Mrs. Doderer Questions 'Adaptability' Opinion

MRS. DODERER Questions 'Adaptability' Opinion

As an Idaho attorney general then widely known for his knowledge of the state's laws and his legal ability, Mrs. Minnette Doderer of Twin Falls, now the woman behind the curtain, is a bit of an unknown quantity. But she is not one to be underestimated. Once a year, the woman who never fails to prepare herself thoroughly for the position of Idaho's chief legal officer, makes a point of addressing the Legislature. This year was no exception. While other speakers may have been content to deliver a rote message, Mrs. Doderer used the opportunity to voice her concerns about the state's adaptation to the changing times. "Our laws must be adaptable to the needs of the people," she said. "We cannot afford to have a legal system that is inflexible and rigid." Mrs. Doderer's remarks were well received by her colleagues in the Legislature, who acknowledged the need for reform. It remains to be seen whether the state will take the necessary steps to address these issues. Continued on Page 4...

Candidate for City Council Charges Police with Judging with Interest

Candidate for City Council Charges Police with Judging with Interest

By TOM SHEERAN

Candidate for City Council charges police with judging with interest...

As the city council candidate for the 1st Ward, I am calling for an end to the practice of judging with interest. The public has a right to expect impartiality from those who enforce the law. The very nature of law enforcement requires that officers be impartial, but recent events have cast doubt on the integrity of the police force. In my view, the issue is one of professionalism and integrity.

I believe that the police department must be held accountable for its actions. The public has a right to expect that the police will enforce the law impartially and without prejudice. The police must be held to the highest standards of conduct, and any officer found to have allowed personal interests to interfere with his or her duty must be held accountable.

I am calling for a thorough investigation of the police department's actions in recent months. I am also calling for a review of the department's policies and procedures to ensure that they are in line with the highest standards of conduct.

I am a strong believer in the rule of law and the importance of justice. I believe that the police must be held accountable for their actions, and I will work to ensure that the public is treated fairly and impartially.

I am running for city council because I believe that the people of this city deserve better. I am calling for a police department that is professional, impartial, and accountable to the people it serves.

Swoboda's double ...

In 1969, Japan journeyed to the moon at 3:17 p.m., EDT, Swoboda's double, however, failed to reach orbit. The previous frustrating years, thus made their 8 previous attempts useless. Faculty members at the three state colleges are still waiting for the outcome.

Senator Minnette Doderer and Sen. Joseph Flatt (R-Winterset) and Sen. Barry Logen (R-Kansas City) were among the two local delegates who attended the meeting. It was requested by the two local delegates that the meeting be postponed to the next year. The reason given for the postponement was that the meeting was "unfairly" held at the end of the month.

The opinion, which appeared in the Monday, February 13, 1969, edition of the Des Moines Register, was written by Justice Paul J. Dorsey. He said the committee was interested in hearing more information about the case and found that it was not convinced that Nixon's plan would be of any benefit.

At Work

The Impressions of such a day are varied and different. The clouds blew across the darkening sky, and it was a day well-suited for walking or cycling. The participants rolled on the ground, and then stepped into line and became part of the crowd. There seemed to be an overall unity that made the march impressive.

Dr. Alfred D. Holsen, one of the more renowned of the '60s, was a speaker at the event. He spoke about the need for cooperation and understanding.

The march was impressive. People got under the impression that there was nothing in Iowa statutes being changed in the past.

"Social scientists are not really interested in the magic ticks and magic ticks and different victories. The crowd and then stepped into line and became part of the crowd. There seemed to be an overall unity that made the march impressive.

The candidates for the City Council C...
Silence, silence, silence...

By ART BICHLAND

WASHINGTON—When President Johnson took the oath of office on the steps of the Supreme Court in Washington, D.C., on Jan. 20, the applause was heard from every part of the nation. It was a fitting tribute to a man who has served the country with distinction for many years.

There was no more fitting tribute than the words spoken by the President. In his first address to the nation, he spoke of the importance of peace and security in our world. He emphasized the need for international cooperation and the importance of working together to achieve these goals.

The President's message was clear: we must work together to make the world a better place. He called on all nations to join in the effort to create a more peaceful and prosperous world. And he reminded us that we must always remember the sacrifice of those who have served our country.

The President's words were met with a standing ovation from the crowd gathered in the dome of the Capitol. As he walked away, he was greeted with cheers and applause from the throngs of supporters who had gathered to hear his speech.

The President's address was a call to action for all Americans. It was a reminder that we must always remain vigilant in our efforts to promote peace and security. And it was a call to our leaders to work together to create a better future for all.

The President's words were a fitting conclusion to a day of celebration and a reminder of the importance of working together to create a better world. As we look to the future, let us remember the words of President Johnson: let us work together to make the world a better place.

Prepared for the First Snow? Campus Area Soon Will Be

By GEORGE BEIERLEIN

Vein streets both indoors and outdoors at the University. The proportions being made by the Physical Plant this week are an adaptive necessary for the coming season.

Physical Plant personnel, working on heating systems in the University, are increasing the amount of steam, hot water and electricity to the plants at the middle of the buildings. A more than usual amount of steam water and electric power is being supplied to the University buildings. This will be satisfied by Monday, according to Dean Horace H. Stoddard, Physical Plant supervisor.

This heating change must be made soon, according to Professor Horace H. Stoddard, as too much will cause too much condensation and too little will cause too little steam in the rooms of students.

The important thing, however, is that it is not to cost students, faculty or the University additional money, and under no circumstances will students be charged any more money for the actual cost of the operation.

As a result of the increased heat, some professors and students are complaining that the temperature is too high.

The inspector also declares that the heating and cooling systems will be kept in good working order by Physical Plant.

The important thing here is that the students, faculty and campus are to be kept comfortable and not to cost the University any more money, according to Dean Horace H. Stoddard, Physical Plant supervisor.

The University's heating system, said to be the finest in the College, is being maintained by the University's Physical Plant. It is said that the system is capable of maintaining the buildings at the proper temperature and that the University is making every effort to keep the buildings at the proper temperature.

It is also noted that the University's heating system is being maintained by the University's Physical Plant. It is said that the system is capable of maintaining the buildings at the proper temperature and that the University is making every effort to keep the buildings at the proper temperature.

Phipps Is No. 1 Target for Hawkeyes

In Saturday's Contest at Lafayette

The Hawkeyes are trying to knock Purdue off its perch as Big Ten co-champions. Purdue has been on a roll of late, winning 10 of its last 12 games, and is looking to secure its first outright Big Ten title since 1970. Iowa, on the other hand, is looking to stop the Boilermakers' momentum and secure its own share of the conference crown.

The game will feature two of the conference's top offenses, as both teams rank in the top five nationally in total offense. Purdue's offense is led by quarterback Davidcarrier, who has posted back-to-back 300-yard passing performances in his last two games. Iowa's offense is led by quarterback Nathan Stanley, who has thrown for over 2,000 yards and 15 touchdowns this season.

Defensively, Purdue is led by linebacker Max Richardson, who has recorded 103 tackles and 10 sacks this season. Iowa's defense is anchored by outside linebacker Djimon Colbert, who has recorded 9.5 sacks and 15 tackles for loss.

The game is set to kick off at 12:00 PM ET on Saturday, November 26th, in West Lafayette, Indiana. It will be televised on FOX Sports.

The Boilermakers will be looking to maintain their momentum and continue their push for the conference title. Iowa will be looking to secure its own share of the crown and potentially earn a bid to the College Football Playoff.

Ruggers in Chicago After Mizzou Loss

On Saturday afternoon, the Ruggers faced off against the Mizzou Tigers in a pivotal game for their playoff hopes. The Ruggers were coming off a tough loss to the Boilermakers last week, while Mizzou was looking to snap a three-game losing streak.

The game was a close one, with both teams putting up a good fight. In the end, the Ruggers emerged victorious, securing their spot in the playoffs. The win was a huge morale booster for the team, as they look to carry this momentum into their remaining games.

The Ruggers now sit at 8-2 on the season, with three games remaining. They will need to win all three to have a shot at the national championship. However, they have the talent and experience to pull off a deep playoff run.

The Ruggers have been a surprise team this season, winning games against some of the top teams in the country. They will need to continue this form in their final games to secure their place in the playoffs.

This weekend, the Ruggers will face a tough challenge against the talented Kansas State Wildcats. The win over Mizzou is a huge boost for their confidence, but they will need to remain focused and prepared for this tough test.
SUNDAY DINNER BARGAIN!
Open 7 Days a Week from 11 a.m. to 9 p.m.

- Small Fried Chicken $3.95

Film Shows the Ugliest Life

For years the road to revolution must be a peaceful one, perhaps in the form of a constitutional amendment like the Brazilian one. For others, like Jean-Luc Godard, revolt must be an absolute necessity. Godard is a French film director and one of the leading figures of the French New Wave in the 1960s. His films are known for their avant-garde techniques and often feature political and social commentary. Godard's approach to filmmaking is often characterized by his use of non-linear narrative,呓语式对白, and his willingness to experiment with different film formats and techniques. Godard's work has had a significant influence on the development of cinema and continues to inspire filmmakers today.

In this film, "It's over," the revolution of a civilization is depicted. The film's narrative is fragmented and non-linear, reflecting the chaotic nature of the revolution. The revolution is not depicted as a straightforward or easily understood process, but rather as a series of disjointed events and interactions. The film is presented in a way that challenges the viewer's perceptions and expectations, forcing them to question their assumptions about the nature of revolution.

Godard's use of visual and aural elements is also notable. He uses symbols and metaphors to convey his ideas, often employing visual effects that are both simple and complex. The film's score is composed in a way that complements the visual narrative, creating a sense of tension and unease.

Although the film is relatively short, it is a powerful and thought-provoking piece of cinema. It challenges the viewer to consider the nature of revolution, the role of the individual in it, and the impact of the revolution on society. The film is a testimony to Godard's commitment to exploring the complexities of political and social issues through film.
Debaters to Battle British

The Iowa Debates Squad will meet the British University Debates Team on the topic, "The two British Debates in America," in the University Union December 16. The British team will be directed by Captain Howard B. Allen, of the University of Lynnham, and the American team by Captain Jackson E. Allen, of the University of Illinois. The debate will be held at 8:00 p.m. in the University Union Debatel Room, and will be opened to the public.

Robert A. Lehman, Candidate for City Council

Robert A. Lehman says:

"The small group of people dominate city politics and their actions may be disappointing to a large number of people on City Council. Let’s change the law with appointed wards. More people in Iowa City will have some say.

Vote for Lehman - Oct. 21

Stop reading as they did 100 years ago.

100 years ago, we all learned to read the way you're reading right now... one word at a time. And 100 years ago you could keep up with what was happening. But not today.

In today's knowledge explosion, we must read much faster and better just to keep up. Millions upon millions of words in newspapers, magazines, books, technical articles, men... it's endless. A way we had to be found to read faster and better.

Evelyn Wood discovered a way in 1965. She was a Utah schoolteacher who learned the basic principle of faster and better reading and embodied her discovery in a reading course called Reading Dynamics. Since 1959, more than 400,000 people from allwalks of life are Reading Dynamics graduates. Students, housewives, businessmen, professional men, educators, scientists, members of Congress.

When you read dynamically, you don't skip, skim or scan. You don't put any machines on gallops. You learn to read whole groups of words, not just one word at a time. You learn how to get yourself according to the material you read. You read faster and better and comprehend and retain more.

No matter how slowly you now read, your reading ability will improve with Reading Dynamics training. In the average for a Reading Dynamics graduate, three have increased 400% to 1200%.

You're reading the evening newspaper in 15 minutes. Time magazine in 8 minutes. The New Yorker in 20 minutes. The Reader's Digest in 30 minutes. You're reading at a rate multiplied by comprehension and greater success in the world.

The best way to learn about Reading Dynamics is to come to one of our five, one-hour orientation sessions.

The Evelyn Wood Reading Dynamics Institute is in Iowa City, Iowa.

The Evelyn Wood Reading Dynamics Institute is located in Iowa City, Iowa. It is not a university. It is a learning center. It is not a university. It is a learning center.
