. Wives are to bring food from their countries.

LEGISLATURE DISCUSSION
State elected officials will discuss the current session of the Iowa Legislature at a meeting here Saturday sponsored by the Johnson County Democratic Central Committee.

Speakers will include Mrs. Minette Doderer and Bruce Mahan, representatives from Iowa City; Robert J. Burns, state senator from Cosgrove, and Lt. Gov. Robert Fulton of Waterloo. The meeting will be held at 8:30 p.m. in the Jefferson Hotel. The public is invited.

TRYOUTS FOR SHOW

Applications for tryouts for the variety show, "Kaleido," are available at the Office of Student Affairs or the Union Director's office. Applications are due at 5 p.m. March 5. Tryouts will be Sunday, 7:30 p.m., in the Union River Room. For further information, call Bill Parisi, 337-9675.

ENGINEERING WIVES

Engineering Wives Club will have a potluck supper at 6:30 p.m. today at Wesley House, 120 N. Dubuque St. Those attending should bring their own table service and covered dish. There will be a 75 cents per couple charge.

BUFFET DINNER

International Wives Club will hold its annual international buffet.

Festival Plans Underway

Plans for the 1965 Spring Festival are underway, Bill Parisi, A3, Chicago Heights, Ill., said today.

The festival, sponsored by Student Senate, will open April 22 with "Kaleido," an all-campus variety show.

U.S. Believes China Sets 2nd Nuclear Test

WASHINGTON (AP) — Four months after Communist China's first atomic explosion, the State Department said Tuesday, the United States "has reason to believe the Peking regime is preparing for another nuclear test."

Press officer Robert J. McCloskey, key, coupled the alert with a reassertion that the United States will stand by its military commitments in the Far East.

On the nuclear disclosure he added:

"The U.S. government deplores this indication that the leaders of Communist China are, in the face of the worldwide condemnation of atmospheric nuclear testing, continuing such tests."

McCloskey, addressing a news conference, gave no indication what evidence had been accumulated on the Chinese Communists' preparations for their second test.

But the United States predicted the first test last Oct. 16.

The site of that low-yield explosion was Lop Nor, a lake on the Taklamakan desert several hundred miles southeast of Urumchi, in western China. The area reportedly has been kept under observation by U.S. spy satellites and other means.

One possible hint of Red China's preparations was information from Nationalist China of sharp increase in weather reports in recent weeks over the Chinese mainland. A similar increase in radioed weather data preceded the first test.

But U.S. officials declined to say what significance was attached here to such weather reporting.

The State Department spokesman said there is no reason to believe that the forthcoming test would have any more military significance than the first explosion. Under present circumstances, the Chinese Communists are not capable of delivering a nuclear weapon, U.S. officials declared.

Talented Trio for 'Kaleido'

Pictured are the producer and directors of "Kaleido," student variety talent show to be held April 22. From left are producer Bill Parisi, A3, Mason City, secretary; Helen Goodell, A3, Peoria, Ill., booklet; David Kyner, A3, Waterloo, publicity; Kathy Varney, A3, Kewanee, Ill., and Neill Luebke, A3, Cedar Rapids, carnival.

Applications for the show are due March 5 with tryouts March 7.

Mayor Appears For Arraignment, Object of Search

DETROIT (AP) — Mayor Orville L. Hubbard of predominately white Dearborn, object of a five-day search by Federal authorities, appeared for arraignment in U.S. District Court Tuesday on an indictment growing out of a racial demonstration.

Hubbard is charged with conspiring to neglect and failing his duty when demonstrators pelted a Dearborn home with stones and garbage on Labor Day 1963 in mistaken belief it had been sold or rented to Negroes. Estimates of the crowd ranged up to 400.

Hubbard, who said he'd been out of town at least two of the last five days didn't quite make his appearance without arrest. Marshals nabbed him as he talked with newsmen outside the courtroom to which he was reporting.

will be representatives from Associated Student Governments (ASG) and the National Student Association (NSA).

The Senate has invited these representatives to present the cases for joining their organizations. Resolutions to join both groups are now under advisement.

Dave Goetz, A4, Davenport, distributed application forms for his committee's "Week in Des Moines" program during Tuesday's meeting.

The program, modeled after the "Week in Washington," is designed to give students an inside view of the workings of the State Legislature.

Under the program students may spend the week of spring vacation (April 12-15) with a legislative leader. Applications must be turned in by Feb. 28.

SOVIET EXPELLED

PARIS (AP) — Sergei Pavlov, general representative in Paris of the Soviet airline Aeroflot, was expelled from France Tuesday.

French authorities declined to give any reason for Pavlov's expulsion.

Leikvold — (Continued from Page 1)

"pretty much as usual" if the project were rejected.

I don't know of any alternative plan being considered for use in case the renewal project is rejected," he said.

The funds from the grant will be used to start planning and survey work of a 20-block area, principally in the central business district. Eighty-two acres will be included in the area.

The salary of the Iowa City urban renewal director, Arthur Westreback, will be paid from the grant.

The Urban Renewal Administration said it is earmarking an \$844,000 grant for the Iowa City project in anticipation of a later application for actual renewal work.

Iowa City is eligible to receive up to 75 per cent Federal financing of the renewal project.

Another resolution calling for recognition of honors courses to be placed on student transcripts was introduced for the first time.

Most of the business which piled high Tuesday night is expected to crop up again Sunday when the next Senate meeting is scheduled. Also scheduled for Sunday's agenda major design planning principles.

'Space Bird' On Target For Meteors

CAPE KENNEDY, Fla. (AP) — A Saturn 1 super-rocket sent a gigantic "space bird" named Pegasus soaring into orbit Tuesday to learn how manned spaceships might be harmed by the sandblast effect of meteoroids and how to protect them from the hazard.

Spreading its wings to a span greater than a four-engine airliner, Pegasus provided a huge target for the tiny, almost invisible particles it seeks to catch. It is the third largest satellite ever launched. The National Aeronautics and Space Administration (NASA) said it over which it swooped.

Each time one of the bits of space debris punctures the craft's thin metal skin, the "bird" emits an electronic squawk which is stored in a memory box and relayed to the ground on command.

Experts estimated that in a year's time, Pegasus would be bombarded by scores of thousands of meteoroids, but that only a fraction, perhaps 1,000, would have sufficient speed and size to pierce the protective coating.

NASA officials said their computers were busy and would be able to calculate today when Pegasus could be seen from the ground.

While Pegasus is probing a danger which faces moon-bound astronauts, another launching scheduled today is to learn more about their goal. Ranger 8 is to ride an Atlas-Agena rocket on a 65-hour, quarter-million-mile journey to continue lunar photographic exploration started last July by Ranger 7.

The Saturn 1 rocket that hurled Pegasus into space responded with a flawless performance that earned it an eighth straight test flight success without a miss. It is as tall as a 19-story building.

The first Saturn 1 rocket that hurtled Pegasus into space responded with a flawless performance that earned it an eighth straight test flight success without a miss. It is as tall as a 19-story building.

The first-stage powerplant built up a thrust of 1.5 million pounds to shoulder Pegasus through the dense lower atmosphere. The hydrogen-powered second stage fired for 10.5 minutes to drill itself and Pegasus into an orbit ranging from 308 to 458 miles high, almost exactly the path sought.

Erhard Wants Support Of Allies in Mid East

BONN, Germany (AP) — Chancellor Ludwig Erhard says he is counting on support from the Western Allies in the Middle East, where he is in hot water with Israel and the United Arab Republic.

In Jerusalem, the Israeli Parliament adopted a resolution Monday expressing "astonishment and indignation" at the West German decision. Prime Minister Levi Eshkol said Israel would not accept West Germany's offer of \$15 million in cash in lieu of undelivered arms.

The United States and other Western Allies do not recognize the United Arab Republic.

Despite a German decision to cut off all economic aid to the U.A.R., because of the invitation to Ulbricht, a dispatch from Cairo said preparations were going ahead for a red carpet welcome for the East German leader. He is scheduled to arrive Feb. 24.

President Gamal Abdel Nasser of the U.A.R. forced Erhard to stop

served on the House Dec. 5. Although the resolution not to seat the delegation until the challenge was settled failed to reach the floor, the party was encouraged by the 149 representatives who voted against a motion to seat the current delegation until the matter was settled, she said.

The FDP is now trying to hold its support and gain more for the vote on the challenge, which should come up in June or July.

If the vote is in favor of unseating the delegation, it will be up to

the House to decide how to fill the vacant seats.

In a brief history of FDP, Mrs. Gray explained that it was organized at a Congress of Federated Organizations (COFO) convention in April, 1964. The organizers were very sure to comply with Mississippi election laws, she said.

"This is more than the recognized Democratic party does in Mississippi," she contend. For instance, state law requires precinct party meetings to be held at the time and place announced in a legal publication 10 days prior to the meeting. The meetings are often held at different times and locations from those announced, and are often not held at all, Mrs. Gray said.

The FDP's goal is to be recognized by the national Democratic Party as the only legal Democratic party in Mississippi, she said. It is organized according to law and is open to all voters who wish to join, she said. The recognized Democratic Party is closed to Negroes, she continued.

The FDP first aroused national attention when it contested the seating of Mississippi delegates at the National Democratic Convention in Atlantic City. A compromise was offered them which involved giving the party two at-large seats. The compromise was turned down, to the dismay of many of the party supporters, Mrs. Gray said.

The members of the party were exercising their right to make their own decision, a right not often available to Mississippi Negroes, she said. The delegation has never regretted the decision, she added.

In an election held by the FDP from Oct. 31 through Nov. 2, 1964, FDP candidates obtained more votes than any of the Democratic party candidates. The election was conducted over a three-day period because of financial limitations and other difficulties which made it impossible to reach all the people of the state in less time, Mrs. Gray explained. The FDP election also polled more votes for Johnson and Humphrey than the regular election.

Over 100,000 voters are now registered with the Freedom Democratic Party, Mrs. Gray said. The test administered to registrants is simple and contains only pertinent information, she added.

Mrs. Gray urged all supporters of the party to ask their representatives to support the party's challenge when the matter comes before the House.

Mrs. Gray's speech in the Senate Chamber of Old Capitol was sponsored by the Friends of SNCC and the local Mississippi Support Program.

ELECTRONIC ENGINEERS—MATHEMATICIANS, ALL DEGREE LEVELS

A NEW DIMENSION IN SCIENCE AND TECHNOLOGY

In an era where the frontiers of intellectual endeavor demand constant investigation, imagination must be the crux of motivation.

The research laboratories at the National Security Agency exemplify that rare activity where imagination and a look at the possibilities of tomorrow are the accepted philosophy. A glance inside these modern, well equipped laboratories would reveal project teams engaged in a broad spectrum of scientific investigations.

Among them . . .

MAJOR COMMUNICATIONS SYSTEMS DEVELOPMENT—Design of new antennas, transmitters, receivers and terminal equipment. Constructing preliminary and basic engineering models to demonstrate the feasibility of using new communications concepts, techniques and circuits. Adapting and perfecting these through the design of a working prototype or field test model.

COMPONENT MINIATURIZATION STUDIES—Practical attempts, through basic design and analysis, to reduce the size yet improve the capability of communications and electronic data processing systems.

SYSTEMS SIMULATION STUDIES—Utilization of modern digital and analog computers to predict the feasibility of engineering ideas and innovations.

MATHEMATICAL INVESTIGATIONS—Exploring the phenomena of the intermarriage of mathematics and electronics in the design of secure communications systems; an essential element of the complex science of cryptology.

ENVIRONMENTAL TESTING—Proving the capabilities of components and systems by simulating atmospheric extremes. These tests are conducted with the latest equipment capable of simulating a wide variety of environmental conditions.

For the ENGINEER and the MATHEMATICIAN, NSA provides a unique variety of opportunities in a NEW dimension in science and technology . . . To assure the success of this venture, scientific employees are encouraged to pursue graduate studies at local universities under Agency sponsorship.

Representatives of the National Security Agency will be conducting interviews on campus on:

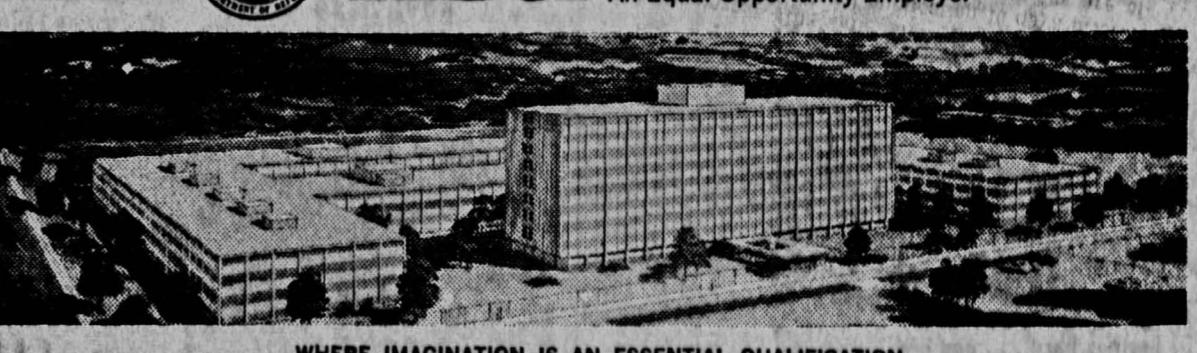

February 22, 23, 1965
