## War For Humanity Urged By Johnson

WASHINGTON (AP) — President Johnson, putting a wide range of old and new programs into a single package, asked Congress on Wednesday to set aside \$52 million next year to fight ignorance, hunger and disease around the globe.

This price tag represents a 60 per cent increase over current annual spending of \$31 million for similar international health and education programs.

ALTHOUGH much of the added money would finance expansion of existing programs, Johnson outlined some new ideas in a special message to Congress. These include a proposed Peace

## Community 'Suggestion Box' Is Suggested For Iowa City

OTTO HOIBERG  
Addresses Group

Citizens' Advisory Committee, a community "suggestion box" to channel ideas from citizens to the Iowa City council, was praised Wednesday night at kick-off recruiting meeting.

The committee is beginning work on a study of problems facing the council. About 75 persons attended the meeting in the Recreation Center, and were urged to sign up for one of the five subcommittees.

"If we do not plan ahead there will come upon us a great unknown, a moratorium chaotic growth," said Ben E. Summerwill, committee co-chairman. "And this will be your inheritance to your children."

THE GUEST speaker, Otto C. Hoiberg, head of community services at the University of Nebraska, stressed the need for citizen participation in community planning.

Success of community planning and the extent of citizen participation are highly correlated, Hoiberg said. Where the public has been informed and feels a plan is its plan, he continued, there is a good chance for success.

The advisory committee should be a two-way channel between the city council, the Department of Planning and Urban Renewal and the community at large, Hoiberg said.

THE FIVE subcommittees deal with community housing, community renewal, community social action, traffic and transportation, and the city-university urban renewal project. Fred H. Doderer is committee co-chairman.

The advisory committee was formed by the City Council in

## Finals Schedule

**TODAY**  
7:30 a.m. — All sections of Bus. Ad. 6A:1, 6A:2, 6E:103, 6S:135.

## Food Dispute Hits Campus Of Illinois U.

CHICAGO (AP) — A meeting of student leaders at the University of Illinois Circle Campus with the Committee on Student Affairs was set up Wednesday to discuss food complaints.

University Vice President Norman A. Parker scheduled the meeting for Thursday in an attempt to head off a threatened boycott Friday of the school's cafeterias.

Despite announcement of the meeting, at which Parker said any student could give comments and suggestions, Andrew Dolan, student body president who called for the boycott, said it was still on.

"The problem never has been one of communication," said Dolan. "They've been willing to meet with us, but nothing ever comes of it."

An unsigned editorial in the student newspaper, The Illini, Monday called the cafeteria fare "slightly yellowed cottage cheese, toasted layer cake and rancid cole slaw."

Another grievance of the 8,600 member student body, said Dolan, was the suspension of the publication of the Chicago Illini, the campus newspaper.

"The administration is cutting off the voice of the responsible students, diminishing the image of the student government and forcing the students who would rather discuss problems onto the picket lines," he said.

But a spokesman for the university said the administration declared a moratorium on the Illini's publication in order to audit the paper's books.

The Taft-Hartley provision

which Dirksen's filibuster is aimed at preserving allows states to ban union-management agreements that require workers to

join unions after they are hired.

Dirksen was challenged by Mansfield, who nine days ago offered the pending motion to take

up the Union Shop Bill. The Montana Democrat said:

"**THERE IS** nothing whatsoever on the Senate calendar relating to the Viet Nam."

Mansfield referred to polls.

Dirksen said show a majority of the nation oppose the repeal measure.

If the senator is so confident of winning, Mansfield said "why doesn't he let my motion come to a vote and proceed to a consideration of the bill on its merits?"

Sen. Roman L. Hruska (R-Neb.), backing Dirksen, said responsibility for locking the Foreign Relations Committee's activity lies with those who have given the union shop issue "priority No. 1."

Sen. Ross Bass (D-Tenn.) reported that a majority of the Senate is ready to vote on the repeal measure and the issue could be settled in two hours if opponents would permit a vote.

"I think they've been here before us all the time," Ching said. "We've got to blast every single hole."

Some of the tunnels were built to combat the French during the 1946-1954 Indochina war. Many are 10 or more feet deep and some go for miles. They have dozens of hidden exits.

CLINTON POST FILLED —

WASHINGTON (AP) — Frederick C. Hinrichs, Clinton, Iowa, has been appointed by Secretary of Commerce John T. Connor as a member of the City of Clinton Bridge Commission. His term will end next Dec. 21.

## UN Council Okays Viet Nam Debate

Corps-in-reverse that would bring 5,000 foreigners to the United States to teach their language and culture in the schools and to work beside the American volunteers in the anti-poverty program.

Calling for "a worldwide effort to rid mankind of the slavery of disease," Johnson said, "Ours is the great opportunity to challenge all in our friend and foe alike, to join battle."

URGE SWIFT congressional passage of new international education and health laws. Johnson said the national interest warranted it and "the work of

peace demands it."

Some other new ideas in the Johnson program include:

— Use of government-owned foreign currencies now standing by to finance binational education foundations that would invest in basic educational projects in the developing countries.

— A variety of efforts to send more American health and education experts abroad and to help train more foreigners in these specialties.

JOHNSON PROMISED an expanded war on disease aimed at worldwide eradication of smallpox by 1975 and the elimination of malaria throughout the Western Hemisphere and in eight African and Asian nations within 10 years.

The President also proposed that the 70 million foreign children now getting Food-for-Peace aid be increased to 150 million within five years.

He also promised new birth control aid for countries asking such help in order to meet a population problem that "threatens the dignity of the individual and the sanctity of the family."

In education, Johnson recommended that 1,000 American schools form partnerships with institutions abroad.

The governor told his news conference that the networks "can take all the time in the world to cover basketball games, football games and golf tournaments, but they don't have time to carry such things as a Security Council meeting."

"I tried all day yesterday," the governor added, "to find out what was going on in the U.N. meeting and I couldn't because nobody was carrying it."

Hughes was convinced that local Iowa stations "would have been tickled to death" to carry the debate if the networks had covered it.

"It's a pity there were more of you," Hubbard said. "I know there will be more in the future on these various committees. Best of luck and I hope you push the city council to the limits."

Success of community planning and the extent of citizen participation are highly correlated, Hoiberg said. Where the public has been informed and feels a plan is its plan, he continued, there is a good chance for success.

The advisory committee should be a two-way channel between the city council, the Department of Planning and Urban Renewal and the community at large, Hoiberg said.

THE FIVE subcommittees deal with community housing, community renewal, community social action, traffic and transportation, and the city-university urban renewal project. Fred H. Doderer is committee co-chairman.

The advisory committee was formed by the City Council in

December, 1963. Their first report on the conditions in Iowa City was issued in April, 1964.

"It enabled the city of Iowa City to have some guidelines, some understanding and some appreciation of what the people want and expected from them," said Mayor William C. Hubbard.

IOWA CITY will have about twice as many people in ten years, said Hubbard.

"This scares me, it scares the council, and it should scare you," he said.

"I wish there were more of you," Hubbard said. "I know there will be more in the future on these various committees. Best of luck and I hope you push the city council to the limits."

Success of community planning and the extent of citizen participation are highly correlated, Hoiberg said. Where the public has been informed and feels a plan is its plan, he continued, there is a good chance for success.

## A funky idea

ALTHOUGH THE IDEA BEHIND urban renewal is basically sound, some of the applications can be down right looney.

Take as an example a recent suggestion from Iowa City's urban renewal planning consultant. This fellow (F. T. Aschman) says that taverns should not be allowed to operate downtown "because they aren't compatible with a shopping area." Hogwash!

It is fairly obvious that this fellow has a very foggy notion about Iowa City. If it weren't for the downtown taverns, there wouldn't be nearly as much downtown shopping as there is now. What does he think most people are shopping for?

Seriously, though, it should be recognized that Iowa City is not an average town. The downtown area is very close to the campus and so by its nature it attracts a different sort of traffic than most cities. The downtown area in most towns attracts shoppers and workers from outlying neighborhoods who have business in town. In Iowa City many people are in the downtown area every day on their way to and from the University.

If Iowa City's planning consultant can't do any more for the town than come up with pat answers and suggestions already used elsewhere, he ought to be fired — soon.

— Jon Van

## Lesson in dignity

MARTIN LUTHER KING is paying a visit to Chicago in hopes of preventing an incident similar to the Watts crisis of last summer.

The first visible effect of King's visit was repair of the west side slum apartment building he moved into. An account of the fixing-up given in The Christian Science Monitor quotes one woman resident of the building as saying this was the first winter in three years that she didn't have to turn on the gas stove to keep her children warm.

Other effects of King's trip to Chicago will probably be more widespread. Although King has said he doesn't expect an outbreak of civil disobedience, he has promised to notify police if he should hear of any plans marching in that direction.

The problems King is hoping to lick in Chicago are the problems Negroes face everywhere. The difference is that there are more Negroes in Chicago than in most places; therefore, there are more problems. A large part of King's efforts will have to be directed at organization — urban living has a tendency to discourage a united front cause. Urban renewal has scattered and displaced many. And, of course, spreading information about the civil rights campaign will be a problem in itself.

But as for countless other cities across the nation, the hardest lesson for Chicago to learn will be the lesson of the dignity of man, according to the gospel of brotherhood.

— Dallas Murphy

## University Bulletin Board

University Bulletin Board notices may be received at The Daily Iowan office, Room 201, Communications Center, next to the Day Room publication. They must be typed and signed by an adviser or member of the organization being publicized. Purely social functions are not eligible for this section.

**SPEED READING CLASSES:** For faculty, staff, grad students or undergrads (except those recommended for special reading help). Speed reading classes begin Feb. 1. Meetings are through Thurs. for 6½ weeks in Room 38 OAT; sections are offered at 11:30 a.m., 12:30 p.m. and 2:30 p.m. Enrollment is limited. Sign up outside 35A OAT through Feb. 4. Sign-up sheets will be at the Rhetorical table during registration.

**STUDENTS WHO MISSED THE SECTION AND READING PASS-OUT EXAM:** Take a make-up exam on Feb. 10, 11:30 a.m.-12:30 p.m. in 38 OAT. Notify Reading Lab office by Feb. 3 if you will take test.

**CHRISTIAN SCIENCE** Organization meets each Wednesday at 5 p.m. in Danforth Chapel. All are welcome to attend.

**MAIN LIBRARY HOURS:** Monday-Friday 7:30 a.m. to 2 p.m.; Saturday — 7:30 a.m.-midnight; Sunday — 1-30 p.m. to 2 a.m.

**DESK HOURS:** Monday-Friday — 8 a.m.-5 p.m.; (Reserved Book Room — 7 p.m.-8 p.m.; Sunday — 2 p.m.-5 p.m.; Reserved Book Room — 6 p.m.-10 p.m.)

**PARENTS COOPERATIVE BABYSITTING LEAGUE:** Those interested in membership call Mrs. Paul Neuhauser at 338-6070. Members' sitting-sitters call Mrs. Paul Neuhauser at 338-6070.

**YWCA BABYSITTING SERVICE:** Call YWCA office, 335-3908 afternoons for babysitting service.

**EDUCATION - PSYCHOLOGY** Library Hours — Monday-Thursday 8 a.m.-10 p.m., Friday-Saturday 8 a.m.-11 p.m., Sunday 2 p.m. to 10 p.m.

**THE SWIMMING POOL** in the Women's Gymnasium will be open for recreational swimming. Monday through Friday 4:15 to 5:15 in the Union Diana Room. All interested persons faculty and faculty wives.

**THE INTER-VARSITY** Christian Fellowship, an interdenominational group of students, meets every Friday at 7 p.m. in the Union Diana Room. All interested persons are welcome.

**The Daily Iowan**

The Daily Iowan is written and edited by students and is governed by a board of five student trustees elected by the student body and four trustees appointed by the president of the University. The Daily Iowan's editorial policy is not an expression of University administration policy or opinion, in any particular.

**MEMBER AUDIT BUREAU OF CIRCULATIONS**

Published by Student Publications Inc., Communications Center, Iowa City, Iowa, daily except Sunday and Monday, and all holidays. Entered as second-class matter at the post office at Iowa City under the Act of Congress of March 2, 1879.

**Subscription Rates:** By carrier in Iowa City, \$10 per year in advance; six months, \$5.50; three months, \$3. All mail subscriptions, \$10 per year; six months, \$5.50; three months,

\$3.25.

# Canadian Diplomat On Tour Says: 'Go North, Young Man'

If you have a pioneering spirit, like a slower pace and want opportunities for advancement, Canada might be the place for you, according to G. C. Morrison of the Canadian consulate in Chicago.

Morrison explained Canada's opportunities in an interview Wednesday. About 20 million people now live in Canada, he said, but 70 to 90 million would be an ideal population. Now there are about 4.5 people per square mile, he said.

Morrison was here Wednesday to talk to students, faculty members and townspeople interested in moving to Canada. He estimated he would see between 25 to 50 people.

A PERSON wishing to migrate to Canada must meet four standards, Morrison, an immigration officer, explained. The person must have a skill, must pass a medical examination, must have sufficient funds to support himself while becoming established, and must be of good character, he said.

G. C. MORRISON  
Promoting Canada

The average man who migrates to Canada, he said, is about 28, married and has two children.

Morrison stressed the natural resources of Canada and that it was the fifth largest industrial nation. Some of the resources there are gold, oil, natural gas,

fish, forests, petroleum, and copper.

"Because the country is growing rapidly," Morrison said, "there are many chances for advancement, especially in the professional fields such as engineering and medicine."

HE EXPLAINED that although an engineer might work in one field all his life here, he would be given a chance to branch out and try many different fields in Canada.

Morrison said that one of the things many American immigrants noticed about Canada was the slower pace. But this might not be true in Canada's less populated areas where farming is primitive.

"That's where the pioneering spirit comes in," he said.

During 1964, 149 Iowans migrated to Canada, Morrison said, and during 1965 about 14,500 Americans did. The 1965 report of Iowan migration has not yet been compiled.

Since two or three years are needed for him to make a circuit of the cities in his district, which comprises 14 states, he said he would send information from Chicago to anyone interested in Canada.

WASHINGTON (AP) — The House voted overwhelmingly Wednesday for contempt of congress citations against the Imperial Wizard of the United Klans of America, Robert M. Shelton, and six of his grand dragons and other state leaders.

Most of what opposition there was came from liberals, who while expressing distaste for the Ku Klux Klan said they questioned the propriety of the process.

This is the same group which consistently votes against funds for the House Committee on Un-American Activities which brought the contempt citations of Klan leaders before the House.

At Wednesday's hearing before the committee, John E. Thornhill, 57, a farmer and oilman from McComb, Miss., testified he got out of the Klan after several Negro churches were burned, and people thought he was involved. Thornhill, who said he made millions of dollars leasing oil rights from Mississippians, told the committee he did not approve of bombings and burnings.

The House liberals were joined by a conservative Republican from Missouri, Rep. Thomas B. Curtis, who wanted the contempt citations referred to a special select committee to rule on the sufficiency of the evidence. His motion lost on a voice vote.

The citations now go to the Justice Department for presentation to a federal grand jury.

Shelton and some of the grand dragons watched the debate from a visitors' gallery.

They were cited for refusing to turn over to the committee Klan documents subpoenaed from them as Klan officials. They pleaded the 1st, 4th, 5th and 14th amendments in refusing to do so.

BIRD FLIES PACIFIC —

SANTIAGO, Chile (UPI) — An albatross believed to have flown 6,000 miles across the South Pacific from New Zealand is page one news in Santiago.

The big bird, found exhausted on the shore this week with a leg band reading "Museum of New Zealand 4-1756," was revived with massage baths and feeding on fish in the Santiago Zoo and berthed with pelicans and penguins, pending word from New Zealand.

The Housing Act grew from a recommendation made during the depression years, Stewart said. The renewal program is no longer slum clearance, he continued, but is used "to restore blighted and deteriorated areas and as a means to effect changes in existing land use required to meet changing needs and to fulfill planning objectives."

RUSSIAN QUADRUPLETS — MOSCOW (AP) — A Soviet woman has given birth to quadruplets — all girls — in the village of Voskhod, Ryazan region, the Soviet news agency Tass reported Wednesday. It said the mother, Lyudmila Rogov, 20, and the babies all are doing well. The father is Alexander Rogov, 23, driver at a local collective farm.

"The federally aided urban renewal program provides financial assistance to cities to do what the private market has been unable to accomplish," said Stewart.

BECAUSE OF diversity of ownerships and inability of investors to absorb financial loss, he said, private investors rarely can assemble the land into marketable tracts for redevelopment.

Planning and execution of urban renewal projects, Stewart stressed,

## Russia Asks New Nuclear Restrictions

MOSCOW (AP) — Premier Alexei N. Kosygin called Wednesday night for a ban for use of nuclear weapons against countries without such weapons on their territory.

Western diplomatic sources said the proposal is new and represents a Soviet attempt to win more support for a treaty against spreading of nuclear weapons.

Presumably, it could also be aimed at forbidding the United States to use such weapons in wars like the one in Viet Nam.

Ambassador Arthur J. Goldberg, chief U.S. delegate to the United Nations, said in December that use of atomic weapons by the United States in Viet Nam was inconceivable and had not even been considered.

Kosygin's statement, a long policy message to the disarmament conference in Geneva, contained only a brief reference to Viet Nam, saying "aggression against Viet Nam is aggression against all countries and peoples who are upholding their freedom and independence."

Nations that have nuclear weapons are the United States, the Soviet Union, Britain, France and Red China.

The new round of the 17-nation disarmament conference in Geneva opened Jan. 27. At that time President Johnson in a message proposed a sweeping plan for nuclear disarmament.

25 YEARS OF Star-Spangled Security FOR AMERICANS 1941-1966

If Ben Franklin were around today, he'd be amazed at what's happened to some of the things he innovated.

His fire insurance idea, for instance, has mushroomed into thousands of companies protecting millions of Americans.

His adventure with lightning has helped create myriads of electrical servants that make life easier and more fun.

And tens of millions of American families live by his principle of thrift, and save by investing regularly in U. S. Savings Bonds. At maturity Bonds pay \$25.00 for every \$18.75 you invest. Or, as Mr. Franklin might have said it, "1,875 pennies saved is 2,500 pennies earned."

And while the money is piling up for retirement, or an emergency, or your children's education, Uncle Sam is using it to strengthen the foundation of freedom Ben Franklin helped build.

Begin saving your pennies. Only 63 of them a day for one month, and you've got your starter Bond.

For your information Series E Bonds pay back \$4 for every \$3 at maturity, are protected against loss, provide tax advantages, can be purchased where you work or bank. For current income on your investment, ask about Series H Bonds.

The U.S. Government does not pay for this advertisement. It is presented as a public service in cooperation with the Treasury Department and The Advertising Council.

## House Cites Klan Leaders For Contempt

## Heavy Snow Warnings Down, But Much Of U. S. Is Buried

By The Associated Press

WASHINGTON (AP) — The House voted overwhelmingly Wednesday for contempt of congress citations against the Imperial Wizard of the United Klans of America, Robert M. Shelton, and six of his grand dragons and other state leaders.

A blanket of snow covered a major part of the nation this Groundhog Day, but the tempestuous, crippling storm that paralyzed the Ohio Valley and the East tapered off.

The Weather Bureau reported that Wednesday was the first day in more than two weeks that warnings of heavy snow, hazardous driving, frost or cold waves had not been issued.

But the groundhog saw his shadow, and, according to tradition, that means six more weeks of winter weather.

FORT DODGE (Iowa) — This community had its fifth bomb scare since last Friday when officials at the Hawley Elementary School received a call shortly before noon Wednesday saying a bomb was in the building.

The caller stated simply that a bomb was in the building. Most of the pupils were home for lunch, but the 103 schoolbus students eating at the school were evacuated. School was dismissed for the rest of the day. A bomb was not found during a search.

About an hour after the call, police arrested an 11-year-old student who admitted making the call. He was the second student caught in connection with the bomb hoaxes. The first was a 13-year-old junior high school student.

Tuesday night the Fort Dodge Community School Board ruled that any student perpetrating such a hoax would be dismissed from school for the balance of the year and his studies would have to be made up the next year. This penalty applies to both students.

SCATTERED light snow was extended from the Great Lakes and the mid-Atlantic states to the northern parts of Georgia and Mississippi. There was scattered light snow also from the northern Great Plains to the Rockies.

The weather was clear and cold over the plains Wednesday morning. International Falls,

## Attempt At Free Fall Record Foiled By Frozen Equipment

By DON REEDER

ESTHERVILLE (Ia.) — Parachutist Nick Piantanida rode a balloon higher than any other man has ever done Wednesday, technicians said, but his attempt at a world free-fall record was foiled by a frozen piece of equipment.

Piantanida, who had planned to jump from more than 120,000 feet, free-fall to about 7,000 feet and then parachute to earth, rode the balloon's gondola to the ground instead.

He stepped from the gondola and stripped off his bright orange space suit three miles southeast of Elmore, Minn., about 40 miles east of this northwest Iowa town that was the target area for his planned parachute jump.

Piantanida looked haggard and disappointed when he met newsmen at the airport here, where he was flown in a small plane after his landing. He said he felt "generally good but tired."

Project personnel who monitored the flight said his balloon ascent reached 123,500 feet — the highest ever recorded.

Adding to the general attitude of resigned gloom among project workers was the knowledge that even the balloon altitude mark will go down as unofficial. The balloonist must ride back to the

ground with the balloon intact to make an official record.

All apparently went well with the flight from Sioux Falls, S.D., until Piantanida was preparing to make his jump. Then he found that he couldn't loosen the hose fastening his space suit oxygen tank to the larger tank in the gondola. It was frozen.

He worked with it for about 10 minutes until technicians on the ground noted an increase in his heart beat and ordered him to ride down with the gondola. Piantanida said it still was frozen when he reached the ground and finally cut the hose with his knife.

Asked if he was happy to have gone higher in a balloon than anyone else, Piantanida replied: "I couldn't care less. We didn't accomplish our mission."

To a question of whether he would try again, Piantanida declared: "I'll get up there one way or the other, sooner or later."

Piantanida said the shock was heavy when the gondola's parachute opened, causing the gondola to oscillate wildly. He confessed to a brief period of feeling "a little woozy" on the way down.

After talking briefly with reporters, the 33-year-old Brick Town, N.J., daredevil went for a medical checkup.

His wife, Janice, was at the

Estherville airport when the balloon went over the town. She watched intently through binoculars.

Asked if he could see the ground, Piantanida said: "It looked real good. It seemed like I went over Estherville at a pretty good pace."

Mrs. Piantanida broke down and cried during the 10 minutes or so of confusion when her husband was too busy working with his oxygen hose to answer technicians on the ground who were talking to him.

She looked relieved when Jacques Isteil, President of SPACE, Inc., finally called out "It's okay — he's all right."

Isteil indicated the company probably will try the experiment, known as "Project Strato-Jump," again. This was the second attempt to end in failure. The first attempt, starting at New Brighton, Minn., last Oct. 22, flopped when the balloon burst at 22,700 feet.

SPACE, Inc., is a private firm working on development of space survival and bail-out equipment and techniques. The name stands for Survival Programs Above Common Environment.

Its announced objectives in Wednesday's project were to prove that a trained parachutist can free-fall from altitudes of

PIANTANIDA

more than 100,000 feet without using stabilizing devices, gain the world free-fall record for the United States, and surpass the manned balloon altitude record unofficially.

The present world free-fall record of 83,523.41 feet was set by Eugene Andreev of the Soviet Union in 1962.

The highest jump on record, but not officially monitored and therefore not recognized as a world mark, was from 102,800 feet by U.S. Air Force Capt. Joseph W. Kittinger Jr. Aug. 16, 1960.

The present manned balloon altitude record is 113,739.9 feet by U.S. Navy Commander Malcolm D. Ross May 4, 1961.

## Hawks Back To Basketball

It's back to basketball for the Iowa squad, when examinations close Friday.

The Hawkeyes are rallying their forces for the Big 10 drive which re-opens Monday at Purdue and continues through March 7 with nine games, five on the road.

But the first consideration for the Iowans is the game with the University of Detroit in Chicago Stadium Saturday about 9:40 p.m. This is the second game of a stadium double-header; the opener is Marquette-Loyola.

The Titans have been met only twice in past years, the last previous game occurring in 1946-47 season. The Hawkeyes won both games.

Detroit enters the Iowa game with a 14-4 record, compared to Iowa's 11-3. The Titans have played three Big 10 teams, beating Indiana, 78-75; and losing to Purdue, 82-75, and to Minnesota, 92-88.

Iowa must contend with one of the leading rebounders in the nation, 6'4" Dorie Murray, who averages 19 rebounds per game and ranks among the first six in the United States. Murray averages 22.6 points per game. His high was 44 points in the narrow loss to Minnesota and he snared 34 rebounds in the Gopher game.

All five of the Titan starters average in double figures. Lou Hyatt, a guard who is 6'2, hits 18 per game; Jim Boyce, 6'6 for 18 per game; Jim Royce, 6'5 for 15; Bruce Rodwan, 6'5 for

16; and Larry Salci, 6'1 guard, 12.

Detroit has averaged 82.9 points per game, as compared with opponents' 78.7.

Among Detroit's victims have been Harvard, Notre Dame, Villanova, Toledo, Xavier of Ohio (2), Western Michigan, West Texas State and Baldwin-Wallace.

Canisius and Marquette beat Detroit, in addition to the losses to Purdue and Minnesota.

Iowa's Coach Ralph Miller said he believed the layoff from games will be helpful rather than harmful for his team. The Iowans, although they have practiced fairly well with the exception of three days, needed a physical rest.

Detroit, having played last Saturday and again Tuesday, may have sharpened its game but Iowa perhaps will have more zest and desire. Iowa has not played a game since Jan. 24 when Ohio State was beaten at Iowa City.

Miller said he looked forward to the stadium game, since he

has had a good record in games before Chicago crowds. His 1965 Iowa team upset No. 1 UCLA

there a year ago, 87-82, in Miller's first season as Hawkeye coach; two of his Wichita State teams were victorious on that court and as a player Miller was a star on two Kansas teams

which won.

The Iowa party will fly from Chicago to Lafayette Sunday,

where Purdue is the Monday opponent at 6:30 p.m. (Iowa time).

Iowa now has 3-2 in the conference for a fourth place tie with Minnesota, while Purdue has 1-4 for an eighth place tie with Wisconsin. Overall, Purdue has a record of 5-10.

The Boilermakers are dangerous, especially on their home court, and they have Dave Schellhase, the nation's leading scorer.

Purdue's conference win was a 93-87 upset of Illinois Jan. 15, the same Illini team which Tuesday gave Michigan its first conference defeat.

Iowa enters the last four weeks of its schedule with a team point average of 79.3 to opponents' 68.9, a field goal percentage of .453 to .432 and 613 rebounds to 531.

Three top scorers are Chris Perrell, average of 17.9; George Peoples, 17.3; and Gerry Jones, 16.2.

Before playing another home

game (Minnesota, Feb. 15) Iowa also must face Northwestern at Evanston Feb. 12.

ward, 14; and Larry Salci, 6-1 guard, 12. Detroit has averaged 82.9 points per game, as compared with opponents' 78.7.

## Athletic Classes For Youths To Be Given By University

Saturday classes for elementary and high school students in swimming, tennis and the use of trampoline and gymnasium apparatus will begin Saturday at The University. All three six-week programs are sponsored by the Department of Physical Education for Women.

Swimming and tennis classes will meet at 10 a.m., while trampoline classes will meet at 11 a.m. The trampoline classes are open to boys and girls seven years of age and older. Beginners and students previously enrolled in the class will meet at the same time.

Swimming classes for beginners, intermediates, and those interested in basic strokes and diving skills are open to girls eight years of age or older. Basic

Instructors for the three Saturday sessions will be graduate students in the Department of Physical Education. The trampoline and gymnastics instructor, Kathleen Miller, has had

# Ben McGilmer Gets Cheers In Games, Not Just Warmup

By PAUL DYSART  
Staff Writer

There was a day when Ben McGilmer was just a pre-game exhibitionist who drew his biggest hand of a basketball game when he accomplished a ferocious dunk shot in warm-ups.

Ben's still stuffing the ball in warm-ups, and the crowd still cheers every time. But lately Ben's been picking up laudations where they count — during a basketball game.

What came over the big sophomore reserve in January?

"I was a little nervous the first part of the season," Ben admitted. "I knew what I was supposed to do, but I was a little over-eager. I kept thinking that if I made the slightest mistake the coach would yank me out. But now that I've had more actual game experience, I feel that I play with the team."

McGilmer figures that he's cut down on his mistakes that plagued him earlier.

"But I'm still making too many," the 6-foot forward laughed. "My biggest problem is memory," he pointed out. "I've got to start thinking on that court. And my defense still isn't good enough, although the coach thinks it's getting better. I don't think that they really trusted me

before defensively."

McGilmer has been leading a savage press in his last two appearances at the Field House, and has shown unusual agility for a big man.

But he's not satisfied. Ben has his eyes on the Big 10 title.

"And I still think we can get it," he said. "Sure, Michigan is up there now. But they don't have it yet. Remember, they've got to play us twice."

"We've just got to play like Coach Miller wants us to," he continued. "If we'd listen to him and do everything he tells us, I don't think there's a team in the Big 10 that could beat us."

McGilmer has been operating in the capacity of 6th man, or the Hawk's "first reserve" since his fiery 14-point outburst against Marshalltown.

"I believe that I can help the team the most by coming off the bench," stated the former all-state from Michigan. "It would be a big thing to be able to start a game for the Hawkeyes."

Now, in his first season on the varsity, he is currently sporting a nine point average for Big 10 games.

Ben played his high school ball for Detroit Northwestern, where he made all city honors besides his all-state billing. Graduating

from high school in the middle of the 1963-64 year, Ben came to Iowa City.

McGilmer chose Iowa over about 100 other schools which sent him scholarship offers while in Detroit.

"I had a whole drawer full of them, and I went and visited about 25 or 30 schools my senior year. But I just liked Iowa City and this school offers the best."

"I didn't want to enter school right away because I didn't want to have to leave another school in the middle of the year," he explained. "So I just stayed in town the rest of the year and played city league ball."

Ben played for Red's Barber Shop of Iowa City that year, and accompanied the team to the state AAU tournaments in Marshalltown.

Last year was his first year as a student at the University, and Ben earned a starting berth on the Hawkeye Frosh squad.

Now, in his first season on the varsity, he is currently sporting a nine point average for Big 10 games.

## Ashe Receives Big Welcome From Home Town Richmond

By TOM PENDERGAST

RICHMOND, Va. (AP) — Arthur Ashe is coming home, and his freezing, snow-covered native city is preparing a warm welcome.

The 22-year-old Negro tennis star flies here from Australia to join eight other top amateur players in the Fidelity Bankers' Invitational Indoor Tournament Saturday and Sunday. As expected, Ashe is seeded No. 1.

Richmond will roll out the red carpet. Friday is Arthur Ashe Day, and the city honors him with a special testimonial dinner Friday night.

In Australia, Ashe won four major titles and beat the Aussies' Roy Emerson, the world's No. 1 amateur, for the second and third straight time before losing to him Monday in the Australian National Championship final.

He has thrilled tennis fans in this Southern city, prompting the usually unemotional city council to adopt a glowing resolution praising Ashe's talents and good sportsmanship, and welcoming him home.

Newspaper editorials added praise — and regret that segregation here during his youth kept him from playing on public courts. Commenting on the council resolution, the Richmond News Leader said:

"The resolution probably would have meant more to the Davis Cup star if it had contained at

least an implied regret that while he was growing up, the inherited mores of most of us prohibited him from playing at Byrd Park."

Ranked second nationally among amateurs, Ashe will be joined by these other ranked players: Cliff Richey, No. 3; Chuck McKinley No. 4; Charlie Pasarell, No. 5; Frank Froehling, No. 11; Gene Scott, No. 12, and Betsy Harrison, No. 18.

Kentucky Guard Hits 42 In Win Over Vanderbilt

NASHVILLE, Tenn. (AP) — Guard Louie Dampier scored 42 points to lead red hot Kentucky, the nation's second-ranked team, to a 105-90 Southeastern Conference basketball conference victory over third-ranked Vanderbilt Wednesday night.

Dampier got 20 points in the first half — all of them field goals — and added 22 with the help of six foul shots. Most of his field goals were long jump shots.

Teammate Pat Riley threw in 28 points, scoring mostly from the corner.

The victory left Kentucky with a 16-0 record overall and 6-0 in the SEC. The win virtually assures the Wildcats the SEC title unless they run into unexpected disaster on the road this month.

Kentucky moved ahead by 23 points, 79-56, midway in the second half to put the game on ice.

## Conference Swim Meet To Be Held At Field House

Host to the Big 10 swimming and diving championships for the first time since 1958, Iowa is formulating plans for the staging of the massive affair with its 18 events and 1,767 points.

It is scheduled for March 3, 4 and 5 at the Field House 75 foot pool. Indiana is the defending champion, having won in 1965 with 447 points to runner-up Michigan's 409.

Francis Graham, business manager of athletics, said that reserved seat tickets will be sold for the night sessions only. These tickets are two dollars. General admission for all sessions is one dollar.

The time schedule shows trial heats Thursday, Friday and Saturday afternoons at 1 p.m., with finals of each day's events starting at 8 p.m. Twelve places will be scored in each event. Actually, there will be two final races.

## First Collegiate Appearance For Olympian Schollander

By LOU BLACK  
Associated Press Sports Writer

NEW HAVEN, Conn. (AP) — Don Schollander, the fabulous winner of four Olympic gold medals for swimming, makes his first Yale varsity appearance Saturday, a splash eagerly awaited by many.

The blond with the dimples and a boyish grin has been entered in only one event — the anchor leg in the 400-yard medley relay — against undefeated Navy.

But if the competition is tight, Coach Phil Moriarty says Schollander will be ready for other tests.

Among those who barely can wait for the swim is Schollander himself. To Don, who'll be 20 in April, the meet starts a drive for national and world honors that will reach its climax in the 1968 Olympics in Mexico City.

The young swimmer from Lake

Oswego, Ore., became eligible for varsity only last week. He didn't start his freshman year at Yale until February 1965, the result of competing in the Tokyo Olympic Games in the fall of 1964.

With Schollander and another Olympian, Bill Mettler, a butterfly stroke whiz, experts predict it won't be long before the start of another golden swimming era for the sons of Eli.

His coach said Don is shaping up excellently. Schollander came down with mononucleosis — a disease bringing on fever, general weakness, headaches and a swelling of the lymph glands — last June while in Switzerland.

Schollander resumed swimming when he returned to Yale in September and has been swimming 1½ hours daily — all he has time for between classes and studies.

Ben McGilmer, a reserve on Iowa's basketball team, studies the Big 10 statistics and contemplates what it will take for Iowa to win the championship this year. McGilmer has become the number six man on the squad, although he is only a sophomore.

—Photo by Ken Kephart

## Unknowns Lead Golf Meet

By BOB MYERS  
Associated Press Sports Writer

PALM SPRINGS, Calif. (AP) — Jack McGowan led a parade of lesser lights and dark horses into the front ranks Wednesday in the first round of the \$10,000 Bob Hope Desert Golf Classic.

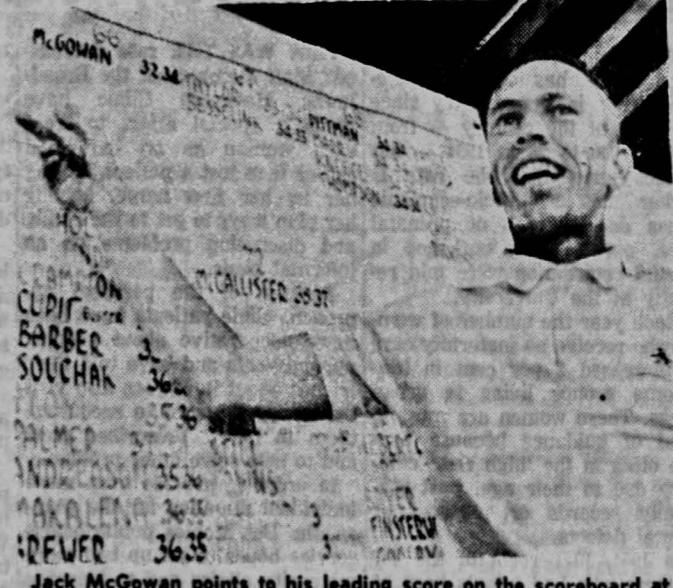

Leaving such celebrated professionals as Arnold Palmer, Bill Casper Jr. and Ken Venturi to trail in the first of this far-flung, 90-hole tournament, the 35-year-old McGowan from Largo, Fla., shot a six-under-par 32-34-66.

The 128 pros, each with three amateurs, launched the five-day event on four Dester Country Club courses — Indian Wells, Bermuda Dunes, La Quinta and El Dorado.

Each has par 36-36-72.

The weather was bright and ideal, and the galleries seemed scattered all over the Coachella Valley in the 20-mile radius of the various courses.

Casper, the defending champion, playing Indian Wells, did most of the stars in the opening round, shot a 37-32-69; Palmer, 37-34-71, and Venturi, the 1964 U.S. Open champion, who is still in high spirits after his great victory in the San Fran-

Jack McGowan points to his leading score on the scoreboard at the Bob Hope Golf Classic. McGowan has a 32-34 total of 66 at Elderado, considered the toughest of the four courses that the tournament is played on.

cisco Lucky International Monday, had 34-38-72.

Tied at 67 were Joe Taylor, 45-year-old club professional from Charleston, W.Va., with 33-34, and veteran Al Besseling, 34-33.

The host comedian, Hope, played

# Decreases In Infant Mortality Subject of Nursing Seminar

The infant death rate per thousand births has decreased tremendously in this country since the turn of the century — from 180 in 1900 to 26 in 1964 — but studies show that the rate is higher in low socio-economic areas due to lack of prenatal care. Nurses at a workshop in mental retardation were told recently at the University.

Each year the number of women who receive no maternity care is increased 2 per cent in low-income groups living in urban areas. These women are most in need of guidance because they are often in the "high risk" category due to their age, past maternity records or physical or mental defects.

In 1964, 10 percent of the 667 mothers who had infants born at Broadlawns Polk County Hospital, Des Moines, had no prenatal care. The average number of doctor visits for this group during pregnancy was three instead of the recommended twelve, the nurses were told.

Twelve-and-a-half percent of these Des Moines area babies were premature and had to spend an average of 29 days in the hospital. In comparison, the figures for 1965 show that, as the result of an improved maternity program in Polk County, only 8 percent of the babies born at the same hospital were premature.

## Campus Notes

### ARMY ROTC

Briefings on the Army ROTC's new two-year program will be held from 1 to 5 p.m. today in rooms 9, 10, or 11 of the Field House.

Students with at least two more years of school, including graduate study, to complete may join the program. Students can enroll during next semester's registration.

### TAU BETA PI MEMBERS

New members of Tau Beta Pi, national engineering honorary society, are: David Berry, E4, Iowa City; Michael English, E4, Dubuque; Burton Gearhart, E4, Newton; David Heltne, E3, Lake Mills; Richard Lammers, E4, Dyersville; Joseph McSwiggin, E4, Wilton Jet.

Paul Mundt, E4, Wellman; Albert Runau, E4, Iowa City; Peter

Seaba, E4, Sigourney; Dennis Schroeder, E4, Muscatine; Ronald Speedy, E4, Allison; David Stahl, E4, Iowa City; William Vansant, E4, Cedar Falls; and Robert Wilbanks, G, Iowa City.

**COVER DESIGN CONTEST**  
The First Presbyterian Church is offering a purchase award of \$25 for an original cover design for the church bulletin. Entries should be submitted in black and white with no medium specified.

Entries must be submitted to the Bulletin Award Contest, First Presbyterian Church, 28 E. Market St., by 5 p.m. Wednesday.

**KKG ALUMNAE PARTY**  
Kappa Kappa Gamma alumnae will sponsor a party at 8 p.m. Tuesday at the home of Mrs. William Summerhill, 933 Highwood St. Pledges of the active chapter will be guests of honor.

## Job Corps Marks First Anniversary

WASHINGTON (AP) — A blustery winter's day last year, 30 young men straggled into an old Civilian Conservation Corps camp at Catoctin, Md., bringing it back to life after a quarter-century of idleness.

They came from the streets of Baltimore, Md., and the backwoods hollows of western Virginia and eastern Kentucky. They all had one thing in common — poverty. They were the first 30 Job Corpsmen.

A year later, five are in military service, one is awaiting induction, eight have jobs, and two are back in school — a total of 16 graduates. Nine still are in the Job Corps. Only five dropped out.

This dropout rate — one in six — is better than the rate for later enrollees. Recent figures released

## Jury Acquits Ex-Mayor

OMAHA (AP) — An all-woman jury late Wednesday found former Omaha Mayor James Dworak innocent of a charge of agreeing to accept a bribe.

In doing so, it accepted the 40-year-old Dworak's explanation that in agreeing to take a \$25,000 campaign contribution from Chicago investor John Coleman he was seeking evidence of a bribe offer.

The jury returned its verdict at 5:45 p.m. It received the case at 12:17 p.m.

It spent three and a half hours in actual deliberations.

Immediately after the verdict, Dworak called his home in California. He now has a rug and carpet business in Alameda.

Dworak said he was unable to reach his wife but talked to his son. The verdict, he said, "came as no surprise to me."

Asked if he planned any legal action against his accusers, he said, "I haven't given that any thought."

His immediate aim, he added, was to "get back to my wife and family."

## Fortran IV Course Set

Two short courses in programming will be offered soon by the University Computer Center.

The Beginning Fortran IV course for learning how to program a digital computer will meet from 8:30 to 10 p.m. Feb. 14, 16, 18, 21, 23 and 25 in 225 Chemistry Building. G. P. Weeg, director of the Computer Center, will be the instructor. Pre-registration is not required.

The Algol course, which assumes a working knowledge of Fortran, will meet from 3:30 to 4:45 p.m. Feb. 15, 17, 22 and 24 and March 1 and 3 in 216 Physics Research Center. Art Fleck, director of programming at the Computer Center, will be the instructor. Pre-registration at the Computer Center office, telephone 353-3170, is required.

# Dirksen Bars Viet Business

WASHINGTON (AP) — A move by the Senate Foreign Relations Committee to reopen hearings at which members have criticized U.S. policy in Asia was blocked Wednesday by Sen. Everett M. Dirksen.

The senator from Arkansas, J. W. Fulbright, arose to say plaintively that his Foreign Relations Committee has a lot of Viet Nam business and wouldn't the Senate let it get about it?

An aisle away, Dirksen, his feet planted solidly apart, shook his head determinedly. He said a firm no.

**EVERYBODY WAS** exceedingly polite to everybody else as chairman Fulbright made a pitch to renew the hearings in which members last week scolded Secretary of State Dean Rusk on Asian policies.

Dirksen, the Senate Republican leader from Illinois, objected because he had another fish to fry.

The point of contention is a Senate rule which forbids committees from meeting while the Senate is in session.

Democratic Leader Mike Mansfield of Montana has been calling Senate meetings two hours earlier than usual at 10 a.m., in a gentlemanly attempt to break a filibuster being managed by Dirksen.

**SEEKING TO PREVENT** the Senate from taking up a House-passed bill which would end state authority to ban union shop contracts, Dirksen retaliated by objecting to committee meetings. This

forced senators either to hold early morning or night meetings, a circumstance most of them find inconvenient, or not meet at all.

With Fulbright lounging against a desk nearby, Sen. Joseph S. Clark (D-Pa.) jumped up to say that those who were blocking full exploration of foreign policy had others want "are assuming a serious responsibility for the safety and future of this nation."

Dirksen said he was perfectly willing to clear the way for any action the Senate wants to take on Viet Nam issues. All Mansfield had to do, he said, was to withdraw the motion to take up the union shop bill.

"**IS COMPULSORY** unionism more important than the lives of the young men who are slogging through the swamps of Viet Nam?" Dirksen asked.

Smiling a little, the Democratic leader replied that no Viet Nam legislation is ready for Senate action.

Fulbright wanted to know how it happened that the Senate Armed Services Committee was listening at the time to closed testimony from Secretary of Defense Robert S. McNamara.

Mansfield replied that McNamara officially was before a Senate Appropriations subcommittee with which the Armed Services members were sitting. He recalled that the Appropriations Committee had received unanimous consent last year to meet during the 89th Congress while the Senate was in session.

adequate prenatal care.

Marilyn Russell, assistant supervisor of the Public Health Nursing Association in Des Moines, discussed the Polk County program in detail with the nurses assembled for the three-day conference.

At this workshop and the follow-up session to be held in June, nurses are learning the causes of mental retardation and possible solutions to the problem through early discovery of cases, counseling mentally retarded patients and their families and possible prevention.

Elizabeth Hutchins, assistant professor in the College of Nursing, said the aim of the work shop is to "sensitize each person to the need for more knowledge and understanding of mental retardation."

**SINCE IT IS** believed that approximately 25 percent of all mental retardation is caused by inadequate prenatal care, this program is a step toward the prevention of mental retardation in infants. Each year, in Iowa alone, approximately 1,900 babies are born who will be mentally retarded, the nurses were told.

Some of the prenatal causes of mental retardation — blood diseases such as toxemia in the mother, improper diet of the pregnant woman, and prematurity — can often be corrected with

the help of prenatal care.

In order to provide even more individual attention for the women, the Des Moines public health service hopes to set up two more maternity clinics and to increase their staff.

### Viet Position Not Weaker, General Says

HONOLULU (AP) — The U.S. commander in Viet Nam said Wednesday "a sound military posture" was kept in South Viet Nam during the 37-day bombing lull for North Viet Nam.

Gen. William C. Westmoreland, arriving for his eighth visit in Honolulu since taking his Viet Nam command in 1964, pointed out that the Viet Cong "continued their acts of terrorism, their harassment of the people and countryside, their atrocities and also continued their infiltration."

But he said the position of the South Vietnamese and their allies remained strong. He described the resumption of bombing raids over North Viet Nam as "a continuation of a previous program," an essential role in the Viet Nam war.

Westmoreland was met by Adm. U.S. Grant Sharp Jr., overall Pacific military commander, and by component commanders of the Air Force, Navy, Army and Marines. They talked privately at considerable length.

Lt. Gen. Joseph Moore, commander of the 2nd Air Division in Viet Nam and Westmoreland's top Air Force commander there, arrived earlier for strategy talks.

### Police Help Bronx Man

DES MOINES (AP) — The Des Moines Police Department Wednesday sent a cashier's check for \$1,058 to Enrique Negron, The Bronx, N.Y., grocer, who had been ostracized after he aided a police officer who was being attacked by a mob.

Police sent the check in care of Patrolman Philip Siegel, the officer who had been attacked, and asked him to present the check to Negron.

A collection had been started by Des Moines Detectives William Mahron and Wallace Sidmore after it was learned that Negron, a grocer, had been forced out of business by his neighbors' boycott.

Money was collected here from over 21 states in amounts ranging from \$1 to \$25.

Police sent the check in care of Patrolman Philip Siegel, the officer who had been attacked, and asked him to present the check to Negron.

James Duesenberry, Harvard economics professor, was sworn in as a member of the President's Council of Economic Advisers, replacing Otto Eckstein who returned to the university staff.

Johnson said again that he did not believe inflation was an inevitable result of prosperity and he believed this could be proved if the cooperation of all Americans could be obtained.

### Russia Claims Achievement Of Long-Promised Better Life

MOSCOW (AP) — The Soviet government told its 232 million people Wednesday they are getting some of the long-promised better life.

Production of consumer goods has accelerated rapidly in recent years and average incomes have risen, according to a 1965 report by the Central Statistical Board.

It said the nation's 77 million nonagricultural workers earned an average of 95 rubles (\$105.55) a month, up five rubles from 1964 and double the 1946 figure.

Counting bonuses and such social services as free medical care, the real average income of factory, office and commercial workers was 128 rubles (\$142.22) a month last year, the report said.

Earnings in the United States are almost as much per week as the Soviet monthly figures. But differing conditions make direct comparisons difficult and for the Russian people the important thing has been their progress.

### ROTC Officer Lauds Program

BY RON BLISS  
Staff Writer

The present situation in Viet Nam should add an extra incentive for male University of Iowa students to enroll in the University's Reserve Officers' Training Corps, Colonel William N. Holm said in a recent interview.

Holm, who is professor of military science, Army ROTC, at the University, said with the current build-up of military forces in Viet Nam, and increase in draft calls, fewer men will be able to avoid serving military obligation.

"Because of this," Holm said, "many students might start taking a closer look at the ROTC program and realize the fine opportunities that it offers."

Holm said the program itself is designed to select and train qualified students, who upon graduation, can be commissioned as officers in the regular Army.

**THE COMMISSION**, Holm said, enables the student to fulfill his military obligation while serving as an officer.

The advantage of this he said, is that an officer receives much higher pay and is in a more respectable position than an enlisted man.

"You'll never get rich on an officer's pay," Holm said, "but

### Bar Inflation, LBJ Appeals

WASHINGTON (AP) — President Johnson got a new economic adviser Wednesday in a barker deal with Harvard University and used the occasion for another appeal for labor and management to hold wage and price lines against inflation.

James Duesenberry, Harvard economics professor, was sworn in as a member of the President's Council of Economic Advisers, replacing Otto Eckstein who returned to the university staff.

Johnson said again that he did not believe inflation was an inevitable result of prosperity and he believed this could be proved if the cooperation of all Americans could be obtained.

MADRID (AP) — Special security measures went into effect at the U.S. Embassy here after telephoned threats that the building would be blown up, officials disclosed Wednesday.

They said the first threats were received on Monday. Additional guards were posted and embassy security personnel took special precautions.

The caller, or callers, did not indicate whether their threats were motivated by the resumption of U.S. air attacks on North Viet Nam or the loss of a nuclear bomb off Spain's southeast coast as the result of a U.S. bomber crash.

at the same time, it is high enough that you can live well on the pay that you draw."

"Surprisingly enough," Holm continued, "of all major career fields pursued by college graduates during the first two years following college, military officers pay ranks third."

Holm said that the salary of a second lieutenant, the rank most Army ROTC graduates are commissioned at, is approximately \$452.88 per month, and this is not including the fringe benefits, he added.

**FRINGE BENEFITS**, Holm said, include medical expenses, travel expenses, recreational allowances, commissary and post exchange privileges, moving allowances, and survivors assistance.

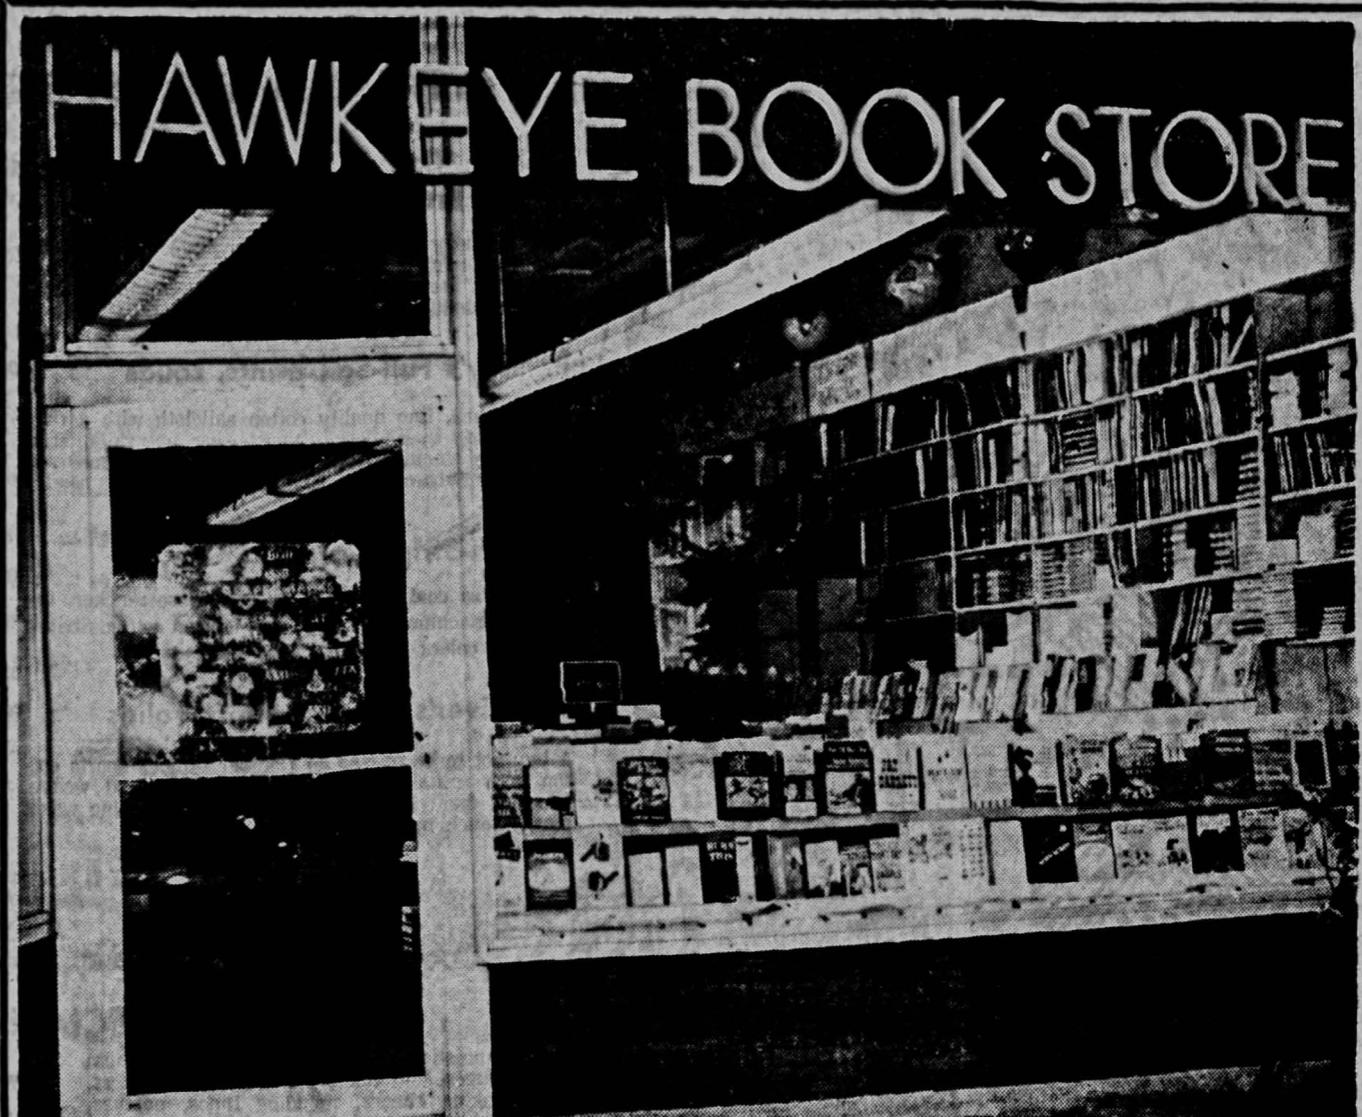

In addition to these extra benefits, Holm said, each officer receives a \$30 uniform allowance on entrance to active duty.

For those who wish to pursue military careers, Holm said, the retirement benefits are also attractive.

For those who have doubts about the ROTC program Holm stressed that by enrolling in it, the student is not committing himself to any great extent.

"During the first two years of the four year program," Holm said, "the course is like any other and can be dropped at any time."

"Then, at the end of those first two years," he continued, "the student is given a choice as to whether or not he will enroll in the advanced program."

# Theatre Fills Many Needs

By MARY ZIELINSKI  
Staff Writer

A playwright in search of a cast and a theater led to the formation of the Iowa City Community Theatre.

Ten years ago, Frank Morrison of Iowa City wrote a play and wanted to see it in finished form. Since there was no available local theater group, Morrison organized his own. Twenty-seven persons were the first members.

According to Mrs. John Schuppert, the group's first president, Morrison came fully prepared with a written constitution and by-laws that, with additions and changes, have remained as the guidelines of the group.

"FOR SOME REASON," Mrs. Schuppert said recently, "Morrison's play never was produced."

Instead, the group's first production was a one act drama by Tennessee Williams, "27 Wagons-loads of Cotton," entered in the University of Iowa's Spring Festival.

The play received a rating of

"superior", and the ICCT won the same rating every year until the festival was discontinued.

"WE KNEW from the beginning our standards had to be high," Mrs. Schuppert said, explaining that Iowa City residents were accustomed to seeing well-done performances at the University Theatre.

The ICCT's original aim of bringing culture to the community was soon dropped as being in competition with the University, and they began to offer popular plays. Among these were "Our Town," "Teahouse of the August Moon," "The Seven-Year Itch," and "The Diary of Anne Frank."

The ICCT's first full-length production was "The Happy Time," performed in March, 1956. They received favorable reviews and a large attendance. The problems came a little later, said Mrs. Schuppert, when "some of the curvature about us wore off."

This year marks the group's 10th anniversary season. Their

next play, "Mary, Mary" opens Monday, which later became a Broadway show.

ALL WORK done for the theatre is voluntary with support coming from individuals, churches and stores.

Much of the backstage work for the group has been done by Mrs. Eugene Weiner, who also has been assistant stage manager five times and handles publicity. Her husband designed and constructed the theatre's portable lighting system.

"Of course," Mrs. Weiner added, "there are difficulties that come with every production, but regardless of all our ups and downs, the Community Theatre is here to stay."

**U.S. TOPS IN SPACE—**  
ZURICH, Switzerland (AP) — The United States has made more than twice as many successful space launches as the Soviet Union, the Swiss Society for the Study of Rocket Techniques estimated.

# Diagnosis Paces Correction In Abnormalities Of Heart

A physician can tell when something is wrong with your heart by merely listening to its sounds in some cases. In others, he may have to use highly complex procedures and instruments for certain tests.

Research is providing physicians with new tools to help diagnose heart defects. The art of diagnosing structural abnormalities of the heart has now gone beyond the ability to correct them.

"We can really look upon this as a hopeful development because this fact alone will lead to solutions," said Dr. Lewis E. January, president-elect of the American Heart Association (AHA).

Many of the advances in diagnosis have come through research programs supported by millions of Americans through the AHA and its affiliates such as the Iowa Heart Association, which currently is supporting 11 research projects at the College of Medicine.

"Development of new and improved methods for the diagnosis and evaluation of heart defects assist the cardiologist in determining whether a defect actually exists, where it is located, how serious its consequences might be, and whether it can be corrected by drug or surgical therapy," said Dr. January, professor of internal medicine.

"Of paramount importance in any diagnosis, of course, is a careful history and physical examination," he said. The physician is aided in his judgment by tests and instruments which can give important information about the patient's heart."

Some of these tests and instruments are simple, others are complex. For instance, noting the time it takes a patient's pulse to return to normal after climbing a short flight of stairs gives some indication of the heart's reserve capacity and is a functional test which has been used for many years.

The experienced physician also can tell much about the heart's condition by listening with a stethoscope to the sound made by the beating heart," he said. For instance, a soft swishing sound, known as a murmur, would indicate to the physician the possibility that there is a structural defect in the heart, a valve, or a major blood vessel."

Among the more complex diagnostic procedures is electrocardiography, one of the most important diagnostic tools available to the cardiologist. Electrical impulses are associated with the action of the heart and the electrocardiograph detects and records these tiny electrical changes.

The graphic peak-and-valley tracings of the electrocardiogram provide information not only on the location and magnitude of injury to the heart but also upon the burden imposed on the heart chambers by structural defects.

"The electrocardiogram is the most reliable objective test for heart attacks and also is very useful in the selection of patients with inborn or acquired heart disease who are likely to benefit from surgery," said Dr. January.

Another important diagnostic tool is cardiac catheterization, which provides a direct pipeline to the heart when a small plastic tube is inserted in a vein of the arm or leg and guided into the chambers of the heart.

Dr. January said that with this versatile procedure blood sam-

ples could be withdrawn from the heart for analysis, pressures could be recorded inside the heart, and radiopaque substances could be introduced for detailed X-ray observation of the heart and great vessels. Dyes or radioactive substances also could be injected to measure heart output and to detect abnormal flow patterns resulting from defects.

"Even though the advances in diagnosis have been amazing," said Dr. January, "we can look forward to better diagnostic tools which will allow even more precise study of cardiac function both in normal and diseased hearts."

## 11 Persons Reported Killed After Hurricane Rips Samoa

PAGO PAGO, American Samoa — The devastating hurricane that swept American and Western Samoa last weekend left 11 persons dead and 12 missing, a spokesman for Gov. H. Rex Lee said Wednesday.

The 12 missing all were off a Western Samoa alone suffered nine deaths from the hurricane, the spokesman told The Associated Press in a telephone call from Pago Pago.

Winds of more than 110 miles an hour slashed the South Pacific islands Saturday and Sunday, causing widespread damage to native homes and other facilities. Power on the main island of Tutuila is still out in some places while restoration work continues.

Western Samoa's casualty fig-

ures were reported to Gov. Lee Wednesday by Prime Minister Mat'afa, whose island had been almost without communications with the outside world since the hurricane struck.

Mat'afa said a third of the housing of his independent island nation was destroyed. All breadfruit crops were leveled. The concomitant taro crops received heavy damage.

An estimated food supplies would last 10 days to two weeks and asked New Zealand for assistance.

REID NEEDED to Omaha late Friday afternoon. Will share expenses. 351-4357.

**RIDE WANTED**

REID NEEDED to Omaha late Friday afternoon. Will share expenses. 351-4357.

**CHILD CARE**

EXPERIENCED Baby Sitting My home day or night, Monday through Friday. 338-4548.

RELIABLE WOMAN will give excellent care to two children. 338-7354.

WILL BABY-SIT, my home. Temple Park. 338-0946.

BABY SITTING for 2 or over. Near University. Mornings. 338-0004. 2-18

**WANTED**

GIRL TO SHARE apartment. Prefer graduate student or over 21. 337-4527.

FREED ROOM and board (girl or boy) in exchange for work. Must be 21 and have car. Dial 338-4599.

PRIVATE PARTY wants to buy 2 Chevy. 886-2273 Tipton, Iowa. 2-16

GRADUATE student wanted to share duplex with 2 others. \$26 per month. 337-7993.

**ROOMS FOR RENT**

SLEEPING ROOM for rent. Men, no cooking. Grad students or working men. Tel. days 337-7701 eve and Sun 337-2426. TPN

LARGE ROOM for male student, cooking. 338-6684.

GRADUATE man — Large, warm, spacious room, cooking. 530 N. Clinton. Call 337-5487 or 337-5848. 2-12

FEMALE GRAD. Student to share ideal quiet study-sleeping room. Refrigerator privileges. Need car. 337-7642; 333-5012. 2-7

### The World in 1965 — Can You Answer These 20 Questions?

1. Two noted statesmen, famed for their facile use of the English language, died in 1965. Who were they?
  2. Name the militant Negro leader who was assassinated and buried with Moslem rites.
  3. A new building in Washington aroused controversy — was it an architectural gem or a monstrosity? Name the building.
  4. A four-letter word not used in polite society figured in a campus protest campaign. Where did it happen?
  5. A United States senator made news by climbing a mountain. Name the senator and the mountain.
  6. An Olympic swimming star was suspended for 10 years for misbehavior. Who was she?
  7. Memorials for two former U. S. Presidents were unveiled. Name the Presidents and locate the memorials.
  8. What satellite figured in the capture of a fugitive from justice? How was it done?
  9. People of an African nation didn't know a revolution was going on because they thought the soldiers were acting for a movie. Name the nation and identify the principals.
  10. A park bench is a memorial to a prominent American who died in 1965. Name the man and locate the bench.
  11. An important pronouncement on U. S. foreign policy was made at Johns Hopkins University in Baltimore. What was the pronouncement and who made it?
  12. A Cleveland newspaperman sailed a tiny sailboat across the Atlantic Ocean. Who was he and how long did he take for the voyage?
  13. An innovation in collective bargaining was developed. What was the innovation and in what dispute was it employed?
  14. Name the Cabinet post which was created in 1965.
  15. A dictator gave permission for many of his people to leave the country. Who was he?
  16. An American astronaut became the first man in the world to have lived in space, on earth and undersea. Who was he?
  17. Two sports champions flopped simultaneously in defense of their titles. Name them.
  18. An African country became the first to declare itself independent from Great Britain since the American colonies did it in 1776. Name the nation.
  19. World communism suffered a setback when an attempted coup failed and backfired into an anti-communist campaign. Where did it happen?
  20. Name the event which brought "power grid" into everyday language.
- (For answers See Below)

#### ANSWERS TO THE 20 QUESTIONS

1. Sir Winston Churchill and Adlai Stevenson (The World in 1965, pages 14 and 130).
2. Malcolm X, slain as he addressed a rally of his followers in New York (The World in 1965, page 35).
3. The Rayburn House Office Building, opened in February (The World in 1965, page 42).
4. The University of California, at Berkeley (The World in 1965, page 54).
5. Senator Robert Kennedy, D-N. Y. He climbed Mount Kennedy, named for his assassinated brother, in Canada's Yukon Territory (The World in 1965, page 58).
6. Dawn Fraser of Australia. (The World in 1965, page 66).
7. Franklin D. Roosevelt in Washington; John F. Kennedy at Runnymede, England (The World in 1965, pages 84 and 94).
8. Early Bird. A photo televised by Canadian police was recognized in Florida, an identification which led to the arrest of Georges LeMay, wanted for bank robbery (The World in 1965, page 100).
9. Algeria. Ahmed Ben Bella was ousted by Col. Houari Boumediene (The World in 1965, page 110).
10. Bernard Baruch, commemorated by an "Elder Statesman's Bench" in Central Park, New York (The World in 1965, pages 110).
11. On April 7, in an address to students and faculty of Johns Hopkins, President Johnson announced the United States readiness for "unconditional discussions" to restore peace in Viet Nam (The World in 1965, page 118).
12. Robert Manly of the Cleveland Plain Dealer. He made the crossing in 78 days, reaching Falmouth, England, on Aug. 17 (The World in 1965, page 148).
13. The "interim extension," by which steel labor and management continued work with 11.5 cents per hour per man going into escrow until contract agreement was reached (The World in 1965, page 164).
14. The Department of Urban Affairs (The World in 1965, page 175).
15. Fidel Castro of Cuba, who permitted Cubans of certain categories to flee to the United States (The World in 1965, page 191).
16. Commander M. Scott Carpenter, U. S. Navy (The World in 1965, page 194).
17. Major League baseball's St. Louis Cardinals, finished seventh in the National League, and the New York Yankees, sixth in the American League (The World in 1965, page 201).
18. Rhodesia (The World in 1965, page 214).
19. Indonesia (The World in 1965, page 216).
20. The power blackout in the Northeast United States (The World in 1965, page 208).

### House Committee Puts Off GI Bill

WASHINGTON (AP) — The House Veterans Affairs Committee put off action again Wednesday on a bill to provide educational and other benefits for veterans.

Chairman Olin E. Teague (D-Tex.) said the committee was unable to muster a quorum because bad weather kept many members from the Capitol. He scheduled another meeting for today.

The bill's benefits would apply to servicemen who were on duty at least 180 days since Jan. 31, 1955, when the benefits program for Korean War veterans ended.

# Small Car Safety Slammed

WASHINGTON (AP) — National Safety Council officials gave statistics Wednesday showing that crash fatalities in small cars are "up to five times more frequent" than in the bigger, standard models.

They told a Senate hearing that the fatality rate could be reduced sharply by the installation of better door locks and good seat belts.

Sen. Abraham Ribicoff (D-Conn.) chairman of a government operations subcommittee, said the council — which has supported

state and local rather than federal highway safety action — was making a good argument for putting Uncle Sam in the driver's seat by requiring federal standards.

HE PROMISED the hearings would result in "substantive" federal legislation.

President Johnson is expected to send Congress a special message on highway safety including some comments on auto design as well as on drivers and highways.

All three — drivers, highways

and cars — are tied up in the safety problem, said Council President Howard Pyle.

He suggested that drivers may be getting more than their share of blame for accidents.

THE STATISTICS do show that driver fault was present in about 85 per cent of all automobile accidents," he said, "but this does not mean that other factors may not also have been present."

"Most accidents should be assumed to result from multiple contributing factors, including in

most cases the automobile itself, the highway and the driver," he said.

A safe car, Pyle said, "is a must." Although alone it is not enough when drivers unsafely travel over unsafe roads."

THE COUNCIL he added, believes that automakers should accelerate the engineering and design of safer cars "even though the American public already has available the safest automobile ever sold on a mass production basis."

### Violin Concert Set By High Schooler

Robert M. Zimansky, a University High School senior, will present a violin recital Sunday at 8 p.m. in North Music Hall.

Accompanying him on the piano will be Michael Sproston, G. Cedar Rapids.

Zimansky is the son of Professor and Mrs. Curt Zimansky, 1421 East Court.

**36 BELOW RECORDED — MOSCOW** (UPI) — It was 36 degrees below zero in the northern port of Murmansk in Wednesday and the usually ice-free bay was covered with eight inches of ice.

Tass news agency said.
