

Senate Sets CBW Vote For Monday

WASHINGTON (AP) — The Senate agreed late Friday to vote Monday on a comprehensive proposal to limit the testing, shipment and storage of such lethal chemical and biological warfare (CBW) agents as nerve gas.

The proposal was developed in day-long conferences between sponsors of eight different amendments and Sen. Thomas J. McIntyre (D-N.H.) chairman of the Armed Services Committee's special research subcommittee.

Introducing the combined proposal, McIntyre said it incorporates the essentials of the other amendments.

Earlier, he told reporters the Pentagon had made clear during the negotiations that it opposes the proposals. "They don't approve," he said, "but they weren't strenuously objecting."

The most controversial part of the package deals with open air testing and sets strict standards for such tests.

For such tests to be legal, it would require approval by the secretary of defense under guidelines provided by the President, as being essential to national security, as well as approval by the surgeon general as not presenting a public health hazard.

The approval by the two officials would have to be provided to six congressional committees, at least 30 days in advance of the tests, including the names of the agents to be tested, the time and place of the tests and the reasons.

Other provisions in the combined amendment would:

- Bar procurement of CBW delivery systems;
- Bar storage of CBW agents outside the United States without prior notice to the country involved;
- Require the surgeon general to approve as safe any transportation of CBW agents to or from military bases;
- Require the secretary of defense to notify Congress and other federal officials of any plans to transport CBW agents to or from military bases;
- Direct detoxification of all lethal CBW agents before transportation; and
- Bar storage of CBW agents outside the United States unless the secretary of state reports it won't violate international law.

Grades to Be Ready For Pickup Aug. 21

Grades for the current summer session will be available for student pickup in the Registrar's office, Room 1, University Hall, on Aug. 21 and 22, from 1 p.m. to 5 p.m.

Grade sheets remaining after 5 p.m. Aug. 22 will be mailed to the student's permanent home address as listed on his permanent record card.

Those wishing to have their grades mailed to an address other than the one given on the record card are asked to bring a stamped self-addressed envelope to the Registrar's office before Aug. 20.

Happy Vacation

The DI, too, will be taking a short vacation this month. The paper will suspend publication today and will resume Aug. 25.

A President Speaks

President Richard Nixon took a case for reform of the welfare system to the American public Friday night. Nixon said he would send to Congress next week messages discussing the change.

— AP Wirephoto

Nixon: Give the Poor Fixed Annual Income

WASHINGTON (AP) — President Nixon proposed Friday night to scrap the present welfare system and to replace it with fixed federal incomes.

The fixed federal incomes for the poor are the key part of the program, which would cost \$4 billion more a year than the present system.

The President also called for a \$1-billion start on sharing federal tax revenues with states, for a shift of manpower programs from Washington to state and local control and for reorganization of the antipoverty agency to almost total emphasis on experimentation.

"I propose that the federal government build a foundation under the income of every American family with dependent children that cannot care for itself — wherever in America that family may live," Nixon said in a broadcast to the nation about his comprehensive domestic policy outline.

He traced what is expected to be his domestic program's emphasis for the coming three years. Requests for specific legislation are to start next week in three messages to Congress.

The President wants the present dependent children's aid program absorbed into a new system that would subsidize poor families regardless of whether the household head has a job.

A family of four anywhere in the nation would receive a minimum federal payment of \$1,600 a year. Under present regulations, a family with the household

head working fulltime is ineligible for welfare.

His proposals would more than double present welfare recipients of 22.4 million and add \$4 billion to present federal outlays of \$4.7 billion a year.

Nixon said his family program is not a guaranteed income in the widely understood sense because it would require able-bodied adult recipients, except mothers with children under age six, "to accept work or training provided suitable jobs are available either locally or at some distance if transportation is provided."

Work incentives would include free day-care centers for children, a \$30-a-month bonus for those participating in job-training programs and the retention of the first \$60 a month of earnings without welfare benefit reductions. Beyond the first \$60, benefits would be reduced to 50 cents for each \$1 earned.

The President said the total welfare savings to the states under his program would be \$735.8 million a year, with all states benefiting.

He said his program "aims at ending the unfairness in a system that has become unfair to the welfare recipient, unfair to the taxpayer."

The President described the present system as a colossal failure that "breaks up homes... often penalizes work... and robs recipients of dignity."

Benefit levels are now grossly unequal, ranging from \$263 in one state for a

family of four to \$39 in another state, the President said. Officials later said these two extremes are in New Jersey and Mississippi respectively.

"So great an inequality is wrong," he said. "No child is 'worth' more in one state than another."

The present system also drives fathers to desert their families so their children can receive aid, the President said.

The President described his new plan this way:

"For a family of four now on welfare, with no outside income, the basic federal payment would be \$1,600 a year. States could add to that amount and most would do so.

"In no case would anyone's present level of benefits be lowered. At the same time, the foundation would be one on which the family itself would build."

A family of four, for example, could remain eligible for aid until its over-all income reached \$3,920 a year under the plan.

"By the same token, a family head already employed at low wages could get a family assistance supplement," the President said. "A family of five in which a father earns \$2,000 a year — which is the hard fact of life for many families — would get family assistance payments of \$1,260 for a total income of \$3,260."

He added that a family of seven earning \$3,000 a year would have its income raised to \$4,360 under his program.

Nixon made a sharp distinction between a guaranteed income, which he opposes, and his family assistance plan.

The President called for a small-scale start in 1971 on sharing revenues with hard-pressed states and cities. He wants Congress to provide \$500 million in his fiscal 1971 budget for revenue sharing, with the payments to probably start in December, 1971.

This is to build to a rate of \$5 billion annually over a five-year period.

He said there would be a "minimum of federal restrictions on how these dollars would be used," but there would be a provision that a percentage be channeled to local governments.

The President said he wants the \$1-billion-a-year federal job training programs transferred to state and local governments.

"What I propose is not a sudden dumping of these programs on unprepared local authorities but a careful, phased transfer, with benchmarks of readiness and incentives for performance," he said.

In addition to a \$30-a-month incentive for welfare recipients' job training, he proposed a computerized job bank to match jobseekers with job vacancies, 150,000 new training spots for welfare families and new day-care centers that would provide jobs for some aid recipients.

Grad Students Present Parking Plan

A group of graduate students who sent University parking officials letters detailing University parking problems and specifying recommendations Aug. 2 have as yet received no response from the officials, according to one of the students, David Sherod, G, Birmingham.

The letters were mailed to the 14 University Parking and Security Committee members, John Dooley, director of parking lot operations, Pres.-select Willard L. Boyd, Faculty Senate, Student Senate, Graduate Senate and The Daily Iowan last week.

The letters, first action of the Ad Hoc Student-Faculty Committee on University Parking, expressed dissatisfaction with the present policy on overtime parking ticketing.

Members of the steering committee of the group are Roger Chalkley, assistant professor of biochemistry; Tony Sobin, G, Oxford, who is also chairman of the committee; Sherod and Frank Rodden, G, San Angelo, Tex.

The ad hoc committee was formed six weeks ago because of "our mutual complaints of campus parking," said Sherod.

"We were also dissatisfied with other group efforts," Sobin added.

Since committee formation, mem-

bers have had interviews with a cross-section of meter-users and with John Dooley of Parking Lot Operations, Sherod said. Committee members also consulted the University Motor Vehicle and Bicycle Regulations Manual and the University Financial Summary of Parking Operations for statements to aid in support of their grievances.

The committee found that revenue from parking and lab equipment breakage fines for the 1967-68 school year was \$77,195 — up nearly 2,100 per cent over the revenue of \$3,567 received from the 1964-65 school year.

The parking and breakage fines are reported together in the University financial summary, but the breakage fine revenue is "negligible," according to Sobin.

According to the letter, the committee feels that "with the present, highly efficient level of parking meter enforcement, no rational person would deliberately leave his meter expired, nor would he allow it to expire."

The committee said that "virtually all overtime violations are unintentional and that the \$1 fine for a short period of overtime parking is out of proportion to the nature of the offense and to the intent of the offender."

The committee proposes:

- "A \$1 fee, paid to the University, of all students with parking privileges in University metered areas to be used for payment of the first 20 overtime (parking) violations.
- "Establishment of a few free parking spaces in each University metered area for five minute maximum occupation for the purposes of dropping off

papers, library books, etc.

"The option that any student be allowed a written appeal to the traffic court in a manner similar to faculty and staff members."

"No tickets be given in any parking area where more than 50 per cent of the parking spaces are vacant, since the stated purpose of meters is parking control and not the collection of revenue."

The committee also said that "the implementation of these programs would, first, improve parking control at the University; second, probably reduce the cost of that control, and, third,

would provide a more equitable system and thus would considerably reduce the level of negative feelings toward the parking authorities which exists now among large numbers of meter-users."

Sobin said, "We have every confidence that these proposals will be viewed fairly."

Sherod said Friday evening that the only response to their letters came from Student Body Pres. Jim Sutton. Sherod said that Sutton's letter "agreed with the committee's views" and that Sutton would refer the information to the Graduate Student Senate Parking Committee.

Soviet Diplomat Ousted on Charges Of Spying; Soviets Oust 1 in Return

WASHINGTON (AP) — The State Department announced Friday the expulsion on spy charges of a Soviet diplomat long stationed at the United Nations. Moscow retaliated by ousting an American embassy officer.

Secrecy surrounded the case against the expelled Russian, 44-year-old Igor L. Andreyev. State Department officials indicated that on security grounds they would give out no more than the first announcement.

The American ordered out by Moscow

is Milton Kovner, 39, listed as an economic counselor with the U.S. embassy there.

Kovner, who arrived on his Moscow assignment a couple of months ago, was previously in the State Department intelligence section. But the department said the Soviets made clear they were ordering him out only in retaliation, not for any improper activities. He is to leave Moscow Tuesday.

As for Andreyev, a counsellor officer at the Soviet U.N. mission who has been

in the United States since 1958, except in 1963-65, a State Department spokesman said he "was engaged in intelligence acquisition activities in New York."

Andreyev left the United States on July 22 after U.S. representatives brought the complaint against him to the office of U.N. Secretary-General U Thant and to the Soviet mission at the U.N. July 14, a State Department spokesman said. The Soviets denied the charges against him.

—Lunar Ice Cream, Too—

Apollo Toy Sales Booming

By LOWELL MAY

Wall plaques picturing the lunar astronauts, a toy man named Callisto — a green "mysterious alien with advanced mental powers" — and "lunar cheesecake" ice cream — it's all part of the new space market generated by the recent Apollo moon landing.

In toyland the impact of the moon landing has been felt most in recent days.

Ronald Borg, assistant manager of Woolworth's in Iowa City, said recently that sales of an Apollo Lunar Module model kit had rocketed nearly 100 per cent since the moon landing. He said that sales of the models had increased to about six a day during the first week of August.

Borg said the earlier Mercury and Gemini program kits "didn't sell at all." The Apollo sales have been on the increase ever since the moon mission

last December, he said.

Borg said the increase in the sales of the Revell Company's small Lunar Module kit could also be attributed to the relatively low price of the new kit.

Bruce Isebrand, manager of Scott's Five and Ten in the Wardway Plaza, said the demand for space oriented toys had increased in his store.

Scott's carries an entire line of space toys from Mattel's Man in Space series running in price from about \$2 to about \$30 and including the alien Callisto.

Other toys in the line include such specialties as a "space bubble," a "talking command console," a "power space suit pak" and a lunar base command station.

Isebrand said that even related articles like toy telescopes had increased in sales recently.

Scott's also displayed a wall plaque featuring a painted image of the three lunar astro-

nauts against a background of their spacecraft circling the shining face of the moon.

Isebrand said Thursday that he had had the plaque for only about three days but that it was selling well and he planned to order more.

The plaque is priced at 57 cents and is distributed by Soroka Sales, Inc.

Another in this series of examples of the new moon-inspired market can be seen next door to Scott's — the Baskin-Robbins ice cream shop, the home of the new lunar cheesecake ice cream.

In general the lunar market, like market fads of the past, is a commercial response to public interest in a special area.

The new lunar market may be selling new pleasures to the public but, with references to green and men and green cheese, it remains doubtful that it will help disperse some old myths.

Diploma Day

Two of the estimated total of nine hundred students who are eligible to graduate this August pick up their degrees Friday in Room 121A Schaeffer Hall. The students are Catherine Borchardt, A4, Bryan, Ohio, and Ron Jackson, A4, Cedar Rapids. In an effort to economize, University officials eliminated the August Commencement and the February Commencement next year. Grads from both semesters are invited to attend June Commencement next year.

From the people

To the Editor:
 in re: State of Iowa vs. Albert G. Marian, et al.

It has come to my attention that The Daily Iowan has reported that I have ordered that the cash bails deposited with the Clerk of the District Court of Iowa in and for Johnson County in the above case be refunded to the persons and organizations who deposited money with the Clerk or who contributed money to the "Student Bail Fund."

No such order has been made. The purpose of the October 15 hearing is to determine the legal question of whether the Clerk, under Iowa law, must disburse the cash bails to the defendants irrespective of the fact that some of the funds were deposited with the Clerk by persons and organizations other than defendants, or whether the Clerk, under Iowa law, must disburse the cash bails to the persons and organizations who deposited the funds with the Clerk.

In the event, and only in the event, that it is determined that the Clerk is legally required to disburse the funds to the persons and organizations who deposited the funds with the Clerk, will determination be made as to who they are and the amounts they are entitled to receive.

In this event, the funds would be disbursed only to those who directly deposited funds with the Clerk. For instance, no disbursement would be made to individuals who contributed to a fund, which fund was then deposited with the Clerk; the disbursement would be made to the fund's authorized representative.

Only those who directly deposited funds with the Clerk should file written claims with the Clerk for refund.

Hygienic Lab Director Says His Facilities Not Hygienic

By TOM McEENEY
 Iowa's first line of defense against public health hazards, the State Hygienic Laboratory, spends much of its time defending itself against its own health hazards — of inadequate working conditions, according to Dr. W. J. Hausler, laboratory director.

The Laboratory is located in the University Medical Laboratories Building. Originally titled the State Bacteriological and Epidemiological Laboratory, it functions as a service agency to the state. The laboratory was established by the Iowa General Assembly in 1904 as a permanent part of the University College of Medicine. It has been generally known as the State

Hygienic Laboratory since the 1930s.

The laboratory conducts most of its research and specimen analysis in four two-story frame houses. The houses are located at the dead end of Melrose Avenue, four blocks southeast of the Medical Laboratories Building.

The four houses were constructed at the turn of the century and needed six months to a year of remodeling before the Hygienic Laboratory could begin to use them, according to principal virologist and Assistant Laboratory Director Yau Wai Wong.

The houses were acquired one at a time over a five-year period dating from the summer of 1963 to the spring of 1968.

Of the houses, Hausler said, "We have very excellent equipment and top diagnostic laboratory people working in four fire traps."

"In a recent mishap at one of the houses, human tuberculosis specimens overheated in a clothes closet-turned-incubator and were completely destroyed by the sudden rise in temperature. Many doctors and possible tuberculosis patients depended on the proper diagnosing of those specimens," he said.

Hausler said that there is always the possibility of accidents in any type of laboratory environment but that the conditions in these 70-year-old houses greatly increase the probability.

There have been mishaps involving the people who work in the houses, according to Wong. "These mishaps usually involve infection by germs and viruses due to the crowded condition of the laboratory rooms," Wong said.

In addition to the examination and protection of human specimens, the Laboratory

does extensive work with animals. The work is mainly concerned with the possibility of animals' being carriers of infectious diseases, and with the observation of animals that have been injected with viruses and germs.

In reference to the animals, Wong said, "The limited space available for animals restricts the amount of testing that can be done. The amount of work could be notably increased with better working conditions."

"Because of the lack of space we are not able to work with highly infectious agents, such as the psittacosis agent, which is commonly known to cause parrot fever, or rickettsia, which causes Q fever — a cattle infection that can cause pneumonia in humans," he said.

Hausler, too, said, "These agents could be studied if the proper space were available."

Another major problem of great concern to both Hausler and Wong is the condition of the houses' construction.

Wong pointed out several places where the construction of the houses was substandard. In one building, there is a very steep staircase that has to be used to carry many glass instruments up and down the stairs during a normal working day.

Another building has a staircase leading to the basement that has become curved over the years. The reason for the curve is that the basement wall is built against its buckling under the constant pressure of the earth outside it.

Three inadequacies are common to all of the four houses Wong said. First, large incubators housing human cultures are all converted clothes closets that are far from being adequately equipped, according to Wong. Second, all of the basements contain highly specialized and expensive equipment that is surrounded by steadily disintegrating sandstone brick walls, he said.

"The third common problem," says Wong, "is the general environmental contamination possibility that is always present in the houses."

Of this problem, Hausler said, "The contamination cannot be stopped because dust and dirt continually come from the walls of the houses."

A new GOP?

Barry Goldwater's effort to realign the Republican Party into a southern, western coalition may finally succeed. A book, based on extensive research, has predicted that it is likely there will be "a dominant Republican party based in the heartland, South and California against a minority Democratic party based in the Northeast and in the Pacific northwest."

The book was written by Kevin Phillips, special assistant to Atty. Gen. John N. Mitchell. Phillips was the voting patterns and trends analyst for Nixon during the campaign.

The book should shake liberal Republicans to the bottom of their shoes. While its predictions are questioned, its research is still considered impeccable. Clayton Fritchey, who was Adlai Stevenson's press officer during the 1956 campaign, said while he could question the book's conclusions, he was still "impressed by the systematic research and study that went into it."

The important conclusion of the book is that Democratic power will be centered in the Northeast and with the blacks, while losing the rest of the country. The book predicted that the Republicans would be able to lose Massachusetts, New York and Michigan without election problems — and would probably only win them in landslide years.

Phillips said that the Republicans will not need to mobilize "liberal support in the big cities, appealing to 'liberal' youth, empathizing with 'liberal' urbanization, gaining substantial black support and courting the affluent young professional classes of suburbia."

The book's analysis means that America's political parties will split down a liberal, conservative line. This is exactly what Barry Goldwater wanted in 1964.

The book classified 1968 as a year of a major political upheaval, but perhaps it is merely an aberration, not the beginning of a trend. But Phillips contends a trend has already started and the Republicans are in the position to be the trend's beneficiary.

The influence of this thinking has clearly impressed Nixon. Nixon worked hard at courting the southerners and westerners during the 1968 election. After the election was over, his course of action was not as conservative as he had stated in the campaign; but Nixon still had to court this conservative "majority," at least in his own mind, to win.

But the "upheaval" may not be of lasting importance, rather, just a passing phenomenon. For the trend to last, it must conquer many people's strong party identification; but it could be done.

One wonders though, that if this realignment does occur, what Abraham Lincoln and Theodore Roosevelt would have had to say?

Before the likes of William Howard Taft and Harding, the GOP was an

active party doing things, not relegating itself to be the defender of the status quo.

But it may become the faithful standard bearer of the status quo if the realignment occurs. The party could be conservative but still not be a party of inaction. It could be conservative without being racist. It could be conservative and still not ignore the problems of the cities. But it may be conservative and all these things.

We feel that while the Republicans may realign and become the conservative party, they would still need to be active in offering their own solutions for these problems. If they don't, their status as majority party would be short lived.

At the least, the Edward Brookes and Nelson Rockefeller and Charles Percy may be left without a home. Ripon Society might even find itself courting oblivion.

— Larry Chandler

College Press Service

WASHINGTON (CPS) — The nation's graduate schools have felt the impact of the elimination of graduate school deferments; however, estimates last summer that male enrollments would drop by as much as 70 per cent were unfounded.

According to a study made by the Scientific Manpower Commission, the draft policy announced in February, 1968 took its greatest toll among first-year graduate students. Second-year students were also significantly affected. The manpower commission, a private corporation, questioned 568 university departments of chemistry, physics, and psychology, and received responses from 356 of these representing some 10,185 graduate students.

The study shows that 15.9 per cent of the graduate males in chemistry in the fall of 1968 were either in the services as of last month or had already received induction notices. The figure for physics graduate students was 12.5 per cent and for psychology 13.3 per cent.

Indications are that the impact of the changes in the draft will be felt more strongly this fall. According to the study, "One normally co-educational chemistry department (which cannot be identified) reported that its entire incoming class for 1969 will be female."

In March 1968, the commission, with the Council of Graduate Schools of the United States, made a report that predicted a 70 per cent drop in male graduate school enrollments. While the figure proved overestimated, Mrs. Betty Vetter, executive director of the commission, said recently that "as far as I can see, the ultimate prediction is right. Only the time schedule was off."

She accounted for the less-than-expected drop in enrollments by pointing to the "unbelievable slowness of local boards in reclassifications, the relatively low draft calls last summer, the large number of reclassification appeals by draft registrants, and the fact that, for financial reasons, no military physical examinations were conducted during all of August 1968."

The Student Non-Violent Coordinating Committee has announced that the "non-violent" has been dropped from its name and that H. Rap Brown has been reappointed chairman of the organization.

"If the situation demands that you retaliate violently you would no longer be hindered or hampered by 'non-violent' in the organization's name," Brown told newsmen.

Renamed the Student National Coordinating Committee, the organization will have no relation "to the concept of non-violence as a solution to the problems of oppressed people," according to Muhammed Hunt of the Brooklyn, New York chapter.

With the announcement of the change in name, Brown outlined plans for "a new dimension" for the organization, including a People's Medical Center for free medical care and a People's Sewing Center "to build the concept of black people controlling their own productive forces."

HOUSTON — (CPS) — A 48-university consortium has been formed to create cooperation among universities for the advancement of space research. Called the Universities Space Research Association (USRA), the consortium intends to plan and operate research facilities and education projects associated with space science and technology.

The consortium has submitted a proposal to the National Aeronautics and Space Administration to take over the management of the Lunar Science Institute in Houston, now under the direction of the National Academy of Sciences.

The consortium formally was born on the day of the successful launch of Apollo 11. USRA functions under the authority of a Council of Institutions composed of an official representative from each member university.

Much of the State Hygienic Laboratory's work is carried on in four houses, parts of which are pictured. Laboratory officials complain that these four houses, located at the dead end of Melrose Avenue just above Highway 218 south, are overcrowded and unsafe. Crumbling floors and walls in the basement of the building at top make proper temperature regulation and cleanliness difficult for the staff. Center, a lab room in another building is cluttered with equipment, most of which should be stored more carefully, officials say. And, bottom, modern expensive analysis equipment does its work amidst a turn-of-the-century environment.

Studies Begin On Computers For City Hall

A computerized data processing system is going to play a role in Iowa City government according to City Manager Frank R. Smiley.

Smiley, Glen V. Eckard, city clerk and finance director, and Joseph B. Pugh Jr., the city's new assistant finance director spent most of Wednesday in Ames examining operations of the city's municipal computers.

A. E. Loven, Ames finance director, told the Iowa City representatives his system is handling 15 different administrative tasks. Loven said the computer cost was partially defrayed by charging for handling paper work for the Ames municipal hospital and for the city-owned electric company.

Smiley said a computer specialist from Iowa State University, C. C. Mosier, is to survey Iowa City administration data processing needs next month. Smiley said that Mosier would then recommend a computer program that would get underway sometime next year and that the city would then begin to make plans.

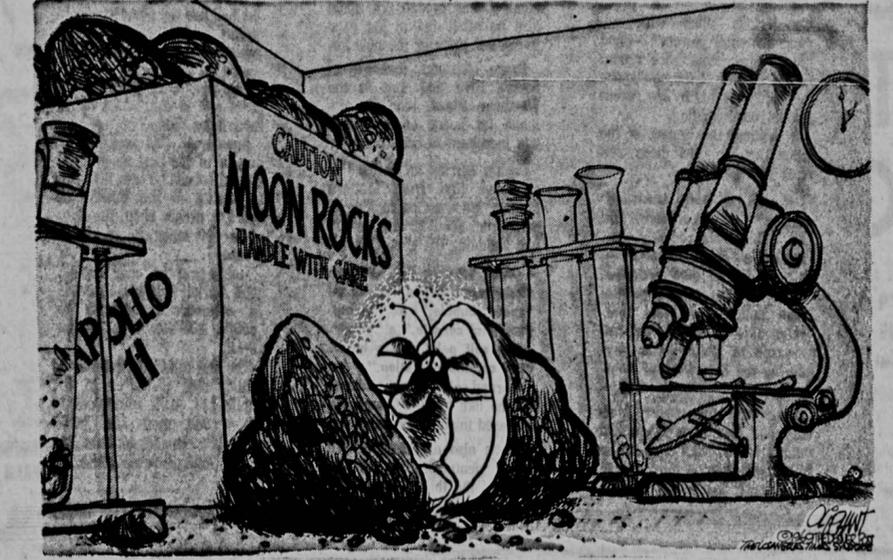

The City Council has provided \$20,000 in the 1970 budget to help launch the new record-keeping system.

3 Endorsed

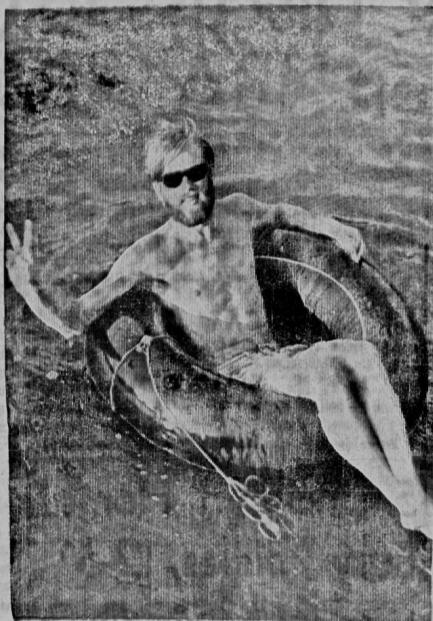

Three candidates for election Sept. 8 to the Iowa City Board of Education were endorsed Friday by the Political Action Committee of the Iowa Educators Association.

Endorsed by the Political Action Committee were Robert E. Engel, 913 S. Summit St.; Mrs. Bruce E. Spivey, 1713 E. Court St.; and James P. Stier, 2401 Mayfield Rd.

Also Friday, Phillip E. Cline, 39, Route 3, announced he would be a candidate in the school board election.

Local Interest Rates Don't Slow Building

Soaring interest rates have not prevented the planned construction of single and multiple family dwellings in Iowa City for increasing for the first six months of 1967.

There have been 16 per cent more building permits issued this year than for the same period last year, according to figures furnished by Bruce Hamilton, Iowa City Building Inspector.

The estimated median value of houses for which builders received permits during the first half of 1967 was also higher than it was a year ago. This year, the average estimated value of a new house here was \$25,489 compared with \$23,248 in 1966.

The U.S. Department of Commerce reported that the medium sales price of new houses sold in the United States between

Teamsters Strike Slows Pan American

WASHINGTON — Thousands of foreign-bound travelers shifted to other airlines or delayed departures Friday as weary negotiators tried to end a strike by the Teamsters Union against Pan American

World Airways. A tentative agreement hung in the balance as bargainers recessed for six hours to rest and to consider the latest proposals. Pan American, the nation's

largest overseas air carrier, canceled all out-bound flights until 5 p.m. CDT, when some 10,000 ground employees walked off the job early Friday at airports from New York to San Francisco. Inbound flights reportedly operated at normal schedules.

Assistant Secretary of Labor William J. Usery Jr. declined to speculate on the prospects for a final agreement when negotiations resume. He said he

believed the negotiators still had tentative agreement on the major issues, such as wages and other money matters, when bargaining ceased.

Meanwhile, the union said military cargo flights for Vietnam would be exempted from strike action. Also, some 600 workers at Cape Kennedy agreed to remain on the job at the request of the secretary of the Air Force, the union said.

Workers Union, including stewar-
dresses, pledged not to cross the lines.

Russia Sends Moon Probe

MOSCOW — The Soviet Union sent another unmanned spacecraft on a moon mission Friday, but there was no hint it would make a landing.

Tass, the official news agency, said the spacecraft — Zond 7 — was launched to study the moon and the space near it, to take lunar photographs and to test "improved on-board systems and the design of the rocket-space complex."

The last Soviet moon shot was Luna 15, another unmanned probe which crashed on the moon July 21, just before the U.S. Apollo astronauts took off from their lunar landing site on the Sea of Tranquility. There had been speculation that Luna 15's mission was to scoop up moon rock and make an automatic return to earth.

The announcement that Zond 7 would test the "rocket-space complex," a new phrase in Soviet space terminology, set off speculation something new was being attempted.

Zond 5 and Zond 6 last year made round-trips to the moon. If usual Soviet practice is fol-

lowed, no indication of the Zond 7 mission will be given until after it nears the moon. That will happen Monday night if the flight takes the usual 3½ days.

Grid Exhibition Pits Colts vs. Raiders

The spotlight will be on the glamor quarterbacks, headed by Joe Namath and Johnny

Unitas, in a 10-game pro football exhibition program tonight and Sunday.

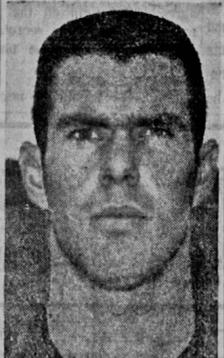

their pinup target for the day. Veteran Babe Parilli will share the quarterback duties with Broadway Joe. Earl Morrall, the backup quarterback who subbed for armstrong Johnny Unitas last season and became the NFL's

Eight of the warmup contests will be played tonight. The two big ones match Baltimore's National Football League champions, 1-0, against Oakland's Western American Football League kingpins, 0-1, at Oakland, and the Super Bowl champion New York Jets, 1-0, of the AFL against the NFL Cards, 0-0, at St. Louis.

Other games on tonight's card include: Detroit, NFL, 0-0, at Kansas City, AFL, 1-0; Chicago, NFL, 0-1, at Miami, AFL, 0-1; New York, NFL, 0-0, at Green Bay, NFL, 0-0; Denver, AFL, 0-0, at Minnesota, NFL, 1-0; Atlanta, NFL, 0-0, vs. Philadelphia, NFL, 0-0, at Portland, Ore.; and New Orleans, NFL, 0-0, at San Diego, AFL, 0-1.

On Sunday, Cleveland, NFL, 0-0, takes on San Francisco, NFL, 0-0, at Seattle in a national television game on CBS, beginning at 6 p.m., EDT, and Boston, AFL, 0-0, opposes Cincinnati, AFL, at Bowling Green, Ohio.

Namath, who played three and one half periods in the Jets' 26-24 victory over the College All-Stars last week, is expected to play only the first half against the Cards. There will be plenty of excitement in that time because the Cards' front four linemen have tabbed him

DARYLE LAMONICA
AFL's 1967 Player of the Year. Player of the Year, and Johnny U. will split the passing duties for the Colts against Oakland.

No Track Boycott, But Hot Discontent

LONDON (AP) — The U.S. track and field team lifted Friday night its threat of a boycott of the Britain-United States meet next week, but team members served notice of their determination to revolutionize the Amateur Athletic Union.

"The Union is rotten right through," said one of the athletes' spokesmen at a meeting in their hotel. "And unless we change things, the Europeans will swamp us at the 1972 Olympics."

The noisy meeting was attended by most of the 125 athletes who are here to compete with Britain next Tuesday and Wednesday as part of a European tour.

Speaker after speaker charged that the junior system was making them second class citizens and liable to make them second class athletes, too.

The athletes are going to call a meeting next month in California of all interested parties, including former American Olympic champions and former officials to set out a plan of action.

The athletes' committee, which includes California hammer thrower George Frenn and 5,000-meter runner Gerry Lindgren, were drafting a letter to President Nixon.

The present trouble blew up at Augsburg, Germany, where the athletes complained about

Merger Discussed Between NBA, ABA

NEW YORK (AP) — Walter Kennedy, commissioner of the National Basketball Association (NBA), said Friday that owners of the NBA and the American Basketball Association (ABA) have held discussions that "ultimately might lead to a merger."

The NBA head said that three owners of NBA and ABA teams met both Thursday and Friday with attorneys representing both circuits.

As a result of these meetings, Kennedy said, he and James Gardner, president of the ABA and owner of the loop's Carolina Cougars, issued a joint statement.

The statement said, "Walter Kennedy, commissioner of the National Basketball Association, and James Gardner, president of the American Basketball Association, announced today that they and their attorneys have begun exploring the possibility of cooperative arrangements between the two basketball leagues."

"The form of such arrangements have not been agreed upon but it is hoped that they will be shaped to conform to the needs of the various cities

in the leagues as well as to any applicable law."

Kennedy said the three owners who represented the NBA during the meetings were Ned Irish of the New York Knicks, Sam Schulman of Seattle and Richard Block of Phoenix. Kennedy said that Gardner, Ray Boe of the New York Nets and Joseph Gear of Dallas represented the ABA owners.

"As far as I'm concerned, there'll be nothing further done at this time," Kennedy said. "We're looking into it. We

talked about several possibilities that ultimately might lead to a merger."

The NBA has teams in Atlanta, Baltimore, Boston, Chicago, Cincinnati, Detroit, Los Angeles, Milwaukee, New York, Philadelphia, Phoenix, San Diego, San Francisco and Seattle.

The ABA is represented in Indiana, Kentucky, New York, New Orleans, Dallas, Los Angeles, Denver, Carolina, Pittsburgh, Miami, Fla. and Oakland. Minnesota moved to Pittsburgh and Houston to Carolina since the close of last season.

5 Cincinnati Homers Bury Phillies, 12-5

CINCINNATI (AP) — The Cincinnati Reds cracked five home runs and exploded for a pair of five-run innings to shatter Philadelphia, 12-5, Friday night.

Lee May and Johnny Bench cracked consecutive homers in the sixth inning as the Reds shot in front. May's 31st homer of the year put the Reds on

top, 6-5, and Bench followed with his 15th. Pete Rose homered in the seventh as the Reds scored five more runs. Chico Ruiz contributed a two-run double in that inning.

The Cincinnati victory increased its western division lead over Atlanta to 1/2 game.

Unknowns Moehling, Marti Tie for Milwaukee Golf Lead

MILWAUKEE (AP) — Ed Moehling, taking a second stab at making a life on the pro tour, shot a second-round 69 Friday and tied Fred Marti for the half-way lead in the \$100,000 Greater Milwaukee Open Golf Tournament.

Each had a 36-hole score of 141, three under par for two trips over the wind-blown 7,075-yard, par 72 North Shore Country Club course.

Marti, a 28-year-old Texan in his sixth year on the tour and still seeking his first victory, had a second-round 70.

One shot back of the pace-setters was rookie pro John Miller, who had a 74 for 142 and was tied with Steve Oppermann, 73; England's Peter Townsend, the first round leader who went to a 75, and South African Allen Henning, 73.

Most of the top names in the game bypassed this event to practice for the PGA Championship next week.

Moehling has won only \$166.67 this year. Miller has been a pro less than six months. Gary Player was the only major name among the leaders. The little South African shot a 70 for 143 and was tied with five others.

Up Against a Tree—

Steve Oppermann of San Francisco is backed up against a tree in the middle of the 12th fairway Friday during the second round of the Greater Milwaukee Open Golf Tournament. Oppermann shot a round of 73 Friday to pull into a four-way tie for third place at the half-way point of the tournament.

The Daily Iowan

SPORTS BRIEFS

SPRINGFIELD, Ill. (AP) — Gov. Richard B. Ogilvie Friday appointed Ernie Banks, Chicago Cubs' first baseman, to the Chicago Transit Authority Board effective Sept. 1. The job pays \$15,000 a year.

The 38-year-old baseball star was named to a seven-year term expiring in 1976, filling the post vacated by James E. Rutherford.

AMHERST, Mass. (AP) — Ron Sellers, the nation's No. 1 pass receiver at Florida State last year and the Boston Patriots' first draft choice, came to terms with the American Football League team Friday in a telephone call with Coach Clive Rush.

A team spokesman declined to give the money figure for the contract but said it involved a period of years.

WESTBURY, N.Y. (AP) — Nevele Pride goes tonight in the \$50,000 American Trotting Championship at Roosevelt Raceway and if he doesn't win it will be the biggest upset of the year in harness racing.

The 4-year-old colt will be after an invitation to the \$100,000 Roosevelt International Trot a week from Saturday. The bid automatically goes to the winner of the ATC, a 1 1/4-mile test. Nevele Pride is in top shape, according to trainer D. I. Stanley Dancer.

MACKINAC ISLAND, Mich. (AP) — The Big 10 approved Friday the use for National Football League games of the University of Minnesota's Memorial Stadium by the Minnesota Vikings Sunday, Oct. 5, and Northwestern University's Dyche Stadium by the Chicago Bears Sunday, Oct. 12.

The exception to the conference rule against use of campus facilities by pro sports teams was granted by the athletic directors' contingent upon baseball's Minnesota Twins being involved in an American League playoff and the Chicago Cubs reaching the World Series.

OAKVILLE, Ont. — Hit near the heart by a lacrosse ball, 11-year-old Lloyd James of Oakville collapsed Thursday night and died shortly afterward in a hospital. The boy was practicing for a game at the time.

NEW YORK (AP) — Lethander Al Downing, going the distance for the first time this season, fired a four-hitter as the New York Yankees defeated Oakland, 5-0, for a split of their Friday night doubleheader.

Larry Haney's tie-breaking double keyed a three-run 10th inning flurry that gave the Athletics a 5-3 victory in the twilight opener, ending New York's winning string at five games.

Lose 10 lbs. in 10 days on Grapefruit Diet

HOLLYWOOD, CALIF. (Special) — This is the revolutionary grapefruit diet that everyone is suddenly talking about. Thousands of copies have been passed from hand to hand in factories, plants and offices throughout the U.S.

Because this diet really works. We have testimonials reporting on its success. If you follow it exactly, you should lose 10 pounds in 10 days. No weight loss in the first four days but you will suddenly drop 5 pounds on the 5th day. Thereafter lose one pound a day until the 10th day. Then you will lose 1 1/2 pounds every two days until you get down to your proper weight. Best of all, there will be no hunger pangs. Revised and enlarged, this diet lets you stuff yourself with formerly "forbidden" foods, such as steaks trimmed with fat, roast or friend chicken, gravies, mayonnaise, lobster swimming in butter, bacon fats, sausages and scrambled eggs and still lose weight. The secret behind this "quick weight loss" diet is simple. Fat does not form fat. And the grapefruit juice in this diet acts as a catalyst (the "trigger"), to start the fat burning process. You stuff yourself on the permitted food listed in the diet plan, and still lose unsightly fat and excess body fluids. A copy of this startling successful diet can be obtained by sending \$2 to

Citrus Diet Plan
5211 W. Jefferson
L.A., Calif. 90016

Money-back guarantee. If after trying the diet you have not lost 7 pounds in the first seven days, another 6 pounds in the next 7 days, and 1 1/2 pounds every two days thereafter, simply return the diet plan and your \$2 will be refunded promptly and without argument. Tear out this message as a reminder. Decide now to regain the trim attractive figure of your youth.

FOLLOW THE EAGLE—"Buy Bonds where you work. We do." More than seven out of 10 of our fighting men in Vietnam buy U.S. Savings Bonds regularly under the Payroll Savings Plan. For Americans who wonder how they can help, buying Bonds and the new Freedom Shares could be an answer.
