Former President Argues—
'South America Needs Aid'

WASHINGTON — An exasperated Berta St. John, Yablonski's wife, charged that the Cleveland, Ohio, architect was responsible for making the trip to Washington, D.C., a glamorous and exciting Sotheby's auction. Yablonski's wife also accused the architect of being too casual and too preoccupied with his personal affairs.

**Albrecht: Communication**

William P. Albrecht, First District Congressional candidate, said in an interview that he would have no trouble winning the support of the citizens of his district. He added that he had no doubt that he could win the election. Albrecht said he would work hard to ensure that his constituents voted for him.

Albrecht also said that he would be a strong advocate for the issues that are important to his constituents. He added that he would work to ensure that the government was responsive to the needs of the people.

Data famine

BY ARTHUR BUCHOLZ

WASHINGTON — One of the major causes of the world's water crisis, according to experts, is the lack of data on what water is available and where it is needed. As the world population grows and the demand for water increases, the need for accurate data on water resources becomes even more critical.

"We don't need," the professor told the assembled crowd, "we need a system that can provide us with the information we need to make informed decisions about water usage." He went on to explain that without good data, decisions about water allocation and conservation can be based on guesswork rather than fact.

Mr. Bucholz explained that in the past, many decisions about water usage were based on outdated and incomplete data. "We need a system that can provide us with the information we need to make informed decisions about water usage," he said. "We need real-time data, not just outdated information that can be misleading." He went on to describe a new system that would provide real-time data on water resources, allowing decision-makers to make informed decisions about water usage.

Mr. Bucholz's system would use sensors placed in water bodies and pipelines to collect data on water levels, flow rates, and other important parameters. This data would be transmitted to a central database, where it would be analyzed and made available to decision-makers.

Mr. Bucholz's system would be a game-changer, he said, allowing decision-makers to make informed decisions about water usage. "We need this system," he said. "We need data, not just guesswork."
Plans for Addition Success

Across the country, the number of students at universities is increasing, which has led to a rise in construction projects. One such project is the addition of new classrooms and laboratories to the University of Iowa. The addition will be built north of the present library and will include 2,800 square feet of space and 1,800 square feet for faculty offices.

The addition will be constructed over the next few years, and the university hopes to complete it by the fall of 1966. The construction is scheduled to begin next Wednesday, according to George Horner, the university's director of construction.

In his report to the Board of Regents, Horner said: "The addition will be the first major addition to the campus in many years, and it is hoped that it will provide the necessary facilities for the continuing growth of the university." Horner also stated that the addition will be constructed in two phases, with the first phase completed by the fall of 1965.

The addition will include 10 new classrooms, which will be used to accommodate the growing number of students. The classrooms will be located on the third and fourth floors of the new building, which will be constructed on the present site of the library.

The addition will also include 1,800 square feet of space for faculty offices, which will be located on the second floor of the new building. The offices will be designed to provide adequate space for the growing number of faculty members.

The cost of the addition is estimated to be $1.5 million, and the university hopes to complete it by the fall of 1966. The construction will be financed through a combination of state and federal funds, as well as through a campaign for private contributions.

The addition will be a significant step in the university's efforts to meet the needs of its growing student body. The university has experienced a significant increase in enrollment in recent years, and it is estimated that the number of students will continue to grow in the coming years.

The addition will be a significant asset to the university, providing much-needed facilities for the growing number of students. It is hoped that the addition will help to ensure the continued success of the university, and that it will provide a strong foundation for the university's future growth and development.
Iowa Gymnasts Face Salukis Here

The Iowa gymnasts face their first dual-meet action of the season when they take on Southern Illinois in the North Gym at 2:30 p.m. today.

Coach Mike Johnson has been relatively pleased with his team's performance so far this season. "We've had some close losses, but I'm pleased with the progress we've made," he said. "Our team has improved significantly from last year, and we're looking forward to the competition.

Southern Illinois has been one of the stronger teams we've faced so far this season. "They have a strong team, and we need to be at our best to compete," Johnson said. "Southern Illinois has a history of strong gymnastics teams, and we need to be ready to face a tough opponent.

The meet today will be an important step in our season. "It's the first time we've faced a team with the same level of experience," Johnson said. "I think it will be a good test for our team, and we need to make sure we're prepared.

Minnesota's Grant Predicts Defensive Battle in Playoff

New Orleans, LA — But because the Super Bowl is on Thursday, it's a shorter break for the Minnesota Vikings. And that's why the Vikings are favored by the Texas Longhorns in the Super Bowl.

"It's going to be a defensive battle," said Grant, who is a former NFL coach. "It will be a very tight game with both teams playing well defensively."

The Vikings have a strong defense led by safety Sean Saint, and the Longhorns have a dominant defense led by defensive end Deacon Jones.

"It will be a tough game," Grant said. "But I think Minnesota will edge it in the end.

Grant said that the game will be decided by the special teams, with Minnesota's Kai Forbath and the Longhorns' Punter Ryan Lefkoe.

"I think the Vikings will win the game," Grant said. "But it will be a very tight battle.

Iowa Tankers Meet Illinois, Michigan St.

After a long holiday break, the Tankers return to action against Illinois and Michigan State this weekend.

The Tankers are coming off a strong performance against Indiana last week, and they are looking to build on that momentum against the Fighting Illini and Wolverines.

"We're excited to get back on the field and face some top competition," said Tankers head coach John Smith. "Our guys are ready to get back to work and make a strong showing this weekend.

Super Bowl Thoughts—

Temperatures in New Orleans for the Super Bowl will be in the 60s, but temperatures in San Francisco will be closer to 50s.

Detroit Lions—The Lions' book was bare, and it was a great opportunity for the team to start fresh.

Minnesota Vikings—The Vikings' defense will be key to their success, and they have a strong unit led by safety Sean Saint.

New England Patriots—The Patriots' offense will be key to their success, and they have a strong unit led by quarterback Tom Brady.

Pittsburgh Steelers—The Steelers' defense will be key to their success, and they have a strong unit led by linebacker James Harrison.

Tennessee Titans—The Titans' offense will be key to their success, and they have a strong unit led by quarterback Marcus Mariota.

San Francisco 49ers—The 49ers' defense will be key to their success, and they have a strong unit led by linebacker NaVorro Bowman.

New Orleans Saints—The Saints' offense will be key to their success, and they have a strong unit led by quarterback Drew Brees.

San Diego Chargers—The Chargers' defense will be key to their success, and they have a strong unit led by linebacker Manti Te'o.

Philadelphia Eagles—The Eagles' offense will be key to their success, and they have a strong unit led by quarterback Nick Foles.
**Critic Elbert Names'Z' the Best Film of the Year**

**EDITOR'S NOTE**: This article is reprinted from the Jan. 4 issue of the Chicago Sun Times.

**By ROGER ELBERT**

This year's best film was surely in "Z," which opened on Christmas and proved likely to be a for-ever film. It is about the way people are, and about how they are not what they are supposed to be, or what society expects them to be.

Mr. Elbert's review:

"'Z,'" which means "twist" in Hebrew, was not just a good film, but a great one. It was a film that transcended its genre, that moved beyond the usual confines of the political thriller.

"Z" is the story of a terrorist group that plans to overthrow a government by assassinating the president. The film is told from the perspective of the protagonist, a reporter named Jack, who is investigating the group. As he delves deeper into their plans, he realizes that the government is just as corrupt as the terrorists.

The film's strengths lie in its storytelling, its cinematography, and its performances. "Z" is a film that is both entertaining and thought-provoking. It is a film that makes you think about the nature of power and the role of the media in society.

"Z" is a film that is not just entertaining, but also a film that is worth watching again and again. It is a film that will be remembered for years to come. And it is a film that will make you think.
End to ROTC Here Asked

By STEVE KOCH

The Reserve Officer Training Corps (ROTC) program will be dropped if the Student Senate passes a resolution regarding the institution's ROTC program. The resolution passed in the Student Senate on Jan. 15. ROTC, or "military training," is to offer the programs and credit for flight training.

The resolution states the Senate's opinion on ROTC implementation as 'the cornerstone of the student body as a whole. Dantes said they're nervous but they had to hear any arguments that the program or academic basis. They said that in order to receive any recognition, the Senate must pass the resolution.

The resolution asked the University to cooperate with the Department of Defense, policy, and Senate officers. Dantes said that while the resolution passed in the Student Senate, it was not the final decision. The Senate is expected to vote on the resolution in the near future.

The resolution stated that the University should not cooperate with the Department of Defense, policy, and Senate officers. Dantes said that while the resolution passed in the Student Senate, it was not the final decision. The Senate is expected to vote on the resolution in the near future.

'Inflation Umpire' Proposed

WASHINGTON — Creation of a new negotiation board to serve as an advisory umpire on wage and price increases was urged Thursday by a former chairman of the Council of Economic Advisers.

"Spurned responsibilities of an impartial umpire must fall back to the courts," said Dr. Arthur M. Okun, former commercial for former President Lyndon B. John-son and a former chairman of the Council of Economic Advisers.
