

U.S. Hurls Biggest Rocket Ever Aloft

Mighty Titan 3C Scores Success On First Flight

CAPE KENNEDY, Fla. (AP) — A mighty Titan 3C, the most powerful rocket ever fired, scored a thundering success on its maiden test flight Friday and signaled the Air Force to proceed with plans to establish a military beachhead in space.

In the most spectacular launching ever witnessed at this missile wonderland, the huge triple-barrel rocket developed total thrust of more than three million pounds, spewed a tail of flame more than 600 feet long and flung into orbit a 21,000-pound dummy satellite — the heaviest payload ever launched.

THIS ORBITING chunk of lead is the forerunner of manned and unmanned military machines which will patrol and perhaps dominate space, preventing other nations from using it for war-like purposes.

Maj. Gen. Ben I. Funk, commander of the Air Force Space Systems Division, said the flight represented "a great day for the nation, the Defense Department and the Air Force."

"The success with a combination of solid — and liquid-fuel rockets," he said, "demonstrates the flexibility of the booster for military as well as other payloads. I feel it will be the catalyst which will kick off many programs which the Air Force has been working on and you have been reading about. The manned orbiting laboratory should get the green light in short order."

Within a few days, the Defense Department is expected to give the Air Force a go-ahead to develop the manned laboratory, which has been under study for several months.

THE LAB, WHICH will be the size of a house trailer, will keep two or more astronauts in orbit for a month or more to determine what military missions man can effectively perform in space. Officials hope to launch the first vehicle by 1968.

Within three years, Titan 3C rockets are expected to establish these unmanned space systems: a network of 24 communications satellites for swiftly relaying military messages around the world; reconnaissance, navigation and satellite intercepter payloads.

With its weight-lifting capability, Titan 3C also will be used for scientific payloads. One project under consideration is to send a package of nine payloads to the moon with a single rocket to determine strength of the lunar surface.

All these plans received tremendous impetus at 9 a.m. Friday when the first of the Titan 3C ignited with a great roar and rush of flames after a perfect countdown. The shot was televised.

Bebee Named Fire Chief

Iowa City has a new fire chief. Dean E. Bebee, 47, of 918 Dearborn Street has been named acting fire chief to replace Chief Adrian F. Rittenmeyer, 49, of 314 East Fairchild Street.

Rittenmeyer resigned because of poor health and will be assistant chief. Rittenmeyer has served as fire chief since October, 1964, and Bebee has served as assistant fire chief since Dec. 1, 1964.

Bebee joined the Iowa City Fire Department in 1949. He was promoted to lieutenant July 15, 1959, to captain Jan. 1, 1964, and then to assistant chief. He will receive a salary increase of \$15 a month. Rittenmeyer will take a \$30 per month cut in salary.

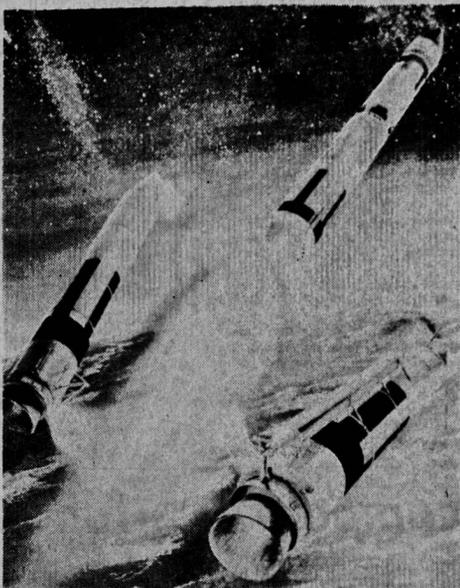

Rittenmeyer joined the Iowa City Fire Department in 1933. For all practical purposes, Rittenmeyer and Bebee are switching jobs.

Rust Group Given Central Telephone

A central telephone number has been set up for contacting the 18 Rust College students in Iowa City this summer for special study.

The number, 337-5321, is listed for Mr. and Mrs. Mitchell Greene, 1220 Second Ave. The phone will be a clearing house for offers of part-time employment, requests for babysitters and social invitations.

The students' expenses and living costs at the University are being paid by the Mississippi Support Program. However, the nine boys and nine girls, all undergraduates, need to earn money for fall tuition at the college, which is in Holly Springs, Miss. The students are looking for afternoon, evening and weekend employment.

Flash Gordon Style

This artist's conception shows the staging rockets as they jettison the spent solid-propellant booster motor cases of the Air Force Titan 3C Standard Space Launch Vehicle at the proper altitude. Simultaneously first stage engines of the liquid propellant core vehicle ignite and the core vehicle pulls away into space. The Titan 3C was launched successfully from Cape Kennedy Friday on its first test flight. —AP Wirephoto

Reporter Takes Stock Of U.S. Newspapers

The function of the press is to inform the public, according to Des Moines Tribune state house reporter Drake Mabry, who addressed a session of the Workshop on the Newspaper in the Classrooms of a Free Society Friday.

According to Mabry, the press has failed in many instances because most newspapers are business-oriented. Many editor, he added, have come up through the business side of a newspaper.

"One of the major responsibilities of a newspaper is to serve as a watchdog of public officials," he said. He pointed out that many public officials dealt in half truths and outright lies. They do this for political reasons, to be re-elected, he said.

Mabry emphasized that society and government are becoming so complex that a mere printing of the facts was not enough. They must be interpreted and analyzed, and analysis is where most newspapers fell down, he said. Many reporters make the mistake of getting too close to public officials to be effective as reporters, he said.

According to the Tribune writer, a conflict has arisen between the public's right to know and the right of public officials to deliberate and make decisions.

"There is a difference between gathering the news and reporting the news," he said.

He explained that gathering the news was finding out what a person meant and why he committed an act. He defined reporting as writing and analyzing the facts that were gathered.

Throughout the speech, Mabry cited instances within the state of Iowa where reporting the facts gave an incorrect interpretation of the story. Events are becoming too complicated to be generally understood, he said.

In spite of all the shortcomings of the press and public officials," he concluded, "the American public is the best informed in the world."

U.S. Arms Own Craft — 'Copter Violates West Berlin Air

BERLIN (AP) — An armed East German helicopter flew over West Berlin Friday in defiance of the Western Allies.

Authoritative sources said the U.S. Army placed machine guns on its helicopters as countermove. A U.S. Army spokesman said he could neither confirm nor deny that machine guns were mounted on the American helicopters.

THE EAST GERMAN helicopter, bearing the same number as one spotted throughout the week, was armed with a 12.7mm machine gun. It flew over the U.S. Army quartermaster compound and near the sprawling McNair barracks which house the U.S. Army Combat Infantry Brigade.

The helicopter, flying at about 1,000 feet, changed course and whirled back into East Germany after a U.S. Army helicopter was rushed to the scene. The intrusion was the most serious challenge of Western rights to air space over Berlin since the East Germans had restricted them to flying along the wall and the borders around the city.

Another East German helicopter, of a smaller type, also flew over Berlin but it was not known whether this one was armed too.

U.S. OFFICIALS said they viewed the flights, even when they do not take place over West Berlin, as extremely serious violations of postwar four-power agreements. These agreements clearly state that only planes of the United States, Britain, France and the Soviet Union have a right to fly within the control zone, which extends 20 miles in radius from the city's center.

The intruder was the most serious challenge of Western rights to air space over Berlin since the East Germans had restricted them to flying along the wall and the borders around the city.

Rusk Cites Communist Rebuffs on Viet Peace

Troops Hunt For Casualties In Viet Nam

Rescue Boats Seeking 7 Americans Missing After Bomber Collision

SAIGON, South Viet Nam (AP) — Ground troops hunted fruitlessly under sporadic sniper fire Friday for enemy casualties from the saturation bombing of three square miles of Viet Cong jungle by 27 giant B52 jets and dozens of other U.S. planes.

A thousand miles or more way, rescue craft sought seven Americans still missing from the collision of two B52s over the choppy South China Sea on their flight toward Viet Nam from Guam for the first war mission of the eight-engine, \$8-million bombers. Four survivors and the body of a dead crewman were recovered.

U.S. AIR FORCE spokesmen declined to evaluate immediately the results of the raid, which splintered trees, burned foliage and churned earth in the D zone 25 miles north of Saigon. But developments indicated the Viet Cong were far from neutralized.

Military sources said the only enemy that reconnaissance patrols encountered were live snipers. Communist riflemen fired on each of the three 60-man Vietnamese units dispatched with about a dozen advisers to scout the area while smoke from the bombardment was still rising. They also shot at helicopters running an aerial check.

ELSEWHERE, TWO U.S. enlisted men were killed and a third wounded in the area of Da Nang, 380 miles northwest of Saigon.

A U.S. military spokesman said one of the dead and the wounded man were hit by a U.S. Marine artillery shell that fell short. A Marine was killed by a shot in the chest.

A Viet Cong mortar attack was reported to have wounded 32 persons, including a U.S. Army adviser, in the Cu Chi area, 20 miles southwest of Saigon. Aircraft and troops were dispatched to hunt the mortar crewmen.

Military spokesmen said a Vietnamese militia company engaged in a heavy fight with a Viet Cong force of undetermined size in the central highlands about 285 miles northeast of Saigon. They reported three U.S. Special Forces men were wounded there.

REFLECTING Viet Cong inroads on South Viet Nam's transportation system, the central post office announced there will be no more deliveries of surface mail to five highland provinces and all the central lowland provinces in the immediate future.

Red ambushes and sabotage were blamed. Reports from various points told of bridges blown, trains ambushed and canals blocked.

U.S. Air Force and Navy planes maintained the air war against Communist North Viet Nam, at one point hitting Highway 7 about 55 miles south of Hanoi. Pilots said they cut the highway in several places, destroyed three barracks and 10 buildings.

Both planes and ships were involved in the hunt at sea for the missing B52 crewmen, complicated by 12-foot waves.

IN WASHINGTON, Secretary of State Dean Rusk told newsmen he believed the raid was worth the effort.

Expect Rain in Northern Iowa

Forecasters said Friday the mild temperatures and rain-free weather that has prevailed around Iowa for the past week will be coming to an end during the weekend.

Temperatures will be slightly warmer today and tonight, the weather bureau said. Afternoon highs were expected to range from the upper 70s northeast to the 80s in the west and south.

Red China Breathes Fire Again

RED CHINA SAID FRIDAY IT WILL SEND VOLUNTEERS to Viet Nam if the Viet Cong asks and "if the United States intends to fight to the end, we will support the Vietnamese people in hitting back to the end."

A broadcast of a Foreign Ministry statement declared "the 650-million Chinese people pledge themselves to back the great Vietnamese people to the hilt."

Respects to DeGaulle

PARIS (AP) — Vice President Hubert H. Humphrey said Friday a main reason for his quick trip to France with America's newest spacemen is to pay his respects to Charles de Gaulle, "a great leader."

Humphrey made the statement at a news conference at the International Air and Space Show shortly after arriving at Le Bourget Airfield with astronauts James A. McDivitt and Edward H. White II, the Gemini space twins who recently completed a four-day orbital flight.

Humphrey will meet De Gaulle Sunday afternoon.

Floods Ravage Great Plains

FLOODS SET OFF BY VIOLENT THUNDERSTORMS swept out of the mountains and eastward across the Great Plains from Montana to New Mexico on Friday, causing at least 13 deaths—possibly many more—and damaging uncounted millions of dollars worth of property.

The fury centered in Colorado. There Gov. John A. Love begged residents to evacuate the Arkansas River flood plain in the southeast part of the state. Floodwaters which cut a mile-wide swath through Denver on Wednesday night raged down the South Platte River 200 miles to the north.

Full Cabinet Gets Report On Situation

B52 Raid Is Defended; Mum on Possible Use Of Big Craft in North

WASHINGTON (AP) — The United States has explored many paths to peace in Viet Nam but has met with constant Communist rebuffs and indications of a desire to drive ahead militarily, Secretary of State Dean Rusk told the Cabinet on Friday.

"I'm not suggesting that all these channels are closed," he said. But he noted it appears the Reds want to continue their military strikes under cover of the current monsoon rains which give them some protection from U.S. bombing.

HE ADDED "we have no evidence" the Communists will be interested in a nonmilitary solution even after the rains stop in September and October.

However, he cautioned that if they do have such discussions in mind they probably would not tip their hand in advance.

Rusk presented his report during a Cabinet session with President Johnson lasting a little more than an hour, and then discussed it with newsmen.

RUSK, asked about use of B52 Strategic Air Command bombers in a strike at a reported Communist concentration in South Viet Nam on Thursday, said, "I would think it was worthwhile myself."

He said nuclear-capable bombers had been used to drop conventional explosives during the Korean War and their use now shouldn't make too much difference in world opinion.

He said results of the "strike are still being examined and he wouldn't comment on whether B52s such as hit the Communists in South Viet Nam might be used in bombing North Viet Nam, hit so far only by smaller U.S. and Vietnamese aircraft.

RUSK SAID he reviewed the many efforts the United States has made during the last 4½ years to obtain a peaceful settlement in Southeast Asia, starting with the 1961 meeting between the late President John F. Kennedy and former Soviet Premier Nikita S. Khrushchev in Vienna.

He mentioned among others the 1962 Geneva conference on Laos, the proposal of 17 non-aligned nations for unconditional discussions on Viet Nam — a plan accepted by the United States — and other U.S.-accepted peace efforts suggested by India, plus a suggested meeting to sure the neutrality of Cambodia.

But he repeated, "We do not see at the present time active interest on the part of Hanoi or Peking, or active effort by Moscow to bring this matter to a peaceful conclusion."

GOP's Bliss Displeased With Barry

WASHINGTON (AP) — Republican National Chairman Ray C. Bliss said Friday Barry Goldwater's new-born Free Society Association will hamper his quest for party unity and money to rebuild the battered GOP.

"I believe in a free society," said Bliss. "What better way is there to maintain it than with a strong two-party system?"

Bliss named a new party finance chairman — retired Gen. Lucius D. Clay — and indicated the conservative organization rallied around the party's beaten presidential nominee may have made his job more difficult.

"Anyone would be a novice to think that splinter groups within your party don't drain off some funds," said Bliss.

Unveiling his organization Thursday, Goldwater said it would be academic and educational in make-up and goals. The former Arizona senator said the society would launch "a crusade of political education" in the principles of conservatism.

He said that should help convince people they belong in the Republican party.

Bliss told a news conference he tried in advance to discourage formation of the society. He did not discuss it with Goldwater, Bliss said, but talked to Denison Kitchel, Goldwater's presidential campaign director and the society president.

It's Time To Draw the Line

ATLANTA (AP) — "Ooops," said the leggy model as she blushingly dropped a pink bra. "I guess I'm a little nervous."

"Can you imagine a machine drawing patterns for panties? Where will it end?"

It will end, says International Business Machines, with better-fitting clothing.

The shapely model's panties were broken down — believe it or not — into straight lines traced by a computer using a ball point pen.

As the panties were outlined, she said, "Ooooh!"

An IBM man said, "Ah, that's it!"

The computer also graded the bra. That is, working from a 34-inch model, it provided the pattern that would be needed for other sizes — both smaller and larger. The design of the bra was preserved.

The machine — the IBM 1627 — can also take into account regional differences.

"For instance, a government study shows that women are bustier in the South," an IBM spokesman explained. "Men in the West are slimmer, and men in the Northeast tend to expand faster in the

No place to hide

A psychosis they call it. And who knows but what they might be right.

After all, more than 50 per cent of today's university undergraduate population enrolls in graduate study programs, and an even larger percentage contemplates such a move.

Graduate students, we are told, are hiding — from the draft, from job-hunting, from girl friends and boy friends and parents. Once a student has jostled his way through his favorite ivory-covered gates, he "has it made." He can breathe a heart-felt sigh of relief, sit back in some plush graduate study room and serenely contemplate the safety he enjoys behind the impregnable walls of academia.

All this and more has been astutely pointed out by John Keats, a contemporary social critic not to be confused with the poet, in a recent issue of Life magazine.

Students, according to Mr. Keats, are not the only ones afflicted with the disease. Employers in business, the sciences, the arts will scarcely interview anyone unless he has at least a masters degree. (The quality of the institution from which the degree was earned is usually not considered.) One student interviewed by Mr. Keats said, "In my field, college is just kindergarten. The M.A. means about as much as a high school diploma. The Ph.D. is like a college diploma."

Graciously enough, the author revealed that there are some (few, it would seem) among the graduate ranks who actually are interested in learning something.

There was little Mr. Keats left unsaid on the negative side of the graduate student question. His viewpoints were nicely supported by similar views of several high-ranking educational authorities and illustrated by the comments of several prospective grad students with attitudes toward advanced education which could best be described as cavalier.

The implication of it all was that most college people are confused and afraid of whatever it is they're confused about. And so they seek refuge from the perils of a decision-making withing the confines of graduate schools. Though we grant that many college seniors are no more sure of "what they want to be when they grow up" than they were when they graduated from high school, we can still take exception to his idea that graduate school is a waste of time for all of them.

Everybody's going to grad school — it's the thing to do. Gaining admission is becoming as much of a cut-throat competition as is gaining admission on the undergraduate level.

The student begins "the graduate school gold rush" by spending many miserable hours worrying if his 3.8 grade point will be high enough to get him into a halfway respectable school. Then he begins sweating his performance on the notorious GRE (Graduate Record Exam). That settled and admission granted, he begins the long and nerve-racking wait for word on that fellowship or assistantship he so desperately needs if he is to continue his education.

Even under the most ideal conditions — a full fellowship, a soft assistantship, or a certified check from dad — the graduate's life is not one long visit to the Playboy Club. Whether he's enrolled in a mediocre or a top-notch college, the competition for grades is just as sharp. The mediocre student competing with other mediocre students is no more assured of success than is the brilliant scholar competing with other brilliant scholars.

And so he plows through mounds of research books, compiles endless statistical tables, and has an occasional beer with the boys.

Whatever motives are involved in the entry into grad school, one thing is increasingly clear — only the fittest survive. And in order to survive, even the draft-dodger must work, study, compete, and, surprisingly enough, he often learns something in the process.

All things considered, it would seem that if a person were looking for a place to hide from the rigors of decision-making, and workaday life, he could surely find a better place.

Dial 337-4191 if you do not receive your Daily Iowan by 7:30 a.m. The Communications Center is open from 8 a.m. to 5 p.m. Monday through Friday and from 9 to 10 a.m. Saturday. Make good service on missed papers is not possible but every effort will be made to correct errors with the next issue.

Letter to the President— Viet Nam—answer needed

(Excerpted from a letter sent to President Johnson by an Iowa student.)

Dear President Johnson, It is perhaps presumptuous of me as an individual with no special knowledge of South East Asia and even more as a visitor to your country — I am a British graduate exchange student — to write you concerning your foreign policy, yet I feel I would be cowardly if I did not write, if I were not at least able to say that I had done my best to protest against a policy that I feel to be morally repugnant as well as politically inexpedient. For this is not just a matter of American but of world-wide significance; if a world war should result from your policies in Vietnam there will be no victors.

IN A COUNTRY such as this, where the majority of citizens do not seem to me at least to have any real respect for education as such beyond the basic skills, but where many people still nostalgically set store by the "pioneer" virtues of toughness, independence, and obstinacy, it is all too easy publicly to discredit those who oppose your policies as a few thousand beatnik and irresponsible students, a few hundred unrealistic professors.

You yourself must be uneasily aware that this picture is not true or fair. These demonstrators are, or are training to be, professional thinkers and reasoners, the nation's intellectual elite, and should at least be listened to carefully rather than glibly dismissed and insulted.

I should be extremely grateful if you could find the time to let me have your own sincere and considered responses to the following questions:
● Has there been any government in South Viet Nam since 1954 that you could describe as genuinely democratic or representative?
● Have ordinary Vietnamese people been given any chance either to elect such a government or to comment on their country's affairs other than through bloody rioting? If you would not tolerate such a situation in the States, why should you seek to perpetuate it elsewhere?
● IF THE U.S.' main concern in South Viet Nam is not to "lose face" — and what an appalling reason for doing anything! — do you imagine North Viet Nam or Communist China is any more eager to lose face? Does not any possibility of a solution that may exist depend on a willingness on both sides to forego some advantage?
● Do you not agree that, however much it may be to the communist world's advantage to exploit the situation for their own ends, the basic problem in Viet Nam is one of nationalism and self-determination rather than of communism, and that therefore attempts to combat this desire for national unity by force are more likely to drive Viet Cong fighters (originally South Vietnamese, incidentally) into yet greater reluctant dependence upon Red China?
● DOES NOT America's reliance solely on superior force deprive it, at least for the duration of your presidency, of any right

to take a high moral stand towards other western nations as it did, rightly, against my own country and France at the time of Suez? Are you not now throwing away your country's actual moral leadership for a mirage of military success?
● In any case, you can destroy any idea, however repulsive, by mere force? Could Britain in six centuries of savage repression destroy Irish nationalism? Or Turkey stamp out Greek nationhood through a similar period of occupation? Surely you recognize that the only way to overcome an idea is to put forward a better idea? Yet present U.S. policy seems perilously negative and devoid of ideas.
● Is it not tragic that, at a time when the United States should be doing all it can to strengthen the United Nations, which previous U.S. governments helped to build and which you pledged yourself to support, your government, by deliberately flouting majority U.N. opinion

over Viet Nam, is helping to weaken not only the General Assembly but the whole idea of international co-operation for which it stands?
● FINALLY, can you deny that your whole policy in South Vietnam is, even in military terms, an appalling gamble? Is the support of one constantly crumbling and unrepresentative, military-dominated succession of governments really worth the alienation of all Asian and most of Western opinion? Will there be much point afterwards in trying to buy back Asian favour with massive aid when the North Vietnamese are still suffering the physical and psychological effects of massive bombing? Or is not this rather the very way to drive non-committed Asians into Communism as the only apparent alternative to what, under the guise of anti-communist crusades, is now really beginning to look like a revival of imperialism?

"What's The Matter? What's Wrong With Safety Signs?"

Racing competition—fun or profit?

(From the Nation — last part of an article on the racing business.)

Stock car racing is only one part of the Ford effort and causes a lot less grief in Dearborn than do some of the related programs. No other firm has ever attempted to win on as many fronts at one time. Even the Daimler-Benz AG, which has a competition record unparalleled in the history of racing, built cars for more than one championship only once (1955) and then quit, there being no more worlds to conquer and the market situation in Germany being so good that they still, a decade later, have a waiting list.

In addition, Daimler-Benz had a wealth of homegrown technicians who were familiar with the racing business and who had years of experience in it before they decided to do two things at once. Ford, with practically no racing experience, has been farming out most of the work. Holman & Moody runs the stock car part of the enterprise and does it well.

The Indianapolis part of the program began with Ford supplying engines and an Englishman, Colin Chapman, building the chassis and running the two-car entry. Chapman's rear-engine creations gave the Indianapolis Establishment some long-overdue lessons in chassis design, and Ford's V8 engine is now well on its way to supplanting the four-cylinder Offenhauser.

BUT IN ITS first two tries at Indianapolis, Ford was not able to do better than second. This year, there doesn't seem to be much doubt about a Ford victory, with 17 Ford-powered cars entered, but the publicity bloom is already off the rose. Any splash Ford might have made by coming, seeing and conquering should have been made in the first year.

By the 1966 race, when the Ford engines (at \$15,000 a copy) will be in practically everyone's hands, there will scarcely be any mention of the type of power plant, or of whether it is placed fore or aft.

The most confusing part of Ford's racing is in long-distance sports car events. In 1963, Ford tried to purchase the Italian Ferrari firm, some marketing mumbujumbo in Detroit having reasoned that the famous Italian trademark would enhance the image of a six-cylinder Falcon. Negotiations broke down at the last minute and Ford then decided if it couldn't buy them it would beat them.

FORD THEN bought a rear-engine coupe design created by Eric Broadley, one of the better-known English race car constructors, and (with Broadley's help) set about transforming this into something of its own.

It was spectacularly unsuccessful in 1964, nine of the cars starting in four races and none of them finishing. At the beginning of this year the GT40 coupes, as they are named, were first and third at the 2,000-kilometer Daytona race, and another was second in the Sebring (Fla.) 12-hour affair, thus giving high hopes to Ford people and tending to make them overlook the basic fact that the car lacks horsepower.

Ford's main objective for the

rear-engined coupe is victory in the "24 Hours" at Le Mans, the world's most famous endurance race, which this year will be run on June 19-20. The way things look to all but Ford people, the only way the Ford can win is if the Italian cars drop out en masse — a highly unlikely prospect considering that 14 are entered.

IN DRAG RACING, which consists of covering a quarter-mile from a standing start quicker than the next fellow, Ford gets its share of wins but not as many as Plymouth and Dodge.

Drag racing draws more than 7 million spectators, including the "hard core" youth market, and success here is important.

General Motors watches with interest, but as yet has not watched with alarm. For one thing, GM's share of the market is so huge now that it is always

looking over its shoulder to see if the antitrust people are following. Secondly, GM identifies its products with racing without actually racing. There are Pontiacs, for example, named Bonneville, Le Mans, Grand Prix and GTO, all names taken directly from racing.

Buick has the Gran Sport, Chevrolet the Monza (a famous circuit) and the Corsia (Italian for race), the Chevrolet and Pontiac have for some time used the checkered flag motif in their design.

GENERAL MOTORS, to be sure, does not content itself with sticking Walter Mitty flags on the sides of its cars. Every so often the door to the GM Technical Center at Warren, Mich., opens just a crack and a look at what is going on inside is enough to make Ford and Chrysler shudder.

The last time General Motors technicians came out in the open was at the Bahamas Speed Week in December, 1963. They cleaned house there, but the exposure in the press, sprinkled liberally with sarcastic remarks concerning GM's policy of nonparticipation, were enough to clamp the lid down.

Thus, GM's back-room engineers are in a dilemma. They aren't supposed to be doing anything of this sort but when the day comes that GM's top management decides to go to the races, they had better be ready to win that same afternoon.

Does it work? Does it sell cars? It is obvious that all the manufacturers think it helps. How much it helps they probably don't know, but one thing they predict with confidence — American Motors is not going to sell many Ramblers in the youth market.

Mothering bugs you

NEW YORK — One of the reasons women feel blue in the morning is that they haven't slept during the night "listening for baby." Men, on the other hand, sleep while baby cries, but have "little trouble" getting up when they want to, according to The Insider's Newsletter.

Researchers at Duke University Medical Center and the Durham (N.C.) Veterans Administration have found that fiftieth, easily interrupted sleep is one of the most significant conditions accompanying depressive disorders which occur twice as frequently among women as among men.

They say that the difference may be connected with the motherly instinct which causes women to sleep with "one ear open for baby's cries."

In a series of tests conducted by the researchers, normal, healthy subjects were subjected to various types of noises as they slept, including a baby's cry. At every level of sleep, a significantly higher number of women than men were aroused by the noises.

The investigators said the hyperactive arousal system of women is a necessity of life in the mothering role and is probably related to differences in the system of female hormones and enzymes or to differences in the nervous system.

They added that motivation has a lot to do with whether a person will awaken to certain noises. This may explain why men have little trouble waking for an early golf game, but hear nothing when baby cries.

University Bulletin Board

University Bulletin Board notices must be received at The Daily Iowan office, Room 201 Communications Center, by noon of the day before publication. They must be typed and signed by an advisor or officer of the organization being published. Purvey social functions are not eligible for this section.

THE SWIMMING POOL in the Women's Gymnasium will be open for recreational swimming Monday through Friday, 4 to 5 p.m. This is open to students, staff, faculty and faculty wives.

MAIN LIBRARY HOURS: Monday-Friday 7:30 a.m.-midnight; Saturday 7:30 a.m.-5 p.m.; Sunday 1:30 p.m.-midnight. Desk hours: Monday-Thursday 7:30 a.m.-10 p.m.; reference and reserve closed 5 p.m.-5 p.m.; Friday and Saturday 8 a.m.-5 p.m.; Sunday 2 p.m.-5 p.m. Reference closed Sunday. Departmental libraries will post their own hours.

IOWA MEMORIAL UNION HOURS: Building — 8 a.m.-11 p.m. Sunday through Thursday; 8 p.m.-midnight, Friday and Saturday; Gold Feather room — 7 a.m.-10:45 p.m. Sunday through Thursday; 7 a.m.-11:45 p.m. Friday and Saturday; Cafeteria — 11:30-1 p.m., 5:45-8 p.m. Monday-Friday; 11:30-1 p.m., Saturday; 5-8:30 p.m., Sunday.

YWCA BABYSITTING SERVICE: Call YWCA office, 2340 afternoon.

WOMEN'S GYM: Open hours for badminton, Tuesday, Thursday and

COMPLAINTS: Students wishing to file University complaints can now turn them in at the Student Senate Office.

PARENTS COOPERATIVE BABYSITTING LEAGUE: Those interested in membership call Mrs. Paul Neuhauer at 338-8070. Those desiring sitters call Mrs. David Griffin, 338-9924.

CHRISTIAN SCIENCE: Organization meets each Tuesday eve at 7:15 in Union Room 1. All are welcome.

INTER-VARSITY CHRISTIAN FELLOWSHIP: An inter-denominational group of students meets for Bible study each Tuesday evening at 7:30 in Union Room 203. Anyone who is interested is very welcome to participate.

Campus Notes

PUBLICATIONS WORKSHOP

Lester G. Benz, assistant professor of journalism, will attend the annual high school publications workshop at Ohio University, Athens, Ohio, Sunday through Friday.

Benz will speak Tuesday on "This Newspaper Business — It's a Lot of Fun" and Wednesday on "What You Can Gain from Working on School Publications."

Benz will also participate in newspaper advisers' group sessions and classroom appearances.

About 2,000 high school students are expected to attend the workshop.

IOWA SOCIALIST LEAGUE

The Iowa Socialist League will hold an open meeting at 8 p.m. Monday in the Union Pentacrest Room. The aims, objectives and political positions of the league will be discussed.

OUTSTANDING THERAPIST

Leo J. Morrissey, instructor in physical therapy, has been named the outstanding physical therapist in Iowa by the state chapter of the American Physical Therapy Association.

Morrissey received the Olive Farr Award for 1965. Farr is a professor emeritus of the University.

Morrissey, a pioneer in physical therapy in Iowa, MORRISSEY was the first president of the state association after it was incorporated. He has served on its board as directors and has been chairman of the legislative committee. Morrissey has also published a number of professional articles and presented scientific papers.

division, \$15 for greeting cards featuring Christmas, and a portable typewriter for "Lucky Three," his entry in prose and poetry.

The contest was sponsored by the national organization of the Hospitalized Veterans Writing Program, a volunteer organization to encourage creative writing for recreation and rehabilitation. More than 1500 veterans entered the contest.

WORKSHOP SPEAKER

Richard A. Kalmann, a staff associate with the Iowa Educational Information Center, will speak on "Conceptual Principles of Data Processing" at the annual workshop in School Accounting in Milwaukee Thursday.

The week-long workshop is sponsored for private school administrators by the Division of Continuing Education at Marquette University.

MEAL CO-OP

The cooperative eating community at Wesley House is now serving meals planned and prepared by students each weekday at 6 p.m. Currently there are seven students in the co-op.

Others interested in joining the co-op can phone Wesley House for additional information.

FILM RESCHEDULED

The Japanese film "Ikiru," scheduled to be shown Thursday night, was delayed in shipment. It has been re-scheduled for 8 p.m. Monday in Shambaugh Auditorium. There will be no admission charge.

The film is part of a series being sponsored by the Department of Chinese and Oriental Studies.

Physical Education Lecture Series Set For Wednesdays

A lecture series sponsored by The University departments of Physical Education for Men and Women has been scheduled for June and July. The lectures will be held on Wednesdays at 7:30 p.m. in the Iowa Memorial Union, and are open to the public at no charge.

A part of the U of I Physical Education Colloquium, the series began Wednesday with an address by Dr. Norman White, associate director of health, physical education and athletics for the Des Moines public schools. He spoke on "Supervision of Physical Education in City Schools."

Discussing "Sportsmanship as a Moral Category" June 23 will be Prof. James Keating of the De Paul University Department of Philosophy. He will speak in 203 Iowa Memorial Union. Dr. Keating is a former dean of Lewis College, Lockport, Ill., and has published several articles dealing with ethics and athletics.

Leon Smith, associate professor of physical education for men, will give a report on the International Conference on Sports Psychology June 30 in the River Room, Iowa Memorial Union.

"Trends in Intercollegiate Athletics" will be discussed July 14 in the River Room by Robert Ray, dean of the University Division of Extension and Special Services. Dr. Ray is past president of the National Collegiate Athletic Association.

Former Student's ID Used To Cash Checks

A number of checks have been cashed at local businesses by a person using identification cards lost by a University freshman, during the last weeks of the spring session.

The student was Randall D. Carlson, Vandenberg Air Force Base, Calif. The billfold he lost contained his Armed Forces Dependent Identification Card and California Drivers License.

WRITING CONTEST

A patient at the Veterans Hospital has won three awards in the 19th Annual Hospitalized Veterans Writing Contest. He is Ralph H. Potter, Bellevue.

Potter won \$15 for his entry in the "Little Books for Little Boys"

City Women's Club Sews Layette Garments

Fifty-four layette garments for the Johnson County American Red Cross have been sewn by the public welfare branch of the Iowa City Women's Club. The garments will be given to needy families.

Women who gave 50 hours to the sewing projects were:

Mrs. Fred Ballard, 311 1/2 S. Dodge St.; Mrs. James Lacinia, 1921 F. St.; Mrs. Fred Miller, 821 Melrose Ave.; Mrs. William Parizek, 917 E. Fairchild St.; Mrs. Ed Schuppert, 511 Ronalds St.; Mrs. George Tomlin, 812 E. Bloomington St.; and Mrs. Herman Wolters, 115 Seventh Ave. N. Mrs. Tomlin was chairman of the project.

Iowa Stellar Research Gets \$41,500

Research designed to further understanding of the creation of the natural elements and energy will be undertaken at the University under a \$41,500 grant from the National Science Foundation (NSF).

The grant will support a research project headed by Satoshi Matsushima, associate professor of physics and astronomy.

Matsushima and his students will pursue theoretical research on the problems of energy transport in the outer layers of the stars, interstellar medium, and the atmospheres of the planets and the earth. The grant is for three years, except for the next academic year when Matsushima will be on leave in Japan as an exchange professor.

Matsushima's work in Japan will be supported by an individual grant of \$16,350, also from the NSF, for a study of theoretical astrophysics and observational astronomy. Two students, James Hansen, G. Denison, and Andrew Lacin, G. Burlington, will accompany him to Japan and will continue their studies as National Aeronautics and Space Administration trainees.

With these grants, the professor and his students hope to develop theory to be applied to the analyses of ultraviolet light spectra of stars recorded from space vehicles as well as visible light observed from ground-based telescopes such as the 200-inch reflector at Mount Palomar in California.

The results of such investigation, said Matsushima, are expected to yield detailed knowledge of physical structures such as temperature, pressure, and chemical compositions of stars, which hold key information for the understanding of the creation of elements and energy through thermonuclear reactions in the interior of stars.

Other students working on the research project, which began April 15, are David Hall, A2, Cedar Rapids, Yoichi Terashita, G, Iowa City, Larry Travis, G, Clinton, and Keith Honey, G, Newburg, Mo.

Matsushima's year in Japan is a result of a U.S.-Japan Cooperative Science Program stemming from an agreement reached between the late President Kennedy and Prime Minister Ikeda in 1961.

Unit Set Up To Handle Poverty Aid

The Johnson County Council on Social Planning incorporated into its bylaws Thursday night a Special Project Committee to administer programs connected with the 1964 Economic Opportunity Act.

The bylaw gave the Special Projects Committee authority to develop and carry on its own administration. The committee will distribute local and federal funds and employ personnel needed to carry out the Act's purposes.

The committee will be accountable to the Council on Social Planning, as well as the appropriate federal agencies.

The Council on Social Planning has been appointed as the official action group of the Johnson County Community Action Program, by the Johnson County Board of Supervisors.

A citizens committee for the Community Action Program also will be formed. It will consist of 30 to 50 members representing the community, including low-income citizens. One of the federal provisions of the act is that low-income citizens be included in planning action programs.

Rev. John G. Craig, chairman of the council, said the citizens committee will be the governing body of the Community Action Program.

U. Physicians To Attend AMA Meeting

Several University of Iowa physicians will participate and others will attend the 114th annual convention of the American Medical Association in New York City Sunday through Thursday.

One scientific project to be reported will be the results of a joint investigation by two physicians from Mercy Hospital in Iowa City and two from the University. The report and a scientific exhibit on the same subject deals with a comparison of tannic acid and alum in barium enemas as an aid in radiologic diagnosis.

INVOLVED in the cooperative research were Drs. George M. Wyatt and Ernest A. Hirschel, both radiologists at Mercy Hospital, and John R. Thornbury and Harry W. Fischer of the U of I Department of Radiology.

Dr. Donovan F. Ward, a 1930 graduate of the College of Medicine and outgoing president of the AMA, will give the presidential address Tuesday evening.

Dr. Brian F. McCabe, head of otolaryngology and maxillofacial surgery, will receive the Harris P. Mosher Award of the American Laryngological, Rhinological, and Otolaryngological Society at the meeting.

THE AWARD is for his thesis, "The Quick Component of Myasthenia," and is given to perpetuate the ideals of the teacher for whom it is named, and to bestow upon a worthy recipient the responsibility of furthering the highest standards of perfection in the study, teaching and practice of otolaryngology.

Dr. Johann L. Ehrenhaft, professor and head of the Division of Thoracic Surgery, will moderate a symposium on "Surgical Indications in Congenital Heart Disease."

Dr. Robert C. Watzke, assistant professor of ophthalmology, will present a paper to be given by two New York ophthalmologists, and Dr. George N. Bedell will participate in an exhibit symposium on "Basic Physiology of Respiration and Its Disturbances."

OTHER EXHIBITS will include: "The Evaluation of Nutritional Status," by Drs. Willard A. Krehl and Robert E. Hodges, both professors of internal medicine; "Conservation Surgery of the Larynx," by Dr. Donald A. Shumrick, assistant professor of otolaryngology; "Standards for Football Equipment," by Dr. William D. Paul, professor of rehabilitation and physical medicine, and Tom Spall, physical therapist in the Department of Athletics; and "Avulsions of the External Genitalia," by Dr. David A. Culp, professor of urology, and Drs. Herbert B. Tjaden and Thomas Stark, both residents in urology.

Dr. John Clancy, associate professor of psychiatry, will show his film, "The Alcoholic Patient and His Physician," at a symposium on "The Alcoholic Patient."

Serving as official AMA representative to various exhibit sessions at the meeting will be Drs. James A. Donaldson, associate professor of otolaryngology; William C. Keetzel, professor and head of obstetrics and gynecology; and Frederick C. Blodi, professor of ophthalmology.

Civil Service Announces Specialists Examinations

The Civil Service Commission has announced an examination for filling male and female Correctional Treatment Specialist positions at Federal penal institutions, the District of Columbia Department of Corrections and the U.S. Board of Parole.

To qualify, all applicants must have successfully completed a course of study leading to a bachelor's degree, including at least 24 semester hours in the social sciences, and must meet the experience requirements identified in the Examination Announcement.

Announcements and application forms may be obtained at the Iowa City Post Office.

Newscasters Attend Kaltenborn Funeral

NEW YORK (AP) — About 250 persons, including well-known radio and television newscasters, attended funeral services today for H. V. Kaltenborn, the news analyst who died Tuesday of a heart attack.

Kaltenborn, who was 86, will be buried in Milwaukee, his birthplace.

Summer Psychiatry Sessions Focus on Disturbed Children

By MARY MOHR

Staff Writer

The freckled-faced, highly-active fifth grade boy impulsively hugged his teacher.

"I like you, I really do," he told her. Then he hit her sharply on the shoulder.

Hardly wincing, the teacher replied, "Yes, I know you do, Billy, but now you must get your geography done." And she directed his attention to a map of the United States in his text.

THIS IS hardly normal classroom behavior, but teachers in the school program at the Psychopathic Hospital, Child Psychiatry Division, do not expect the "ordinary" from their pupils.

Right now, the five regular staff teachers and 15 training teachers are conducting a summer school session for 16 emotionally disturbed youngsters, pre-school through high school age.

Besides helping the young patients at the hospital, the program provides experience for resident psychiatrists and practical teaching experience needed for certification to teach emotionally disturbed children.

ONE TEACHER works with a group of three or four children. Some of these children are often easily distractible and will interrupt an arithmetic lesson with an unexpected outburst such as "I'm uncontrollable."

Without raising her voice, the teacher will reply, "So am I, at times," and continue with her explanation of fractions.

The children sit around tables or at individual desks. In small groups they learn to work together and overcome anti-social tendencies and interact in a positive way. They are grouped mainly on the basis of ability, according to Nancy Allbaugh, education supervisor.

SO A STUDENT of sixth grade age may be reading in a high school literature book, if he is able.

Explaining the school's aims, Miss Allbaugh said, "We are most concerned with changing the child's attitude toward learning. Many have failed in school before because of their emotional problems and they have had experiences with their teachers."

She said that this was one reason why the school had not sought accreditation.

"This would bring pressure to stress content of the lessons, not changing the child's attitude," she added.

All hospital and school staff personnel work closely together.

"Our main philosophy is to put the child in the most ideal environment in terms of what he needs; school is a part of this. We are shaping behavior," Miss Allbaugh said.

TO DO THIS, the therapy director develops a plan of attack on each child's problems. Then the teachers, nurses and recreational and occupational therapists work closely together to carry this plan out. Each child is discussed at weekly meetings and his progress is evaluated.

The child's school is a "barometer" of the progress of his treatment, Miss Allbaugh said.

A child will be admitted to the hospital only after local agencies have said they can do nothing more for him. Some children have been sent home after two months; others have stayed for more than a year.

THE PATIENTS show a cross-section of emotional disturbances. A bespectacled, rather serious-looking 11-year-old, who likes to talk about cars, has been diagnosed as a "child schizophrenic." He defends himself by withdrawing from normal emotional contact with his environment.

He has created a fantasy world in which imaginary people are "after him." He can cope with these imaginary people; the real ones around him, he is unable to handle.

Another youngster may be over-anxious and highly insecure. He wants to please everyone, but he feels he cannot. When he is

Summer Psychologists

Discussing lesson plans at the school at the Child's Psychiatry Division, Psychopathic Hospital, are summer practice teachers Raymond Felner, head school psychologist in Waterloo; Mrs. Doris Mueller, teacher at the Annie Wittenmyer Home, Davenport; Leo Ogden, school psychologist in Waterloo, and Miss Nancy Allbaugh, supervisor of the education program.

ing. Many have failed in school before because of their emotional problems and they have had experiences with their teachers."

She said that this was one reason why the school had not sought accreditation.

"This would bring pressure to stress content of the lessons, not changing the child's attitude," she added.

All hospital and school staff personnel work closely together.

"Our main philosophy is to put the child in the most ideal environment in terms of what he needs; school is a part of this. We are shaping behavior," Miss Allbaugh said.

der the same circumstances we released theirs."

Gen. Telmo Vargas, military adviser to OAS Secretary-General Jose A. Mora, said Thursday night the rebel leaders had inquired about 30 rebel prisoners in the hands of the inter-American force. He denied the rebels had requested their release in exchange for the American prisoners.

THE OAS peace committee spent 20 minutes at the conference table with Caamano and his team of rebel negotiators, outlining the proposal for a provisional government.

In another development, Col. Hector Lachapelle of the rebel military command announced that three more American soldiers had been captured and were under interrogation. He would not reveal their names or the conditions under which they were captured.

Pfc. Larry Leed, Canestoga, Pa., and Spec. 4 Donald Jones, Pomona, Calif., were taken prisoner Thursday when they drove a jeep and trailer into the rebel sector.

LACHAPELLE said one more prisoner was taken Thursday night and the other two Friday.

Asked when the prisoners would be released, Col. Francisco Caamano Deno, the rebel president, said this was uncertain.

"We have always returned the prisoners. That's our policy," he said. "We are waiting to hear about our prisoners over there which they promised to return un-

told to answer questions in his history book, he often sits and daydreams.

When he finally starts his lesson he may tear up his paper because "it wasn't right." He starts over again, but he really doesn't want to finish because he says, "I can't do it right anyway."

TO HELP such a child, staff members pare the assignment to a level which he can handle.

"Choose the three problems you want to work, Jim," they tell him. In this way, he slowly begins to gain confidence.

Still other children at the school may be aggressive and have temper tantrums. Often they have come from families in which the parents fought frequently. The child has thus learned to act this way.

OTHER CHILDREN have psychopathic personalities. They are impulsive and lack any feeling of guilt. The only thing which bothers them is being caught and punished for their misdeeds.

They try to manipulate their teachers. They may remark suddenly, "Why are you so ugly?" or they may give the teacher cookies, depending on how they think they will gain what they want. In order to deal with such a child, the teacher has to be an "expert in compromise and manipulation . . ." according to Miss Allbaugh.

Elementary students attend school in the morning and have therapy sessions in the afternoon. Mrs. Susan MacMillan teaches the basic skills. A group of preschoolers is taught by Mrs. Alberta Wells.

HIGH SCHOOL students study in three areas: history, taught by Richard Winter; English, taught by Donald Monroe; and mathematics taught by James Stehens. The summer practice teachers work closely with the instructors in planning lessons for the students and coordinating it with the therapy program.

The educational program is directed by Dr. Donald L. Carr, assistant professor of education.

Gov. Kerner Asks Illinois U. Outlay Of \$214.4 Million

SPRINGFIELD, Ill. (AP) — The Illinois House passed and sent to Gov. Kerner Friday the \$214.4 million operating budget of the University of Illinois for 1965-67.

Also approved were \$9.8 million in new money and \$18.7 million re-appropriation for capital improvements at the university.

The House passed a Senate bill permitting counties to use electronic voting systems if approved by the secretary of state. The systems would be in addition to voting machines now in use.

Other bills clearing the legislature propose creation of an Illinois arts council with \$50,000 to assess the needs of the arts throughout the state, appropriate \$25,000 for a feasibility study of a lake and park in northeast Logan County, and authorize organization of consumer credit counseling corporations.

GOP'S NAME FINANCE HEAD—WASHINGTON (AP) — Gen. Lucius D. Clay, now a New York business man, was named chairman of the Republican National Finance Committee Friday.

Stock Market Take Loss, as Expected

NEW YORK (AP) — The stock market took a moderate loss Friday, halting a string of three straight daily advances, pretty much as expected.

The decline was on the lightest volume in three weeks — 4.32 million shares compared with 5.22 million Thursday.

The pace of trading has been slipping every day since Tuesday when the market staged its dramatic reversal on turnover of 8.5 million shares. As the advance lost steam, most analysts expected a decline unless the Wall Street atmosphere changed radically.

The market reached its peak in the first hour then began to back away from its moderate early gains. Shortly after noon it turned mixed, then it went a little lower.

Speed, Power Clash in Race

By ORLO ROBERTSON
Associated Press Sports Writer

They're staging what shapes up as a whale of a horse race at Hollywood Park Saturday with a horse with blazing speed taking on veteran campaigners who apply their power in the home stretch.

The race is the 1-16 miles of the \$50,000-added Ingelwood Handicap.

Viking Spirit is the horse with the sizzling speed in the Ingelwood. On May 22 he forced arch-rival Native Diver to equal the world record of 1:20 for seven furlongs before losing by a neck in the Los Angeles Handicap at Hollywood Park.

Then in his next start, the rich Californian on June 5, he carried his speed all the way in the 1-16 mile event and staved off the closing challenge of Quadrangle, winner of the 1964 Belmont Stakes.

Native Diver wasn't entered as expected but Quadrangle was, setting up a natural.

Another come-from-behind entrant is Hill Rise, idle since he finished a disappointing fifth in the Los Angeles Handicap. Then there are Colorado King, the South African who cut a big figure in 1964 West Coast stakes but winless thus far at the Hollywood meeting, and Argentine-import, Tronado, third in both the Los Angeles and Californian Handicaps.

L.A. Signs Dugan

LOS ANGELES (AP) — The Los Angeles Angels announced Friday the signing of pitcher George Dugan of Centralia, Ill., one of their baseball draft choices.

Dugan, 22, recently graduated by Murray, Ky., State, had a 39-6 record in four years at college. He will report Tuesday to Quad-Cities in the Midwest League.

The left-handed pitcher struck out 545 in 405 innings, pitched two no-hitters and had 16 shutouts. The Angels declined to say whether Dugan received a bonus for signing.

Six Iowa City youths advanced to the semi-final round and one won in the final round of the State Jr. JayCee Tennis tournament in Friday's action.

The tournament will continue today with consolation finals at 9, semi-finals at 10:30, and finals at 1.

The Iowa City players advancing were Mona Schallau in girls 18 and under, Barb Larew in the 16 and under class, Nat Chapman and Terry Paul in boys 18 and under, Chapman, Hans Zoelner, Paul, and Steve Houghton in 18 and under doubles, and Houghton in 16 and under singles.

In one of two semi-final rounds completed Friday, Cindy Shirley and Kim Hudson of Des Moines beat Iowa City's Jeanie Schallau and Des Moines' Kathy Fletcher, 12-6.

Two players participating in the meet, Richard Stokstad of Cedar Falls and Mike Wilkenson of Sioux City, have brothers playing for the Iowa tennis team, Arden and Steve respectively.

Girls 16 and Under Doubles
Debbie Nolty and Barb Larew beat Diane Moltett, Ottumwa, 12-4. Andy Shirley, Des Moines, and Peggy Mondanaro, Ottumwa, 12-4.

Girls 18 and Under Singles
Mona Schallau, Iowa City, will meet Judy Nolting, Waterloo.

Lois Einwalter, Waterloo, will meet Mary Mrziak, Waterloo.

Girls 18 and Under Doubles
Einwalter and Mrziak will meet Cheryl Quick, Davenport and Linda Reeves, Davenport.

Nancy Nelson, Clinton and Nolt-

NAT CHAPMAN

ing will meet Teresa Korando, Grundy Center and Beth Stock, Grundy Center.

Girls 16 and Under Singles

Boys 18 and Under Doubles
Gray and Steve Kirk, Waterloo, will meet Mike Powell (Newton) and Dave Spencer, Newton.

Lee Wright, Cedar Rapids and Bob Vane, Cedar Rapids, will meet Dick Raverly, Des Moines and Gar Greenbaum, Des Moines.

Joe Namath Ready To Play for Jets

NEW YORK (AP) — Joe Namath, the New York Jets' \$400,000 quarterback, was pronounced ready Friday to play football when training camp opens July 15.

An examination by Dr. James A. Nicholas, orthopedic consultant to the Jets who performed an operation on the player's right knee Jan. 25, showed the former Alabama star to be in good condition. Namath underwent the operation on his knee in New York shortly after he signed with the Jets. Namath has returned to his home in Beaver Falls, Pa. The Jets said he will move to New York next week and will workout at Shea Stadium prior to the opening of camp.

COACHES VOTE AGAINST AUBERKELEY, Calif.

College track coaches, after a heated discussion, voted Friday to support the ban against collegians competing in the Amateur Athletic Union national championships next week.

The motion passed by a 66-25 margin after an earlier resolution to recommend lifting of the ban was tabled 60-36.

Gary Player Moves Ahead As Venturi, Palmer Are Cut

By WILL GRIMSLEY
Associated Press Sports Writer

ST. LOUIS (AP) — Gary Player, the little South African in black, swept into the lead with even par 70-70-140 Friday and escaped an avalanche of bogeys that took a toll of defending champion Ken Venturi and the great Arnold Palmer in the second round of the U.S. Open Golf Tournament.

Venturi, gamely swinging clubs with numb fingers drained of blood, skied to a 79 for 160 and Palmer, no longer able to trigger one of his miracle charges, scrambled to a second straight 76 for 152.

Neither survived the traditional cut reducing the field from its original 150 to the low 50 and ties for the final two rounds Saturday and Sunday.

"I'm nailing my bag to the wall — I won't swing another club until I am ready," said Venturi, stricken with a painful circulatory ailment in his right hand.

"The wheels just came off — I didn't play well at all," commented the disappointed Palmer, who had gone 51 tournaments without missing the cut.

The beefy, 210-pound Jack Nicklaus, in danger of elimination after an opening 78, rallied with a 72 for 150.

"I've won from farther back than this," said the 25-year-old Golden Bear from Columbus, Ohio. "I can still win."

If he does he'll have to climb

Yipee

Ken Nagle, in second place after the second round of the National Open, lets out a yell of exuberation after he birdied the second hole Thursday.

over some pretty strong backs.

These included those of rugged Ken Nagle, 44-year-old Australian, and Mason Rudolph, the implacable Tennessean who can't see the tee without thick spectacles. They were tied for second at 141, one stroke back, after Nagle shot a 73 and Rudolph a 72.

Big Rally Wins For Brecunier

GRINNELL (AP) — Ann Brecunier of Waterloo capped a blazing comeback with a 79 Friday, and won the Iowa junior Girls golf tournament title.

The 17-year-old high school graduate won by six strokes over Becky Morrell, 15, of Charles City, as Suzie Thorson of Cedar Falls skidded to a third-place finish after pacing the early rounds.

Miss Brecunier, tossed in the pool after clinching the crown, had a 72-hole total of 336 strokes with a final round her best of the tournament.

She and Miss Thorson, 18, were deadlocked going into the final, but Miss Thorson dropped out of contention when she took an 18 and finished with a total of 348 strokes.

Miss Morrell, a stroke back going into the last round, shot an 84 and took second with a total of 342.

Jacque Fladoos of Dubuque, the 1963 champion and the pre-tournament favorite, finished fourth at 347 after an
