Wallace Comes to Moline To Present Farm Program

Molegin, Ill. — George Wallon, director of a large farm implement and tractor company, spoke before more than 400 faculty members and students at the Illinois State University College of Agriculture.

Wallace is a fourth generation farmer himself, and his company manufactures farm equipment. The company is located in Illinois and has a large plant in Illinois.

In his address, Wallace talked about the history of his company, the importance of agriculture, and the challenges facing farmers today.

Wallace also discussed the importance of technology in modern agriculture. He talked about new farming techniques, such as precision farming, and the role of technology in improving crop yields.

Wallace's presentation was well-received by the audience, and he was invited to speak at future events.

Moeglin is the director of the College of Agriculture at the University of Illinois. He is a respected leader in the field of agriculture and has received many awards for his contributions to the field.

Wallace referred to his company's long history, which dates back to the early 20th century. He also talked about the company's recent expansion into new markets, such as robotics and automation.

Wallace's presentation was well-received by the audience, and he was invited to speak at future events.

Moeglin is the director of the College of Agriculture at the University of Illinois. He is a respected leader in the field of agriculture and has received many awards for his contributions to the field.

Low blood pressure?

In the United Nations suffering from high blood pressure is the result of millions of years of evolution. For most of it's 200 million year history, man's primary source of nutrition was leaves, fruits and seeds and the major cause of death in man was parasites. Man has developed a high blood pressure in order to provide a rapid blood supply to the brain due to the high atmospheric pressure at sea level. This is particularly evident in the heart, where the blood pressure is 150 mm Hg. The average heart rate is 70 beats per minute. If this were to be increased by 10 beats per minute, the heart would have to work much harder to maintain the same blood pressure. This would result in a greater demand for oxygen and nutrients, and the heart would become more muscular in order to meet this demand. The human heart is the only organ that can adapt to this level of stress by increasing its muscle mass and reducing its rate of contraction.

Last month was taken in this column the opportunity to comment on the situation in which the UN is ailing. Let it be clear, in this instance, that the author is not referring to the body of his profession but to the organization itself. The current state of the UN is not a happy one. Many member states are unhappy with the organization and the situation is likely to get worse before it gets better. The UN is in a state of crisis and the only way out is through a fundamental reform of the organization. The author believes that this can be achieved through a process of negotiation and consensus building among the member states. The UN must be reformed in order to ensure its effectiveness and viability.

Lindsay Struggling to Settle Strike by Police, Teachers

The New York Times — The nation's capital was in turmoil yesterday as the federal government's 200,000-secretary workers went on strike. In a rare move, the president declared a national emergency and suspended the strike, citing the need to maintain public order.

Details of the strike and the president's action were sketchy. The secretary workers, who have been in negotiations for months with the federal government, voted overwhelmingly to authorize a strike. The government responded by invoking emergency powers and immediately suspending the strike.

Under the new plan, the secretary workers will be allowed to continue their work, but they will not receive any increases in pay or benefits. They will also be subject to further negotiations with the government.

In Washington, Secretary of State John C. Calhoun said the government would take all necessary steps to ensure the smooth operation of the federal government. He added that the secretary workers' decision to strike was a matter of "personal choice" and that the government had nothing to do with it.

The secretary workers' union, the American Federation of Government Employees, said it was prepared to continue its negotiations with the government.

Greek System Lauded at Fraternity Banquet

The Greek system was viewed with approval yesterday at a fraternity banquet at the University of Illinois, Champaign-Urbana.

"The Greek system is the backbone of American college life," said Robert M. Robinson, president of the national fraternity council. "It provides a framework for students to grow and develop." Robinson was speaking at the 15th annual fraternity banquet, which is attended by fraternity leaders from across the country.

At the banquet, several fraternity presidents were recognized for their contributions to the growth of the Greek system. Among them was John L. Adams, president of the national fraternity council.

Adams said that the Greek system has evolved over the years to meet the changing needs of students. "It is a dynamic system that adapts to the times," he said. "The Greek system is an effective way to provide a supportive environment for students." Adams was joined at the banquet by several other fraternity leaders, including Robert M. Robinson, president of the national fraternity council.

SDS Members Turn Attention To Election, Day of Rage

Ten thousand students in the Students for a Democratic Society (SDS) moved last week to focus public attention on the upcoming presidential election.

"The SDS is not just another political group," said SDS President John C. Calhoun. "We are a movement of young people who are committed to making a difference in the world." Calhoun was speaking at a press conference announceing the SDS's "Day of Rage," which is scheduled for October 24.

The SDS's Day of Rage will be a nationwide series of demonstrations and protests aimed at forcing the candidates to address the issues that matter most to young people.

Marijuana Transport Law Faces High Court Ruling

The Supreme Court is due to rule today on the constitutionality of the federal law that makes it illegal to possess marijuana. The law has been challenged by several states, including California, which has legalized marijuana for medical use.

"The Supreme Court's decision will be a key factor in determining the future of marijuana policy," said California Attorney General Jerry Brown. "We hope that the court will strike down this law and allow states to make their own decisions about marijuana policy." Brown was speaking at a press conference yesterday, where he announced his support for legalizing marijuana for medical use.

Teach-In Pleases Augustine; Sit-Down Disagreement Resolved

Professor Augustine, associate professor of history, was pleased yesterday with the outcome of a teach-in that took place at the university yesterday. "The students were very engaged," he said. "I think we should do more of these teach-ins." Augustine was speaking at a press conference yesterday, where he announced his support for the teach-in.

The teach-in was held in response to a series of protests by student activists who are unhappy with the university's policies on student protests and言论自由。"We need to have more open dialogue with the administration," said a student activist. "We're not trying to be disruptive, we just want to be heard." The activist was speaking at a press conference yesterday, where he announced his support for the teach-in.

Paper Chain Gets New Head

John C. Calhoun, a graduate of the University of Illinois, has been appointed to head the Student Paper Chain, a student newspaper at the university.

"I am honored to be appointed to this position," said Calhoun. "I look forward to working with the student editorial board and the faculty顾问 committee to improve the quality of the Paper Chain." Calhoun was speaking at a press conference yesterday, where he announced his support for the appointment.

Young car thieves need your help.

[Image of a young car thief]

If you are trying to use two contact lenses to improve your vision, there are a few things you should keep in mind. First, make sure your lenses are properly cleaned and stored. Second, be sure to replace your lenses regularly. Finally, wear your lenses for the recommended amount of time. By following these guidelines, you can enjoy clear vision and the convenience of contact lenses.
Hawks' Defense Pleases Nagel

By CHUCK STOLBERG

Among other things, Iowa's 64-15 victory over Minnesota was an opportunity for the defense to make its presence felt. With the conference's leading rushing offense, it was a fitting scenario for the Hawks. The defense, under the guidance of Coach Hayden Fry, proved to be more than a match for the Gophers' attack.

Lowery Elston Howard, one of the few seniors remaining on the team, has been a key player for the Hawks this season. His return to the lineup has been instrumental in solidifying the team's defense.

Versatile Turtle

Elston Howard, the man who likes the outdoor look even when under any combination, can be seen running with the lively athletes. His presence adds a much-needed boost to the team's morale.

Elston Howard Retires

Boston - Elston Howard, Iowa's all-time leading receiver, ended his career Monday by announcing his retirement from college football.

"I don't want to be the player who can't make plays when the game is on the line," Howard said. "I want to be remembered as a winner." Howard has 1,123 career receiving yards and is the second-leading receiver in Iowa history.

Winless Wake Forest Finds Great Difficulty in Winning

Wake Forest, North Carolina - The Wake Forest Demon Deacons found great difficulty winning their third straight victory Saturday against the University of North Carolina. The Deacons, who entered the game with a 1-2 record, were outscored 27-0 by the Tar Heels.

"Our defense is giving us all we can handle," Wake Forest Coach Bill Kenan said. "But our offense is simply not clicking."

Hayes Blasts Officials Again

"I've been in buses that should be in the 3rd string and I think I could handle the 10th string," Hayes said. "It's like being stuck in a traffic jam, but you can't move your feet."

Collegiately Correct...

For Fall 1986, Sears offers a choice of two of America's most celebrated campus collar models - the Pocketbook and the Derby. Each offers distinctive features, including a decorative button and a stitched collar. The Pocketbook is made of handsome solid collar fabrics, a cut and color exclusive with Sears. The Derby model comes in five-colored 100% cotton or durable polyester blend.

Swimmers Add to Supply of U.S. Medals

MEXICO CITY — Of 8 men's gold medals
from international competition boasting
three more medals in the 30-meter butterfly
for Santa Clara, Calif., a St. Louis resident
in the 50-meter breaststroke, took two
for the swimmer and another for the
University of Missouri. Both victories
laid the ground for the American team's
final score of 67 points, ahead of the
United States' three gold medals for
the 100-meter medley, the 400-meter
free relay and the 400-meter medley relay.

For the swimmers, the victory was
a momentous one as they edged past the
100-meter breaststroke and 400-meter
medley relay.

Scholarships

The State University of New York at
Stony Brook has named 10 students
as winners of its annual scholarship
program.

Each student will receive a $1,000
scholarship, in addition to a $750
scholarship to the University of
Connecticut, a $600 scholarship to the
University of Wisconsin, and a $500
scholarship to the University of
Massachusetts.

The program is sponsored by the
State University of New York at
Stony Brook and is open to all students
who have graduated from high school
and are planning to attend the University
of Connecticut, the University of
Massachusetts, or the University of
Wisconsin.

The winners are:

1. James A. Smith, a senior at the
University of Connecticut, who
planned to major in chemical
engineering.

2. Paul G. Johnson, a senior at
the University of Massachusetts,
who planned to major in
chemistry.

3. Robert W. Anderson, a senior at
the University of Wisconsin,
who planned to major in
chemistry.

4. James E. Cooper, a senior at
the University of Connecticut,
who planned to major in
chemistry.

5. John A. Brown, a senior at
the University of Massachusetts,
who planned to major in
chemistry.

6. William J. O'Brien, a senior at
the University of Wisconsin,
who planned to major in
chemistry.

7. John M. O'Connor, a senior at
the University of Connecticut,
who planned to major in
chemistry.

8. James E. Conley, a senior at
the University of Massachusetts,
who planned to major in
chemistry.

9. John A. Brown, a senior at
the University of Wisconsin,
who planned to major in
chemistry.

10. James E. Cooper, a senior at
the University of Connecticut,
who planned to major in
chemistry.

Each student will receive a $1,000
scholarship, in addition to a $750
scholarship to the University of
Connecticut, a $600 scholarship to the
University of Wisconsin, and a $500
scholarship to the University of

Iowa Blue Cross and Blue Shield are 134 million dollar businesses.

That's a handsome figure. It makes your Blue Cross and Blue Shield plans rank among Iowa's biggest businesses. That is, if you can call it a business. Businesslike, yes, and efficient, but not monymakers.

But handsome is as handsome does, and Blue Cross and Blue Shield do handsomely by their members.

Which is probably the reason we've become the biggest terror on the insurance side of hospital and doctor care in Iowa.

Exactly what makes us look so good? Realistic benefits based on your need. Non-profit operation to put a lot more of your money into care. Cost controls to help keep your rates low. Experience in millions of cases to give us a lot of knowledge.

Those are some of the reasons Blue Cross and Blue Shield now see almost every other person in Iowa. If you're not in on it, why not come over and see how the other half lives.
