Jim Sutton Is Elected Defense Spending As Declining

ECONOMIST Sees Defense Spending As Declining

WASHINGTON D.C. — The government's economic policy is not a study in economic suicide, the early warning signs showed.

In 1955, the government began cutting the budget of the Defense Department, and in 1960, it cut the budget of the Defense Department by 40 percent.

But in 1961, the government began increasing the budget of the Defense Department by 40 percent.

The government's economic policy is not a study in economic suicide, the early warning signs showed.

Why the Arab-Israel dilemma?

By DAVID R. KACZAN

Editor's Note - The writer, a native of New York City, is a communications expert.

The Arab-Israel dilemma is the result of the rivalry between the Arab world and the Jewish state.

First on our list: the fact that Zionism has been in existence for over 100 years. But it is only in the past 30 years that the conflict has escalated into a full-scale war.

There are several factors that contribute to this conflict.

1. The Jewish community of Israel is not large enough to make a significant contribution to the world economy.

2. The Arab community is not united enough to present a united front against the Jewish state.

3. The Jewish state is not secure enough to allow for any progress in the peace process.

4. The Arab community is not powerful enough to impose its will on the Jewish state.

In conclusion, the Arab-Israel dilemma is a complex issue that requires a comprehensive solution.

Oil industry fights demand

By Willton

In the past, oil industries have faced challenges with demand.

Today, the oil industry is facing a similar challenge.

In order to meet the growing demand for oil, the oil industry must find new sources of oil.

One approach is to develop new technologies to extract oil from unconventional sources.

Another approach is to develop new sources of energy.

In conclusion, the oil industry must find new ways to meet the growing demand for oil.

NFL's Colts Strong Again; Favored in Coastal Division

BALTIMORE — A year ago the Baltimore Colts were the almost impossible task of defending their NFL title. The American Football League was not yet united in a unified NFL, nor were the Colts, who went 11-2-1 and won the championship. But this year, with the almost impossible task of defending their AFC title, the Colts are once again the almost impossible task.

The Colts have the honor of committing their championship in their third straight season of the Super Bowl, which they have won the past two seasons. The Super Bowl is the ultimate test of human greatness, and the Colts have proven they are equal to the task.

The Colts' quarterback is the key to their success. John Unitas, who threw for 4,000 yards a year ago, is back and better than ever. He is a master of the passing game, and his ability to read the defense is unparalleled.

The Colts' defense is also strong, with the All-Pro four-man line of Bubba Smith, Bob Lilly, Bob Krzanich, and Jim Howard. They are complemented by the strong secondary of Donnie Shell, Larry Collins, and Donnie Young.

The Colts' offense is also strong, with the All-Pro running back Jim Brown, and the wide receivers Paul Warfield and Gary Anderson.

The Colts' head coach is Don Shula, who led the Colts to their first Super Bowl victory last season. Shula's leadership is key to the team's success.

The Colts are favored in their division, and they are expected to win the division again this year. The division includes the Baltimore Colts, the Boston Patriots, the Buffalo Bills, and the New York Giants.

The Colts' season opener is against the New York Giants on September 9th. The Giants are expected to be a tough opponent, but the Colts are favored in their division.

JOHNNY UNITAS 1969 Calendar

The 1969 calendar features images of Johnny Unitas, the Colts' quarterback. It includes photos of him from his career, including his Super Bowl wins.
