Let us not be impractical or think that privates haven't lived.

What have kings or ladies or privates ever had that we haven't? Hasn't all life been a struggle for our ancestors as it has been for us? And all that we are now doing is merely the same.

By NICHOLAS MEYER

"Doomsday" is the title of Steven Spielberg's new movie, but it could just as easily be "December," the month in which the events of the movie take place. "Doomsday" is set in the year 2015, when the world is on the brink of a nuclear war.

The story follows a group of people who are trying to prevent the war and save the planet.

The movie is a警告 of the dangers of nuclear weapons and the importance of peace. It is a call to action for all of us to work together to prevent such a disaster from happening.

Let us not be impractical or think that privates haven't lived. What have kings or ladies or privates ever had that we haven't? Hasn't all life been a struggle for our ancestors as it has been for us? And all that we are now doing is merely the same.
