Who's telling the truth?

The latest developments in the current round of events leading up to the University of Iowa Students for a Democratic Society's planned sit-in at the Administration Building occurred this week. News bulletins reported that SDS members told an interviewer that they are scaling down plans for the strike action.

At the same time, however, a number of administrators and students who were attending the University of Iowa Student Government meeting, although he did admit that the strike was going to happen, said that the SDS members were not being truthful in their statements.

The SDS members, who have been involved in a number of recent demonstrations, are seeking to overide the closing of the campus by the university administration.

The university administration has stated that the SDS members are not telling the truth about their intentions and that they are trying to create a false impression in the minds of the public.

However, the SDS members have denied these allegations and have stated that they are not trying to deceive anyone and that they are only trying to express their feelings about the current situation.

The SDS members have stated that they are not interested in starting a new movement and that they are only interested in fighting for their rights and for the rights of all students.
